Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are available on legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (Recoverables from reinsurance and SPVs shall not be included in this cell.)

		Recoverables from reinsurance and SPVs shall not be included in this cell.
R0480/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — spread risk — securitisation positions — resecuritisation	This is the absolute value of the liabilities sensitive to the spread risk on resecuritisation positions, after the shock and after the loss absorbing capacity of technical provisions. The amount of TP shall be net of reinsurance and SPV recoverables.
R0480/C0060	Absolute value after shock — Net solvency capital requirement — spread risk — securitisation positions — resecuritisation	This is the net capital charge for spread risk on resecuritisation positions, after adjustment for the loss absorbing capacity of technical provisions.
R0480/C0070	Absolute values after shock — Liabilities (before the loss absorbing capacity of technical provisions) — spread risk — securitisation positions — resecuritisation	This is the absolute value of the liabilities sensitive to the spread risk on resecuritisation positions, after the shock but before the loss absorbing capacity of technical provisions. The amount of TP shall be net of reinsurance and SPV recoverables.
R0480/C0080	Absolute value after shock — Gross solvency capital requirement — spread risk — securitisation positions — resecuritisation	This is the gross capital charge for spread risk on resecuritisation positions, i.e. before the loss absorbing capacity of technical provisions.
[^{F5} R0481/C0020	Initial absolute values before shock – Assets – spread risk – securitisation positions – other securitisation	This is the absolute value of the assets sensitive to the spread risk on other securitisation positions. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0481/C0030	Initial absolute values before shock – Liabilities – spread risk – securitisation positions – other securitisation	This is the absolute value of the liabilities sensitive to the spread risk on other securitisation positions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method

Recoverables from reinsurance and SPVs shall not be included in this cell.

		Recoverables from reinsurance and SPVs shall not be included in this cell.
R0500/C0060	Absolute value after shock — Net solvency capital requirement — market risk concentrations	This is the net capital charge for market risk concentrations, after adjustment for the loss absorbing capacity of technical provisions, aggregated for each single name exposure. For captive undertakings, if cell R0040/C0010=1, this item represents net capital charge for market risk concentration, calculated using simplified calculation.
R0500/C0080	Absolute value after shock — Gross solvency capital requirement — market risk concentrations	This is the gross capital charge for market risk concentrations, aggregated for each single name exposure, i.e. before the loss absorbing capacity of technical provisions.
Currency risk		
R0600/C0060	Absolute value after shock — Net solvency capital requirement (after the loss absorbing capacity of technical provisions) — currency risk	This is the sum for the different currencies of: — the capital requirement (including after the loss absorbing capacity of technical provisions) for an increase in value of the foreign currency against the local currency; — the capital requirement (including after the loss absorbing capacity of technical provisions) for a decrease in value of the foreign currency against the local currency.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

R0600/C0080	Absolute value after shock Gross solvency capital	This is the sum for the different currencies of:
	requirement — currency risk	— the capital requirement (before the loss absorbing capacity of technical provisions) for an increase in value of the foreign currency against the local currency; — the capital requirement (before the loss absorbing capacity of technical provisions) for a decrease in value of the foreign currency against the local currency.
R0610–R0620/C0020	Initial absolute values before shock — Assets — Currency risk — increase/ decrease in the value of the foreign currency	This is the total value of the assets sensitive to currency increase/decrease risk, before shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0610–R0620/C0030	Initial absolute values before shock — Liabilities — Currency risk — increase/ decrease in the value of the foreign currency	This is the total value of the liabilities sensitive to currency increase/decrease risk, before shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0610–R0620/C0040	Absolute values after shock — Assets — Currency risk — increase/ decrease in the value of the foreign currency	This is the absolute value of assets sensitive to currency increase/decrease risk after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0610–R0620/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Currency risk — increase/ decrease in the value of the foreign currency	This is the absolute value of liabilities (after the loss absorbing capacity of technical provisions) sensitive to currency increase/decrease risk after the shock.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. Pt. 2. These amendments apply only to the version of legislation.gov.uk. Details of relevant amending instruments can be found on their website (<https://www.legislation.gov.uk>). The amount of TP shall be net of reinsurance and SPV recoverables.

		recoverables.
R0610–R0620/C0060	Absolute value after shock — Net solvency capital requirement (after the loss absorbing capacity of technical provisions) — Currency risk — increase/ decrease in the value of the foreign currency	This is the net capital charge for currency increase/decrease risk, after adjustment for the loss absorbing capacity of technical provisions. In R0610 only the currencies where the increase shock is the largest shall be reported and in R0620 only the currencies where the decrease shock is the largest shall be reported.
R0610–R0620/C0070	Absolute values after shock (before the loss-absorbing capacity of technical provisions) — Currency risk — increase/ decrease in the value of the foreign currency	This is the absolute value of liabilities (before the loss absorbing capacity of technical provisions) sensitive to currency increase/decrease risk after the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0610–R0620/C0080	Absolute value after shock — Gross solvency capital requirement (excluding the loss-absorbing capacity of technical provisions) — Currency risk — increase/ decrease in the value of the foreign currency	This is the gross capital charge for the currency increase/decrease risk, i.e. excluding before the loss absorbing capacity of Technical provisions. In R0610 only the currencies where the increase shock is the largest shall be reported and in R0620 only the currencies where the decrease shock is the largest shall be reported.

Diversification within market risk module

R0700/C0060	Diversification within market risk module –net	This is the diversification effect within the market risk module as a result of the aggregation of the net capital requirements (after loss absorbing capacity of technical provisions) of the single risk sub-modules. Diversification shall be reported as a negative value
-------------	--	---

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments will reduce the capital requirement when it reduces the capital requirement. (See end of Document for details)

R0700/C0080	Diversification within market risk module — gross	This is the diversification effect within the market risk module as a result of the aggregation of the gross capital requirements (before loss absorbing capacity of technical provisions) of the single risk sub-modules. Diversification shall be reported as a negative value when it reduces the capital requirement.
Total solvency capital requirement for market risk		
R0800/C0060	Total market risk — Net solvency capital requirement	This is the total net capital charge for all market risks, after loss absorbing capacity of technical provisions, calculated using the standard formula.
R0800/C0080	Total market risk — Gross solvency capital requirement	This is the total gross capital charge for all market risks, excluding loss absorbing capacity of technical provisions, calculated using the standard formula

S.26.02 — Solvency Capital Requirement — Counterparty default risk

General comments

This section relates to annual submission of information for individual entities, ring fenced-funds, matching adjustment portfolios and remaining part.

Template SR.26.02.01 has to be filled in for each ring-fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub-funds of a material RFF/MAP as identified in the second table of S.01.03.

	ITEM	INSTRUCTIONS
Z0010	Article 112	Identifies whether the reported figures have been requested under Article 112(7), to provide an estimate of the SCR using standard formula. One of the options in the following closed list shall be used: 1 — Article 112(7) reporting

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. 		Options 3 to 7 may be used simultaneously. If R0010/C0010 = 4 or 6, for Type 1 exposures, only R0100/C0080 shall be filed in for R0100.]
R0100/C0080	Type 1 exposures — Gross solvency capital requirement	[^{F8} This is the gross capital charge (before the loss-absorbency capacity of technical provisions) for counterparty default risk arising from all Type 1 exposures. If R0010/C0010 = 4 or 6, this item represents the Gross solvency capital requirement using simplifications.]
R0110–R0200/C0020	Name of single name exposure	Describe the name of the 10 largest single exposures.
R0110–R0200/C0030	Code of single name exposure	Identification code using the Legal Entity Identifier (LEI) if available. If not available this item shall not be reported
R0110–R0200/C0040	Type of code of the single name exposure	Identification of the code used in item 'Code of single name exposure'. One of the options in the following closed list shall be used: 1 — LEI 9 — None
R0110–R0200/C0050	Type 1 exposures — Single name exposure X — Loss Given Default	The value of the Loss Given Default for each of the 10 largest single name exposure.
R0110–R0200/C0060	Type 1 exposures — Single name exposure X — Probability of Default	The Probability of Default for each of the 10 largest single name exposure.
R0300/C0080	Type 2 exposures — Gross solvency capital requirement	This is the gross capital charge (before the loss-absorbency capacity of technical provisions) for counterparty default risk arising from all Type 2 exposures, as defined for Solvency II purposes

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

R0310/C0050	Type 2 exposures Receivables from Intermediaries due for more than 3 months — Loss Given Default	This is the value of Loss Given Default for Type 2 counterparty risk arising from intermediaries due for more than 3 months.
R0320/C0050	Type 2 exposures — All type 2 exposures other than receivables from Intermediaries due for more than 3 months — Loss Given Default	This is the value of Loss Given Default for Type 2 counterparty risk arising from all type 2 exposures other than receivables from Intermediaries due for more than 3 months.
R0330/C0080	Diversification within counterparty default risk module — gross solvency capital requirement	This is the amount of gross diversification effects allowed in aggregation of capital requirements for counterparty default risk for Type 1 and Type 2 exposures.
R0400/C0070	Total net solvency capital requirement for counterparty default risk	This is the total amount of the net capital charge (after the loss-absorbency capacity of technical provisions) for counterparty default risk.
R0400/C0080	Total gross solvency capital requirement for counterparty default risk	This is the total amount of the gross capital charge (before the loss-absorbency capacity of technical provisions) for counterparty default risk.
Further details on mortgages		
R0500/C0090	Losses stemming from type 2 mortgage loans	Amount of the overall losses stemming from mortgage loans that has been classified as type 2 exposures according to Article 191 (13) of Delegated Regulation (EU) 2015/35.
R0510/C0090	Overall losses stemming from mortgage loans	Amount of the overall losses stemming from mortgage loans according to Article 191 (13) of Delegated Regulation (EU) 2015/35.

S.26.03 — Solvency Capital Requirements — Life underwriting risk

General comments:

This section relates to annual submission of information for individual entities, ring fenced-funds, matching adjustment portfolios and remaining part.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2019. ~~Template SR 26.03.010 has to be filled in for each ring-fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub-funds of a material RFF/MAP as identified in the second table of S.01.03.~~

All values shall be reported net of reinsurance and other risk mitigating techniques.

Amounts before and after shock shall be filled in with the amount of assets and liabilities sensitive to that shock. For the liabilities the assessment shall be done at the most granular level available between contract and homogeneous risk group. This means that if a contract/HRG is sensitive to a shock the amount of liabilities associated to that contract/HRG shall be reported as amount sensitive to that shock.

	ITEM	INSTRUCTIONS
Z0010	Article 112	Identifies whether the reported figures have been requested under Article 112(7), to provide an estimate of the SCR using standard formula. One of the options in the following closed list shall be used: 1 — Article 112(7) reporting 2 — Regular reporting
Z0020	Ring-fenced fund, matching adjustment portfolio or remaining part	Identifies whether the reported figures are with regard to a RFF, matching adjustment portfolio or to the remaining part. One of the options in the following closed list shall be used: 1 — RFF/MAP 2 — Remaining part
Z0030	Fund/Portfolio number	When item Z0020 = 1, identification number for a ring fenced fund or matching adjustment portfolio. This number is attributed by the undertaking and must be consistent over time and with the fund/portfolio number reported in other templates. [F11 When item Z0020 = 2, then report '0']
R0010/C0010	Simplifications used: mortality risk	Identify whether an undertaking used simplifications for a calculation of mortality risk.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments have been incorporated into the legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (See end of Document for details)

		<p>The following options shall be used:</p> <ul style="list-style-type: none"> 1 — Simplifications used 2 — Simplifications not used <p>If R0010/C0010 = 1, only C0060 and C0080 shall be filled in for R0100.</p>
R0020/C0010	Simplifications used — longevity	<p>Identify whether an undertaking used simplifications for the calculation of longevity risk. The following options shall be used:</p> <ul style="list-style-type: none"> 1 — Simplifications used 2 — Simplifications not used <p>If R0020/C0010 = 1, only C0060 and C0080 shall be filled in for R0200.</p>
R0030/C0010	Simplifications used: disability– morbidity risk —	<p>Identify whether an undertaking used simplifications for the calculation of disability — morbidity risk. The following options shall be used:</p> <ul style="list-style-type: none"> 1 — Simplifications used 2 — Simplifications not used <p>If R0030/C0010 = 1, only C0060 and C0080 shall be filled in for R0300.</p>
R0040/C0010	Simplifications used: lapse risk	<p>[^{F8}Identify whether an undertaking used simplifications for the calculation of lapse risk. The following options shall be used:</p> <ul style="list-style-type: none"> 1 – Simplification for the purposes of Article 95 2 – Simplification for the purposes of Article 95a 9 – Simplifications not used <p>Options 1 and 2 may be used simultaneously.</p>

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are only available by legislation.gov.uk. Details of relevant amending instruments can be found on their website (C0060 and C0080 shall be filled in for R0400 to R0420.]

		filled in for R0400 to R0420.]
R0050/C0010	Simplifications used: life expense risk —	Identify whether an undertaking used simplifications for the calculation of life expense risk. The following options shall be used: 1 — Simplifications used 2 — Simplifications not used If R0050/C0010 = 1, only C0060 and C0080 shall be filled in for R0500.
R0060/C0010	Simplifications used: life catastrophe risk	Identify whether an undertaking used simplifications for the calculation of life catastrophe risk. The following options shall be used: 1 — Simplifications used 2 — Simplifications not used If R0060/C0010 = 1, only C0060 and C0080 shall be filled in for R0700.
Life underwriting risk		
R0100/C0020	Initial absolute values before shock — Assets — Mortality risk	This is the absolute value of the assets sensitive to mortality risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0100/C0030	Initial absolute values before shock — Liabilities — Mortality risk	This is the absolute value of liabilities sensitive to mortality risk, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0100/C0040	Absolute values after shock — Assets — Mortality risk	This is the absolute value of the assets sensitive to mortality risk after the shock (i.e. permanent increase in mortality rates).

