

Commission Regulation (EU) 2015/1222 of 24 July 2015 establishing a guideline on capacity allocation and congestion management (Text with EEA relevance) (revoked)

TITLE I

GENERAL PROVISIONS

Article 1	Subject matter and scope
Article 2	Definitions
Article 3	Objectives of capacity allocation and congestion management cooperation
Article 4	NEMOs designation and revocation of the designation
Article 5	NEMOs designation in case of a national legal monopoly for trading services
Article 6	NEMO designation criteria
Article 7	NEMO tasks
Article 8	TSOs' tasks related to single day-ahead and intraday coupling
Article 9	Adoption of terms and conditions or methodologies
Article 10	Day-to-day management of the single day-ahead and intraday coupling
Article 11	Stakeholder involvement
Article 12	Consultation
Article 13	Confidentiality obligations

TITLE II

REQUIREMENTS FOR TERMS, CONDITIONS AND METHODOLOGIES CONCERNING CAPACITY ALLOCATION AND CONGESTION MANAGEMENT

CHAPTER 1

Capacity calculation

Section 1

General requirements

Article 14	Capacity calculation time-frames
Article 15	Capacity calculation regions

Section 2

The common grid model

Article 16	Generation and load data provision methodology
Article 17	Common grid model methodology
Article 18	Scenarios
Article 19	Individual grid model

Changes to legislation: This version of this Regulation was derived from EUR-Lex on IP completion day (31 December 2020 11:00 p.m.). It has not been amended by the UK since then. Find out more about legislation originating from the EU as published on legislation.gov.uk. (See end of Document for details)

Section 3

Capacity calculation methodologies

- Article 20 Introduction of flow-based capacity calculation methodology
- Article 21 Capacity calculation methodology
- Article 22 Reliability margin methodology
- Article 23 Methodologies for operational security limits, contingencies and allocation constraints
- Article 24 Generation shift keys methodology
- Article 25 Methodology for remedial actions in capacity calculation
- Article 26 Cross-zonal capacity validation methodology

Section 4

The capacity calculation process

- Article 27 General provisions
- Article 28 Creation of a common grid model
- Article 29 Regional calculation of cross-zonal capacity
- Article 30 Validation and delivery of cross-zonal capacity

Section 5

Biennial report on capacity calculation and allocation

- Article 31 Biennial report on capacity calculation and allocation

CHAPTER 2

Bidding zone configuration

- Article 32 Reviewing existing bidding zone configurations
- Article 33 Criteria for reviewing bidding zone configurations
- Article 34 Regular reporting on current bidding zone configuration by ENTSO for Electricity and the Agency

CHAPTER 3

Redispatching and countertrading

- Article 35 Coordinated redispatching and countertrading

CHAPTER 4

Algorithm development

- Article 36 General provisions
- Article 37 Algorithm development

CHAPTER 5

Single day-ahead coupling

Section 1

The price coupling algorithm

Article 38	Objectives of the price coupling algorithm
Article 39	Inputs and results of the price coupling algorithm
Article 40	Products accommodated
Article 41	Maximum and minimum prices
Article 42	Pricing of day-ahead cross-zonal capacity
Article 43	Methodology for calculating scheduled exchanges resulting from single day-ahead coupling
Article 44	Establishment of fallback procedures
Article 45	Arrangements concerning more than one NEMO in one bidding zone and for interconnectors which are not operated by certified TSOs

Section 2

The single day-ahead coupling process

Article 46	Provision of input data
Article 47	Operation of single day-ahead coupling
Article 48	Delivery of results
Article 49	Calculation of scheduled exchanges resulting from single day-ahead coupling
Article 50	Initiation of fallback procedures

CHAPTER 6

Single intraday coupling

Section 1

Objectives, conditions and results of single intraday coupling

Article 51	Objectives of the continuous trading matching algorithm
Article 52	Results of the continuous trading matching algorithm
Article 53	Products accommodated
Article 54	Maximum and minimum prices
Article 55	Pricing of intraday capacity
Article 56	Methodology for calculating scheduled exchanges resulting from single intraday coupling
Article 57	Arrangements concerning more than one NEMO in one bidding zone and for interconnectors which are not operated by certified TSOs

Changes to legislation: This version of this Regulation was derived from EUR-Lex on IP completion day (31 December 2020 11:00 p.m.). It has not been amended by the UK since then. Find out more about legislation originating from the EU as published on legislation.gov.uk. (See end of Document for details)

Section 2

The single intraday coupling process

- Article 58 Provision of input data
- Article 59 Operation of single intraday coupling
- Article 60 Delivery of results
- Article 61 Calculation of scheduled exchanges resulting from single intraday coupling
- Article 62 Publication of market information
- Article 63 Complementary regional auctions

Section 3

Transitional intraday arrangements

- Article 64 Provisions relating to explicit allocation
- Article 65 Removal of explicit allocation
- Article 66 Provisions relating to intraday arrangements
- Article 67 Explicit requests for capacity

CHAPTER 7

Clearing and settlement for single day-ahead and intraday coupling

- Article 68 Clearing and settlement

CHAPTER 8

Firmness of allocated cross-zonal capacity

- Article 69 Proposal for day-ahead firmness deadline
- Article 70 Firmness of day-ahead capacity and allocation constraints
- Article 71 Firmness of intraday capacity
- Article 72 Firmness in the event of force majeure or emergency situations

TITLE III

COSTS

CHAPTER 1

Congestion income distribution methodology for single day-ahead and intraday coupling

- Article 73 Congestion income distribution methodology

CHAPTER 2

Redispatching and countertrading cost sharing methodology for single day-ahead and intraday coupling

- Article 74 Redispatching and countertrading cost sharing methodology

CHAPTER 3

Capacity allocation and congestion management cost recovery

- Article 75 General provisions on cost recovery
- Article 76 Costs of establishing, amending and operating single day-ahead and intraday coupling
- Article 77 Clearing and settlement costs
- Article 78 Costs of establishing and operating the coordinated capacity calculation process
- Article 79 Costs of ensuring firmness
- Article 80 Cost sharing between NEMOs and TSOs in different Member States

TITLE IV

DELEGATION OF TASKS AND MONITORING

- Article 81 Delegation of tasks
- Article 82 Monitoring of the implementation of single day-ahead and intraday coupling

TITLE V

TRANSITIONAL AND FINAL PROVISIONS

- Article 83 Transitional provisions for Ireland and Northern Ireland
- Article 84 Entry into force
Signature

Changes to legislation:
