

Regulation (EU) No 1143/2014 of the European Parliament  
and of the Council of 22 October 2014 on the prevention and  
management of the introduction and spread of invasive alien species

REGULATION (EU) No 1143/2014 OF THE  
EUROPEAN PARLIAMENT AND OF THE COUNCIL

of 22 October 2014

on the prevention and management of the  
introduction and spread of invasive alien species

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 192(1) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee<sup>(1)</sup>,

After consulting the Committee of the Regions,

Acting in accordance with the ordinary legislative procedure<sup>(2)</sup>,

Whereas:

- (1) The appearance of alien species, whether of animals, plants, fungi or micro-organisms, in new locations is not always a cause for concern. However, a significant subset of alien species can become invasive and have serious adverse impact on biodiversity and related ecosystem services, as well as have other social and economic impact, which should be prevented. Some 12 000 species in the environment of the Union and in other European countries are alien, of which roughly 10 to 15 % are estimated to be invasive.
- (2) Invasive alien species represent one of the main threats to biodiversity and related ecosystem services, especially in geographically and evolutionarily isolated ecosystems, such as small islands. The risks such species pose may intensify due to increased global trade, transport, tourism and climate change.
- (3) The threat to biodiversity and related ecosystem services that invasive alien species pose takes different forms, including severe impacts on native species and the structure and functioning of ecosystems through the alteration of habitats, predation, competition, the transmission of diseases, the replacement of native species throughout a significant proportion of range and through genetic effects by hybridisation. Furthermore, invasive alien species can also have a significant adverse impact on human health and the economy. Only live specimens, and parts that can reproduce, represent a threat to biodiversity and related ecosystem services, human health or the economy, and therefore, only those should be subject to the restrictions under this Regulation.

- (4) The Union, as a party to the Convention on Biological Diversity, approved by Council Decision 93/626/EEC<sup>(3)</sup>, is bound by Article 8(h) of that Convention, according to which the Parties shall, as far as possible and as appropriate, 'prevent the introduction of, control or eradicate those alien species which threaten ecosystems, habitats or species'.
- (5) The Union, as a Party to the Convention on the Conservation of European Wildlife and Natural Habitats, approved by Council Decision 82/72/EEC<sup>(4)</sup>, has undertaken to take all appropriate measures to ensure the conservation of the habitats of the wild flora and fauna species.
- (6) To support the achievement of the objectives of Directives 2000/60/EC<sup>(5)</sup>, 2008/56/EC<sup>(6)</sup> and 2009/147/EC<sup>(7)</sup> of the European Parliament and of the Council and Council Directive 92/43/EEC<sup>(8)</sup>, this Regulation should establish rules to prevent, minimise and mitigate the adverse effects of invasive alien species on biodiversity and related ecosystem services, and on human health and safety as well as to reduce their social and economic impact.
- (7) Some species migrate naturally in response to environmental changes. They should not be considered as alien species in their new environment and should be excluded from the scope of this Regulation. This Regulation should focus only on species introduced into the Union as a consequence of human intervention.
- (8) There are currently over 40 Union legislative acts on animal health which include provisions on animal diseases. Moreover, Council Directive 2000/29/EC<sup>(9)</sup> includes provisions on organisms which are harmful to plants or plant products, and Directive 2001/18/EC of the European Parliament and of the Council<sup>(10)</sup> sets out the regime applicable to genetically modified organisms. Therefore, any new rules on invasive alien species should be aligned with and not overlap with those legislative acts of the Union and should not apply to the organisms targeted by those legislative acts.
- (9) Regulations (EC) No 1107/2009<sup>(11)</sup> and (EU) No 528/2012<sup>(12)</sup> of the European Parliament and of the Council and Council Regulation (EC) No 708/2007<sup>(13)</sup> provide for rules concerning the authorisation for the use of certain alien species for particular purposes. The use of certain species has already been authorised under those regimes at the time of entry into force of this Regulation. To ensure a coherent legal framework, species used for those purposes should thus be excluded from the scope of this Regulation.
- (10) As invasive alien species are numerous, it is important to ensure that priority is given to addressing the subset of invasive alien species considered to be of Union concern. A list of such invasive alien species considered to be of Union concern ("the Union list") should therefore be established and regularly updated. An invasive alien species should be considered to be of Union concern if the damage that it causes in affected Member States is so significant that it justifies the adoption of dedicated measures applicable across the Union, including in the Member States that are not yet affected or are even unlikely to be affected. To ensure that the identification of invasive alien species of Union concern remains proportionate, the Union list should be established and updated gradually and be focused on species whose inclusion on the Union list would effectively

---

prevent, minimise or mitigate the adverse impact of those species in a cost efficient manner. As species within the same taxonomic group often have similar ecological requirements and may pose similar risks, the inclusion of taxonomic groups of species on the Union list should be allowed, where appropriate.

- (11) The criteria for inclusion on the Union list are the core instrument of application of this Regulation. To ensure the effective use of resources, those criteria should ensure that among the potential invasive alien species currently known, those that have the most significant adverse impact will be listed. The Commission should submit to the committee established by this Regulation a proposal for a Union list based on those criteria within one year of the entry into force of this Regulation. When proposing the Union list, the Commission should inform that committee on how it took those criteria into account. The criteria should include a risk assessment pursuant to the applicable provisions under the relevant Agreements of the World Trade Organisation (WTO) on placing trade restrictions on species.
- (12) To avoid disproportionate or excessive costs for any Member State and to safeguard the added value of Union action through this Regulation, when proposing the Union list and consequential measures, the Commission should take into consideration the implementation cost for Member States, the cost of inaction, the cost-effectiveness and the socio-economic aspects. In this context, in selecting the invasive alien species to be included on the Union list, special attention should be given to species that are widely used and provide significant social and economic benefits in a Member State, without compromising the objectives of this Regulation.
- (13) To ensure compliance with the rules under the relevant Agreements of the WTO and the coherent application of this Regulation, common criteria should be established to carry out the risk assessment. Where appropriate, those criteria should be based on existing national and international standards and should encompass different aspects of the characteristics of the species, the risk and modes of introduction into the Union, the adverse social, economic and biodiversity impact of the species, the potential benefits of uses and the costs of mitigation to weigh them against the adverse impact, as well as on an assessment of the potential costs of environmental, social and economic damage demonstrating the significance for the Union, so as to further justify action. In order to develop the system progressively and build upon the experience gained, the overall approach should be assessed by 1 June 2021.
- (14) Some invasive alien species are included in Annex B to Council Regulation (EC) No 338/97<sup>(14)</sup>, and their importation into the Union is prohibited because their invasive character has been recognised and their introduction into the Union has an adverse impact on native species. Those species are: *Callosciurus erythraeus*, *Sciurus carolinensis*, *Oxyura jamaicensis*, *Lithobates (Rana) catesbeianus*, *Sciurus niger*, *Chrysemys picta* and *Trachemys scripta elegans*. To ensure a coherent legal framework and uniform rules on invasive alien species at Union level, the listing of those invasive alien species as invasive alien species of Union concern should be considered as a matter of priority.

*Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)*

---

- (15) Prevention is generally more environmentally desirable and cost-effective than reaction after the fact, and should be prioritised. Therefore, priority should be given to the listing of invasive alien species that are not yet present in the Union or are at an early stage of invasion and of invasive alien species that are likely to have the most significant adverse impact. As new invasive alien species can be introduced continuously into the Union and alien species present are spreading and expanding their range, it is necessary to ensure that the Union list is constantly reviewed and kept up-to-date.
- (16) Regional cooperation should be explored between Member States concerned with the same species that are not able to establish a viable population in a large part of the Union. Where the objectives of this Regulation are better achieved by measures at Union level, those species could also be included on the Union list.
- (17) In pursuing the objectives of this Regulation, it is appropriate to take account of the specific situation of the outermost regions, and in particular their remoteness, insularity and the uniqueness of their respective biodiversities. Therefore, the requirements under this Regulation to take restrictive and preventive measures relating to invasive alien species of Union concern should be adapted to the specificities of the outermost regions, as defined by the Treaty on the Functioning of the European Union (TFEU), taking into account European Council Decisions 2010/718/EU<sup>(15)</sup> and 2012/419/EU<sup>(16)</sup>.
- (18) The risks and concerns associated with invasive alien species represent a cross-border challenge affecting the whole of the Union. It is therefore essential to adopt a ban at Union level on intentionally or negligently bringing into the Union, reproducing, growing, transporting, buying, selling, using, exchanging, keeping and releasing invasive alien species of Union concern in order to ensure that early and consistent action is taken across the Union to avoid distortions of the internal market and to prevent situations where action taken in one Member State is undermined by inaction in another Member State.
- (19) With a view to enabling scientific research and ex-situ conservation activities, it is necessary to provide specific rules for the invasive alien species of Union concern subject to those activities. Those activities should be carried out in closed establishments where the organisms are in contained holding and with all the necessary measures taken to avoid the escape or unlawful release of invasive alien species of Union concern. Where authorised by the Commission in duly motivated exceptional cases of compelling public interest it should be possible for those rules to apply also to certain other activities, including commercial activities. In implementing those rules, particular attention should be paid to avoiding any adverse impact on protected species and habitats, in accordance with relevant Union law.
- (20) There may be cases where alien species not yet recognised as invasive alien species of Union concern appear at the Union borders or are detected in the territory of the Union. Member States should therefore be granted the possibility to adopt certain emergency measures on the basis of available scientific evidence. Such emergency measures would allow immediate reaction against invasive alien species which could pose risks related to their introduction, establishment and spread in those countries, while Member States assess the actual risks posed by them, in line with the applicable

**Changes to legislation:** There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)

---

provisions of the relevant Agreements of the WTO, in particular with a view to having those species recognised as invasive alien species of Union concern. There is a need to couple national emergency measures with the possibility of adopting emergency measures at Union level to comply with the provisions of the relevant Agreements of the WTO. Furthermore, emergency measures at Union level would equip the Union with a mechanism to act swiftly in case of presence or imminent danger of entry of a new invasive alien species in accordance with the precautionary principle.

- (21) A large proportion of invasive alien species are introduced unintentionally into the Union. It is therefore crucial to manage the pathways of unintentional introduction more effectively. Action in this area should be gradual, given the relatively limited experience in this field. Action should include voluntary measures, such as the actions proposed by the International Maritime Organisation's Guidelines for the Control and Management of Ships' Biofouling, and mandatory measures. Action should build on the experience gained in the Union and in Member States in managing certain pathways, including measures established through the International Convention for the Control and Management of Ships Ballast Water and Sediments adopted in 2004. Accordingly, the Commission should take all appropriate steps to encourage Member States to ratify that Convention.
- (22) To develop an adequate knowledge base to address the problems raised by invasive alien species, it is important that Member States undertake research, monitoring and surveillance of such species. As surveillance systems offer the most appropriate means for early detection of new invasive alien species and for the determination of the distribution of already established species, those systems should include both targeted and general surveys and benefit from the involvement of different sectors and stakeholders, including regional and local communities. Surveillance systems should imply paying continuous attention to any new invasive alien species anywhere in the Union and aim to provide an effective and complete picture at Union level. In the interest of efficiency and cost-effectiveness, existing systems of customs control, surveillance and monitoring already established by Union law should be applied, in particular those set out in Directives 92/43/EEC, 2000/60/EC, 2008/56/EC and 2009/147/EC.
- (23) Official controls on animals and plants should be carried out to prevent the intentional introduction of invasive alien species. Live animals and plants should only enter the Union through border control entities in accordance with Regulation (EC) No 882/2004 of the European Parliament and of the Council<sup>(17)</sup>, and Council Directives 91/496/EEC<sup>(18)</sup> and 97/78/EC<sup>(19)</sup> or points of entry in accordance with Directive 2000/29/EC. To ensure efficiency gains and avoid creating parallel systems of customs controls, competent authorities should verify whether those species are invasive alien species of Union concern at the first border control entity or point of entry.
- (24) After the introduction of an invasive alien species, early detection and rapid eradication measures are crucial to prevent their establishment and spread. The most effective and cost efficient response is often to eradicate the population as soon as possible while the number of specimens is still limited. In the event that eradication is not feasible or the costs of eradication outweigh the environmental, social and economic benefits in the

---

long term, containment and control measures should be applied. Management measures should be proportional to the impact on the environment and take due consideration of the biogeographic and climatic conditions of the Member State concerned.

- (25) Management measures should avoid any adverse impact on the environment as well as on human health. Eradicating and managing some animal invasive alien species, while necessary in some cases, may induce pain, distress, fear or other forms of suffering to the animals, even when using the best available technical means. For that reason, Member States and any operator involved in the eradication, control or containment of invasive alien species should take the necessary measures to spare avoidable pain, distress and suffering of animals during the process, taking into account as far as possible the best practices in the field, for example the Guiding Principles on Animal Welfare developed by the World Organisation for Animal Health. Non-lethal methods should be considered and any action taken should minimise the impact on non-targeted species.
- (26) Invasive alien species generally cause damage to ecosystems and reduce the resilience of those ecosystems. Therefore proportionate restoration measures should be undertaken to strengthen the ecosystems' resilience towards invasions, to repair the damage caused and to enhance the conservation status of species and their habitats in accordance with Directives 92/43/EEC and 2009/147/EC, the ecological status of inland surface waters, transitional waters, coastal waters and groundwater in accordance with Directive 2000/60/EC, and the environmental status of marine waters in accordance with Directive 2008/56/EC. The costs of such restoration measures should be recovered in accordance with the polluter pays principle.
- (27) Cross-border cooperation, particularly with neighbouring countries, and coordination between Member States, particularly within the same biogeographical region of the Union, should be fostered to contribute to the effective application of this Regulation.
- (28) A system to address invasive alien species should be underpinned by a centralised information system collating the existing information on alien species in the Union and allowing access to information on the presence of species, their spread, their ecology, invasion history and all other information necessary to underpin policy and management decisions and allowing also the exchange of best practices.
- (29) Directive 2003/35/EC of the European Parliament and of the Council<sup>(20)</sup> has established a framework for public consultation in environment related decisions. In defining action in the field of invasive alien species, effective public participation should enable the public to express, and the decision-maker to take account of, opinions and concerns which may be relevant to those decisions. That should increase the accountability and transparency of the decision-making process and contribute to public awareness of environmental issues and support for the decisions taken.
- (30) The participation of the scientific community is important to provide an adequate knowledge base to address the problems raised by invasive alien species. A dedicated scientific forum should be set up to provide advice on the scientific aspects related to the application of this Regulation, in particular as regards establishing and updating the Union list, risk assessments, emergency measures and rapid eradication measures.

---

**Changes to legislation:** There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)

---

- (31) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission in respect of the adoption and updating of the Union list, the format of the documents serving as evidence for permits, the adoption of emergency measures at Union level, the requirement to apply certain provisions in the Member States concerned in the case of enhanced regional cooperation, the rejection of the Member States' decisions not to apply eradication measures and the technical formats for reporting to the Commission. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council<sup>(21)</sup>.
- (32) In order to take into account the latest scientific developments in the environmental field, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of determining how it may be concluded that invasive alien species are capable of establishing viable populations and of spreading, as well as for setting out the common elements for the development of risk assessments. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.
- (33) To guarantee compliance with this Regulation, it is important that Member States impose effective, proportionate and dissuasive sanctions for infringements, taking into account the nature and gravity of the infringement, the principle of recovery of the costs and the polluter pays principle.
- (34) Through measures taken under this Regulation, Member States may impose obligations on holders or users of alien species as well as owners and tenants of the land concerned.
- (35) To enable non-commercial owners to keep their companion animals that belong to species included on the Union list until the end of the animal's natural life, it is necessary to provide transitional measures, on condition that all measures are put in place to avoid reproduction or escape.
- (36) To enable commercial operators, who may have legitimate expectations, for instance those who have received an authorisation in accordance with Regulation (EC) No 708/2007, to exhaust their stock of invasive alien species of Union concern following the entry into force of this Regulation, it is justified to allow them two years to slaughter, humanely cull, sell or, where relevant, hand over the specimens to research or ex-situ conservation establishments.
- (37) Since the objectives of this Regulation, namely to prevent, minimise and mitigate the adverse impact on biodiversity of the introduction and spread of invasive alien species within the Union, cannot be sufficiently achieved by the Member States but can rather, by reason of its scale and effects, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives.

---

**Changes to legislation:** There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)

---

- (38) It should be possible for Member States to maintain or adopt rules on invasive alien species of Union concern that are more stringent than those laid down in this Regulation and to apply provisions such as those set out in this Regulation for invasive alien species of Union concern to invasive alien species of Member State concern. Any such measures should be compatible with the TFEU and be notified to the Commission in accordance with Union law,

HAVE ADOPTED THIS REGULATION:

## CHAPTER I U.K.

### GENERAL PROVISIONS

#### Article 1 U.K.

##### Subject matter

This Regulation sets out rules to prevent, minimise and mitigate the adverse impact on biodiversity of the introduction and spread within [<sup>F1</sup>Great Britain], both intentional and unintentional, of invasive alien species.

#### Textual Amendments

- F1** Words in Regulation substituted (31.12.2020) by [The Invasive Non-native Species \(Amendment etc.\) \(EU Exit\) Regulations 2019 \(S.I. 2019/223\)](#), regs. 1(1)(b), **4(2)(a)** (with reg. 2(1)(a)) (as amended by S.I. 2020/1590, regs. 1(1)(b)(i), 6(2)(3)(a)); 2020 c. 1, Sch. 5 para. 1(1); and Regulation: [By The Invasive Non-native Species \(EU Exit\) \(Scotland\) \(Amendment etc.\) Regulations 2020 \(S.S.I. 2020/473\)](#), regs. 1(1), **2(2)(a)** (with reg. 1(2)), it is provided that (S.) (31.12.2020) the word “Scotland” is substituted for the words “the Union”

#### Article 2 U.K.

##### Scope

- 1 This Regulation applies to all invasive alien species.
  - 2 This Regulation does not apply to:
    - a species changing their natural range without human intervention, in response to changing ecological conditions and climate change;
    - b genetically modified organisms as defined in point 2 of Article 2 of Directive 2001/18/EC;
    - c pathogens that cause animal diseases; for the purpose of this Regulation, animal disease means the occurrence of infections and infestations in animals, caused by one or more pathogens transmissible to animals or to humans;
- <sup>F2F3</sup><sup>F4</sup>d pests of plants listed [<sup>F5</sup>pursuant to Article 5(2) or Article 32(3)] [<sup>F5</sup>in retained EU law relating to plant health], or subject to measures pursuant to [<sup>F6</sup>Article 30(1), of Regulation (EU) 2016/2031 of the European Parliament and of the Council] [<sup>F6</sup>retained EU law relating to plant health];]

**Changes to legislation:** There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)

- e species listed in Annex IV to Regulation (EC) No 708/2007 when used in aquaculture;
- f micro-organisms manufactured or imported for use in plant protection products already authorised or for which an assessment is ongoing under Regulation (EC) No 1107/2009; or
- g micro-organisms manufactured or imported for use in biocidal products already authorised or for which an assessment is ongoing under Regulation (EU) No 528/2012.

