Changes to legislation: Commission Delegated Regulation (EU) 2015/2205, Introductory Text is up to date with all changes known to be in force on or before 08 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2205 may be subject to amendment by EU Exit Instruments made by both the Financial Conduct Authority and the Bank of England under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 5. These amendments are not currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

Commission Delegated Regulation (EU) 2015/2205 of 6 August
2015 supplementing Regulation (EU) No 648/2012 of the European
Parliament and of the Council with regard to regulatory technical
standards on the clearing obligation (Text with EEA relevance)

COMMISSION DELEGATED REGULATION (EU) 2015/2205

of 6 August 2015

supplementing Regulation (EU) No 648/2012 of the European Parliament and of
the Council with regard to regulatory technical standards on the clearing obligation

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) No 648/2012 of the European Parliament and of the Council
of 4 July 2012 on OTC derivatives, central counterparties and trade repositories⁽¹⁾, and in
particular Article 5(2) thereof,

Whereas:

- (1) The European Securities and Markets Authority (ESMA) has been notified of the classes of interest rate over-the-counter (OTC) derivatives that certain central counterparties (CCPs) have been authorised to clear. For each of those classes ESMA has assessed the criteria that are essential for subjecting them to the clearing obligation, including the level of standardisation, the volume and liquidity, and the availability of pricing information. With the overarching objective of reducing systemic risk, ESMA has determined the classes of interest rate OTC derivatives that should be subject to the clearing obligation in accordance with the procedure set out in Regulation (EU) No 648/2012.
- (2) Interest rate OTC derivative contracts can have a constant notional amount, a variable notional amount or a conditional notional amount. Contracts with a constant notional amount have a notional amount which does not vary over the life of the contract. Contracts with a variable notional amount have a notional amount that varies over the life of the contract in a predictable way. Contracts with a conditional notional amount have a notional amount which varies over the life of the contract in an unpredictable way. Conditional notional amounts add complexity to the pricing and risk management associated with interest rate OTC derivative contracts and thus to the ability of CCPs to clear them. This feature should be taken into account when defining the classes of interest rate OTC derivatives to be subject to the clearing obligation.
- (3) In determining which classes of OTC derivative contracts should be subject to the clearing obligation, the specific nature of OTC derivative contracts which are concluded with covered bond issuers or with cover pools for covered bonds should be taken into

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Delegated Regulation (EU) 2015/2205, Introductory Text is up to date with all changes known to be in force on or before 08 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2205 may be subject to amendment by EU Exit Instruments made by both the Financial Conduct Authority and the Bank of England under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 5. These amendments are not currently available on legislation.gov.uk. ~~In this respect, the classes of interest rate OTC derivatives subject to the~~

clearing obligation under this Regulation should not encompass contracts concluded with covered bond issuers or cover pools for covered bonds, provided they meet certain conditions.

- (4) Different counterparties need different periods of time for putting in place the necessary arrangements to clear the interest rate OTC derivatives subject to the clearing obligation. In order to ensure an orderly and timely implementation of that obligation, counterparties should be classified into categories in which sufficiently similar counterparties become subject to the clearing obligation from the same date.
- (5) A first category should include both financial and non-financial counterparties which, on the date of entry into force of this Regulation, are clearing members of at least one of the relevant CCPs and for at least one of the classes of interest rate OTC derivatives subject to the clearing obligation, as those counterparties already have experience with voluntary clearing and have already established the connections with those CCPs to clear at least one of those classes. Non-financial counterparties that are clearing members should also be included in this first category as their experience and preparation towards central clearing is comparable with that of financial counterparties included in it.
- (6) A second and third category should comprise financial counterparties not included in the first category, grouped according to their levels of legal and operational capacity regarding OTC derivatives. The level of activity in OTC derivatives should serve as a basis to differentiate the degree of legal and operational capacity of financial counterparties, and a quantitative threshold should therefore be defined for division between the second and third categories on the basis of the aggregate month-end average notional amount of non-centrally cleared derivatives. That threshold should be set out at an appropriate level to differentiate smaller market participants, while still capturing a significant level of risk under the second category. The threshold should also be aligned with the threshold agreed at international level related to margin requirements for non-centrally cleared derivatives in order to enhance regulatory convergence and limit the compliance costs for counterparties. As in those international standards, whereas the threshold applies generally at group level given the potential shared risks within the group, for investment funds the threshold should be applied separately to each fund since the liabilities of a fund are not usually affected by the liabilities of other funds or their investment manager. Thus, the threshold should be applied separately to each fund as long as, in the event of fund insolvency or bankruptcy, each investment fund constitutes a completely segregated and ring-fenced pool of assets that is not collateralised, guaranteed or supported by other investment funds or the investment manager itself.
- (7) Certain alternative investment funds ('AIFs') are not captured by the definition of financial counterparties under Regulation (EU) No 648/2012 although they have a degree of operational capacity regarding OTC derivative contracts similar to that of AIFs captured by that definition. Therefore AIFs classified as non-financial

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Delegated Regulation (EU) 2015/2205, Introductory Text is up to date with all changes known to be in force on or before 08 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2205 may be subject to amendment by EU Exit Instruments made by both the Financial Conduct Authority and the Bank of England under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 5. These amendments are not currently available on legislation.gov.uk. ~~counterparties should be included in the same categories of counterparties as AIFs~~

classified as financial counterparties.

- (8) A fourth category should include non-financial counterparties not included in the other categories, given their more limited experience and operational capacity with OTC derivatives and central clearing than the other categories of counterparties.
- (9) The date on which the clearing obligation takes effect for counterparties in the first category should take into account the fact that they may not have the necessary pre-existing connections with CCPs for all the classes subject to the clearing obligation. In addition, counterparties in this category constitute the access point to clearing for counterparties that are not clearing members, client clearing and indirect client clearing being expected to increase substantially as a consequence of the entry into force of the clearing obligation. Finally, this first category of counterparties account for a significant portion of the volume of interest rate OTC derivatives already cleared, and the volume of transactions to be cleared will significantly increase after the date on which the clearing obligation set out in this Regulation will take effect. Therefore, a reasonable timeframe for counterparties in the first category to prepare for clearing additional classes, to deal with the increase of client clearing and indirect client clearing and to adapt to increasing volumes of transactions to be cleared should be set at six months.
- (10) The date on which the clearing obligation takes effect for counterparties in the second and third categories should take into account the fact that most of them will get access to a CCP by becoming a client or an indirect client of a clearing member. This process may require between 12 and 18 months depending on the legal and operational capacity of counterparties and their level of preparation regarding the establishment of the arrangements with clearing members that are necessary for clearing the contracts.
- (11) The date on which the clearing obligation takes effect for counterparties in the fourth category should take into account their legal and operational capacity, and their more limited experience with OTC derivatives and central clearing than other categories of counterparties.
- (12) For OTC derivative contracts concluded between a counterparty established in a third country and another counterparty established in the Union belonging to the same group and which are included in the same consolidation on a full basis and are subject to an appropriate centralised risk evaluation, measurement and control procedures, a deferred date of application of the clearing obligation should be provided. The deferred application should ensure that those contracts are not subject to the clearing obligation for a limited period of time in the absence of implementing acts pursuant to Article 13(2) of Regulation (EU) No 648/2012 covering the OTC derivative contracts set out in the Annex to this Regulation and regarding the jurisdiction where the non-Union counterparty is established. Competent authorities should be able to verify in advance that the counterparties concluding those contracts belong to the same group and fulfil the other conditions of intragroup transactions pursuant to Regulation (EU) No 648/2012.
- (13) Unlike OTC derivatives whose counterparties are non-financial counterparties, where counterparties to OTC derivative contracts are financial counterparties, Regulation (EU) No 648/2012 requires the application of the clearing obligation to contracts

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Delegated Regulation (EU) 2015/2205, Introductory Text is up to date with all changes known to be in force on or before 08 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2205 may be subject to amendment by EU Exit Instruments made by both the Financial Conduct Authority and the Bank of England under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 5. These amendments are not currently available on legislation.gov.uk. ~~concluded after the notification to ESMA that follows the authorisation of a CCP to~~

clear a certain class of OTC derivatives, but before the date on which the clearing obligation takes effect, provided the remaining maturity of such contracts at the date on which the obligation takes effect justifies it. The application of the clearing obligation to those contracts should pursue the objective of ensuring the uniform and coherent application of Regulation (EU) No 648/2012. It should serve to seek financial stability and the reduction of systemic risk, as well as ensuring a level playing field for market participants when a class of OTC derivative contracts is declared subject to the clearing obligation. The minimum remaining maturity should therefore be set at a level that ensures the achievement of those objectives.

- (14) Before regulatory technical standards adopted pursuant to Article 5(2) of Regulation (EU) No 648/2012 enter into force, counterparties cannot foresee whether the OTC derivative contracts they conclude would be subject to the clearing obligation on the date that obligation takes effect. This uncertainty has a significant impact on the capacity of market participants to accurately price the OTC derivative contracts they enter into since centrally cleared contracts are subject to a different collateral regime than non-centrally cleared contracts. Imposing forward-clearing to OTC derivative contracts concluded before the entry into force of this Regulation, irrespective of their remaining maturity on the date on which the clearing obligation takes effect, could limit counterparties' ability to hedge their market risks adequately and either impact the functioning of the market and financial stability, or prevent them from exercising their usual activities by hedging them by other appropriate means.
- (15) Moreover, OTC derivative contracts concluded after this Regulation enters into force and before the clearing obligation takes effect should not be subject to the clearing obligation until counterparties to those contracts can determine the category they are comprised in, whether they are subject to the clearing obligation for a particular contract, including their intragroup transactions, and before they can implement the necessary arrangements to conclude those contracts taking into account the clearing obligation. Therefore, in order to preserve the orderly functioning and the stability of the market, as well as a level playing field between counterparties, it is appropriate to consider that those contracts should not be subject to the clearing obligation, irrespective of their remaining maturities.
- (16) OTC derivative contracts concluded after the notification to ESMA that follows the authorisation of a CCP to clear a certain class of OTC derivatives, but before the date on which the clearing obligation takes effect should not be subject to the clearing obligation when they are not significantly relevant for systemic risk, or when subjecting those contracts to the clearing obligation could otherwise jeopardise the uniform and coherent application of Regulation (EU) No 648/2012. Counterparty credit risk associated to interest rate OTC derivative contracts with longer maturities remains in the market for a longer period than that associated to interest rate OTC derivatives with low remaining maturities. Imposing the clearing obligation on contracts with short remaining maturities would imply a burden on counterparties disproportionate to the level of risk mitigated. In addition, interest rate OTC derivatives with low remaining maturities represent a relatively small portion of the total market and thus

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Delegated Regulation (EU) 2015/2205, Introductory Text is up to date with all changes known to be in force on or before 08 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2205 may be subject to amendment by EU Exit Instruments made by both the Financial Conduct Authority and the Bank of England under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 5. These amendments are not currently available on legislation.gov.uk. ~~a relatively small portion of the total systemic risk associated to this market. The~~

- minimum remaining maturities should therefore be set at a level ensuring that contracts with remaining maturities of no more than a few months are not subject to the clearing obligation.
- (17) Counterparties in the third category bear a relatively limited share of overall systemic risk and have a lower degree of legal and operational capacity regarding OTC derivatives than counterparties in the first and second categories. Essential elements of the OTC derivative contracts, including the pricing of interest rate OTC derivatives subject to the clearing obligation and concluded before that obligation takes effect, will have to be adapted within short timeframes in order to incorporate the clearing that will only take place several months after the contract is concluded. This process of forward-clearing involves important adaptations to the pricing model and amendments to the documentation of those OTC derivatives contracts. Counterparties in the third category have a very limited ability to incorporate forward-clearing in their OTC derivative contracts. Thus, imposing the clearing of OTC derivative contracts concluded before the clearing obligation takes effect for those counterparties could limit their ability to hedge their risks adequately and either impact the functioning and the stability of the market or prevent them from exercising their usual activities if they cannot continue to hedge. Therefore, OTC derivative contracts concluded by counterparties in the third category before the date on which the clearing obligation takes effect should not be subject to the clearing obligation.
- (18) In addition, OTC derivative contracts concluded between counterparties belonging to the same group can be exempted from clearing, provided certain conditions are met, in order to avoid limiting the efficiency of intragroup-risk management processes and therefore, undermine the achievement of the overarching goal of Regulation (EU) No 648/2012. Therefore, intragroup transactions which fulfil certain conditions and which are concluded before the date on which the clearing obligation takes effect for those transactions should not be subject to the clearing obligation.
- (19) This Regulation is based on draft regulatory technical standards submitted by ESMA to the Commission.
- (20) The Commission informed ESMA of its intention to endorse with amendments the draft regulatory technical standards proposed by ESMA, in accordance with the procedure set out in the fifth and sixth subparagraphs of Article 10(1) of Regulation (EU) No 1095/2010 of the European Parliament and of the Council⁽²⁾. ESMA adopted a formal opinion as to those amendments which it submitted to the Commission.
- (21) ESMA has conducted open public consultations on the draft regulatory technical standards on which this Regulation is based, analysed the potential related costs and benefits, requested the opinion of the Security and Markets Stakeholder Group established by Article 37 of Regulation (EU) No 1095/2010, and consulted the European Systemic Risk Board,

HAS ADOPTED THIS REGULATION:
