  - (d) Data on the past and present use of the recipient plant, such as history of safe use for consumption as food or feed, including information on how the plant is typically cultivated, transported and stored, whether special processing is required to make the plant safe to eat, and the plant normal role in the diet (for example, which part of the plant is used as a food source, whether its consumption is important in particular subgroups of the population, what important macro- or micro-nutrients it contributes to the diet);
  - (e) Additional information relating to the recipient or parental plants required for the environmental safety aspects:
    - (i) information concerning reproduction:
      - mode(s) of reproduction;
      - specific factors affecting reproduction (if any);
      - generation time;
    - (ii) sexual compatibility with other cultivated or wild plant species;
    - (iii) survivability:
      - ability to form structures for survival or dormancy;
      - specific factors, if any, affecting survivability;
    - (iv) dissemination:
      - ways and extent of dissemination (to include, for example, an estimation of how viable pollen and/or seed declines with distance);