- F3** Art. 2(2)(d): By [The Invasive Non-native Species \(Amendment etc.\) \(EU Exit\) Regulations 2019 \(S.I. 2019/223\)](#), regs. 1(1)(b), **5(2)(b)** (with reg. 2(1)(a)) (as amended by [S.I. 2020/1590](#), regs. 1(1)(b)(i), 6(2)), it is provided that (31.12.2020) the words “retained EU law relating to plant health” are substituted for the words “Article 16(3) of that Directive”; 2020 c. 1, Sch. 5 para. 1(1)
- F4** Substituted by [Regulation \(EU\) 2016/2031 of the European Parliament of the Council of 26 October 2016 on protective measures against pests of plants, amending Regulations \(EU\) No 228/2013, \(EU\) No 652/2014 and \(EU\) No 1143/2014 of the European Parliament and of the Council and repealing Council Directives 69/464/EEC, 74/647/EEC, 93/85/EEC, 98/57/EC, 2000/29/EC, 2006/91/EC and 2007/33/EC](#).
- F5** Words in Art. 2(2)(d) substituted (S.) (31.12.2020) by [The Invasive Non-native Species \(EU Exit\) \(Scotland\) \(Amendment etc.\) Regulations 2020 \(S.S.I. 2020/473\)](#), regs. 1(1), **3(2)(a)** (with reg. 1(2))
- F6** Words in Art. 2(2)(d) substituted (S.) (31.12.2020) by [The Invasive Non-native Species \(EU Exit\) \(Scotland\) \(Amendment etc.\) Regulations 2020 \(S.S.I. 2020/473\)](#), regs. 1(1), **3(2)(b)** (with reg. 1(2))

## Article 3 **U.K.**

### Definitions

For the purposes of this Regulation, the following definitions apply:

- (1) 'alien species' means any live specimen of a species, subspecies or lower taxon of animals, plants, fungi or micro-organisms introduced outside its natural range; it includes any part, gametes, seeds, eggs or propagules of such species, as well as any hybrids, varieties or breeds that might survive and subsequently reproduce;
- (2) 'invasive alien species' means an alien species whose introduction or spread has been found to threaten or adversely impact upon biodiversity and related ecosystem services;
- (3) 'invasive alien species [<sup>F7</sup>of special concern]' means an invasive alien species whose adverse impact has been deemed such as to require concerted action [<sup>F8</sup>across Great Britain] pursuant to Article 4(3);
- (4) <sup>F9</sup> .....
- (5) 'biodiversity' means the variability among living organisms from all sources, including terrestrial, marine and other aquatic ecosystems and the ecological complexes of which they are part; this includes diversity within species, between species and of ecosystems;

---

**Changes to legislation:** There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)

---

- (6) 'ecosystem services' means the direct and indirect contributions of ecosystems to human wellbeing;
- (7) 'introduction' means the movement, as a consequence of human intervention, of a species outside its natural range;
- (8) 'research' means descriptive or experimental work, undertaken under regulated conditions to obtain new scientific findings or to develop new products, including the initial phases of identification, characterisation and isolation of genetic features, other than those features which make a species invasive, of invasive alien species only insofar as essential to enable the breeding of those features into non-invasive species;
- (9) 'contained holding' means keeping an organism in closed facilities from which escape or spread is not possible;
- (10) 'ex-situ conservation' means the conservation of components of biological diversity outside their natural habitat;
- (11) 'pathways' means the routes and mechanisms of the introduction and spread of invasive alien species;
- (12) 'early detection' means the confirmation of the presence of a specimen or specimens of an invasive alien species in the environment before it has become widely spread;
- (13) 'eradication' means the complete and permanent removal of a population of invasive alien species by lethal or non-lethal means;
- (14) 'population control' means any lethal or non-lethal action applied to a population of invasive alien species, while also minimising the impact on non-targeted species and their habitats, with the aim of keeping the number of individuals as low as possible, so that, while not being able to eradicate the species, its invasive capacity and adverse impact on biodiversity, the related ecosystem services, on human health or the economy, are minimised;
- (15) 'containment' means any action aimed at creating barriers which minimises the risk of a population of an invasive alien species dispersing and spreading beyond the invaded area;
- (16) 'widely spread' means an invasive alien species whose population has gone beyond the naturalisation stage, in which a population is self-sustaining, and has spread to colonise a large part of the potential range where it can survive and reproduce;
- (17) 'management' means any lethal or non-lethal action aimed at the eradication, population control or containment of a population of an invasive alien species, while also minimising the impact on non-targeted species and their habitats;
- (18) <sup>F10</sup><sub>F11</sub> 'the responsible authorities' means—
  - (a) for the purposes of Articles 5(3), 18 and 19(6) as they apply in relation to any matter affecting the offshore marine area—
    - (i) each person mentioned in sub-paragraph (c);
    - (ii) the Scottish Ministers; and
    - (iii) in Northern Ireland, the Department of Agriculture, Environment and Rural Affairs;

