1. Before consignments are released for free circulation within [^{F19}Great Britain], the competent authority must sample processed animal protein from imported consignments at the [^{F20}border control post] to ensure compliance with the general requirements of Chapter I of Annex X.

The competent authority must:

- (a) sample each consignment of products carried in bulk;
- (b) carry out random sampling of consignments of products packaged in the manufacturing plant of origin.

2. By way of derogation from point 1, when six consecutive tests on bulk consignments originating in a given third country prove negative, the competent authority of the [^{F20}border control post] may carry out random sampling of subsequent bulk consignments from that third country.

If one of those random samples proves positive, the competent authority carrying out the sampling must inform the competent authority of the third country of origin so that it can take appropriate measures to remedy the situation.

The competent authority of the third country of origin must bring these measures to the attention of the competent authority carrying out the sampling.

In the event of a further positive result from the same source, the competent authority of the [^{F20}border control post] must sample each consignment from the same source until six consecutive tests again prove negative.

3. Competent authorities must keep a record for at least three years of the results of sampling carried out on all consignments that have undergone sampling.
4. Where a consignment imported into [^{F21}Great Britain] proves to be positive for salmonella or where it does not meet the microbiological standards for enterobacteriaceae set out in Chapter I of Annex X, it must either:
 - (a) be dealt with in accordance with the procedure laid down by [^{F22}Article 66(3) (b), 69 and 72 of the Official Controls Regulation]; or
 - (b) reprocessed in a processing plant or decontaminated by a treatment authorised by the competent authority. The consignment must not be released until it has been treated, tested for salmonella or enterobacteriaceae, as necessary, by the competent authority in accordance with Chapter I of Annex X, and a negative result obtained.

5. [^{F23}Processed animal protein obtained from farmed insects may be imported into [^{F24}Great Britain] provided that it has been produced in compliance with the following conditions:

- (a) the insects belong to one of the following species:

- (b) the substrate for the feeding of insects may only contain products of non-animal origin or the following products of animal origin of Category 3 material:
- fishmeal,
 - blood products from non-ruminants,
 - di and tricalcium phosphate of animal origin,
 - hydrolysed proteins from non-ruminants,