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are available on legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (Recoverables from reinsurance and SPVs shall not be included in this cell.)

		Recoverables from reinsurance and SPVs shall not be included in this cell.
R0100/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Mortality risk	This is the absolute value of the liabilities (after the loss absorbing capacity of technical provisions) sensitive to risk, after the shock (i.e. permanent increase in mortality rates). The amount of TP shall be net of reinsurance and SPV recoverables.
R0100/C0060	Absolute value after shock — Net solvency capital requirement — Mortality risk	This is the net capital charge for mortality risk after the shock (after adjustment for the loss absorbing capacity of technical provisions). If R0010/C0010=1, this item represents net capital charge for mortality risk calculated using simplifications.
R0100/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions) — Mortality risk	This is the absolute value of the liabilities (before the loss absorbing capacity of technical provisions) sensitive to mortality risk, after the shock (permanent increase in mortality rates). The amount of TP shall be net of reinsurance and SPV recoverables.
R0100/C0080	Absolute value after shock — Gross solvency capital requirement — Mortality risk	This is the gross capital charge for mortality risk. (before the loss absorbing capacity of technical provisions) If R0010/C0010=1, this item represents gross capital charge for mortality risk calculated using simplifications.
R0200/C0020	Initial absolute values before shock — Assets — Longevity risk	This is the absolute value of the assets sensitive to longevity risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

R0200/C0030	Initial absolute values before shock — Liabilities	This is the absolute value of liabilities sensitive to
	Longevity risk	longevity risk charge, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0200/C0040	Absolute values after shock — Assets — Longevity risk	This is the absolute value of the assets sensitive to longevity risk, after the shock (i.e. permanent decrease in mortality rates). Recoverables from reinsurance and SPVs shall not be included in this cell.
R0200/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Longevity risk	This is the absolute value of the liabilities (after the loss absorbing capacity of technical provisions sensitive to longevity risk, after the shock (i.e. permanent decrease in mortality rates). The amount of TP shall be net of reinsurance and SPV recoverables.
R0200/C0060	Absolute value after shock — Net solvency capital requirement — Longevity risk	This is the net capital charge for longevity risk after the shock (after adjustment for the loss absorbing capacity of technical provisions). If R0020/C0010=1, this item represents net capital charge for longevity risk calculated using simplifications
R0200/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions)— Longevity risk	This is the absolute value of the liabilities (before the loss absorbing capacity of technical provisions) sensitive to longevity risk charge, after the shock (permanent decrease in mortality rates). The amount of TP shall be net of reinsurance and SPV recoverables.
R0200/C0080	Absolute value after shock — Gross solvency capital requirement — Longevity risk	This is the gross capital charge for longevity risk (before the loss absorbing capacity of technical provisions).

(S.I. 2015/2450) Regulations 2018 (S.I. 2018/1115) regs. 2, 3, Sch. Pt. 2. These amendments are not currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (See end of Document for details)

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. Pt. 2. These amendments may only apply to this legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (Represent gross for details)

		capital charge for longevity risk calculated using simplifications.
R0300/C0020	Initial absolute values before shock — Assets — Disability — morbidity risk	This is the absolute value of the assets sensitive to disability — morbidity risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0300/C0030	Initial absolute values before shock — Liabilities — Disability— morbidity risk	This is the absolute value of liabilities sensitive to disability — morbidity risk, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0300/C0040	Absolute values after shock — Assets — Disability — morbidity risk	This is the absolute value of the assets sensitive to disability — morbidity risk, after the shock (i.e. as prescribed by standard formula: an increase in disability and morbidity rates which are used in calculation of technical provisions to reflect the disability and morbidity experience in the next following 12 months, and for all months after the following 12 months and a decrease in the disability and morbidity rates recovery rates used in the calculation of technical provisions in respect of next 12 months and for all year thereafter. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0300/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Disability — morbidity risk	This is the absolute value of liabilities (after the loss absorbing capacity of technical provisions) sensitive to disability — morbidity risk, after the shock (i.e. as prescribed by standard formula, see description provided in

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are available on [legislation.gov.uk](http://www.legislation.gov.uk). Details of relevant amending instruments can be found on their website. (See end of Document for details)

		The amount of TP shall be net of reinsurance and SPV recoverables.
R0300/C0060	Absolute value after shock — Net solvency capital requirement — Disability — morbidity risk	This is the net capital charge for disability — morbidity risk, after adjustment for the loss absorbing capacity of technical provisions. If R0030/C0010=1, this item represents net capital charge for disability and morbidity risk calculated using simplifications.
R0300/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions) — Disability — morbidity risk	This is the absolute value of the liabilities (before the loss absorbing capacity of technical provisions) sensitive to disability — morbidity risk, after the shock (i.e. as prescribed by standard formula, see description provided in definition to cell R0300/C0040). The amount of TP shall be net of reinsurance and SPV recoverables.
R0300/C0080	Absolute value after shock — Gross solvency capital requirement — Disability — morbidity risk	This is the gross capital charge for disability — morbidity risk (before the loss absorbing capacity of technical provisions). If R0030/C0010=1, this item represents gross capital charge for disability and morbidity risk calculated using simplifications.
R0400/C0060	Absolute value after shock — Net solvency capital requirement — Lapse risk	This is the overall net capital charge for lapse risk, after adjustment for the loss absorbing capacity of technical provisions. If R0040/C0010=1, this item represents net capital charge for lapse risk calculated using simplifications.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

R0400/C0080	Absolute value after shock — Gross solvency capital requirement — Lapse risk	This is the overall gross capital charge (before the loss-absorbing capacity of technical provisions) for lapse risk. If R0040/C0010=1, this item represents gross capital charge for lapse risk calculated using simplifications.
R0410/C0020	Initial absolute values before shock — Assets — Lapse risk — risk of increase in lapse rates	This is the absolute value of the assets sensitive to the risk of an increase in lapse rates, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0410/C0030	Initial absolute values before shock — Liabilities — Lapse risk — risk of increase in lapse rates	This is the absolute value of liabilities sensitive to the risk of an increase in lapse rates, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0410/C0040	Absolute values after shock — Assets — Lapse risk — risk of increase in lapse rates	This is the absolute value of the assets sensitive to the risk of an increase in lapse rates, after the shock (i.e. permanent increase in the lapse rates). Recoverables from reinsurance and SPVs shall not be included in this cell.
R0410/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Lapse risk — risk of increase in lapse rates	This is the absolute value of liabilities (after the loss absorbing capacity of technical provisions) sensitive to the risk of an increase in lapse rates, after the shock (i.e. permanent increase in the lapse rates). The amount of TP shall be net of reinsurance and SPV recoverables.
R0410/C0060	Absolute value after shock — Net solvency capital requirement — Lapse risk — risk of increase in lapse rates	This is the net capital charge for the risk of a permanent increase in lapse rates, after adjustment for the loss absorbing capacity of technical provisions.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments apply to the consolidated legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (If R0040/C0010=1, this item represents net capital charge)

		for a permanent increase in lapse rates, calculated using simplified calculation for lapse rate.
R0410/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions — Lapse risk — risk of increase in lapse rates)	This is the absolute value of the liabilities (before the loss absorbing capacity of technical provisions) sensitive to the risk of a permanent increase in lapse rates, after the shock (permanent increase in lapse rates). The amount of TP shall be net of reinsurance and SPV recoverables.
R0410/C0080	Absolute value after shock — Gross solvency capital requirement — Lapse risk — risk of increase lapse rates	This is the gross capital charge (before the loss-absorbing capacity of technical provisions) for the risk of a permanent increase in lapse rates. If R0040/C0010=1, this item represents gross capital charge for a permanent increase in lapse rates, calculated using simplified calculation for lapse rate.
R0420/C0020	Initial absolute values before shock — Assets — Lapse risk — risk of decrease in lapse rates	This is the absolute value of the assets sensitive to the risk of a permanent decrease in lapse rates, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0420/C0030	Initial absolute values before shock — Liabilities — Lapse risk — risk of decrease in lapse rates	This is the absolute value of liabilities sensitive to the risk of a permanent decrease in lapse rates, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0420/C0040	Absolute values after shock — Assets — Lapse risk — risk of decrease in lapse rates	This is the absolute value of the assets sensitive to the risk of a permanent decrease in lapse rates, after the shock (i.e. permanent decrease in the rates of lapse rates).

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are available on legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (Recoverables from reinsurance and SPVs shall not be included in this cell.)

		Recoverables from reinsurance and SPVs shall not be included in this cell.
R0420/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Lapse risk — risk of decrease in lapse rates	This is the absolute value of the liabilities (after the loss absorbing capacity of technical provisions) sensitive to the risk of a permanent decrease in lapse rates, after the shock (i.e. permanent decrease of the rates of lapse rates). The amount of TP shall be net of reinsurance and SPV recoverables.
R0420/C0060	Absolute value after shock — Net solvency capital requirement — Lapse risk — risk of decrease in lapse rates	This is the net capital charge for the risk of a permanent decrease in lapse rates, after adjustment for the loss absorbing capacity of technical provisions. If R0040/C0010=1, this item represents net capital charge for a permanent decrease in lapse rates, calculated using simplified calculation for lapse rate.
R0420/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions)— Lapse risk — risk of decrease in lapse rates	This is the absolute value of the liabilities (before the loss absorbing capacity of technical provisions) sensitive to the risk of a permanent decrease in lapse rates, after the shock (permanent decrease in lapse rates). The amount of TP shall be net of reinsurance and SPV recoverables.
R0420/C0080	Absolute value after shock — Gross solvency capital requirement — Lapse risk — risk of decrease in lapse rates	This is the gross capital charge for the risk of a decrease in lapse rates as used to compute the risk (before the loss absorbing capacity of technical provisions). If R0040/C0010=1, this item represents gross capital charge for a permanent decrease in lapse rates,

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are available at www.legislation.gov.uk. Details of relevant amending instruments can be found on their websites and for details of calculation of TP lapse rate

R0430/C0020	Initial absolute values before shock — Assets — Lapse risk— mass lapse risk	This is the absolute value of the assets sensitive to mass lapse risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0430/C0030	Initial absolute values before shock — Liabilities — Lapse risk –mass lapse risk	This is the absolute value of liabilities sensitive to mass lapse risk, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0430/C0040	Absolute values after shock — Assets — Lapse risk — mass lapse risk	This is the absolute value of the assets sensitive to mass lapse risk charge, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0430/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Lapse risk — mass lapse risk	This is the absolute value of the liabilities (after the loss absorbing capacity of technical provisions) sensitive to mass lapse risk charge, after the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0430/C0060	Absolute value after shock — Net solvency capital requirement — Lapse risk — mass lapse risk	This is the net capital charge for mass lapse risk, after adjustment for the loss absorbing capacity of technical provisions.
R0430/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions)— Lapse risk — mass lapse risk	This is the absolute value of the liabilities sensitive to mass lapse risk charge, after the shock (before the loss absorbing capacity of technical provisions). The amount of TP shall be net of reinsurance and SPV recoverables.
R0430/C0080	Absolute value after shock — Gross solvency capital requirement — Lapse risk — mass lapse risk	This is the gross capital charge for mass lapse risk, after the shock (before the loss absorbing capacity of technical provisions).

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

R0500/C0020	Initial absolute values before shock — Assets — Life — expense risk	This is the absolute value of the assets sensitive to life — expense risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0500/C0030	Initial absolute values before shock — Liabilities — Life — expense risk	This is the absolute value of liabilities sensitive to life — expense risk, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0500/C0040	Absolute values after shock — Assets — Life — expense risk	This is the absolute value of the assets sensitive to life expense risk, after the shock (i.e. shock as prescribed by standard formula: a 10 % increase the amount of expenses taken into account in the calculation of technical provisions and increase in 1 percentage point to the expense inflation rate (expressed as a percentage) used for the calculation of technical provision). Recoverables from reinsurance and SPVs shall not be included in this cell.
R0500/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Life — expense risk	This is the absolute value of liabilities (after the loss absorbing capacity of technical provisions) sensitive to expense risk, after the shock (i.e. a shock, as prescribed by standard formula, refer to description provided within definition to cell R0500/C0040). The amount of TP shall be net of reinsurance and SPV recoverables.
R0500/C0060	Absolute value after shock — Net solvency capital requirement — Life expense risk	This is the net capital charge for expense risk, including adjustment for the loss absorbing capacity of technical provisions.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (See end of Document for details)

		charge for life expense risk calculated using simplified calculation.
R0500/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions) — Life — expense risk	This is the absolute value of the liabilities (before the loss absorbing capacity of technical provisions) sensitive to expense risk, after the shock (i.e. shock as prescribed by standard formula, refer to description provided within definition to cell R0500/C0040). The amount of TP shall be net of reinsurance and SPV recoverables.
R0500/C0080	Absolute value after shock — Gross solvency capital requirement — Life — expense risk	This is the gross capital charge for expense risk (before the loss absorbing capacity of technical provisions). If R0050/C0010=1, this cell represents gross capital charge for life expense risk calculated using simplified calculations.
R0600/C0020	Initial absolute values before shock — Assets — Revision risk	This is the absolute value of the assets sensitive to revision risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0600/C0030	Initial absolute values before shock — Liabilities — Revision risk	This is the absolute value of liabilities sensitive to revision risk, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0600/C0040	Absolute values after shock — Assets — Revision risk	This is the absolute value of the assets sensitive to revision risk, after the shock (i.e. shock as prescribed by standard formula: a % increase in the amount of annuity benefits taken into account in the calculation of technical provisions).

