

Commission Regulation (EU) No 601/2012 of 21 June 2012 on the monitoring and reporting of greenhouse gas emissions pursuant to Directive 2003/87/EC of the European Parliament and of the Council (Text with EEA relevance) (repealed)

### CHAPTER III

## MONITORING OF EMISSIONS OF STATIONARY INSTALLATIONS

### SECTION 2

#### *Calculation-based methodology*

#### *Subsection 3*

#### *Calculation factors*

#### *Article 30*

#### **Determination of calculation factors**

1 The operator shall determine calculation factors either as default values or values based on analysis depending on the applicable tier.

2 The operator shall determine and report calculation factors consistently with the state used for related activity data, referring to the fuel's or material's state in which the fuel or material is purchased or used in the emission causing process, before it is dried or otherwise treated for laboratory analysis.

Where such an approach incurs unreasonable costs, or where higher accuracy can be achieved, the operator may consistently report activity data and calculation factors referring to the state in which laboratory analyses are carried out.

**Changes to legislation:**

There are currently no known outstanding effects for the Commission Regulation (EU) No 601/2012 (repealed), Article 30.
