### Article 3

#### Definitions

For the purposes of this Regulation, the definitions of Directive 2005/94/EC shall apply [<sup>F7</sup>, subject to the modifications below].

[<sup>F8</sup>Article 2 of Directive 2005/94/EC is to be read as if—

- (a) in point 4 (definition of “poultry”), for “all birds” to the end there were substituted “fowl, turkeys, guinea fowl, ducks, geese, quails, pigeons, pheasants, partridges and ratites (*Ratitae*) reared or kept in captivity for breeding, the production of meat or eggs for consumption, or for restocking supplies of game”;
- (b) point 15 (definition of “diagnostic manual”) were omitted;
- (c) in point 18 (definition of “competent authority”)—
  - (i) for “authority of a Member State” there were substituted “person or body”;
  - (ii) “in accordance with this Directive” were omitted;
- (d) in point 21 (definition of “official supervision”), for “this Directive” there were substituted “relevant legislation”.]

The following definitions shall also apply:

- (a) ‘birds’ means animals of the avian species other than those referred to in the second paragraph of Article 2;
- (b) ‘approved breeding establishment’ means:
  - (i) an establishment used exclusively for the breeding of birds; and
  - (ii) that has been inspected and approved by the competent authority of the exporting third country for compliance with the conditions provided for in Article 4 and Annex II;
- (c) ‘captive bred birds’ means birds that have not been caught in the wild but have been born and bred in captivity from parents that mated or had gametes otherwise transferred in captivity;
- (d) ‘seamlessly closed leg-ring’ means a ring or band in a continuous circle, without any break or join, which has not been tampered with in any way, of a size which cannot be removed from the bird when its leg is fully grown after having been applied in the first days of the bird’s life and which has been commercially manufactured for that purpose;

- (e) ‘approved quarantine facility’ means premises, other than quarantine centres:
- (i) in which quarantine of imported birds is carried out;
  - (ii) which has been inspected and approved by the competent authority for compliance with the minimum conditions provided for in Article 6 and Annex IV;
- (f) ‘approved quarantine centre’ means premises:
- (i) in which quarantine of imported birds is carried out;
  - (ii) containing a number of units, which are operationally and physically separated from each other and in which each unit contains only birds of the same consignment, with the same health status, and therefore comprises a single epidemiological unit;
  - (iii) which has been inspected and approved by the competent authority for compliance with the minimum conditions provided for in Article 6 and Annex IV;
- (g) ‘sentinel birds’ means poultry which are to be used as a diagnostic aid during quarantine;
- (h) ‘diagnostic manual’ means the Diagnostic Manual for avian influenza set out in the Annex to Decision 2006/437/EC.
- (i) [F9“appropriate authority” means the Secretary of State (in relation to England), the Welsh Ministers (in relation to Wales) and the Scottish Ministers (in relation to Scotland); but the “appropriate authority” is the Secretary of State if consent is given by:
- (i) in relation to Wales, the Welsh Ministers;
  - (ii) in relation to Scotland, the Scottish Ministers;
- (j) “third country” means any country or territory other than the British Islands.]

## Article 11

### Quarantine provisions

1 The birds shall be quarantined for at least 30 days in an approved quarantine facility or centre ('the quarantine').

2 At least at the beginning and the end of quarantine of each consignment, the official veterinarian shall inspect the conditions of quarantine, including an examination of the mortality records and a clinical inspection of the birds in the approved quarantine facility or in each unit of the approved quarantine centre.

However, the official veterinarian shall carry out inspections more frequently if required by the disease situation.

## Article 12

### Examination, sampling and testing to be carried out in relation to a consignment during quarantine

1 The examination, sampling and testing procedures for avian influenza and Newcastle disease, set out in Annex V, shall be carried out following the arrival of the birds in quarantine.

2 When sentinel birds are used a minimum of 10 sentinel birds shall be used in the approved quarantine facility or in each unit of the approved quarantine centre.

3 Sentinel birds used for examination, sampling and testing procedures shall be:

- a at least three weeks old and used only once for those purposes;
- b leg-banded for identification purposes or identified with another non-removable identification;
- c unvaccinated and have been found sero-negative for avian influenza and Newcastle disease within a period of 14 days before the date of commencement of quarantine;
- d placed in the approved quarantine facility or in a unit of the approved quarantine centre before the arrival of the birds in the common airspace and as close as possible to the birds in such a way that close contact between the sentinel birds and the excrements of the birds in quarantine is ensured.

## Article 13

### Action in case of a suspected disease in an approved quarantine facility or centre

1 If during quarantine in an approved quarantine facility, it is suspected that one or more birds and/or sentinel birds are infected with avian influenza or Newcastle disease, the following measures shall be taken:

- a the competent authority shall place the approved quarantine facility under official supervision;
- b samples for virological examination as set out in point 2 of Annex V shall be taken from those birds and sentinel birds and shall be analysed accordingly;
- c no birds shall enter or leave the approved quarantine facility until the suspicion is ruled out.

---

2 If the suspicion of avian influenza or Newcastle disease in the affected approved quarantine facility as referred to in paragraph 1 is confirmed, the following measures shall be taken:

- a all birds and sentinel birds in the approved quarantine facility shall be killed and destroyed;
- b the approved quarantine facility shall be cleaned and disinfected;
- c no birds shall enter the approved quarantine facility until 21 days following the final cleaning and disinfection.

3 If during quarantine in an approved quarantine centre, it is suspected that one or more birds and/or sentinel birds in a unit of the quarantine centre are infected with avian influenza or Newcastle disease, the following measures shall be taken:

- a the competent authority shall place the approved quarantine centre under official supervision;
- b samples for virological examination as set out in point 2 of Annex V shall be taken from those birds and sentinel birds and shall be analysed accordingly;
- c no birds shall enter or leave the approved quarantine centre until the suspicion is ruled out.

4 If the suspicion of avian influenza or Newcastle disease in the affected unit of the approved quarantine centre as referred to in paragraph 3 is confirmed, the following measures shall be taken:

- a all birds and sentinel birds in the affected unit of the approved quarantine centre shall be killed and destroyed;
- b the unit concerned shall be cleaned and disinfected;
- c the following samples shall be taken:
  - (i) where sentinel birds are used, not earlier than 21 days following the final cleaning and disinfection of the unit concerned, samples for serological examination as set out in Annex V must be taken from sentinel birds in the other quarantine units; or
  - (ii) where no sentinel birds are used, during 7 to 15 days following the final cleaning and disinfection, samples for virological examination as set out in point 2 of Annex V must be taken from birds in the other quarantine units;
- d no birds shall leave the approved quarantine centre until the results of the sampling provided for in point (c) have been confirmed as negative.

## Article 14

### **Derogations relating to a positive finding of low pathogenic avian influenza or Newcastle disease in an approved quarantine facility or centre**

1 Where during quarantine one or more birds and/or sentinel birds are found to be infected with low pathogenic avian influenza (LPAI) or Newcastle disease, the competent authority may, based on a risk assessment, grant derogations from the measures provided for in Article 13(2)(a) and (4)(a), provided that such derogations do not endanger disease control (the derogation).

F23  
...

2 When an official veterinarian inspects an approved quarantine facility or centre that has been granted a derogation, and one or more of the birds and/or sentinel birds are found to be infected with LPAI or Newcastle disease, the measures set out in paragraphs 3 to 7 shall be complied with.

F24  
...

3 In the case of a positive finding of LPAI, instead of the standard samples as provided for in the diagnostic manual, the following samples shall be taken for laboratory testing, 21 days following the date of the last positive finding of LPAI in the approved quarantine facility or from each unit in the approved quarantine centre and at intervals of 21 days:

- a samples of any dead sentinel birds or other birds present at the time of sampling;
- b tracheal/oropharyngeal and cloacal swabs from at least 60 birds or from all birds where there are less than 60 present at the approved quarantine facility or the unit concerned of the approved quarantine centre; or if the birds are small, exotic and not used to being handled or handling them would be dangerous for people, samples of fresh faeces must be collected; the sampling and laboratory testing of such samples must continue until two consecutive negative laboratory results are obtained which must be at least at an interval of 21 days.

However, the competent authority may grant derogations from the sample size provided for in this paragraph, based on the outcome of a risk assessment.

4 In the case of a positive finding of Newcastle disease, the competent authority may only grant a derogation provided that in the 30 days following the death or clinical recovery of the last case of that disease, sampling in accordance with points 1 and 2 of Annex V, not taking account of the reference to the time period specified, has been carried out with negative results.

5 Birds shall not be released from quarantine until at least the laboratory testing period provided for in paragraph 3 has elapsed.

6 The approved quarantine facility or the unit concerned of the approved quarantine centre shall be cleaned and disinfected after it has been emptied. Any matter or waste likely to have been contaminated as well as all the waste that has accumulated during the laboratory testing period provided for in paragraph 3 shall be removed in such a way that ensures that the pathogen is not spread, and destroyed in such a way that guarantees the destruction of the virus of LPAI or Newcastle disease present.

7 The repopulation of the approved quarantine facility or centre shall not take place for a period of 21 days following the date of completion of the final cleansing and disinfection as provided for in paragraph 6.
