*ANNEX XIII***REPORTING ON LIQUIDITY (PART 1 of 5: LIQUID ASSETS)**

1. Liquid assets
  - 1.1. General remarks
    1. This is a summary template which contains information about assets for the purpose of monitoring the liquidity coverage requirement as specified in Article 412 REGULATION (EU) NO 575/2013. Items which do not need to be completed by institutions are colored grey.
    2. Assets shall be reported in one of six sections in this template:
    3. Assets which meet the requirements of Article 416 and Article 417: assets identified as liquid for reporting purposes in the REGULATION (EU) NO 575/2013, which meet the operational requirements for holdings of liquid assets.
    4. Assets which meet the requirements of Article 416 (1) (b) and (d) but do not meet the requirements of Article 417 (b) and (c) REGULATION (EU) NO 575/2013.
    5. Items subject to supplementary reporting of liquid assets according to Annex III REGULATION (EU) NO 575/2013
    6. Assets which do not meet the requirements of Article 416 REGULATION (EU) NO 575/2013 but meet the requirements of Article 417(b) and (c) REGULATION (EU) NO 575/2013.
    7. Treatment for jurisdictions with insufficient liquid assets
    8. Reporting of Shar'iah compliant assets as alternative assets under Article 509(2)(i).
  - 1.2. Specific remarks
    9. For items 1.1 to 1.2 institutions shall report the relevant amounts in column 030.
    10. For items 1.3 to 1.4 institutions shall report the market value of assets in column 010 and the value according to Article 418 in column 020 for each category of assets.
    11. For item 1.5 institutions shall report the relevant undrawn amount in column 040.
    12. For item 1.6.1/1.6.2 institutions shall report the relevant amounts in column 030/040.
    13. For items 1.7 to 2.2, in accordance with the last paragraph of Article 416(1) REGULATION (EU) NO 575/2013 and pending a uniform definition in accordance with Article 460 of high and extremely high liquidity and credit quality, institutions shall identify themselves in a given currency transferable assets that are of extremely high and high liquidity and credit quality and report their market value in columns 010 and 030 and the value according to Article 418 in columns 020 and 040.
    14. For items 1.3 to 1.4 and 1.7 to 1.14, institutions shall only report assets that fulfill all the operational requirements referred to in Article 417 REGULATION (EU) NO 575/2013.
    15. For items 2.1 to 2.2, institutions shall report assets which would otherwise qualify to be reported in section 1.1 to 1.14 but do not meet the operational requirements referred to in Article 417 (b) and (c) REGULATION (EU) NO 575/2013.

**▼B**

16. For items 1.1 to 2.2, with the exception of item 1.5, institutions shall only report assets which fulfill all the conditions referred to in Article 416(3) REGULATION (EU) NO 575/2013.
17. For items 3.1 to 3.12, institutions shall only report assets subject to supplementary reporting of liquid assets in accordance with Annex III REGULATION (EU) NO 575/2013. All items, with the exception of those referred to in sections 3.1, 3.2 and 3.9, must satisfy the conditions as set out in the last paragraph of that Annex.
18. For items 4.1 to 4.12.3, institutions shall only report assets which do not meet the requirements of Article 416 REGULATION (EU) NO 575/2013 but still meet the requirements of Article 417(b) and (c) REGULATION (EU) NO 575/2013
19. For items 5.1 to 5.2, institutions shall only report items related to the derogations as referred to in Article 419(2) REGULATION (EU) NO 575/2013 for currencies with constraints on the availability of liquid assets
20. For items 6.1 to 6.1.3, only Shar'iah compliant banks shall report items that are Shar'iah compliant financial products as an alternative to assets that would qualify as liquid assets for the purposes of Article 416 REGULATION (EU) NO 575/2013
21. The value of the liquid assets of all items in the template, with the exception of 1.1 to 1.2.1, 1.5 to 1.6.2, 3.1 to 3.2, 3.9 to 3.10 and 5.2 shall be the market value and the value after the application of the relevant haircuts. For items 1.1 to 1.2.1, 1.6 to 1.6.2, 3.1 to 3.2, 3.10 and 5.2 the amount of the item shall be reported. For item 1.5 and 3.9 the undrawn amount of the line shall be reported.

**REPORTING ON LIQUIDITY (PART 2 of 5: OUTFLOWS)**

## 1. Outflows

## 1.1. General remarks

1. This is a summary template which contains information about liquidity outflows measured over the next 30 days, for the purpose of monitoring the liquidity coverage requirement as specified in Article 412 of the REGULATION (EU) NO 575/2013. Items which do not need to be completed by institutions are coloured grey.
2. In accordance with Article 420 REGULATION (EU) NO 575/2013, this section covers reporting requirements on retail deposits (Article 421), other deposits and liabilities (Article 422), additional outflows (Article 423) and outflows from credit and liquidity facilities (Article 424).