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. (Recoverables from reinsurance and SPVs shall not be included in this cell.)

		Recoverables from reinsurance and SPVs shall not be included in this cell.
R0600/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Revision risk	This is the absolute value of liabilities (after the loss absorbing capacity of technical provisions) sensitive to revision risk charge, after the shock (i.e. as prescribed by standard formula, refer to a definition in item R0600/C0040). The amount of TP shall be net of reinsurance and SPV recoverables.
R0600/C0060	Absolute value after shock — Net solvency capital requirement — Revision risk	This is the net capital charge for revision risk after adjustment for the loss absorbing capacity of technical provisions.
R0600/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions) — Revision risk	This is the absolute value of the liabilities (excluding the loss-absorbing capacity of technical provisions) underlying revision risk charge, after the shock ((i.e. shock as prescribed by standard formula, refer to a definition provided in item R0600/C0040), as used to compute the risk. The amount of TP shall be net of reinsurance and SPV recoverables.
R0600/C0080	Absolute value after shock — Gross solvency capital requirement — Revision risk	This is the gross capital charge (before the loss-absorbing capacity of technical provisions) for revision risk.
R0700/C0020	Initial absolute values before shock — Assets — Life Catastrophe risk	This is the absolute value of the assets sensitive to life catastrophe risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0700/C0030	Initial absolute values before shock — Liabilities — Life Catastrophe risk	This is the absolute value of liabilities sensitive to life catastrophe risk, before the shock.

Status: Point in time view as at 31/12/2020.

R0800/C0080	Diversification within life underwriting risk module — Net	This is the diversification effect within the life underwriting risk module as a result of the aggregation of the net capital requirements (after adjustment for the loss absorbing capacity of technical provisions) of the single risk sub-modules. Diversification shall be reported as a negative value if they reduce the capital requirement.
R0800/C0080	Diversification within life underwriting risk module — Gross	This is the diversification effect within the life underwriting risk module as a result of the aggregation of the gross capital requirements (before the loss absorbing capacity of technical provisions) of the single risk sub-modules. Diversification shall be reported as a negative value if they reduce the capital requirement.
R0900/C0060	Total net solvency capital requirement for life underwriting risk	This is the total net capital charge for life underwriting risk, after adjustment for the loss absorbing capacity of technical provisions.
R0900/C0080	Total gross solvency capital requirement for life underwriting risk	This is the total gross capital charge for life underwriting risk, before the loss absorbing capacity of technical provisions.
Further details on revision risk		
R1000/C0090	USP — Factors applied for the revision risk shock	Revision shock — undertaking specific parameter ('USP') as calculated by the undertaking and approved by the supervisory authority. This item is not reported where no undertaking specific parameter is used.

S.26.04 — Solvency Capital Requirement — Health underwriting risk

General Comments:

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

This section relates to annual submission of information for individual entities, ring-fenced funds, matching adjustment portfolios and remaining part.

Template SR.26.04.01 has to be filled in for each ring-fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub-funds of a material RFF/MAP as identified in the second table of S.01.03.

All values shall be reported net of reinsurance and other risk mitigating techniques.

Amounts before and after shock shall be filled in with the amount of assets and liabilities sensitive to that shock. For the liabilities the assessment shall be done at the most granular level available between contract and homogeneous risk group. This means that if a contract/HRG is sensitive to a shock the amount of liabilities associated to that contract/HRG shall be reported as amount sensitive to that shock.

	ITEM	INSTRUCTIONS
Z0010	Article 112	Identifies whether the reported figures have been requested under Article 112(7), to provide an estimate of the SCR using standard formula. One of the options in the following closed list shall be used: 1 — Article 112(7) reporting 2 — Regular reporting
Z0020	Ring-fenced fund, matching adjustment portfolio or remaining part	Identifies whether the reported figures are with regard to a RFF, matching adjustment portfolio or to the remaining part. One of the options in the following closed list shall be used: 1 — RFF/MAP 2 — Remaining part
Z0030	Fund/Portfolio number	When item Z0020 = 1, identification number for a ring fenced fund or matching adjustment portfolio. This number is attributed by the undertaking and must be consistent over time and with the fund/portfolio number reported in other templates. ^[F11] When item Z0020 = 2, then report '0'
R0010/C0010	Simplifications used — health mortality risk	Identify whether an undertakings used simplifications for the

Further details on revision risk		
R0900/C0090	Revision shock USP	Revision shock — undertaking specific parameter as calculated by the undertaking and approved by the supervisory authority. This item is not reported where no undertaking specific parameter is used.
NSLT Health premium and reserve risk		
R1000–R1030/C0100	Standard deviation for premium risk — USP	This is the undertaking specific standard deviation for premium risk for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, and its proportional reinsurance as calculated by the undertaking and approved or prescribed by the supervisory authority. This item is not reported where no undertaking specific parameter is used.
R1000–R1030/C0110	USP Standard Deviation gross/net	Identify if the USP standard Deviation was applied gross or net. One of the options in the following closed list shall be used: 1 — USP gross 2 — USP net
R1000–R1030/C0120	Standard deviation for premium risk — USP — Adjustment factor for non — proportional reinsurance	This is the undertaking specific adjustment factor for non-proportional reinsurance of each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, which allows undertakings to take into account the risk-mitigating

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are of particular importance on legislation.gov.uk. Details of relevant amending instruments can be found on their websites (see details)

		reinsurance — as calculated by the undertaking and approved or prescribed by the supervisory authority Where no undertaking specific parameter is used, this cell shall be left blank.
R1000–R1030/C0130	Standard deviation for reserve risk — USP	This is the undertaking specific standard deviation for reserve risk for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, and its proportional reinsurance as calculated by the undertaking and approved or prescribed by the supervisory authority. This item is not reported where no undertaking specific parameter is used.
R1000–R1030/C0140	Volume measure for premium and reserve risk — volume measure for premium risk: Vprem	The volume measure for premium risk for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, and its proportional reinsurance
R1000–R1030/C0150	Volume measure for premium and reserve risk –Volume measure reserve risk: Vres	The volume measure for reserve risk for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, and its proportional reinsurance
R1000–R1030/C0160	Volume measure for premium and reserve risk — Geographical Diversification	This represents the geographical diversification to be used for the volume measure for premium and reserve risk for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, and its proportional reinsurance. If the factor for geographical diversification is not calculated, then this item is set to the default value of 1.
R1000–R1030/C0170	Volume measure for premium and reserve risk — V	The volume measure for NSLT health premium and

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. Pt. 2. These amendments are referred to in legislation.gov.uk. Details of relevant amending instruments can be found on their websites. **Reserve risk referred to in Title I Chapter V Sections 4 and 12 of Delegated Regulation (EU) 2015/35, for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, and its proportional reinsurance**

		4 and 12 of Delegated Regulation (EU) 2015/35, for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, and its proportional reinsurance
R1040/C0170	Total Volume measure for premium and reserve risk	The total volume measure for premium and reserve risk, equal to the sum of the volume measures for premium and reserve risk for all lines of business, as defined in Annex I to Delegated Regulation (EU) 2015/35.
R1050/C0100	Combined standard deviation	This is the combined standard deviation for premium and reserve risk for all segments.
R1100/C0180	Solvency capital requirement — NSLT health premium and reserve risk	This is the total capital charge for the NSLT health premium and reserve risk sub module referred to in Title I Chapter V Sections 4 and 12 of Delegated Regulation (EU) 2015/35.
R1200/C0190	Initial absolute values before shock — Assets — Lapse risk	This is the absolute value of the assets sensitive to the NSLT health lapse risk referred to in Title I Chapter V Section 4 of Delegated Regulation (EU) 2015/35, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R1200/C0200	Initial absolute values before shock — Liabilities — Lapse risk	This is the absolute value of liabilities sensitive to the NSLT health lapse risk referred to in Title I Chapter V Section 4 of Delegated Regulation (EU) 2015/35, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

R1200/C0210	Absolute values after shock — Assets — Lapse risk	This is the absolute value of the assets sensitive to the NSLT health lapse risk referred to in Title I Chapter V Section 4 of Delegated Regulation (EU) 2015/35, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R1200/C0220	Absolute values after shock Liabilities — Lapse risk	This is the absolute value of the liabilities sensitive to lapse risk, after the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R1200/C0230	Absolute value after shock— Solvency capital requirement — Lapse risk	This is the capital charge for NSLT health lapse risk referred to in Title I Chapter V Section 4 of Delegated Regulation (EU) 2015/35.
R1300/C0240	Diversification within NSLT health underwriting risk — gross	This is the diversification effect within the NSLT health underwriting risk sub-module referred to in Title I Chapter V Section 4 of Delegated Regulation (EU) 2015/35, as a result of the aggregation of the capital requirements for NSLT health premium and reserve risk and NSLT health lapse risk. Diversification shall be reported as a negative value if they reduce the capital requirement.
R1400/C0240	Total solvency capital requirement for NSLT health underwriting	This is the total capital charge for the NSLT health underwriting risk sub module referred to in Title I Chapter V Section 4 of Delegated Regulation (EU) 2015/35.
Health catastrophe risk		
R1500/C0250	Net solvency capital requirement for health catastrophe risks — Mass accident risk sub module	The net solvency capital requirement for the mass risk sub-module calculated after loss absorbing capacity of technical provisions

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. R1700/C0270	Total net solvency capital requirement for health underwriting risk	This is the total net solvency capital requirement for the health underwriting risk module.
R1700/C0280	Total gross solvency capital requirement for health underwriting risk	This is the total gross solvency capital requirement for the health underwriting risk module.

S.26.05 — Solvency Capital Requirement — Non–Life underwriting risk

General comments:

This section relates to annual submission of information for individual entities, ring fenced–funds, matching adjustment portfolios and remaining part.

Template SR.26.05.01 has to be filled in for each ring–fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub–funds of a material RFF/MAP as identified in the second table of S.01.03.

All values shall be reported net of reinsurance and other risk mitigating techniques.

Amounts before and after shock shall be filled in with the amount of assets and liabilities sensitive to that shock. For the liabilities the assessment shall be done at the most granular level available between contract and homogeneous risk group. This means that if a contract/HRG is sensitive to a shock the amount of liabilities associated to that contract/HRG shall be reported as amount sensitive to that shock.

	ITEM	INSTRUCTIONS
Z0010	Article 112	Identifies whether the reported figures have been requested under Article 112(7), to provide an estimate of the SCR using standard formula. One of the options in the following closed list shall be used: 1 — Article 112(7) reporting 2 — Regular reporting
Z0020	Ring–fenced fund, matching adjustment portfolio or remaining part	Identifies whether the reported figures are with regard to a RFF, matching adjustment portfolio or to the remaining part. One of the options in the following closed list shall be used: 1 — RFF/MAP 2 — Remaining part

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

Z0090 (EU Exit) Regulations 2018 (S.I. 2018/1115) Regs. 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100. These amendments are not currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

Z0090	Fund/Portfolio number	When item Z0020 = 2, identification number for a
		ring fenced fund or matching adjustment portfolio. This number is attributed by the undertaking and must be consistent over time and with the fund/portfolio number reported in other templates. [^{F11} When item Z0020 = 2, then report '0']
R0010/C0010	Captives simplifications — non life premium and reserve risk	Identify whether a captive undertaking used simplifications for the calculation of non-life premium and reserve risk. One of the options in the following closed list shall be used: 1 — Simplifications used 2 — Simplifications not used If R0010/C0010 = 1, only C0060, C0070 and C0090 shall be filled in for R0100 — R0230.
[^{F5} R0011/C0010	Simplifications used – non-life lapse risk	Identify whether an undertaking used simplifications for the calculation of non-life underwriting risk. The following options shall be used: 1 – Simplification for the purposes of Article 90a 9 – Simplification not used]
Non-life premium and Reserve Risk		
R0100–R0210/C0020	Standard deviation for premium risk — USP Standard Deviation	This is the undertaking specific standard deviation for premium risk for each segment as calculated by the undertaking and approved or prescribed by the supervisory authority. This item is not reported where no undertaking specific parameter is used.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. 		calculated, then this item is set to the default value of 1.
R0100–R0210/C0090	Volume measure for premium and reserve risk — V	The volume measure for non — life premium and reserve risk for each segment. If R0010/C0010 = 1, this item shall represent the capital requirement for non — life premium and reserve risk of particular segment calculated using simplifications.
R0220/C0090	Total Volume measure for premium and reserve risk	The total volume measure for premium and reserve risk, equal to the sum of the volume measures for premium and reserve risk for all segments:
R0230/C0020	Combined standard deviation	This is the combined standard deviation for premium and reserve risk for all segments. [If R0010/C0010=1, this item represents total capital charge for non–life premium and reserve risk sub module calculated using simplified calculation.]
R0300/C0100	Total capital requirement for non — life premium and reserve risk	This is the total capital charge for the non–life premium and reserve risk sub module.
Non–life lapse risk		
R0400/C0110	Initial absolute values before shock — Assets — Non–life underwriting risk — Lapse risk	This is the absolute value of the assets sensitive to the non–life lapse risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0400/C0120	Initial absolute values before shock — Liabilities — Non–life underwriting risk — Lapse risk	This is the absolute value of liabilities sensitive to the non–life lapse risk, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

R0400/C0130	Absolute values after shock — Assets — Non-life	This is the absolute value of the assets sensitive to non-life lapse risk, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0400/C0140	Absolute values after shock — Liabilities — Non-life underwriting risk — Lapse risk	This is the absolute value of the liabilities sensitive to non-life lapse risk, after the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0400/C0150	Solvency capital requirement — Non-life underwriting risk — Lapse risk	This is the capital charge for non-life underwriting lapse risk.
Non-life catastrophe risk		
R0500/C0160	Capital requirement for non-life catastrophe risk	This is the total non-life catastrophe risk capital requirement.
Total non-life underwriting risk		
R0600/C0160	Diversification within non-life underwriting risk module	This is the diversification effect within the non-life underwriting risk sub-module as a result of the aggregation of the capital requirements premium and reserve risk, catastrophe risk and lapse risk. Diversification shall be reported as a negative value if they reduce the capital requirement.
R0700/C0160	Total capital requirement for non-life underwriting risk	This is the solvency capital requirement for non-life underwriting risk sub module.

S.26.06 — Solvency Capital Requirements — Operational risk

General comments:

This section relates to annual submission of information for individual entities, ring fenced-funds, matching adjustment portfolios and remaining part.

Template SR.26.06.01 has to be filled in for each ring-fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub-funds of a material RFF/MAP as identified in the second table of S.01.03.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. For these purposes, technical provisions shall not include the risk margin, and shall be without deduction of recoverables from reinsurance contracts and special purpose vehicles.
R0130/C0020	Capital requirement for operational risk based on technical provisions	This is the capital requirement for operational risk based on technical provisions
R0200/C0020	Earned life gross premiums (previous 12 months)	Premium earned during the previous 12 months for life insurance obligations, [F ⁴ excluding unit-linked] without deducting premium ceded to reinsurance
R0210/C0020	Earned life gross premiums unit-linked (previous 12 months)	Premium earned during the previous 12 months for life insurance obligations where the investment risk is borne by the policyholders without deducting premium ceded to reinsurance
R0220/C0020	Earned non-life gross premiums (previous 12 months)	Premium earned during the previous 12 months for non-life insurance obligations, without deducting premiums ceded to reinsurance
R0230/C0020	Earned life gross premiums (12 months prior to the previous 12 months)	Premium earned during the 12 months prior to the previous 12 months for life insurance obligations, [F ⁴ excluding unit-linked] without deducting premium ceded to reinsurance
R0240/C0020	Earned life gross premiums unit-linked (12 months prior to the previous 12 months)	Premium earned during the 12 months prior to the previous 12 months for life insurance obligations where the investment risk is borne

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments apply to the policyholders without deducting premium ceded to reinsurance. Details of relevant amending instruments can be found on their website (www.financialregulators.gov.uk). (Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments apply to the policyholders without deducting premium ceded to reinsurance.)

		reinsurance.
R0250/C0020	Earned non-life gross premiums (12 months prior to the previous 12 months)	Premium earned during the 12 months prior to the previous 12 months for non-life insurance obligations, without deducting premiums ceded to reinsurance
R0260/C0020	Capital requirement for operational risk based on earned premiums	This is the capital requirement for operational risks based on earned premiums.
R0300/C0020	Capital requirement for operational risk before capping	This is the capital requirement for operational risk before capping adjustment
R0310/C0020	Cap based on Basic Solvency Capital Requirement	This is the result of the cap percentage applied to the Basic SCR.
R0320/C0020	Capital requirement for operational risk after capping	This is the capital requirement for operational risk after capping adjustment.
R0330/C0020	Expenses incurred in respect of unit linked business (previous 12 months)	This is the amount of expenses incurred in the previous 12 months in respect of life insurance where the investment risk is borne by the policyholders.
R0340/C0020	Total capital requirement for operational risk	This is the capital charge for operational risk.

S.26.07 — Solvency Capital Requirement — Simplifications

General comments:

This section relates to annual submission of information for individual entities, ring fenced-funds, matching adjustment portfolios and remaining part.

Template SR.26.07.01 has to be filled in for each ring-fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub-funds of a material RFF/MAP as identified in the second table of S.01.03.

	ITEM	INSTRUCTIONS
Z0010	Article 112	Identifies whether the reported figures have been requested under Article 112(7), to provide an estimate

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. S.27.01 — Solvency Capital Requirement — Non-life and health catastrophe risk

General comments:

This section relates to annual submission of information for individual entities, ring fenced-funds, matching adjustment portfolios and remaining part.

Template SR.27.01 has to be filled in for each ring-fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub-funds of a material RFF/MAP as identified in the second table of S.01.03.

This template is designed to allow an understanding of how the catastrophe risk module of the SCR has been calculated and what are the main drivers.

For every type of catastrophe risk the risk mitigating effect of the undertaking's specific reinsurance contracts and special purpose vehicles must be determined. This calculation is prospective and must be based on the reinsurance program of the next reporting year as described in the reinsurance templates for Facultative covers (S.30.01 and S.30.02) and Outgoing reinsurance program in the next reporting year (S.30.03 and S.30.04).

Undertakings need to estimate their recoveries from risk mitigation in line with the Directive 2009/138/EC, Delegated Regulation (EU) 2015/35 and any relevant technical standard.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (Undertakings shall complete the catastrophe reporting template only to the granularity required to perform this calculation. amending instruments can be found on their website/s. (See end of Document for details)

Under the non-life and health underwriting risk modules, catastrophe risk is defined as the risk of loss, or of adverse change in the value of insurance liabilities, resulting from significant uncertainty of pricing and provisioning assumptions related to extreme or exceptional events as set out in Article 105(2)(b) and (4)(c) of the Directive 2009/138/EC.

The reported capital requirements reflects the capital requirements before and after risk mitigation which is the risk mitigating effect of the undertaking's specific reinsurance contracts and special purpose vehicles. The reported capital requirement after risk mitigation is before the loss absorbing capacity of technical provisions. The default value of the risk mitigation shall be reported as a positive value in order to be deducted.

In case the diversification effect reduces the capital requirement the default value of the diversification shall be reported as a negative value.

(See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments will be brought into force on 1 January 2024. Details of relevant amending instruments can be found on their websites (link of Document for details)

C0010/R0070	SCR before risk mitigation — Diversification between perils	Diversification effect arising from the aggregation of the total capital charges before risk mitigation relating to different natural catastrophe perils.
C0020/R0010	Total risk mitigation — Natural catastrophe risk	This is the total risk mitigation effect of the undertaking's specific reinsurance contracts and special purpose vehicles arising from all natural catastrophe perils and taking into consideration the diversification effect between the perils given in C0020/R0070.
C0020/R0020–R0060	Total risk mitigation — Natural catastrophe risk perils	This is the total risk mitigation effect of the undertaking's specific reinsurance contracts and special purpose vehicles per natural catastrophe peril.
C0020/R0070	Total risk mitigation — Diversification between perils	Diversification effect arising from the aggregation of the risk mitigation effect of the undertaking's specific reinsurance contracts and special purpose vehicles relating to different natural catastrophe perils.
C0030/R0010	SCR after risk mitigation — Natural catastrophe risk	This is the total catastrophe risk after risk mitigation arising from all natural catastrophe perils and taking into consideration the diversification effect between the perils given in C0030/R0070.
C0030/R0020–R0060	SCR after risk mitigation — Natural catastrophe risk perils	This is the total capital requirement after risk mitigation per natural catastrophe peril, taking into consideration the diversification effect between zones and regions. Per natural peril this amount is equal to the Catastrophe

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments will be available on legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (See end of Document for details)

C0030/R0070	SCR after risk mitigation — Diversification between perils	Diversification effect arising from the aggregation of the total capital charges after risk mitigation relating to different natural catastrophe perils.
C0010/R0080	SCR before risk mitigation — Catastrophe risk non-proportional property reinsurance	This is the total catastrophe risk before risk mitigation arising from non-proportional property reinsurance.
C0020/R0080	Total risk mitigation — Catastrophe risk non-proportional property reinsurance	This is the total risk mitigation effect of the undertaking's specific reinsurance contracts and special purpose vehicles for non-proportional property reinsurance.
C0030/R0080	SCR after risk mitigation — Catastrophe risk non-proportional property reinsurance	This is the total catastrophe risk after risk mitigation arising from non-proportional property reinsurance.
C0010/R0090	SCR before risk mitigation — Man-made catastrophe risk	This is the total catastrophe risk before risk mitigation arising from all man-made perils and taking into consideration the diversification effect between the perils given in C0010/R0160.
C0010/R0100–R0150	SCR before risk mitigation — Man-made catastrophe risk perils	This is the total capital requirement before risk mitigation per man-made peril, taking into consideration the diversification effect between sub-perils. Per man-made peril this amount is equal to the Catastrophe Risk Charge before risk mitigation.
C0010/R0160	SCR before risk mitigation — Diversification between perils	Diversification effect arising from the aggregation of the total capital charges before risk mitigation relating to different man-made perils.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. Health catastrophe risk — Summary

C0010/R0300	SCR before risk mitigation — Health catastrophe risk	This is the total catastrophe risk before risk mitigation arising from all Health catastrophe risk sub-modules and taking into consideration the diversification effect between the sub-modules given in C0010/R0340.
C0010/R0310–R0330	SCR before risk mitigation — Health catastrophe risk sub-modules	This is the total capital requirement before risk mitigation per Health catastrophe risk sub-modules, taking into consideration the diversification effect between the countries. Per Health catastrophe risk sub-module this amount is equal to the Catastrophe Risk Charge before risk mitigation.
C0010/R0340	SCR before risk mitigation — Diversification between sub-modules	Diversification effect arising from the aggregation of the total capital charges before risk mitigation relating to different Health catastrophe risk sub-modules.
C0020/R0300	Total risk mitigation — Health catastrophe risk	This is the total risk mitigation effect of the undertaking's specific reinsurance contracts and special purpose vehicles arising from all Health catastrophe risk sub-modules and taking into consideration the diversification effect between the sub-modules given in C0020/R0340.
C0020/R0310–R0330	Total risk mitigation — Health catastrophe risk sub-modules	This is the total risk mitigation effect of the undertaking's specific reinsurance contracts and special purpose vehicles per Health catastrophe risk sub-module.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. Pt. 2. These amendments are not that over one share property damage legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

		by Windstorm and where the risk is situated in this particular [F3 specified] region.
C0050/R0600	Exposure — Total Windstorm [F3 specified] Regions before diversification	Total of the exposure before diversification for the 20 [F3 specified] regions.
C0060/R0400–R0590	Specified Gross Loss — [F3 specified] Region	Specified gross windstorm loss per each of the 20 [F3 specified] regions, taking into consideration the effect of diversification effect between zones.
C0060/R0600	Specified Gross Loss — Total Windstorm [F3 specified] Regions before diversification	Total of the specified gross loss before diversification for the 20 [F3 specified] regions.
C0070/R0400–R0590	Catastrophe Risk Charge Factor before risk mitigation — [F3 specified] Region	The risk charge factor per each of the 20 [F3 specified] regions for Windstorm, taking into consideration the effect of diversification effect between zones.
C0070/R0600	Catastrophe Risk Charge Factor before risk mitigation — Total Windstorm [F3 specified] Regions before diversification	Ratio between total specified gross loss and total exposure.
C0080/R0400–R0590	Scenario A or B — [F3 specified] Region	The larger of the capital requirement for Windstorm risk for each of the 20 [F3 specified] regions according to scenario A or scenario B. When determining the largest amount of scenario A and B, the risk mitigation effect of the undertaking's specific reinsurance contracts and special purpose vehicles relating to this peril, shall be taken into account.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. C0090/R0400-R0590	Catastrophe Risk Charge before risk mitigation —	Capital requirement before risk mitigation arising from
	[^{F3} specified] Region	Windstorm for each of the 20 [^{F3} specified] Regions corresponding to the larger of scenario A or B.
C0090/R0600	Catastrophe Risk Charge before risk mitigation — Total Windstorm [^{F3} specified] Regions before diversification	Total of the capital requirement before risk mitigation arising from Windstorm for the 20 [^{F3} specified] regions.
C0090/R0790	Catastrophe Risk Charge before risk mitigation — Total Windstorm Other Regions before diversifications	The capital requirement before risk mitigation for Windstorm risk in regions other than the [^{F3} specified] Regions. It is the amount of the instantaneous loss, without deduction of the amounts recoverable from reinsurance contracts and Special Purpose Vehicles.
C0090/R0800	Catastrophe Risk Charge before risk mitigation — Total Windstorm all Regions before diversification	Total of the capital requirement before risk mitigation arising from Windstorm for all regions.
C0090/R0810	Catastrophe Risk Charge before risk mitigation — Diversification effect between regions	Diversification effect arising from the aggregation of the Windstorm risks relating to the different regions (both [^{F3} specified] Regions and 'other regions')
C0090/R0820	Catastrophe Risk Charge before risk mitigation — Total Windstorm after diversification	This is the total capital requirement before risk mitigation for Windstorm risk, taking into consideration the diversification effect reported in item C0090/R0810.
C0100/R0400–R0590	Estimated Risk Mitigation — [^{F3} specified] Region	Per each of the 20 [^{F3} specified] Regions, the estimated risk mitigation effect, corresponding to the selected scenario, of the undertaking's specific reinsurance contracts and special purpose vehicles relating to this peril,

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. 	Total Earthquake [^{F3} specified] Regions before diversification	
C0170/R0830–R1020	Catastrophe Risk Charge before risk mitigation — [^{F3} specified] Region	Capital requirement before risk mitigation arising from Earthquakes in each of the 20 [^{F3} specified] Regions.
C0170/R1030	Catastrophe Risk Charge before risk mitigation — Total Earthquake [^{F3} specified] Regions before diversification	Total of the capital requirement before risk mitigation arising from Earthquakes for the 20 [^{F3} specified] regions.
C0170/R1220	Catastrophe Risk Charge before risk mitigation — Total Earthquake — Other Regions before diversification	The capital requirement before risk mitigation for Earthquake risk in regions other than the [^{F3} specified] Regions. It is the amount of the instantaneous loss, without deduction of the amounts recoverable from reinsurance contracts and Special Purpose Vehicles.
C0170/R1230	Catastrophe Risk Charge before risk mitigation — Total Earthquake — All Regions before diversification	Total of the capital requirement before risk mitigation arising from Earthquakes for all regions.
C0170/R1240	Catastrophe Risk Charge before risk mitigation — Diversification effect between regions	Diversification effect arising from the aggregation of the Earthquake risks relating to the different regions (both [^{F3} specified] Regions and Other regions).
C0170/R1250	Catastrophe Risk Charge before risk mitigation — Total Earthquake after diversification	This is the total capital requirement before risk mitigation for Earthquake risk, taking into consideration the diversification effect given in C0170/R1240.
C0180/R0830–R1020	Estimated Risk Mitigation — [^{F3} specified] Region	Per each of the 20 [^{F3} specified] Regions the estimated risk mitigation effect of the undertaking's specific reinsurance contracts and special purpose vehicles relating to this peril, excluding the estimated reinstatement premiums.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. C1450/R4420	Income protection — Total pandemic exposure	The total of all income protection pandemic exposure for all countries identified of insurance and reinsurance undertakings. The value of the benefits payable for the insured person shall be the sum insured or where the insurance contract provides for recurring benefit payments the best estimate of the benefit payments assuming that the insured person is permanently disabled and will not recover.
C1510/R4420	Catastrophe Risk Charge before risk mitigation — Total Pandemic all countries	This is the total capital requirement before risk mitigation for the health sub-module pandemic for all countries identified.
C1520/R4420	Estimated Risk Mitigation — Total Pandemic all countries	The total estimated risk mitigation effect of the undertaking's specific reinsurance contracts and special purpose vehicles relating to this peril, excluding the estimated reinstatement premiums for all countries identified.
C1530/R4420	Estimated Reinstatement Premiums — Total Pandemic all countries	The total estimated reinstatement premiums as a result of the undertaking's specific reinsurance contracts and special purpose vehicles relating to this peril for all countries identified.
C1540/R4420	Catastrophe Risk Charge after risk mitigation — Total Pandemic all countries	The total capital requirement after risk mitigation for the health sub-module pandemic for all countries identified.