---

**Changes to legislation:** There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)

---

- (b) for the purposes of Articles 9, 16, 17 and 19(5)—
    - (i) each person mentioned in sub-paragraph (c);
    - (ii) the Scottish Ministers; and
    - (iii) in Northern Ireland, the Department of Agriculture, Environment and Rural Affairs; and
  - (c) otherwise, each person who, in relation to any particular area or matter, is the appropriate authority;
- (19) ‘the other responsible authorities’ means, in relation to the appropriate authority, the responsible authorities other than itself;
- (20) ‘the appropriate authority’ means—
- (a) the Secretary of State in relation to—
    - (i) England;
    - (ii) the offshore marine area; and
    - (iii) the regulation of imports into, and exports from, the United Kingdom;
  - (b) in relation to Wales, the Welsh Ministers;
- (21) ‘the list of species of special concern’ means the list of species in the Annex to Commission Implementing Regulation (EU) 2016/1141 adopting a list of invasive alien species of Union concern pursuant to Regulation (EU) No 1143/2014 of the European Parliament and of the Council, as amended from time to time;
- (22) ‘the UK marine area’ has the meaning given by section 42(1) of the Marine and Coastal Access Act 2009;
- (23) ‘England’, ‘Scotland’ and ‘Wales’ include that part of the territorial sea which is respectively adjacent to them, and ‘Northern Ireland’ includes the Northern Ireland inshore region (except in the definition of that term);
- (24) ‘the offshore marine area’ means—
- (a) any part of the seabed and subsoil situated in any area designated under section 1(7) of the Continental Shelf Act 1964 (exploration and exploitation of the continental shelf);
  - (b) any part of the waters within British fishery limits (except the internal waters of, and the territorial sea adjacent to, the United Kingdom, the Channel Islands and the Isle of Man);
- (25) ‘the Committee’ has the meaning given by Article 27;
- (26) ‘the Scientific Forum’ means the forum referred to in Article 28;
- (27) ‘the GB marine area’ consists of that part of the UK marine area which is not the Northern Ireland inshore region;
- (28) ‘the Northern Ireland inshore region’ has the meaning given to it in section 2 of the Marine Act (Northern Ireland) 2013;

*Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)*

#### List of invasive alien species [<sup>F7</sup>of special concern]

1 [<sup>F12</sup>The Secretary of State may by regulations amend the list of species of special concern so as to add or remove species from that list] on the basis of the criteria laid down in paragraph 3 of this Article. <sup>F13</sup>...

2 [<sup>F14</sup>The Secretary of State] shall undertake a comprehensive review of the [<sup>F15</sup>list of species of special concern][<sup>F16</sup>before 2nd August 2022, and before the last anniversary of that date in each subsequent period of six years] and shall, in the meantime, update it, as appropriate, in accordance with <sup>F17</sup>... paragraph 1 with:

- a the addition of new invasive alien species;
- b the removal of listed species if they no longer meet one or more of the criteria laid down in paragraph 3.

3 Invasive alien species shall only be included on the [<sup>F15</sup>list of species of special concern] if they meet all of the following criteria:

- a they are found, based on available scientific evidence, to be alien to the territory of [<sup>F18</sup>Great Britain]<sup>F19</sup> ...;

**Changes to legislation:** There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)

- b they are found, based on available scientific evidence, to be capable of establishing a viable population and spreading in the environment under current conditions and in foreseeable climate change conditions in <sup>F20</sup>the territory of Great Britain];
- c they are, based on available scientific evidence, likely to have a significant adverse impact on biodiversity or the related ecosystem services, and may also have an adverse impact on human health or the economy;
- d it is demonstrated by a risk assessment carried out pursuant to Article 5(1) that concerted action <sup>F8</sup>across Great Britain] is required to prevent their introduction, establishment or spread;
- e it is likely that the inclusion on the <sup>F15</sup>list of species of special concern] will effectively prevent, minimise or mitigate their adverse impact.
- 4 <sup>F21</sup>The Committee may submit to the Secretary of State] requests <sup>F22</sup>from the Committee] for the inclusion of invasive alien species on the <sup>F15</sup>list of species of special concern]. Those requests shall include all of the following:
- the name of the species;
  - a risk assessment carried out in accordance with Article 5(1);
  - evidence that the criteria set out in paragraph 3 of this Article are met.
- 5 The <sup>F15</sup>list of species of special concern] shall make reference, where relevant, to the goods with which the invasive alien species are generally associated and their Combined Nomenclature codes as provided by Council Regulation (EEC) No 2658/87<sup>(22)</sup>, <sup>F23</sup>indicating the categories of goods that shall be subject to official controls pursuant to Article 15 of this Regulation].
- 6 When <sup>F24</sup>amending] the <sup>F15</sup>list of species of special concern], the <sup>F25</sup>Secretary of State] shall apply the criteria set out in paragraph 3 with due consideration to the implementation cost <sup>F26</sup>..., the cost of inaction, the cost-effectiveness and the socio-economic aspects. The <sup>F15</sup>list of species of special concern] shall include as a priority those invasive alien species that:
- are not yet present in <sup>F27</sup>Great Britain] or are at an early stage of invasion and are most likely to have a significant adverse impact;
  - are already established in <sup>F28</sup>Great Britain] and have the most significant adverse impact.
- <sup>F29</sup>7 .....
- <sup>F30</sup>8 For the purposes of this Article, references to “Great Britain” are to be read as references to Great Britain and the GB marine area.]

## Article 5 **U.K.**

### Risk assessment

1 For the purposes of Article 4, a risk assessment shall be carried out in relation to the current and potential range of invasive alien species, having regard to the following elements:

*Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)*

- a a description of the species with its taxonomic identity, its history, and its natural and potential range;
- b a description of its reproduction and spread patterns and dynamics including an assessment of whether the environmental conditions necessary for its reproduction and spread exist;
- c a description of the potential pathways of introduction and spread of the species, both intentional and unintentional, including where relevant the commodities with which the species is generally associated;
- d a thorough assessment of the risk of introduction, establishment and spread in relevant biogeographical regions in current conditions and in foreseeable climate change conditions;
- e a description of the current distribution of the species, including whether the species is already present in [<sup>F31</sup>Great Britain] or in neighbouring countries, and a projection of its likely future distribution;
- f a description of the adverse impact on biodiversity and related ecosystem services, including on native species, protected sites, endangered habitats, as well as on human health, safety, and the economy including an assessment of the potential future impact having regard to available scientific knowledge;
- g an assessment of the potential costs of damage;
- h a description of the known uses for the species and social and economic benefits deriving from those uses.

2 [<sup>F32</sup>When the Secretary of State proposes to amend the list of species of special concern under Article 4(1), the Scientific Forum must carry out the risk assessment referred to in paragraph 1.]

<sup>F33</sup>Whenever [<sup>F34</sup>the Committee] submits a request for the inclusion of a species on the [<sup>F15</sup>list of species of special concern][<sup>F35</sup>the Scientific Forum is] responsible for carrying out the risk assessment referred to in paragraph 1. <sup>F36</sup>...

3 [<sup>F37</sup>The responsible authorities, acting jointly, may] specify the type of evidence acceptable for the purposes of point (b) of Article 4(3) and provide a detailed description of the application of points (a) to (h) of paragraph 1 of this Article. The detailed description shall include the methodology to be applied in the risk assessments, taking into account relevant national and international standards and the need to prioritise action against invasive alien species associated with, or that have the potential to cause, a significant adverse impact on biodiversity or related ecosystem services, as well as on human health or the economy, such adverse impact being considered as an aggravating factor. [<sup>F38</sup>Before taking any action under this paragraph, the responsible authorities, acting jointly, must consult the Scientific Forum and such other experts as they consider appropriate.]

### PREVENTION

#### Article 7 **U.K.**

#### Restrictions

- 1 Invasive alien species [<sup>F7</sup>of special concern] shall not be intentionally:
- brought into the territory of [<sup>F1</sup>Great Britain], including transit under customs supervision;
  - kept, including in contained holding;
  - bred, including in contained holding;
  - transported to, from or within [<sup>F1</sup>Great Britain], except for the transportation of species to facilities in the context of eradication;
  - placed on the market;
  - used or exchanged;
  - permitted to reproduce, grown or cultivated, including in contained holding; or
  - released into the environment.
- 2 [<sup>F40</sup>The appropriate authority] shall take all necessary steps to prevent the unintentional introduction or spread, including, where applicable, by gross negligence, of invasive alien species [<sup>F7</sup>of special concern].

### Permits

1 By way of derogation from the restrictions set out in points (a), (b), (c), (d), (f) and (g) of Article 7(1), and subject to paragraph 2 of this Article, [F41the appropriate authority] shall establish a permit system allowing establishments to carry out research on, or ex-situ conservation of, invasive alien species [F7of special concern]. Where the use of products derived from invasive alien species [F7of special concern] is unavoidable to advance human health, [F41the appropriate authority] may also include scientific production and subsequent medicinal use within their permit system.

2 [F42The appropriate authority may] issue the permits referred to in paragraph 1 for activities carried out in contained holding that fulfil all of the following conditions:

- a the invasive alien species [F7of special concern] is kept in and handled in contained holding in accordance with paragraph 3;
- b the activity is to be carried out by appropriately qualified personnel as laid down by the [F43appropriate authority];
- c transport to and from contained holding is carried out under conditions that exclude escape of the invasive alien species as established by the permit;
- d in the case of invasive alien species [F7of special concern] that are animals, they are marked or otherwise effectively identified where appropriate, using methods that do not cause avoidable pain, distress or suffering;
- e the risk of escape or spread or removal is effectively managed, taking into account the identity, biology and means of dispersal of the species, the activity and the contained holding envisaged, the interaction with the environment and other relevant factors;
- f a continuous surveillance system and a contingency plan covering possible escape or spread is drawn up by the applicant, including an eradication plan. The contingency plan shall be approved by the [F44appropriate authority]. If an escape or spread occurs, the contingency plan shall be implemented immediately and the permit may be withdrawn, temporarily or permanently.

The permit referred to in paragraph 1 shall be limited to a number of invasive alien species and specimens that does not exceed the capacity of the contained holding. It shall include the restrictions necessary to mitigate the risk of escape or spread of the species concerned. It shall accompany the invasive alien species to which it refers at all times when those species are kept, brought into and transported within [F1Great Britain].

3 Specimens shall be considered to be kept in contained holding if the following conditions are fulfilled:

- a the specimens are physically isolated and they cannot escape or spread or be removed by unauthorised persons from the holdings where they are kept;
- b cleaning, waste handling and maintenance protocols ensure that no specimens or reproducible parts can escape, spread or be removed by unauthorised persons;
- c the removal of the specimens from the holdings, disposal or destruction or humane cull is done in such way as to exclude propagation or reproduction outside of the holdings.

*Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)*

4 When applying for a permit, the applicant shall provide all necessary evidence to allow the [<sup>F45</sup>appropriate authority] to assess whether the conditions set out in paragraphs 2 and 3 are fulfilled.

5 [<sup>F46</sup>The appropriate authority may] withdraw the permit at any point in time, temporarily or permanently, if unforeseen events with an adverse impact on biodiversity or related ecosystem services occur. Any withdrawal of a permit shall be justified on scientific grounds and, where scientific information is insufficient, on the grounds of the precautionary principle and having due regard to national administrative rules.

<sup>F47</sup>6 .....

7 For all permits issued in accordance with paragraph 1 of this Article, [<sup>F48</sup>the appropriate authority must], without delay, make publicly available on the internet at least the following:

- a the scientific and common names of the invasive alien species [<sup>F7</sup>of special concern] for which the permit has been issued;
- b the number or the volume of specimens concerned;
- c the purpose for which the permit has been issued; and
- d the codes of Combined Nomenclature as provided by Regulation (EEC) No 2658/87.

8 [<sup>F49</sup>The appropriate authority] shall ensure that inspections are carried out <sup>F50</sup>... to ensure that the establishments comply with the conditions set out in those permits issued.

F<sup>53</sup>2

[<sup>F54</sup>3 Before issuing a permit under paragraph 1 of this Article, the appropriate authority must consult and have regard to the opinions of—

- a the Committee;
- b the Scientific Forum;
- c the other responsible authorities.]

4 An application for [<sup>F55</sup>a permit under paragraph 1 of this Article] shall include the following:

- a details of the establishment or groups of establishments including their name and address;
- b the scientific and common names of the invasive alien species [<sup>F7</sup>of special concern] for which [<sup>F56</sup>an authorisation][<sup>F56</sup>a permit] is requested;
- c the codes of Combined Nomenclature as provided by Regulation (EEC) No 2658/87;
- d the number or the volume of specimens concerned;
- e the reasons for the requested [<sup>F57</sup>authorisation][<sup>F57</sup>permit];
- f a detailed description of the envisaged measures to ensure that escape or spread are not possible from contained holding facilities in which the invasive alien species [<sup>F7</sup>of special concern] is to be kept in and handled, as well as of the measures to ensure that any transport of the species that may be necessary is carried out under conditions that exclude escape;

## Article 13 **U.K.**

### Action plans on the pathways of invasive alien species

1 <sup>F83</sup>The responsible authorities, acting jointly, must], within 18 months of <sup>F84</sup>IP completion day and in respect of] the adoption of the <sup>F15</sup>list of species of special concern] carry out a comprehensive analysis of the pathways of unintentional introduction and spread of invasive alien species <sup>F7</sup>of special concern] at least in <sup>F85</sup>Great Britain and the GB marine area], and identify the pathways which require priority action ('priority pathways') because of the volume of species or of the potential damage caused by the species entering <sup>F1</sup>Great Britain] through those pathways.

2 Within three years of <sup>F86</sup>IP completion day and in respect of] the adoption of the <sup>F15</sup>list of species of special concern], <sup>F87</sup>the responsible authorities, acting jointly, must] establish and implement one single action plan or a set of action plans to address the priority pathways it has identified pursuant to paragraph 1. Action plans shall include timetables for action and shall describe the measures to be adopted and, as appropriate, voluntary actions and codes of good practice, to address the priority pathways and to prevent the unintentional introduction and spread of invasive alien species into or within <sup>F1</sup>Great Britain].

<sup>F88</sup>3

*Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)*

4 The action plans referred to in paragraph 2 of this Article shall include, in particular, measures based on an analysis of costs and benefits, in order to:

- a raise awareness;
- b minimise contamination of goods, commodities, vehicles and equipment by specimens of invasive alien species, including measures to tackle transportation of invasive alien species from [<sup>F89</sup>other] countries;
- [<sup>F90</sup>c ensure appropriate checks at [<sup>F91</sup>Great Britain's] borders, other than the official controls pursuant to Article 15.]

[<sup>F92</sup>5 The responsible authorities must review the action plans established under paragraph 2 at least every six years.]

[<sup>F93</sup>6 In this Article and Article 14, the date of adoption of the list of species of special concern is to be taken to be 2nd August 2016.]

### EARLY DETECTION AND RAPID ERADICATION

#### Article 14 **U.K.**

##### Surveillance system

1 Within 18 months of [<sup>F94</sup>IP completion day and in respect of] the adoption of the [<sup>F15</sup>list of species of special concern], [<sup>F95</sup>the appropriate authority] shall establish a surveillance system of invasive alien species [<sup>F7</sup>of special concern], or include it in their existing system, which collects and records data on the occurrence in the environment of invasive alien species by survey, monitoring or other procedures to prevent the spread of invasive alien species into or within [<sup>F1</sup>Great Britain].

2 The surveillance system referred to in paragraph 1 of this Article shall:

a cover [<sup>F96</sup>England and Wales] to determine the presence and distribution of new as well as already established invasive alien species [<sup>F7</sup>of special concern];

*Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)*

- b be sufficiently dynamic to detect rapidly the appearance in the environment of [<sup>F97</sup>England and Wales] of any invasive alien species [<sup>F7</sup>of special concern], whose presence was previously unknown;
- c build upon, be compatible with, and avoid duplication of relevant provisions for assessment and monitoring laid down by [<sup>F98</sup>retained EU law] or under international agreements and make use of the information provided by the existing systems of surveillance and monitoring set out in [<sup>F99</sup>retained EU law which transposed] Article 11 of Directive 92/43/EEC, Article 8 of Directive 2000/60/EC and Article 11 of Directive 2008/56/EC;
- d take into account the relevant transboundary impact and transboundary features, to the extent possible.

## <sup>F100</sup>Article 15 **U.K.**

### Official controls

1 By 2 January 2016, [<sup>F101</sup>the Secretary of State] shall have in place fully functioning structures to carry out the official controls necessary to prevent the intentional introduction into [<sup>F102</sup>Great Britain] of invasive alien species [<sup>F103</sup>of special concern]. Those official controls shall apply to the categories of goods falling within the Combined Nomenclature codes to which a reference is made in the [<sup>F104</sup>list of species of special concern], pursuant to Article 4(5).

2 Competent authorities shall carry out the appropriate risk-based controls to the goods mentioned in paragraph 1 of this Article verifying that:

- a they are not on the [<sup>F104</sup>list of species of special concern]; or
- b they are covered by a valid permit as referred to in Article 8.

3 The controls referred to in paragraph 2 of this Article, consisting of documentary, identity and where necessary, physical checks, shall take place when goods referred to in paragraph 1 of this Article are brought into [<sup>F102</sup>Great Britain]. [<sup>F105</sup>In paragraphs 4 to 6 and 8, “the competent authority” means the authority responsible for carrying out the official controls mentioned in paragraph 2].

4 The handling in free zones or free warehouses and the placing of goods referred to in paragraph 1 under the customs procedures of release for free circulation, transit, customs warehousing, inward processing, processing under customs control and temporary admission shall be subject to the declaration to the customs authorities of:

- a the relevant entry document duly completed by the competent authorities <sup>F106</sup>... attesting that the conditions referred to in paragraph 2 of this Article are met, in cases where the controls have been carried out at border entities in accordance with Regulation (EC) No 882/2004 and [<sup>F107</sup>retained EU law which transposed] Directives 91/496/EEC and 97/78/EC or at [<sup>F108</sup>points of entry as defined in] point (j) of Article 2(1) of Directive 2000/29/EC. The customs procedure indicated therein shall be followed; or
- b where goods are not subject to official controls according to [<sup>F109</sup>retained EU law], other documentary evidence that the controls have been carried out with satisfactory results and the subsequent entry document.

Those documents may also be submitted electronically.

5 If the controls establish non-compliance with this Regulation:

- a customs authorities shall suspend the placing under a customs procedure or detain the goods;
- b competent authorities <sup>F110</sup>... shall detain the goods.

*Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)*

Where goods are detained, they shall be entrusted to the competent authority in charge of applying this Regulation. That authority shall act in accordance with national legislation. [F111 The Secretary of State] may delegate specific functions to other authorities.

6 Costs incurred while the verification is carried out and those arising from any non-compliance shall be at the expense of the natural or legal person within [F102 Great Britain] who brought the goods into [F102 Great Britain]<sup>F112</sup>....

7 [F113 The Secretary of States] shall put in place procedures to ensure the exchange of relevant information and the efficient and effective coordination and cooperation between all authorities involved for the verification referred to in paragraph 2.

8 Based on best practices, [F114 the Secretary of State, together with the competent authority, must] develop guidelines and training programmes to facilitate the identification and detection of invasive alien species [F115 of special concern] and the performance of efficient and effective controls.

9 Where permits have been issued in accordance with Article 8, reference to a valid permit covering the declared goods shall be made in the customs declaration or relevant notifications to the border entity.]