## ▼B

3. In accordance with Article 421(5) of the REGULATION (EU) NO 575/2013, institutions may exclude from the calculation of outflows certain clearly circumscribed categories of retail deposits. For completeness, the reporting of these deposits is requested in item 1.1.6 of the template.

## 1.2. Outflows sub template

## 1.2.1. Instructions concerning specific rows

| 110-1130 | <p><b>1.2 outflows on other liabilities</b></p> <p>Article 422 REGULATION (EU) NO 575/2013</p> <p>Total outflows on other liabilities due over the next 30 days shall be reported in the following subcategories as follows:</p> <p>Liabilities reported in this section shall only consist of general obligations other than retail deposits defined in Article 411(2) (which shall instead be reported in item 1.1. above).</p> <p>Liabilities reported here shall fall due over the next 30 days, have an earliest possible contractual maturity date within the next 30 days or have an undefined maturity date. This includes both (i) liabilities with options that are exercisable at the investor's discretion and (ii) liabilities with options exercisable at the institution's discretion where the institution's ability not to exercise the option is limited for reputational reasons. In particular, where the market expects certain liabilities to be redeemed within the next 30 days, before their legal final maturity date, such liabilities shall be included in the appropriate subcategory.</p> |

| 960-990 | <p><b>1.2.3.1 in order to obtain clearing, custody or cash management services (excluding correspondent banking or prime brokerage)</b></p> <p>Article 422(3)(a) of REGULATION (EU) NO 575/2013</p> <p>Total amount of deposits that have to be maintained by the depositor in order to obtain clearing, custody or cash management services from the institution (excluding correspondent banking or prime brokerage), shall be reported in the following subcategories as follows:</p> <p>[Note: A clearing relationship, in this context, refers to a service arrangement that enables customers to transfer funds (or securities) indirectly through direct participants in domestic settlement systems to final recipients. Such services are limited to the following activities: transmission, reconciliation and confirmation of payment orders; daylight overdraft, overnight financing and maintenance of post-settlement balances; and determination of intra-day and final settlement positions. Clearing and related services must be provided under a legally binding agreement to institutional customers (Basel III liquidity rules text paragraph 75).</p> <p>A custody relationship, in this context, refers to the provision of safekeeping, reporting, processing of assets and/or the facilitation of the operational and administrative elements of related activities on behalf of customers in the process of their transacting and retaining financial assets. Custody related services must be provided under a legally binding custodial services or other similar agreement to institutional customers. Such services are limited to the settlement of securities transactions, the transfer of contractual payments, the processing of collateral, the execution of foreign currency transactions, the holding of related cash balances and the provision of ancillary cash management services. Also included is the receipt of dividends and other income, client subscriptions and redemptions, scheduled distributions of client funds and the payment of fees, taxes and other expenses. Custodial services can furthermore extend to asset and corporate trust servicing, treasury, escrow, funds transfer, stock transfer and agency services, including payment and settlement services (excluding correspondent banking), trade financing, and depository receipts (Basel III liquidity rules text paragraph 76).</p> <p>A cash management relationship, in this context, refers to the provision of cash management and related services to customers. Cash management and related]</p> |

**▼B****REPORTING ON LIQUIDITY (PART 3 of 5: INFLOWS)**

## 1. Inflows

## 1.1. General remarks

1. This is a summary template which contains information about liquidity inflows measured over the next 30 days, for the purpose of monitoring the liquidity coverage requirement as specified in Article 412 of the REGULATION (EU) NO 575/2013. Items which do not need to be completed by institutions are coloured grey.
2. In accordance with Article 425(2) REGULATION (EU) NO 575/2013, liquidity inflows shall:
  - (i) comprise only contractual inflows from exposures that are not passed due and for which the bank has no reason to expect non-performance within the 30-day time horizon.
  - (ii) be reported in full,.
3. In accordance with Article 425(7) REGULATION (EU) NO 575/2013, institutions shall not report inflows from any of the liquid assets reported in accordance with Article 416 other than payments due on the assets that are not reflected in the market value of the asset.
4. In accordance with Article 425(8) REGULATION (EU) NO 575/2013, institutions shall not report inflows from any new obligations entered into.

**REPORTING ON LIQUIDITY (PART 4 of 5: COLLATERAL SWAPS)**

## General remarks

- This is a summary template which contains information that will allow EBA to assess whether secured lending and collateral swap transactions have been properly unwound, where liquid assets referred to in points (a), (b) and (c) of Article 416(1) have been obtained against collateral that does not qualify under points (a), (b) and (c) of Article 416(1).