S.28.01 — Minimum Capital Requirement — Only life or only non-life insurance or reinsurance activity

General comments:

This section relates to opening, quarterly and annual submission of information for individual entities.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

In particular, S.28.01 is to be submitted by insurance and reinsurance undertakings/other than insurance undertakings engaged in both life and non-life insurance activity. These undertakings shall submit S.28.02 instead.

This template shall be completed on the basis of Solvency II valuation, i.e. written premiums are defined as the premiums due to be received by the undertaking in the period (as defined in Article 1(11) of Delegated Regulation (EU) 2015/35).

All references to technical provisions address technical provisions after application of Long Term Guarantee measures and transitionals.

The calculation of MCR combines a linear formula with a floor of 25 % and a cap of 45 % of the SCR. The MCR is subject to an absolute floor depending on the nature of the undertaking (as defined in Article 129 (1) (d) of the Directive 2009/138/EC).

	ITEM	INSTRUCTIONS
C0010/R0010	Linear formula component for non-life insurance and reinsurance obligations — MCR _{NL} Result	This is the linear formula component for non-life insurance and reinsurance obligations calculated in accordance with Article 250 of Delegated Regulation (EU) 2015/35.
C0020/R0020	Medical expense insurance and proportional reinsurance — Net (of reinsurance/SPV) best estimate and TP calculated as a whole	These are the technical provisions for medical expense insurance and proportional reinsurance, without risk margin after deduction of the amounts recoverable from reinsurance contracts and SPVs, with a floor equal to zero.
C0030/R0020	Medical expense insurance and proportional reinsurance — net (of reinsurance) written premiums in the last 12 months	These are the premiums written for medical expense insurance and proportional reinsurance during the (rolling) last 12 months, after deduction of premiums for reinsurance contracts, with a floor equal to zero.
C0020/R0030	Income protection insurance and proportional reinsurance — net (of reinsurance/SPV) best estimate and TP calculated as a whole	These are the technical provisions for income protection insurance and proportional reinsurance, without risk margin after deduction of the amounts recoverable from reinsurance contracts and SPVs, with a floor equal to zero.
C0030/R0030	Income protection insurance and proportional	These are the premiums written for income protection

C0060/R0250	Total capital at risk for all life (re)insurance obligations — Net (of reinsurance/SPV) total capital at risk	These are the total capital at risk, being the sum in relation to all contracts that give rise to life insurance or reinsurance obligations of the capital at risk of the contracts.
C0070/R0300	Overall MCR calculation — Linear MCR	The linear Minimum Capital Requirement shall equal to the sum of the MCR linear formula component for non-life insurance and reinsurance and the MCR linear formula component for life insurance and reinsurance obligations calculated in accordance with Article 249 of Delegated Regulation (EU) 2015/35.
C0070/R0310	Overall MCR calculation — SCR	This is the latest SCR to be calculated and reported in accordance with Articles 103 to 127 of Directive 2009/138/EC, either the annual one or a more recent one in case the SCR has been recalculated (e.g. due to a change in risk profile), including capital add on. Undertakings using internal model or partial internal model to calculate the SCR shall refer to the relevant SCR, except where under Article 129 (3) of Directive 2009/138/EC the national supervisory authority requires a reference to the standard formula.
C0070/R0320	Overall MCR calculation — MCR cap	This is calculated as 45 % of the SCR including any capital

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments add-on in accordance with legislation.gov.uk. Details of relevant amending instruments can be found on their websites. Art 129(3) of the Directive

		2009/138/EC.
C0070/R0330	Overall MCR calculation — MCR floor	This is calculated as 25 % of the SCR including any capital add-on in accordance with Art 129 (3) of the Directive 2009/138/EC.
C0070/R0340	Overall MCR calculation — Combined MCR	This is the result of the formula component calculated in accordance with Article 248 (2) of Delegated Regulation (EU) 2015/35.
C0070/R0350	Overall MCR calculation — Absolute floor of the MCR	This is calculated as defined in Art 129(1) d of Directive 2009/138/EC.
C0070/R0400	Minimum Capital Requirement	This is the result of the formula component calculated in accordance with Article 248 (1) of Delegated Regulation (EU) 2015/35.

S.28.02 — Minimum Capital Requirement — Both life and non-life insurance activity

General comments:

This section relates to opening, quarterly and annual submission of information for individual entities.

In particular, S.28.02 is to be submitted by insurance undertakings engaged in both life and non-life insurance activity. Insurance and reinsurance undertakings other than insurance undertakings engaged in both life and non-life insurance activity shall submit S.28.01 instead.

This template shall be completed on the basis of Solvency II valuation, i.e. written premiums are defined as the premiums due to be received by the undertaking in the period (as defined in Article 1(11) of Delegated Regulation (EU) 2015/35).

All references to technical provisions address technical provisions after application of Long Term Guarantee measures and transitionals.

The calculation of MCR combines a linear formula with a floor of 25 % and a cap of 45 % of the SCR. The MCR is subject to an absolute floor depending on the nature of the undertaking (as defined in Article 129 (1) (d) of the Directive 2009/138/EC).

S.29.01 — Excess of Assets over Liabilities

General comments:

This section relates to annual submission of information for individual entities.

This template, together with S.29.02 to S.29.04, explains the variation of Excess of Assets over Liabilities by reconciling the different sources of movements (please see the five main sources in b) below). In these templates, creation of value needs to be reported (such as income from investments).

The content of this template covers:

- a) A presentation of all variations in Basic Own fund items during the reporting period. It isolates the variation of the Excess of Assets over Liabilities as part of this total variation. This first analysis is entirely performed based on information also reported in template S.23.01 (year N and N–1).
- b) A summary of the 5 main sources affecting the variation of the Excess of Assets over Liabilities between the prior and the last reporting periods (cells C0030/R0190 to C0030/R0250):
 - The variation related to investments and financial liabilities — detailed in template S.29.02,
 - The variation related to technical provisions — detailed in templates S.29.03 and S.29.04,
 - The variation of ‘pure’ capital items, which is not directly influenced by the business carried on (e.g., variations in ordinary shares numbers and values); these variations are analysed in detail within template S.23.03;
 - Other main variations linked to tax and dividend distribution, namely:
 - Variation in Deferred Tax position
 - Income Tax of the reporting period
 - Dividend distribution
 - Other variations not explained elsewhere.

	ITEM	INSTRUCTIONS
C0010/R0010–R0120	Basic Own fund items — Year N	These items do not cover all Basic Own fund items, but only those before adjustments/deductions for: <ul style="list-style-type: none"> — Own funds from the financial statements that shall not be represented by the reconciliation reserve and do not meet the criteria to be classified as

C0030/R0210	Variations in capital basic own fund items and other items approved	This amount explains the part of the variation of Excess of Assets over Liabilities due to movements in 'pure' capital items, such as Ordinary share capital (gross of own shares), Preference shares, Surplus funds.
C0030/R0220	Variations in Deferred Tax position	Variations in the Excess of assets over liabilities explained by variation of deferred tax assets and deferred tax liabilities
C0030/R0230	Income tax of the reporting period	Amount of corporate tax of the reporting period, as stated in the financial statements of the reporting period.
C0030/R0240	Dividend distribution	Amount of dividend distributed during the reporting period, as stated in the financial statements of the reporting period.
C0030/R0250	Other variations in Excess of Assets over Liabilities	The remaining variations in the excess of assets over liabilities.

S.29.02 — Excess of Assets over Liabilities — explained by investments and financial liabilities

General comments:

This section relates to annual submission of information for individual entities.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2019. Changes to the Excess of Assets over Liabilities due to investments and financial liabilities relevant amending instruments can be found on their website/s. (See end of Document for details)

[^{F1}The scope of this template:

- i. Includes investments;
- ii. Includes liabilities position of derivatives (as investments);
- iii. Includes Own shares;
- iv. Includes Financial liabilities (comprising subordinated liabilities);
- v. Includes assets held for unit-linked and index-linked funds;
- vi. Excludes property held for own use.]

For all these items, the template covers the investments held at closing date of the prior reporting period (N-1) and the investments acquired/issued during the reporting period (N).

[^{F1}The difference between template S.29.02 (last table) and information in template S.09.01 is the inclusion of the revenue from own shares and the exclusion of Property held for own use. The purpose of the template is to provide a detailed understanding of the changes in the Excess of Assets over Liabilities related to investments, considering:

- i. Movements in valuation with an impact on the Excess of Assets over Liabilities (e.g. realised gains and losses from sales, but also valuation differences);
- ii. Revenues triggered by investments;
- iii. Expenses related to investments (including interest charges on financial liabilities.).]

	ITEM	INSTRUCTIONS

Applicable to other investment income not considered in cells C0010/R0070, C0010/R0080 and C0010/R0090, such as securities lending fees, commitment fees etc., excluding the ones from property held for own use.]

S.29.03 — Excess of Assets over Liabilities — explained by technical provisions

General comments:

This section relates to annual submission of information for individual entities.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

This template focuses on changes in the Excess of Assets over Liabilities due to technical provisions (TP). The scope of technical provisions includes risks captured through Best Estimate (BE) and Risk margin, and those captured through TP calculated as a whole.

As regards the order of calculation in the table 'breakdown of Variation in Best Estimate', presentation of the order is not deemed prescriptive as to the order in which the calculation is performed, as long as the content of the different cells indeed reflect the purpose and definition of these cells.

Undertakings are required to report data on accident year or underwriting year basis, in accordance with any requirements of the National Supervisory Authority. If the National Supervisory Authority has not stipulated which to use then the undertaking may use accident or underwriting year according to how they manage each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, provided that they use the same year consistently, year on year.

The purpose of the template is to provide a detailed understanding of the changes in the Excess of Assets over Liabilities related to technical provisions, considering:

- Changes in TP captions;
- Changes in technical flows of the period;
- A detailed breakdown of the variation of Best Estimate — gross of reinsurance by sources of changes (such as new business, changes in assumptions, experience, etc.).

[^{F2}The accepted reinsurance on unit-linked and index-linked business shall be included within the template.]