#### Rapid eradication at an early stage of invasion

1 After early detection and within three months after the transmission of the early detection notification referred to in Article 16, [<sup>F123</sup>the appropriate authority must] apply eradication measures and notify those measures to [<sup>F124</sup>the other responsible authorities].

2 When applying eradication measures, [<sup>F125</sup>the appropriate authority must] ensure that the methods used are effective in achieving the complete and permanent removal of the population of the invasive alien species concerned, with due regard to human health and the environment, especially non-targeted species and their habitats, and ensuring that animals are spared any avoidable pain, distress or suffering.

3 [<sup>F126</sup>The appropriate authority must] monitor the effectiveness of the eradication. [<sup>F127</sup>The appropriate authority may] use the surveillance system provided for in Article 14 to this effect. The monitoring shall also assess the impact on non-targeted species, as appropriate.

**Changes to legislation:** There are currently no known outstanding effects for the Regulation (EU) No 1143/2014 of the European Parliament and of the Council. (See end of Document for details)

4 [F128The appropriate authority must] inform [F129the other responsible authorities] of the effectiveness of the measures taken and notify [F130the other responsible authorities] when a population of an invasive alien species [F7of special concern] has been eradicated. F131...

## Article 18 U.K.

### Derogations from the obligation of rapid eradication

1 <sup>F132</sup>The responsible authorities, acting jointly, may], based on robust scientific evidence, decide, within two months of the detection of an invasive alien species referred to in Article 16, not to apply eradication measures if at least one of the following conditions is met:

- a eradication is demonstrated to be technically unfeasible because the eradication methods available cannot be applied in the environment where the invasive alien species is established;
- b a cost-benefit analysis demonstrates on the basis of the available data with reasonable certainty that the costs will, in the long term, be exceptionally high and disproportionate to the benefits of eradication;
- c eradication methods are not available or are available but have very serious adverse impact on human health, the environment or other species.

F134<sup>2</sup> .....

F134<sup>3</sup> .....

4 <sup>F135</sup>The appropriate authority] shall ensure that containment measures are in place to avoid further spread of the invasive alien species to other <sup>F136</sup>parts of Great Britain] when, pursuant to paragraph 1, no eradication measures are applied.

5 Where <sup>F137</sup>the responsible authorities decide not to make a decision referred to in] paragraph 1 of this Article, <sup>F138</sup>the appropriate authority] shall apply the eradication measures referred to in Article 17 without delay.

6 Where the <sup>F139</sup>responsible authorities make a decision referred to in] paragraph 1 of this Article, the invasive alien species shall be subject to the management measures referred to in Article 19.

## CHAPTER IV **U.K.**

### MANAGEMENT OF INVASIVE ALIEN SPECIES THAT ARE WIDELY SPREAD

#### Article 19 **U.K.**

##### Management measures

1 Within 18 months of an invasive alien species being included on the [<sup>F15</sup>list of species of special concern], [<sup>F140</sup>the appropriate authority] shall have in place effective management measures for those invasive alien species [<sup>F7</sup>of special concern] which [<sup>F141</sup>the appropriate authority has] found to be widely spread on [<sup>F142</sup>the territory for which it is responsible], so that their impact on biodiversity, the related ecosystem services, and, where applicable, on human health or the economy are minimised.

Those management measures shall be proportionate to the impact on the environment and appropriate to the specific circumstances of [<sup>F143</sup>the constituent part of Great Britain], be based on an analysis of costs and benefits and also include, as far as is feasible, the restoration measures referred to in Article 20. They shall be prioritised based on the risk evaluation and their cost effectiveness.

2 The management measures shall consist of lethal or non-lethal physical, chemical or biological actions aimed at the eradication, population control or containment of a population of an invasive alien species. Where appropriate, management measures shall include actions applied to the receiving ecosystem aimed at increasing its resilience to current and future invasions. The commercial use of already established invasive alien species may be temporarily allowed as part of the management measures aimed at their eradication, population control or containment, under strict justification and provided that all appropriate controls are in place to avoid any further spread.

3 When applying management measures and selecting methods to be used, [<sup>F144</sup>the appropriate authority] shall have due regard to human health and the environment, especially non-targeted species and their habitats, and shall ensure that, when animals are targeted, they are spared any avoidable pain, distress or suffering, without compromising the effectiveness of the management measures.

4 The surveillance system provided for in Article 14 shall be designed and used to monitor the effectiveness of eradication, population control or containment measures in minimising the impact on biodiversity, the related ecosystems services and, where applicable, on human health or the economy. The monitoring shall also assess the impact on non-targeted species, as appropriate.

5 Where there is a significant risk that an invasive alien species [<sup>F7</sup>of special concern] will spread to another [<sup>F145</sup>part of the United Kingdom], [<sup>F146</sup>the appropriate authority] in which that species is present shall immediately notify the other [<sup>F147</sup>responsible authorities]. <sup>F148F149</sup>...

[<sup>F150</sup>6 Following a notification under paragraph 5 which relates to the offshore marine area, where appropriate the responsible authorities shall establish jointly agreed management measures.]

### Transitional provisions for non-commercial owners

1 By way of derogation from points (b) and (d) of Article 7(1), [<sup>F198</sup>and, in relation to introduction into Great Britain from Northern Ireland, point (a) of Article 7(1),] owners of companion animals not kept for commercial purposes that belong to the invasive alien species included on the [<sup>F15</sup>list of species of special concern] shall be allowed to keep them until the end of the animals' natural life, provided the following conditions are met:

- a the animals were kept before their inclusion on the [<sup>F15</sup>list of species of special concern];
- b the animals are kept in contained holding and all appropriate measures are put in place to ensure that reproduction or escape are not possible.

2 [<sup>F199</sup>The responsible authorities] shall take all reasonable steps to inform non-commercial owners of the risks posed by keeping the animals referred to in paragraph 1 and of the measures to be taken to minimise the risk of reproducing and escaping through awareness-raising and education programmes organised by [<sup>F200</sup>the responsible authorities].

3 Non-commercial owners who cannot ensure that the conditions set out in paragraph 1 are met, shall not be permitted to keep the animals concerned. [<sup>F201</sup>The responsible authorities] may offer them the possibility of having their animals taken from them. Where this occurs, due regard to animal welfare shall be given.

4 The animals referred to in paragraph 3 of this Article may be kept by the establishments referred to in Article 8 or in facilities established by [<sup>F202</sup>the responsible authorities] for that purpose.