(a) Collateral swaps sub template

**▼B****REPORTING ON LIQUIDITY (PART 5 of 5: STABLE FUNDING)**

1. Items providing stable funding
  - 1.1. General remarks
    1. This is a summary template which contains information about items providing stable funding. Items which do not need to be completed by institutions are coloured grey.
    2. All own funds and liabilities reported on an institution's balance sheet shall be reported here. The total amount of these two categories shall therefore reflect the size of the institutions' total assets.
    3. In accordance with Article 427(2) REGULATION (EU) NO 575/2013, liabilities shall be reported in five buckets as follows:
      - (a) liabilities for which the closer of their maturity date and the earliest date at which they can contractually be called is within three months of the reporting date, shall be reported in column F of the relevant category. All sight deposits shall be reported here.
      - (b) liabilities for which the closer of their maturity date and the earliest date at which they can contractually be called is between three and six months from the reporting date, shall be reported in column G of the relevant category.
      - (c) liabilities for which the closer of their maturity date and the earliest date at which they can contractually be called is between 6 and 9 months from the reporting date, shall be reported in column H of the relevant category.
      - (d) liabilities for which the closer of their maturity date and the earliest date at which they can contractually be called is between 9 and 12 months from the reporting date, shall be reported in column I of the relevant category.
      - (e) liabilities for which the closer of their maturity date and the earliest date at which they can contractually be called is beyond one year of the reporting date and own funds shall be reported in column J of the relevant category.
    4. Institutions shall assume that investors redeem a call option at the earliest possible date. For funding with options exercisable at the institution's discretion, reputational factors that may limit the institution's ability to exercise the option shall be taken into account. In particular, where the market expects certain liabilities to be redeemed before their legal final maturity date, institutions shall assume such behaviour.
    5. For retail deposits reported in section 1.2, the same assumptions with regard to maturity for the Liquidity Coverage template shall be used in the Available Stable Funding template.

## 2. Items requiring stable funding

## 2.1. General remarks

1. This is a summary template which contains information about items requiring stable funding. Items which do not need to be completed by institutions are coloured grey.
2. All assets reported on an institutions balance sheet shall be reported here. The total amount reported shall therefore reflect the size of total own funds and liabilities together.
3. Treatment of maturity:

(i) In accordance with Article 428(2) of the REGULATION (EU) NO 575/2013, items shall be presented in five buckets as follows:

- (a) assets for which the closer of their maturity date and the earliest date at which they can contractually be called is within three months of the reporting date, shall be reported in column 010, 060 or 110 depending on the relevant category.

**▼B**

- (b) assets for which the closer of their maturity date and the earliest date at which they can contractually be called is between three and six months from the reporting date, shall be reported in column 020, 070, or 120 depending on the relevant category.
  - (c) assets for which the closer of their maturity date and the earliest date at which they can contractually be called is between 6 and 9 months from the reporting date, shall be reported in column 030, 080, or 130 depending on the relevant category.
  - (d) assets for which the closer of their maturity date and the earliest date at which they can contractually be called is between 9 and 12 months from the reporting date, shall be reported in column 040, 090, or 140 depending on the relevant category.
  - (e) assets for which the closer of their maturity date and the earliest date at which they can contractually be called is beyond one year of the reporting date and own funds shall be reported in column 050, 100, or 150 depending on the relevant category.
- (ii) For options exercisable at the institution's discretion, institutions shall take into account reputational factors that may limit the ability not to exercise the option. In particular, if third parties expect that an option will not be exercised, the institution shall assume such behaviour for the purpose of reporting assets in this template.
  - (iii) Assets shall be reported according to their residual contract maturity and not behavioural assumptions.
4. In accordance with Article 510 of the REGULATION (EU) NO 575/2013, for the purpose of monitoring Stable Funding, for each category of assets reported in the required stable funding template, institutions shall provide a separate break down of the assets encumbrance as follows:
- (i) The amount of assets reported which are unencumbered shall be reported in the first sub-category.
  - (ii) The amount of assets which are encumbered shall be reported in the relevant sub-line depending on the period of encumbrance, as follows:
    - i. for a period within three months
    - ii. for a period between three and 6 months
    - iii. for a period between 6 and 9 months
    - iv. for a period between 9 and 12 months
    - v. for a period greater than 12 months
5. Treatment of assets received or lent in secured lending and capital market driven transactions in accordance with Article 192 of REGULATION (EU) NO 575/2013:
- (i) Institutions shall exclude assets which they have borrowed in secured lending and capital market driven transactions in accordance with Article 192 or REGULATION (EU) NO 575/2013 (such as reverse repurchase transactions and collateral swaps) of which they do not have beneficial ownership.