	ITEM	INSTRUCTIONS
Of which the following breakdown of Variation in Best Estimate — analysis per UWY if applicable — Gross of reinsurance		
C0010–C0020/R0010	Opening Best Estimate	Amount of Best Estimate — gross of reinsurance — as stated in the Balance Sheet at closing year N–1 related to those lines of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, for which an underwriting year approach (UWY) is used for Best Estimate calculation.
C0010–C0020/R0020	Exceptional elements triggering restating of opening Best Estimate	Amount of adjustment to opening Best Estimate due to elements, other than changes in perimeter that led to restate the opening BE. Shall essentially concern changes in models (in case models are used) for correction of the model and other modifications. It shall not concern changes in assumptions.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are expected to be mostly applicable for Life legislation.gov.uk. Details of relevant amending instruments can be found on their website. (See end of Document for details)

		business.
C0010–C0020/R0030	Changes in perimeter	Amount of adjustment to opening Best Estimate related to changes in perimeter of the portfolio like sales of (part of) portfolio and purchases. This could also concern changes of perimeter due to liabilities evolving to annuities stemming from Non–Life obligations (triggering some changes from Non–Life to Life).
C0010–C0020/R0040	Foreign exchange variation	Amount of adjustment to opening Best Estimate related to foreign exchange variation during the period. In this case the foreign exchange variation is actually meant to be applied to contracts which are taken out in currencies different from the balance sheet currency. For the calculation, the cash–flows of these contracts contained in the opening Best Estimate are simply converted due to the exchange variation. This item does not address the impact on the cash–flows of the insurance portfolio induced by re–valuation of year N–1 assets due to foreign exchange variation during year N.
C0010–C0020/R0050	Best Estimate on risks accepted during the period	It represents present expected future cash flows (gross of reinsurance) included in Best Estimate and related to risks accepted during the period. This shall be considered at the closing date (and not at the actual date of inception of the risks), i.e. this shall form part of the Best Estimate at closing date.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments have the effect of amending the legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (For details) The scope of cash flows refers to Article 77 of

		Directive 2009/138/EC.
C0010–C0020/R0060	Variation of Best Estimate due to unwinding of discount rate — risks accepted prior to period	<p>The variation of Best Estimate captured here shall only relate to the unwinding of discount rates, and does not take into account other parameters such as changes in assumptions or discount rates, experience adjustment, etc.</p> <p>The concept of unwinding may be illustrated as follows: Calculate the Best Estimate of year N–1 again but using the shifted interest rate term structure</p> <p>In order to isolate this strict scope of variation, the calculation may be as follows:</p> <ul style="list-style-type: none"> — Consider Opening Best Estimate including the adjustment to opening Best Estimate (cells C0010/R0010 to R0040); — Based on this figure, run the calculation of the unwinding of discount rates.
C0010–C0020/R0070	Variation of Best Estimate due to year N projected in and out flows — risks accepted prior to period	<p>Premiums, claims, and surrenders that were forecasted on the Opening Best Estimate as to be paid during the year, will not be in the closing Best Estimate anymore as they would have been paid/ received during the year. A neutralisation adjustment shall be performed.</p> <p>In order to isolate this adjustment, the calculation may be as follows:</p> <ul style="list-style-type: none"> — Consider Opening Best Estimate (cell C0010/

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not reflected in this version of legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

		<p>to opening Best Estimate (cells C0010/R0020 to R0040)</p> <p>— Isolate the amount of cash flows (cash in minus cash out) that were projected within this opening Best Estimate for the period considered</p> <p>— This isolated amount of cash flow shall come in addition to Opening Best Estimate (for neutralisation effect) — and be filled in cell C0010/R0070 and C0020/R0070.</p>
C0010–C0020/R0080	Variation of Best Estimate due to experience — risks accepted prior to period	<p>[^{F1}The variation of Best Estimate captured here shall strictly relate to the cash flows projected at the end of the period when compared to the cash flows that were projected at the beginning of the period for the periods N + 1 and future. It shall only capture the changes due to the realisation of the CF in year N and not linked to changes in assumptions.]</p>
C0010–C0020/R0090	Variation of Best Estimate due to changes in non-economic assumptions — risks accepted prior to period	<p>[^{F1}It mainly refers to changes in best estimate not driven by realised technical flows and changes in assumptions directly linked to insurance risks (i.e. lapse rates), which can be referred to as non-economic assumptions.] In order to isolate the strict scope of variation due to changes in assumptions, the calculation may be as follows:</p>

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not included in this version of legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

		<p>Estimate (cell C0010/R0010) including the adjustment to opening Best Estimate (cell C0010/R0010 to R0040) and the impact of unwinding of year N projected cash-flows (C0010/R0060 to R0080 and C0020/R0060 to R0080 respectively);]</p> <p>— Based on this figure, run calculations with new assumptions not related to discount rates — that applied at year end N (if any)</p> <p>This will provide the variation of Best Estimate strictly related to changes in these assumptions. This may not capture the variation due to case-by-case revision of RBNS, which would thus have to be added.</p> <p>For Non-Life, cases can be expected where these changes cannot be discerned separately from changes due to experience (C0020/R0080). In such cases, report the total figure under C0020/R0080.</p>
C0010–C0020/R0100	Variation of Best Estimate due to changes in economic environment — risks accepted prior to period	It mainly refers to assumptions not directly linked to insurance risks, i.e. mainly the impact of the changes in economic environment on the cash flows (taking management actions into account, e.g. reduction of future discretionary benefits

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are changes in legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (See end of Document for details)

		<p>For non-life (C0020/R0100), in case variation due to inflation cannot be discerned from changes due to experience, the whole amount would be reported under C0020/R0080.</p> <p>In order to isolate this strict scope of variation, the calculation may be as follows:</p> <ul style="list-style-type: none"> — Consider the opening Best Estimate including the adjustment to opening Best Estimate (cell C0010/R0010 to R0040) and the impact of unwinding, of year N projected cash-flows and experience (C0010/R0060 to R0080 and C0020/R0060 to R0080 respectively, or alternatively, C0010/R0060 to R0090 and C0020/R0060 to R0090 respectively) — Based on this figure, run calculations with new discount rates that applied during year N, together with related financial assumptions (if any). <p>This will provide the variation of Best Estimate strictly related to changes in discount rates and related financial assumptions.</p>
C0010–C0020/R0110	Other changes not elsewhere explained	Corresponds to other variations in Best Estimate,

Status: Point in time view as at 31/12/2020.

S.30.01 — Facultative covers for non-life and life business basic data

General comments:

This section relates to annual submission of information for individual entities.

This template is relevant to insurance and reinsurance undertakings which reinsure and/or retrocede business on a facultative basis.

It shall be filled by the non-life and life insurance and reinsurance undertakings with information on facultative covers in the next reporting year, covering information on the 10 most important risks in terms of reinsured exposure for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35 (e.g. in cases where the risks accepted do not fit in the regular policy acceptance and could only be accepted in case part of the risk is reinsured on a facultative basis). Each facultative risk is submitted to the reinsurer and terms and conditions of the facultative reinsurance are negotiated individually for each policy. Treaties that automatically cover risks are out of scope of this template and must be reported in S.30.03.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations.

~~There shall be one separate template for each line of business. For each line of business, a selection must be made of the 10 most important risks in terms of reinsured exposure (part of sum insured transferred to all reinsurers) on a facultative basis. Furthermore, each underwriting risk shall have a unique code specified by the ‘risk identification code’.~~

[^{F1}This template is prospective (to be in line with S.30.03) and as such shall reflect the reinsurance treaties effective and valid during the next reporting year for the selected 10 most important risks in terms of reinsured exposure for each line of business. Undertakings shall report the most important risks of the next reporting period which are covered by reinsurance treaties valid during the next reporting period. If reinsurance strategy changes materially after the validity date or if the renovation of the reinsurance contracts are performed later than the reporting date and before next 1 January, the information on this template shall be re-submitted when adequate.]

Facultative placements covering different lines of business shall also appear in the various relevant line of business if they are ranked within the 10 biggest risks of the same line of business.

Pt. 2. These amendments will be the next possible Expiry Date. (See details on legislation.gov.uk. Details of relevant amending instruments can be found on their websites.)

C0120	Currency	Identify the ISO 4217 alphabetic code of the currency used while placing the facultative cover. All the amounts must be expressed in this currency for the specific facultative cover, unless otherwise required by the national supervisory authority. In case the facultative cover is placed in two different currencies, then the main currency must be filled.
C0130	Sum insured	The highest amount that the insurer can be obliged to pay out under the policy. The insured sum relates to the underwriting risk. Where the facultative cover provides for a number of exposures/risks across the country the aggregate policy limits shall be specified. If the risk has been accepted on a co-insurance basis, the insured sum indicates the maximum liability of the reporting non-life insurer. [^{F4} In the case of unlimited sum insured, the 'Sum insured' shall be an estimation of the expected possible loss (calculated using the same methods as used for the calculation of the premium, which shall reflect the actual risk exposure).]
C0140	Type of underwriting model	Type of underwriting model which is used to estimate the exposure of the underwriting risk and the need for reinsurance protection. One of the options in the following closed list shall be used: 1 — Sum Insured the highest amount that the insurer can

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments apply to the specific legislation.gov.uk. Details of relevant amending instruments can be found on their website. (See end of Document for details)

C0280	Currency	Identify the ISO 4217 alphabetic code of the currency used while placing the facultative cover. All the amounts of this record must be expressed in this currency.
C0290	Sum Insured	The amount that the life insurer pays out to the beneficiary. If the risk is co-insured with other life insurers, the insured capital payable by the reporting life insurer has to be reported here.
C0300	Capital at risk	The capital at risk, as defined in Delegated Regulation (EU) 2015/35/EC. If the risk is co-insured with other life insurers, the risk capital relating to the life insurer's amount share in the insured capital has to be reported here.
C0310	Sum reinsured on a facultative basis, with all reinsurers	[^{F3} The sum reinsured on a facultative basis is that part of the sum insured which is reinsured on a facultative basis. The amount shall be consistent with the Sum insured as specified in C0290 and reflects the maximum liability (100 %) for the facultative reinsurers.]
C0320	Facultative reinsurance premium ceded to all reinsurers for 100 % of the reinsurance placement	Expected gross annual or written reinsurance premium, gross of ceding commissions, ceded to the reinsurers for their share.
C0330	Facultative reinsurance commission	Expected commission with the gross annual or written reinsurance premium. This shall include all ceding, overriding and profit commissions that represent cash-flows into the reporting insurer due from the reinsurer.

Status: Point in time view as at 31/12/2020.

S.30.02 ~~Facultative covers for non-life and life business shares data~~ ^{Exit} ~~Facultative covers for non-life and life business shares data~~ currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

General comments:

This section relates to annual submission of information for individual entities.

This template is relevant to insurance and reinsurance undertakings which reinsure and/or retrocede business on a facultative basis.

It shall be filled by the non-life and life insurance and reinsurance undertakings with information on shares of reinsurers of facultative covers in the next reporting year covering information on the 10 most important risks in terms of reinsured exposure, for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, (e.g. in cases where the risks accepted do not fit in the regular policy acceptance and could only be accepted in case part of the risk is reinsured on a facultative basis). Each facultative risk is submitted to the reinsurer and terms and conditions of the facultative reinsurance are negotiated individually for each policy. Treaties that automatically cover risks are out of scope of this template and must be reported in S.30.03.

There shall be one separate template for each line of business. For each line of business, a selection must be made of the 10 most important risks in terms of reinsured exposure (part of sum insured transferred to all reinsurers) on a facultative basis. Furthermore, each underwriting risk shall have a unique code specified by the 'risk identification code'. Each chosen risk shall be separated to get unique conditions for a contract in a single line. ^{F4}Where a facultative cover as reported in template S.30.01 is related to more than one reinsurance undertaking, this template shall be filled in with as many rows as the number of reinsurance undertakings involved for the specific facultative cover.]

^{F1}This template is prospective (to be in line with S.30.03) and as such shall reflect the reinsurance treaties effective and valid during the next reporting year for the selected 10 most important risks in terms of reinsured exposure for each line of business. Undertakings shall report the most important risks of the next reporting period which are covered by reinsurance treaties valid during the next reporting period. If reinsurance strategy changes materially after the validity date or if the renovation of the reinsurance contracts are performed later than the reporting date and before next 1 January, the information on this template shall be re-submitted when adequate.]

Facultative placements covering different lines of business shall also appear in the various relevant lines of business if they are ranked within the 10 biggest risks of the same line of business.

This template shall be filled in for each reinsurer that accepted the facultative cover.

S.30.03 — Outgoing Reinsurance Program basic data

General comments:

This section relates to annual submission of information for individual entities.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU) Regulations (S.I. 2018 No. 24) and by the Prudential Regulation Authority (EU Exit) Regulations (S.I. 2018 No. 24).

This template is relevant to insurance and reinsurance undertakings with an outgoing reinsurance and/or reinsurance program including any coverage provided by State backed reinsurance pool arrangements, excluding facultative covers.

This template shall be filled by the insurance and reinsurance undertaking which is transferring underwriting risk to the reinsurers through a reinsurance treaty whose period of validity includes or overlaps the next reporting year and are known when filling the template. If reinsurance strategy changes materially after that date or if the renovation of the reinsurance contracts are performed later than the reporting date and before next 1 January, the information on this template shall be re-submitted when adequate.

	ITEM	INSTRUCTIONS
C0010	Reinsurance program code	Unique code (undertaking specific) covering all the individual reinsurance placements and/or treaties which belong to the same reinsurance program.
C0020	Treaty identification code	Treaty identification code that identifies the treaty exclusively and must be maintained in subsequent reports, usually the original treaty number registered in the company's books.
C0030	Progressive section number in treaty	The progressive section number assigned by the undertaking to the various sections of the treaty, in those cases where the treaty, for example, covers more than one line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, or covers different lines of activity with different limits. Treaties with different conditions are considered different treaties for the submission of information and shall be reported in different sections. For different lines of business covered under the same treaty, the conditions referring to each line of business will be detailed separately under each section number. Treaties covering different type of reinsurance (e.g. one section on a Quota Share basis and