**▼B**

- (ii) Institutions shall report those assets they have lent in secured lending and capital market driven transactions in accordance with Article 192 or REGULATION (EU) NO 575/2013 (such as repurchase transactions or collateral swaps) of which they retain beneficial ownership.
- (iii) Where an institution has encumbered securities in repurchase transactions lent in secured lending and capital market driven transactions in accordance with Article 192 or REGULATION (EU) NO 575/2013 but retained beneficial ownership and they remain on their balance sheet, they shall allocate such securities to the appropriate RSF category.

## 6. Treatment of derivatives payables and receivables:

- (i) An institution will usually have both net derivatives liabilities (i.e. payables) and net derivative assets (i.e. receivables) on its balance sheet. Institutions shall calculate these according to regulatory netting rules, not accounting rules, and report the amounts in both template 1.1. 'Required funding' and template 1.2 'Stable funding' accordingly.

## 2.2. Items requiring stable funding

## 2.2.1. Instructions concerning specific rows

**▼ M1***ANNEX XIV*

## Single Data Point Model

All data items set out in Annexes I, III, IV, VI, VIII, X, XII and XVI shall be transformed into a single data point model which is the basis for uniform IT systems of institutions and competent authorities.

The single data point model shall meet the following criteria:

- (a) provide a structured representation of all data items set out in Annexes I, III, IV, VI, VIII, X, XII and XVI;
- (b) identify all the business concepts set out in Annexes I to XIII, XVI and XVII;
- (c) provide a data dictionary identifying table labels, ordinate labels, axis labels, domain labels, dimension labels and member labels;
- (d) provide metrics which define the property or amount of data points;
- (e) provide data point definitions that are expressed as a composition of characteristics that univocally identify the financial concept;
- (f) contain all the relevant technical specifications necessary for developing IT reporting solutions producing uniform supervisory data.

**▼ M1***ANNEX XV*

## Validation Rules

The data items set out in Annexes I, III, IV, VI, VIII, X, XII and XVI shall be subject to validation rules ensuring data quality and consistency.

The validation rules shall meet the following criteria:

- (a) define the logical relationships between relevant data points;
- (b) include filters and preconditions that define a set of data to which a validation rule applies;
- (c) check the consistency of the reported data;
- (d) check the accuracy of the reported data;
- (e) set default values which shall be applied where the relevant information has not been reported.

    - 6.3.2. INSTRUCTIONS CONCERNING SPECIFIC COLUMNS

**GENERAL INSTRUCTIONS**

- 1. STRUCTURE AND CONVENTIONS
  - 1.1. Structure
    - 1. The framework consists of five sets of templates which comprise a total of nine templates according to the following scheme:
      - (a) Part A: Encumbrance overview:
        - AE-ASS template. Assets of the reporting institution
        - AE-COL template. Collateral received by the reporting institution

▼ **M3**

— AE-NPL. Own covered bonds and asset-backed securities (hereinafter ‘ABS’) issued and not yet pledged

— AE-SOU. Sources of encumbrance

(b) Part B: Maturity data:

— AE-MAT template. Maturity data

(c) Part C: Contingent encumbrance

— AE-CONT template. Contingent encumbrance

(d) Part D: Covered bonds

— AE-CB template. Covered bonds issuance

(e) Part E: Advanced data:

— AE-ADV-1 template. Advanced template for assets of the reporting institution

— AE-ADV-2 template. Advanced template for collateral received by the reporting institution

2. For each template legal references are provided as well as further detailed information regarding more general aspects of the reporting.

### 1.2. Accounting standard

3. Institutions shall report carrying amounts under the accounting framework they use for the reporting of financial information in accordance with Articles 9 to 11. Institutions that are not required to report financial information shall use their respective accounting framework.

4. For the purposes of this Annex, ‘IAS’ and ‘IFRS’ refer to the international accounting standards as defined in Article 2 of Regulation (EC) No 1606/2002. For institutions which report under IFRS standards, references have been inserted to the relevant IFRS standards.

### 1.3. Numbering convention

5. The following general notation is used in these instructions to refer to the columns, rows and cells of a template: {Template; Row; Column}. An asterisk sign is used to indicate that the validation is applied to the whole row or column. For example {AE-ASS; \*, 2} refers to the data point of any row for column 2 of the AE-ASS template.

6. In the case of validations within a template the following notation is used to refer to data points from that template: {Row; Column}.

### 1.4. Sign convention

7. Templates in Annex XVI shall follow the sign convention described in paragraphs 9 and 10 of Part I of Annex V.

▼ **M3**

## 1.5. Level of application

8. The level of application of the reporting on asset encumbrance follows that of the reporting requirements on own funds under the first subparagraph of Article 99(1) of Regulation (EU) No 575/2013 (CRR). Consequently, institutions that are not subject to prudential requirements in accordance with Article 7 of CRR are not required to report information on asset encumbrance.

## 1.6. Proportionality

9. For the purpose of Article 16a(2)(b), the asset encumbrance level shall be calculated as follows:

— Carrying amount of encumbered assets and collateral = {AE-ASS;010;010} + {AE-COL;130;010}.

— Total assets and collateral = {AE-ASS;010;010} + {AE-ASS;010;060} + {AE-COL;130;010} + {AE-COL;130;040}.

— Asset encumbrance ratio = (Carrying amount of encumbered assets and collateral)/(Total assets and collateral)

10. For the purpose of Article 16a(2)(a), the sum of total assets shall be calculated as follows:

— Total assets = {AE-ASS;010;010} + {AE-ASS;010;060}

## 1.7. Definition of encumbrance

11. For the purpose of this Annex and Annex XVI, an asset shall be treated as encumbered if it has been pledged or if it is subject to any form of arrangement to secure, collateralise or credit enhance any transaction from which it cannot be freely withdrawn.

It is important to note, that assets pledged that are subject to any restrictions in withdrawal, such as for instance assets that require prior approval before withdrawal or replacement by other assets, should be considered encumbered. The definition is not based on an explicit legal definition, such as title transfer, but rather on economic principles, as the legal frameworks may differ in this respect across countries. The definition is however closely linked to contractual conditions. The EBA sees the following types of contracts being well covered by the definition (this is a non-exhaustive list):

— secured financing transactions, including repurchase contracts and agreements, securities lending and other forms of secured lending;

— various collateral agreements, for instance collateral placed for the market value of derivatives transactions;

— financial guarantees that are collateralised. It should be noted, that if there is no impediment to withdrawal of collateral, such as prior approval, for the unused part of guarantee, then only the used amount should be allocated (on a pro-rata allocation);

**▼ M3**

- collateral placed at clearing systems, CCPs and other infrastructure institutions as a condition for access to service. This includes default funds and initial margins;
- central bank facilities. Pre-positioned assets should not be considered encumbered, unless the central bank does not allow withdrawal of any assets placed without prior approval. As for unused financial guarantees, the unused part, i.e. above the minimum amount required by the central bank, should be allocated on a pro-rata basis among the assets placed at the central bank;
- underlying assets from securitisation structures, where the financial assets have not been de-recognised from the institution's financial assets. The assets that are underlying retained securities do not count as encumbered, unless these securities are pledged or provided as collateral in any way to secure a transaction;
- assets in cover pools used for covered bond issuance. The assets that are underlying covered bonds count as encumbered, except in certain situations where the institution holds the corresponding covered bonds ('own-issued bonds');
- as a general principle, assets which are being placed at facilities that are not used and can be freely withdrawn should not be considered encumbered.

**TEMPLATE-RELATED INSTRUCTIONS****2. PART A: ENCUMBRANCE OVERVIEW**

12. The encumbrance overview templates differentiate assets which are used to support funding or collateral needs at the balance sheet date ('point-in time encumbrance') from those assets which are available for potential funding needs.
13. The overview template shows the amount of encumbered and non-encumbered assets of the reporting institution in a tabular format by products. The same breakdown also applies to collateral received and own debt securities issued other than covered bonds and securitisations.

**2.1. Template: AE-ASS. Assets of the reporting institution****2.1.1. General remarks**

14. This paragraph sets out instructions that apply to the main types of transaction that are relevant when completing the AE templates:

All transactions that increase the level of encumbrance of an institution have two aspects that shall be reported independently throughout the AE templates. Such transactions shall be reported both as a source of encumbrance and as an encumbered asset or collateral.

The following examples describe how to report a type of transaction of this Part but the same rules apply to the other AE templates.

**▼ M3****(a) Collateralised deposit**

A collateralised deposit is reported as follows:

- (i) the carrying amount of the deposit is registered as a source of encumbrance in {AE-SOU; r070; c010};
- (ii) where the collateral is an asset of the reporting institution: its carrying amount is reported in {AE-ASS; \*; c010} and {AE-SOU; r070; c030}; its fair value is reported in {AE-ASS; \*; c040};
- (iii) where the collateral has been received by the reporting institution, its fair value is reported in {AE-COL; \*; c010}, {AE-SOU; r070; c030} and {AE-SOU; r070; c040}.

**(b) Repo/matching repos**

A repurchase agreement (hereinafter 'repo') is reported as follows:

- (i) the carrying amount of the repo is reported as a source of encumbrance in {AE-SOU; r050; c010};
- (ii) the collateral of the repo should be shown:
- (iii) where the collateral is an asset of the reporting institution: its carrying amount is reported in {AE-ASS; \*; c010} and {AE-SOU; r050; c030}; its fair value is reported in {AE-ASS; \*; c040};
- (iv) where the collateral has been received by the reporting institution through a previous reverse repurchase agreement (matching repo), its fair value is reported in {AE-COL; \*; c010}, {AE-SOU; r050; c030} and in {AE-SOU; r050; c040}.

**(c) Central bank funding**

As collateralised central bank funding is only a specific case of a collateralised deposit or a repo transaction in which the counterparty is a central bank, the rules in i) and ii) above apply.

For operations where it is not possible to identify the specific collateral to each operation, as collateral is pooled together, the collateral breakdown must be done on a proportional basis, based on the composition of the pool of collateral.

Assets that have been pre-positioned with central banks are not encumbered assets unless the central bank does not allow withdrawal of any assets placed without prior approval. For unused financial guarantees, the unused part, i.e. the amount above the minimum required by the central bank, is allocated on a pro-rata basis among the assets placed at the central bank.

**(d) Securities lending**

For securities lending with cash collateral the rules for repos/matching repos apply.

**▼ M3**

Securities lending without cash collateral is reported as follows:

- (i) the fair value of the securities borrowed is reported as a source of encumbrance in {AE-SOU; r150; c010}. When the lender does not receive any securities in return for the securities lent but receives a fee instead, {AE-SOU; r150; c010} is reported as zero;
- (ii) where the securities lent as collateral are an asset of the reporting institution: their carrying amount is reported in {AE-ASS; \*; c010} and {AE-SOU; r150; c030}; their fair value is reported in {AE-ASS; \*; c040};
- (iii) where the securities lent as collateral are received by the reporting institution, their fair value is reported in {AE-COL; \*; c010}, {AE-SOU; r150; c030} and {AE-SOU; r150; c040}.

**(e) Derivatives (liabilities)**

Collateralised derivatives with a negative fair value are reported as follows:

- (i) the carrying amount of the derivative is reported as a source of encumbrance in {AE-SOU; r020; c010};
- (ii) the collateral (initial margins required to open the position and any collateral placed for the market value of derivatives transactions) are reported as follows:
  - (i) where it is an asset of the reporting institution: its carrying amount is reported in {AE-ASS; \*; c010} and {AE-SOU; r020; c030}; its fair value is reported in {AE-ASS; \*; c040};
  - (ii) where it is collateral received by the reporting institution, its fair value is reported in {AE-COL; \*; c010}, {AE-SOU; r020; c030} and {AE-SOU; r020; c040}.

**(f) Covered bonds**

Covered bonds for the entire asset encumbrance reporting are instruments referred to in the first subparagraph of Article 52(4) of the Directive 2009/65/EU, irrespective of whether these instruments take the legal form of a security or not.

No specific rules apply to covered bonds where there is no retention of part of the securities issued by the reporting institution.

In case of retention of part of the issuance and in order to avoid double counting, the proposed treatment below shall apply:

- (i) where the own covered bonds are not pledged, the amount of the cover pool that is backing those securities retained and not yet pledged is reported in the AE-ASS templates as non-encumbered assets. Additional information about the retained covered bonds not yet pledged (underlying assets, fair value and eligibility of those available for encumbrance and nominal of those non-available for encumbrance) is reported in the AE-NPL template;

▼ **M3**

- (ii) where the own covered bonds are pledged, then the amount of the cover pool that is backing those securities retained and pledged is included in the AE-ASS template as encumbered assets.

The following table sets out how to report covered bond issuance of EUR 100 of which 15 % is retained and not pledged and 10 % is retained and pledged as collateral in a EUR 11 repo transaction with a central bank, where the cover pool comprises unsecured loans and the carrying amount of the loans is EUR 150.

| <b>Own covered bonds retained</b> | 15 % 100 = 15   | {AE-Not pledged, r010, c040} | 15 % (150) = 22,5    | {AE-Assets, r100, c60}<br>{AE-Not pledged, r020, c010} |

(g) **Securitisations**

Securitisations mean debt securities held by the reporting institution originated in a securitisation transaction as defined in Article 4(61) of CRR.

For securitisations that remain in the balance sheet (non-derecognised), the rules for covered bonds apply.

For derecognised securitisations, there is no encumbrance where the institution holds some securities. Those securities will appear in the trading book or in the banking book of the reporting institutions as any other security issued by a third party.

## 2.2. Template: AE-COL. Collateral received by the reporting institution

## 2.2.1. General remarks

15. For the collateral received by the reporting institution and the own debt securities issued other than own covered bonds or ABSs, the category of 'non-encumbered' assets is split between those 'available for encumbrance' or potentially eligible to be encumbered and those 'non-available for encumbrance'.
16. Assets are 'non-available for encumbrance' when they have been received as collateral and the reporting institution is not permitted to sell or re-pledge the collateral, except in the case of a default by the owner of the collateral. Own debt securities issued other than own covered bonds or securitisations are non-available for encumbrance when there is any restriction in the terms of the issuance to sell or re-pledge the securities held.
17. For the purpose of the asset encumbrance reporting, securities borrowed in exchange for a fee without providing cash-collateral or non-cash collateral are reported as collateral received.

2.3. Template: AE-NPL. Own covered bonds and ABSs issued and not yet pledged

2.3.1. General remarks

18. To avoid double counting, the following rule applies in relation to own covered bonds and securitisations issued and retained by the reporting institution:

- (a) where those securities are pledged, the amount of the cover pool/underlying assets that are backing them shall be reported in the AE-ASS template as encumbered assets. The source of funding in the event of pledging own covered bonds and securitisations is the new transaction in which the securities are being pledged (central bank funding or other type of secured funding) and not the original issuance of covered bonds or securitisations;

▼ **M3**

- (b) where those securities are not yet pledged, the amount of the cover pool/underlying assets that are backing those securities shall be reported in the AE-ASS template as non-encumbered assets.

|         | Reporting institutions that cannot positively establish central bank eligibility for an item, for instance jurisdictions that operate without a clear definition of central bank repo eligible assets or do not have access to continuously functioning central bank repo market, may abstain from reporting the associated amount for that item, i.e. leave the reporting field blank. |
| 040     | <p><b>Nominal of own debt securities issued non-available for encumbrance</b></p> <p>Nominal amount of the own covered bonds and own securitisations retained that are non-encumbered and also non-available for encumbrance.</p>                                                                                                                                                       |

2.4. Template: AE-SOU. Sources of encumbrance

2.4.1. General remarks

19. This template provides information on the importance for the reporting institution of the different sources of encumbrance, including those with no associated funding as loans commitments or financial guarantees received and securities lending with non-cash collateral.

20. The total amounts of assets and collateral received in the AE-ASS and the AE-COL templates meet the following validation rule: {AE-SOU; r170; c030} = {AE-ASS; r010; c010} + {AE-COL; r130; c010} + {AE-COL; r240; c010}.

## 4. PART C: CONTINGENT ENCUMBRANCE

## 4.1. General remarks

22. This template requires institutions to calculate the level of asset encumbrance in a number of stressed scenarios.
23. Contingent encumbrance refers to the additional assets which may need to be encumbered when the reporting institutions faces adverse developments triggered by an external event over which the reporting institution has no control (including a downgrade, decrease of the fair value of the encumbered assets or a general loss of confidence). In these cases, the reporting institution will need to encumber additional assets as a consequence of already existing transactions. The additional amount of encumbered assets shall be net of the impact of the institution's hedge transactions against the events described under the aforementioned stressed scenarios.
24. This template includes the following two scenarios for reporting contingent encumbrance which are set out in more detail in points 4.1.1. and 4.1.2. The information reported shall be the institution's reasonable estimate based on the best available information.

**▼ M3**

- (a) Decrease of the fair value of the encumbered assets by 30 %. This scenario only covers a change in the underlying fair value of the assets, and not any other change which may affect its carrying amount such as foreign exchange gains or losses or potential impairment. The reporting institution may then be forced to post more collateral in order to keep the value of the collateral constant.
  
- (b) A 10 % depreciation in each currency in which the institution has aggregate liabilities amounting to or exceeding 5 % of the institution's total liabilities.

25. The scenarios shall be reported independently of each other, and significant currency depreciations shall also be reported independently of depreciations of other significant currencies. Consequently institutions shall not take correlations between the scenarios into account.

4.1.1. Scenario A: Decrease of 30 % of encumbered assets

- 26. It shall be assumed that all encumbered assets decrease 30 % in value. The need of additional collateral arising from such a decrease shall take into account existing levels of over-collateralisation, such that only the minimum collateralisation level is maintained. The need of additional collateral shall also take into account the contractual requirements of the contracts and agreements impacted, including threshold triggers.
  
- 27. Only contracts and agreements, where there is a legal obligation to supply additional collateral shall be included. This includes covered bond issues where there is a legal requirement to uphold minimum levels of over collateralisation but no requirement to maintain existing rating levels on the covered bond.

4.1.2. Scenario B: Depreciation of 10 % in significant currencies

- 28. A currency is a significant currency if the reporting institution has aggregate liabilities in that currency amounting to or exceeding 5 % of the institution's total liabilities
  
- 29. The calculation of a 10 % depreciation shall take into account both changes on the asset and liability side, i.e. focus the asset-liability mismatches. For instance a repo transactions in USD based on USD assets does not cause additional encumbrance, whereas a repo transaction in USD based on a EUR asset causes additional encumbrance.
  
- 30. All transactions which have a cross-currency element shall be covered by this calculation.

4.2. Template: AE-CONT. Contingent encumbrance

4.2.1. Instructions concerning specific rows

- 31. See instructions concerning specific columns of the AE-SOU template in point 1.5.1. The content of the columns in AE-CONT template does not differ from the AE-SOU template.

| 010     | <p><b>Matching liabilities, contingent liabilities or securities lent</b></p> <p>Same instructions and data as for column 010 of the AE-SOU template.</p> <p>Amount of the matching financial liabilities, contingent liabilities (loan commitments received and financial guarantees received) and of the securities lent with non-cash collateral, insofar as these transactions entail asset encumbrance for that institution.</p> <p>As referred for each row in the template, financial liabilities are reported at their carrying amount, contingent liabilities at their nominal and securities lent with non-cash collateral at their fair value.</p> |
| 020     | <p><b>A. Additional amount of encumbered assets</b></p> <p>Additional amount of assets that would become encumbered due to a legal, regulatory or contractual provision that could be triggered in the event of occurrence of scenario A.</p> <p>Following the instructions laid down in Part A of this Annex, these amounts are reported at their carrying amount if the amount is related to assets of the reporting institution or at their fair value if related to collateral received. Amounts exceeding the non-encumbered assets and collateral of the institution are reported at fair value.</p>                                                    |
| 030     | <p><b>B. Additional amount of encumbered assets. Significant currency 1</b></p> <p>Additional amount of assets that would become encumbered due to a legal, regulatory or contractual provision that could be triggered in the event of a depreciation of significant currency number 1 in scenario B.</p> <p>See rules for amount types in row 020.</p>                                                                                                                                                                                                                                                                                                      |
| 040     | <p><b>B. Additional amount of encumbered assets. Significant currency 2</b></p> <p>Additional amount of assets that would become encumbered due to a legal, regulatory or contractual provision that could be triggered in the event of a depreciation of significant currency number 2 in scenario B.</p> <p>See rules for amount types in row 020.</p>                                                                                                                                                                                                                                                                                                      |

## 5. PART D: COVERED BONDS

## 5.1. General remarks

32. The information in this template is reported for all UCITS-compliant covered bonds issued by the reporting institution. UCITS-compliant covered bonds are the bonds referred to in the first subparagraph of Article 52(4) of Directive 2009/65/EC. These are covered bonds issued by the reporting institution if the reporting institution is in relation to the covered bond subject by law to special public supervision designed to protect bond-holders and if for such covered bond it is required that sums deriving from the issue of those bonds shall be invested in accordance with the law in assets which, during the whole period of validity of the bonds, are capable of covering claims attaching to the bonds and which, in the event of failure of the issuer, would be used on a priority basis for the reimbursement of the principal and payment of the accrued interest.

▼ **M3**

33. Covered bonds issued by or on behalf of the reporting institution that are not UCITS-compliant covered bonds shall not be reported within the AE-CB templates.

34. The reporting shall be based on the statutory covered bond regime, i.e. the legal framework which applies to the covered bond programme.

5.2. Template: AE-CB. Covered bonds issuance

5.2.1. Instructions concerning z-axis

| z-axis | Legal references and instructions                                                                                                                                                                                                                                                  |

## 6. PART E: ADVANCED DATA

## 6.1. General remarks

35. Part E follows the same structure as in the encumbrance overview templates in Part A with different templates for the encumbrance of the assets of the reporting institution and for the collateral received: AE-ADV1 and AE-ADV2 respectively. Consequently, matching liabilities correspond to the liabilities that are secured by the encumbered assets and no one-to-one relation has to exist.

## 6.2. Template: AE-ADV1. Advanced template for assets of the reporting institution

## 6.2.1. Instructions concerning specific rows

| Rows    | Legal references and instructions                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 010-020 | <b>Central bank funding (of all types, including repos)</b><br>All types of liabilities of the reporting institution in which the counterparty of the transaction is a central bank.<br><br>Assets that have been pre-positioned with central banks shall not be treated as encumbered assets unless the central bank does not allow withdrawal of any asset placed without prior approval. For unused financial guarantees, the unused part, i.e., the amount above the minimum required by the central bank, shall be allocated on a pro-rata basis among the assets placed at the central bank. |
| 030-040 | <b>Exchanged traded derivatives</b><br>Carrying amount of the collateralised derivatives of the reporting institution that are financial liabilities, insofar as these derivatives are listed or traded on a recognised or designated investment exchange and they entail asset encumbrance for that institution.                                                                                                                                                                                                                                                                                  |