C0150	Estimated Subject Premium Income (XL – ESPI)	The amount of the estimated subject premiums income ('ESPI') relating to the contract period. It is normally the amount of premium referring to the portfolio protected under Excess of Loss treaties; in any case it is the amount on which the reinsurance premium is calculated by applying the rate. This item is only reported for XL treaties.
C0160	Gross Estimated Treaty Premium Income (proportional and non-proportional)	The amount of premium for 100 % of the treaty relating to the contract period. This amount is the equivalent of the 100 % reinsurance premium to be paid to all reinsurers for the treaty period, including the premium corresponding to unplaced shares.
C0170	Aggregate deductibles	The amount of franchise, meaning an additional retention when losses are covered by the reinsurer only when a certain amount of cumulative losses have taken place. This item is reported ^[F4] , when applicable, only if item C0180 is not reported.
C0180	Aggregate deductibles (%)	The percentage of franchise, meaning an additional retention percentage when losses are covered by the reinsurer only when a certain amount of cumulative losses have taken place. This item is reported ^[F4] , when applicable, only if item C0170 is not reported. The percentage shall be reported as a decimal.
C0190	Retention or priority	The amount, for Surplus, Working XL and Catastrophe XL treaties, that is stated as retention or priority in the reinsurance treaty. Separate

		as defined in Annex I to Delegated Regulation (EU) 2015/35.
C0200	Retention or priority (%)	The percentage, for Quota Share and Stop Loss treaties, that is stated as retention or priority in the reinsurance treaty. Separate indication shall be given for the various lines of business, as defined in Annex I to Delegated Regulation (EU) 2015/35. The percentage shall be reported as a decimal.
C0210	Limit	The amount that is stated as Limit in the reinsurance treaty. Separate indication shall be given for the various lines of business, as defined in Annex I to Delegated Regulation (EU) 2015/35. In the case of unlimited cover '– 1' is to be reported.
C0220	Limit (%)	The percentage, for Stop Loss treaties, that is stated as Limit in the reinsurance treaty. Separate indication shall be given for the various lines of business, as defined in Annex I to Delegated Regulation (EU) 2015/35. In the case of unlimited cover '– 1' is to be reported. The percentage shall be reported as a decimal.
C0230	Maximum cover per risk or event	The amount of maximum cover per risk or event. If for a Quota Share or a Surplus a maximum amount has been agreed for an event (for example — windstorm), the 100 % amount is to be reported. In all other cases, the amount is equal to the Limit minus Priority. In the case of unlimited cover '– 1' is to be reported.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C0240	Maximum cover per treaty	The amount of maximum cover per treaty. If for a
		Quota Share or a Surplus a maximum amount has been set for the entire contract, the 100 % amount is to be reported. In the case of unlimited cover '– 1' is to be reported. For XL or SL treaties the initial capacity has to be indicated (e.g. annual aggregate limits); total cover might also be the result of the information provided under C0250.
C0250	Number of reinstatements	Number of possibilities to recover the reinsurance coverage.
C0260	Description of reinstatements	Description of the reinstatements to recover the reinsurance coverage. Examples of possible content of this item are '2 at 100 % plus 1 at 150 %' or 'all free'
C0270	Maximum reinsurance commission	Report the maximum percentage of commission. If fixed, item C0270, C0280 and C0290 are equal. The percentage shall be reported as a decimal. This item is only applicable for proportional treaties.
C0280	Minimum reinsurance commission	Report the minimum percentage of commission. If fixed, item C0270, C0280 and C0290 are equal. The percentage shall be reported as a decimal. This item is only applicable for proportional treaties.
C0290	Expected reinsurance commission	Report the expected percentage of commission. If fixed, item C0270, C0280 and C0290 are equal. The percentage shall be reported as a decimal. This item is only applicable for proportional treaties.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C0300	Maximum overriding commission	Report the maximum percentage of Overriding commission. If fixed, item C0300, C0310 and C0320 are equal. The percentage shall be reported as a decimal. This item is only applicable for proportional treaties.
C0310	Minimum overriding commission	Report the minimum percentage of Overriding commission. If fixed, item C0300, C0310 and C0320 are equal. The percentage shall be reported as a decimal. This item is only applicable for proportional treaties.
C0320	Expected overriding commission	Report the expected percentage of Overriding commission. If fixed, item C0300, C0310 and C0320 are equal. The percentage shall be reported as a decimal. This item is only applicable for proportional treaties.
C0330	Maximum profit commission	Report the maximum percentage of Profit commission. If fixed, item C0330, C0340 and C0350 are equal. The percentage shall be reported as a decimal. This item is only applicable for proportional treaties.
C0340	Minimum profit commission	Report the minimum percentage of Profit commission. If fixed, item C0330, C0340 and C0350 are equal. The percentage shall be reported as a decimal. This item is only applicable for proportional treaties.
C0350	Expected profit commission	Report the expected percentage of Profit commission. If fixed, item C0330, C0340 and C0350 are equal.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments shall be reported as a decimal for details) on legislation.gov.uk. Details of relevant amending instruments can be found on their websites (See end of Document for details)

		This item is only applicable for proportional treaties.
C0360	XL rate 1	Report the fixed rate or starting rate of a sliding rate system. The percentage shall be reported as a decimal. This item is only reported for XL treaties.
C0370	XL rate 2	Report the top end rate of a sliding rate system [F ¹¹ or NA for not applicable]. The percentage shall be reported as a decimal. This item is only reported for XL treaties.
C0380	XL premium flat	Indication on whether XL premium is based or not on a flat premium. One of the options in the following list shall be used: 1 — XL premium based on a flat premium 2 — XL premium not based on a flat premium This item is only reported for XL treaties.

S.30.04 — Outgoing Reinsurance Program shares data

General comments:

This section relates to annual submission of information for individual entities.

This template is relevant to insurance and reinsurance undertakings with an outgoing; reinsurance and/or retrocession program including any coverage provided by State backed reinsurance pool arrangements, excluding facultative covers.

This template shall be filled by the insurance and reinsurance undertaking which is transferring underwriting risk to the reinsurers through a reinsurance treaty whose period of validity includes or overlaps the next reporting year and are known when filling the template. If reinsurance strategy changes materially after that date or if the renovation of the reinsurance contracts are performed later than the reporting date and before next 1 January, the information on this template shall be re-submitted when adequate.

	ITEM	INSTRUCTIONS

Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

S.31.01 Share of reinsurers (including Finite Reinsurance and SPVs)
General comments:

This section relates to annual submission of information for individual entities.

This template shall be filled by the insurance and reinsurance undertakings where a recoverable is recognised in relation to the reinsurer (even if all contracts with that reinsurer have terminated) and whose reinsurer is reducing the gross technical provisions as per end of the reporting year.

The template collects information on reinsurers and not on separate treaties. All ceded technical provisions, including those ceded under Finite reinsurance (as defined in S.30.03 Column C0060), must be completed. This also means that if an SPV or a syndicate of Lloyd's acts as a reinsurer the SPV or the syndicate must be listed.

	ITEM	INSTRUCTIONS
C0040	Code reinsurer	Identification code of the reinsurer by this order of priority: — Legal Entity Identifier (LEI); — Specific code attributed by the undertaking
C0050	Type of code Reinsurer	Identification of the code used in item 'Code reinsurer'. The following closed list shall be used: 1 — LEI 2 — Specific code
C0060	Reinsurance recoverables — Premium provision Non–life including Non–SLT Health	The amount of share of the reinsurer in the recoverables from reinsurance (including Finite Re and SPV) before the adjustment for expected losses due to the counterparty default, in the best estimate of the premium provisions calculated as the expected present value of future incoming and outgoing cash flows.
C0070	Reinsurance recoverables — Claims provisions Non–life including Non–SLT Health	The amount of share of the reinsurer in the recoverables from reinsurance (including Finite Re and SPV) before the adjustment for expected losses due to the counterparty default, in the best estimate of the claims provisions.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C0080	Reinsurance recoverables Technical provisions Life	The amount of share of the reinsurer in the recoverables
	including SLT Health	from reinsurance (including Finite Re and SPV) before the adjustment for expected losses due to the counterparty default, in the best estimate of the technical provisions.
C0090	Adjustment for expected losses due to counterparty default	Per reinsurer the adjustment for expected losses due to counterparty default. The adjustment shall be calculated separately and must be in line with Delegated Regulation (EU) 2015/35. This value shall be reported as negative value.
C0100	Reinsurance recoverables: Total reinsurance recoverables	The result of ceded technical provisions (resulting from claims provision + premiums provision + Non-Life TP calculated as a whole and Life including health SLT, including the adjustment for expected losses due to counterparty default.
C0110	Net receivables	The amounts past due resulting from: claims paid by the insurer but not yet reimbursed by the reinsurer plus commissions to be paid by the reinsurer and other receivables minus debts to the reinsurer. Cash deposits are excluded and are to be considered as guarantees received.
C0120	Assets pledged by reinsurer	Amount of assets pledged by the reinsurer to mitigate the counterparty default risk of the reinsurer.
C0130	Financial guarantees	Amount of guarantees received by the undertaking from the reinsurer to guarantee the payment of the liabilities due by the undertaking (includes letter of credit, undrawn committed borrowing facilities).

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

(EU Exit) Regulations 2018 (S.I. 2018/1111), Regs 2 to 3 Sch. Pt. 2. These amendments are not currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

C0140	Cash deposits	[^{F4} Amount of cash deposits received by the undertaking from the reinsurers.]
C0150	Total guarantees received	Total amount of types of guarantees. [^{F4} Corresponds to the sum of the amounts reported in C0120, C0130 and C0140.]
Information on reinsurers		
C0160	Code reinsurer	Identification code of the reinsurer by this order of priority: — Legal Entity Identifier (LEI); — Specific code attributed by the undertaking
C0170	Type of code Reinsurer	Identification of the code used in item 'Code reinsurer'. The following closed list shall be used: 1 — LEI 2 — Specific code
C0180	Legal name reinsurer	Legal name of the reinsurer to whom the underwriting risk has been transferred. The official name of the risk-carrier reinsurer is stated in the reinsurance contract. It is not permitted to fill in the name of a reinsurance broker. Nor is it permitted to state a general or incomplete name as international reinsurers have several operating companies that may be based in different countries. In case of pooling arrangements, the name of the Pool (or Pool manager) can be filled only if the Pool is a legal entity.
C0190	Type of reinsurer	Type of reinsurer to whom the underwriting risk has been transferred. The following closed list shall be used: 1 — Direct Life insurer

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not currently in force. [legislation.gov.uk](https://www.legislation.gov.uk). Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments to the credit quality step shall reflect any readjustments to the credit quality made internally by the undertakings that use the standard formula. [F12 One of the options in the following closed list shall be used:

		<p>readjustments to the credit quality made internally by the undertakings that use the standard formula.</p> <p>[F12 One of the options in the following closed list shall be used:</p> <ul style="list-style-type: none"> 0 — Credit quality step 0 1 — Credit quality step 1 2 — Credit quality step 2 3 — Credit quality step 3 4 — Credit quality step 4 5 — Credit quality step 5 6 — Credit quality step 6 9 — No rating available]
C0240	Internal rating	Internal rating of the reinsurer for undertakings using internal model to the extent that the internal ratings are used in their internal modelling. If an internal model undertaking is using solely external ratings this item shall not be reported.

S.31.02 — Special Purpose Vehicles

General comments:

This section relates to annual submission of information for individual entities.

This template is relevant for each insurance or reinsurance undertaking transferring risk(s) to a Special Purpose Vehicle (SPV), to ensure sufficient disclosure has been made where SPVs are used as alternative risk transfer methods to traditional reinsurance treaties.

The template applies to the use of:

- a) SPVs defined under Article 13(26) and authorised under Article 211(1) of Directive 2009/138/EC;
- b) SPVs meeting conditions of Article 211(3) of Directive 2009/138/EC;
- c) SPVs regulated by third country supervisors where these meet equivalent measures to the conditions set out in Article 211(2) of Directive 2009/138/EC;

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

d) Other SPVs not meeting the definitions above where risks are transferred under arrangements with the economic substance of a reinsurance contract. (See end of Document for details)

The template covers risk mitigation techniques (recognised or not) carried out by the (re)insurance undertaking whereby a SPV assumes risks from the reporting undertaking through a reinsurance contract; or assume insurance risks from the reporting undertaking transferred through a similar arrangement that is 'reinsurance like'.

	ITEM	INSTRUCTIONS
C0030	Internal code of SPV	[^{F3} Internal code attributed to the SPV by the undertaking by this order of priority: — Legal Entity Identifier (LEI); — Specific code This code shall be unique to each SPV and remain constant over subsequent reports.]
C0040	ID Code of SPV notes or other financing mechanism issued	For the notes or other financing mechanism issued by the SPV and hold by the insurance and reinsurance undertaking identify the ID code by this order of priority if existent: — ISO 6166 ISIN when available; — Other 'recognised' codes (e.g.: CUSIP, Bloomberg Ticker, Reuters RIC); — Code attributed by the undertaking, when the options above are not available, and must be consistent over time.
C0050	ID Code Type of SPV notes or other financing mechanism issued	Type of ID Code used for the 'Asset ID Code' item. One of the options in the following closed list shall be used: 1 — ISO 6166 for ISIN code 2 — CUSIP (The Committee on Uniform Securities Identification Procedures number assigned by the CUSIP Service

S.36.01 — IGT — Equity-type transactions, debt and asset transfer

General comments:

This section relates to annual submission of information for individual entities.

The purpose of this template is to collect information according to Article 265 of Directive 2009/138/EC on all (significant, very significant and transactions required to be reported in all circumstances) IGTs related to equity, debt, reciprocal financing and asset transfers related transactions within a group according to Article 213 (2)(d) of Directive 2009/138/EC. These include, but are not limited to:

- equity and other capital items including participations in related entities and transfer shares of related entities of the group;
- debt including bonds, loans, collateralised debt, and other transactions of similar nature e.g. with periodic pre-determined interest or coupon or premium payments for a pre-determined period of time.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date.

Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation

Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

— (EU Exit) regulations (EU Exit) Regulations, such as transfer of properties and transfer of shares of other companies unrelated (i.e. outside) to the group. (See end of Document for details)

The insurance undertaking is expected to complete this template for all significant, very significant and transactions required to be reported in all circumstances for IGTs between the individual undertaking and the mixed-activity insurance holding company and its related undertakings.

This template shall include IGTs that were:

- in-force at the start of the reporting period.
- incepted during the reporting period and outstanding at the reporting date.
- incepted and expired/matured during the reporting period.

Where similar transactions with a related entity may be excluded from IGT reporting when considered individually against the thresholds for significant and very significant, these transactions must nevertheless be individually reported where collectively they are at or above the corresponding threshold values for significant or very significant IGTs.

Each transaction shall be reported separately.

Any additions/top-ups to significant IGTs shall be reported as a separate IGT, even if the top-up in its own right falls below the significant threshold limit. For example, if an undertaking increases the initial loan amount to another related undertaking the addition to the loan should be recorded as a separate item with its issue date as the date of the top-up.

Where the transaction value is different for two transacting parties (e.g. a EUR 10 m transaction between A and B where A records EUR 10 m but B only receive EUR 9,5 m because of transactions costs, of say EUR 0,5 m has been expensed) the template shall record the maximum amount as the transaction amount, in this case EUR 10 m.

Where there is a chain of related IGTs (say A invests in B and B invests in C), each link of the chain needs to be reported as a separate IGT.

	ITEM	INSTRUCTIONS
C0010	ID of intragroup transaction	Unique internal identification code for each intragroup transaction. Should be consistent over time.
C0020	Investor/lender name	Name of the entity that is buying the equity or lending to a related undertaking within the group. I.e. the entity that recognises the transaction as an asset on their balance sheet (debit — balance sheet).
C0030	Identification code for investor/lender	The unique identification code attached to the investor/buyer/transferee by this order of priority: <ul style="list-style-type: none"> — Legal Entity Identifier (LEI); — Specific code

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments will be made to the legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (For details) The date should follow the ISO 8601 (yyyy-mm-dd) format.

		The date should follow the ISO 8601 (yyyy-mm-dd) format.
C0120	Maturity date of transaction	Identify the ISO 8601 (yyyy-mm-dd) code of the date when the transaction expires/reaches maturity if applicable. — For IGTs with no maturity date use '9999-12-31'. — For perpetual securities use '9999-12-31'
C0130	Currency of transaction	Identify the ISO 4217 alphabetic code of the currency in which the transaction took place.
C0140	Contractual amount of transaction/Transaction price	Amount of the transaction or price as per agreement/contract.
C0150	Value of collateral/asset	The value of collateral for collateralised debt or asset value for IGT involving asset transfer.
C0160	Amount of redemption/prepayments/paybacks during reporting period	Amount of total redemptions/prepayments/paybacks during the reporting period if applicable.
C0170	Amount of dividends/interest/coupon and other payments made during reporting period	This cell shall capture any payments made in relation to the IGTs recorded in this template for the reporting period (12 months up to the reporting date). This includes, but not limited to: — Dividends for the current year including paid or declared but unpaid dividends. — Any deferred dividends from previous years paid during the reporting period (i.e. any deferred dividends paid that impacted

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not the P&L for the reporting period. (See end of Document for details) legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

		<ul style="list-style-type: none"> — Interest payments made in relation to debt instruments. — Any other payments made in relation to the IGTs that are reported in this template, e.g. charges on asset transfers. <p>Amount of total tops-ups if applicable, i.e. total additional money invested during the reporting period such as a additional payments on partly paid shares or increasing loan amount during the period,</p>
C0180	Balance of contractual amount of transaction at reporting date	Outstanding amount of the transaction at the reporting date if applicable e.g. for debt issue. If there has been a full early settlement/prepayment, the balance of contractual amount will be zero.
C0190	Coupon/Interest rate	The interest or coupon rate as a percentage, if applicable. For variable interest rate, this shall include the reference rate and the interest rate above it.

S.36.02 — IGT — Derivatives

General comments:

This section relates to annual submission of information for individual entities.

This template shall report all IGTs between entities in scope of group supervision according to Article 213 (2)(d) of Directive 2009/138/EC.

The insurance undertaking is expected to complete this template for all significant, very significant and transactions required to be reported in all circumstances for IGTs between the individual undertaking and the mixed-activity insurance holding company and its related undertakings:

This template shall include IGTs that were:

- in-force at the start of the reporting period.
- incepted during the reporting period and outstanding at the reporting date.
- incepted and expired/matured during the reporting period.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

Where similar transactions with a related entity may be excluded from IGT reporting when considered individually against the thresholds for significant and very significant, these transactions must nevertheless be reported individually where collectively, they are at or above the corresponding threshold values for significant or very significant IGTs.

Each transaction shall be reported separately.

Any additions/top-ups to significant IGTs shall be reported as a separate IGT, even if the top-up in its own right falls below the significant threshold limit. For example, if an undertaking increases the initial loan amount to another related undertaking the addition to the loan should be recorded as a separate item with its issue date as the date of the top-up.

Where the transaction value is different for two transacting parties (e.g. a EUR 10 m transaction between A and B where A records EUR 10 m but B only receive EUR 9,5 m because of transactions costs, of say EUR 0,5 m has been expensed) the template should record the maximum amount as the transaction amount, in this case EUR 10 m.

Where there is a chain of related IGTs (say A invests in B and B invests in C), each link of the chain needs to be reported as a separate IGT.

	ITEM	INSTRUCTIONS
C0010	ID of intragroup transaction	Unique internal identification code for each intragroup transaction. Must be consistent over time.
C0020	Investor/Buyer name	Name of the entity that is investing/buying the derivative, or the counterparty with the long position. For swaps the payer is the payer of the fixed rate that receives the floating rate.

S.36.03 — IGT — Internal reinsurance

General comments:

This section relates to annual submission of information for individual entities.

[^{F3}The purpose of this template is to collect information on all IGTs (significant, very significant and transactions required to be reported in all circumstances) related to internal reinsurance within a group identified according to Article 213(2)(d) of Directive 2009/138/EC. These include, but are not limited to:]

- reinsurance treaties between related undertakings;
- facultative reinsurance between related undertakings; and
- any other transaction that results in transferring underwriting risk (insurance risk) between related undertakings.

The insurance undertaking is expected to complete this template for all significant, very significant and transactions required to be reported in all circumstances for IGTs between the individual undertaking and the mixed-activity insurance holding company and its related undertakings.

This template shall include IGTs that were:

Status: Point in time view as at 31/12/2020.

- Changes to legislation:** Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2019. These amendments are not currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their website's. (See end of Document for details)
- in force at the start of the reporting period.
- incepted during the reporting period and outstanding at the reporting date.
- incepted and expired/matured during the reporting period.

Where similar transactions with a related entity may be excluded from IGT reporting when considered individually against the thresholds for significant and very significant, these transactions must nevertheless be individually reported where collectively they are at or above the corresponding threshold values for significant or very significant IGTs.

Each transaction shall be reported separately. Undertakings shall report as many rows as needed to properly identify the transaction, including if different types of reinsurance contracts/treaties are used.

Any additions/top-ups to significant IGTs shall be reported as a separate IGT, even if the top-up in its own right falls below the significant threshold limit. For example, if an undertaking increases the initial loan amount to another related undertaking the addition to the loan shall be recorded as a separate item with its issue date as the date of the top-up.

Where the transaction value is different for two transacting parties (e.g. a EUR 10 m transaction between A and B where A records EUR 10 m but B only receive EUR 9,5 m because of transactions costs, of say EUR 0,5 m has been expensed) the template shall record the maximum amount as the transaction amount, in this case EUR 10 m.

Where there is a chain of related IGTs (say A invests in B and B invests in C), each link of the chain needs to be reported as a separate IGT.

	ITEM	INSTRUCTIONS
C0010	ID of intragroup transaction	Unique internal identification code for each intragroup transaction. Must be consistent over time.
C0020	Name of cedent	Legal name of the entity that has transferred the underwriting risk to another insurer or reinsurer within the group.

Pt. 2. These amendments are in force. For further information see <https://www.legislation.gov.uk>. Details of relevant amending instruments can be found on their websites. This item is not reported if there is no expiry date (for example, contract is continuous and ends by one of the parties giving notice).

		reported if there is no expiry date (for example, contract is continuous and ends by one of the parties giving notice).
C0100	Currency of contract/treaty	Identify the ISO 4217 alphabetic code of the currency of payments for the specific reinsurance contract/treaty.
C0110	Type of reinsurance contract/treaty	Identify the type of reinsurance contract/treaty. The following close list shall be used: <ol style="list-style-type: none"> 1 — quota share 2 — variable quota share 3 — surplus 4 — excess of loss (per event and per risk) 5 — excess of loss (per risk) 6 — excess of loss (per event) 7 — excess of loss 'back-up' (protection against follow-on events which certain catastrophes can cause such as flooding or fire) 8 — excess of loss with basis risk 9 — reinstatement cover 10 — aggregate excess of loss 11 — unlimited excess of loss 12 — stop loss 13 — other proportional treaties 14 — other non-proportional treaties 15 — Financial reinsurance 16 — Facultative proportional

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not currently in force. [legislation.gov.uk](https://www.legislation.gov.uk). Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

		Other proportional treaties (code 13) and Other non-proportional treaties (code 14) can be used for hybrid types of reinsurance treaties
C0120	Maximum cover by reinsurer under contract/treaty	For quota share or a surplus treaty, 100 % of the maximum amount that has been set for the entire contract/treaty is stated here (e.g. £ 10 million). In case of unlimited cover '– 1' must be filled in here. For XL or SL treaties enter the initial capacity. This item has to be reported in the currency of the transaction.
C0130	Net Receivables	The amount resulting from: claims paid by the insurer but not yet reimbursed by the reinsurer + commissions to be paid by the reinsurer + other receivables minus debts to the reinsurer. Cash deposits are excluded and are to be considered as guarantees received. Total amount must be equal to the sum of the balance sheet items: Reinsurance receivables and Reinsurance payables.
C0140	Total reinsurance recoverable	Total amount due from the reinsurer at the reporting date which include: — Premium provision for part of the future reinsurance premium which has already been paid to the reinsurer; — Claims provision for claims outstanding for insurer which have to be paid by the reinsurer; and/or

Status: Point in time view as at 31/12/2020.

S.36.04 IGT - Cost Sharing, contingent liabilities, off balance sheet and other items
(EU Exit) Regulation (EU) 2015/2450 of 2 December 2015 laying down implementing technical standards for the prudential supervision of credit institutions and for the prudential supervision of investment firms by the Prudential Regulation Authority. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

General comments:

This section relates to annual submission of information for individual entities.

The purpose of this template is to collect information on all other IGTs (significant, very significant and transactions required to be reported in all circumstances) which have not been captured in 36.01 to 36.03 templates within the group according to Article 213 (2) (d) of Directive 2009/138/EC. These include, but not limited to:

- Internal cost sharing;
- Contingent liabilities (other than derivatives);
- Off balance sheet guarantees;
- Any other transactions between related undertakings or natural persons in scope of the group supervision.

The insurance undertaking is expected to complete this template for all significant, very significant and transactions required to be reported in all circumstances for IGTs between the individual undertaking and the mixed-activity insurance holding company and its related undertakings.

This template shall include IGTs that were:

- in-force at the start of the reporting period.
- incepted during the reporting period and outstanding at the reporting date.
- incepted and expired/matured during the reporting period.

Where similar transactions with a related entity may be excluded from IGT reporting when considered individually against the thresholds for significant and very significant, these transactions must nevertheless be individually reported where collectively they are at or above the corresponding threshold values for significant or very significant IGTs.

Each transaction shall be reported separately.

Any additions/top-ups to significant IGTs shall be reported as a separate IGT, even if the top-up in its own right falls below the significant threshold limit. For example, if an undertaking increases the initial loan amount to another related undertaking the addition to the loan should be recorded as a separate item with its issue date as the date of the top-up.

Where the transaction value is different for two transacting parties (e.g. a EUR 10 m transaction between A and B where A records EUR 10 m but B only receive EUR 9,5 m because of transactions costs, of say EUR 0,5 m has been expensed) the template should record the maximum amount as the transaction amount, in this case EUR 10 m.

Where there is a chain of related IGTs (say A invests in B and B invests in C), each link of the chain needs to be reported as a separate IGT.

	ITEM	INSTRUCTIONS
C0010	ID of intragroup transaction	Unique internal identification code for each intragroup transaction. Must be consistent over time.
C0020	Investor/Buyer/Beneficiary name	Legal name of the entity that is purchasing/investing in the

ANNEX III U.K.

Instructions regarding reporting templates for groups

This Annex contains additional instructions in relation to the templates included in Annex I of this Regulation. The first column of the tables identifies the items to be reported by identifying the columns and rows as showed in the template in Annex I.

Templates which shall be filled in in accordance with the instructions of the different sections of this Annex are referred to as ‘this template’ throughout the text of the Annex.

S.01.01 — Content of the submission

General comments:

This section relates to opening, quarterly and annual submission of information for groups, ring fenced funds, matching portfolios and remaining part at group level.

When a special justification is needed the explanation is not to be submitted within the reporting template but shall be part of the dialogue with the national competent authorities.

	ITEM	INSTRUCTIONS
Z0010	Ring-fenced fund/matching portfolio/remaining part	Identifies whether the reported figures are with regard to a ring-fenced fund (‘RFF’), matching adjustment portfolio (‘MAP’) or to the remaining part. One of the options in the following closed list shall be used: 1 — RFF/MAP 2 — Remaining part
Z0020	Fund/Portfolio number	When item Z0010 = 1, identification number for a ring-fenced fund or matching portfolio. This number is attributed by the undertaking and must be consistent over time and with the fund/ portfolio number reported in other templates. [^{F11} When item Z0010 = 2, then report ‘0’]
C0010/R0010	S.01.02 — Basic Information — General	This template shall always be reported. The only option possible is:

Status: Point in time view as at 31/12/2020.

S.01.03 — Basic information — RFF and matching adjustment portfolios

General comments:

This section relates to opening and annual submission of information for groups.

All ring-fenced funds and matching portfolios should be identified regardless if they are material for the purposes of submission of information.

In the first table all ring-fenced funds and matching adjustments portfolios shall be reported. In case a ring-fenced fund has a matching portfolio not covering the full RFF three funds have to be identified, one for the RFF, other for the MAP inside the RFF and other for the remaining part of the fund (vice-versa for the situations where a MAP has a RFF).

In the second table the relations between the funds as explained in previous paragraph are explained. Only the funds with such relations shall be reported in the second table.

For group reporting the following specific requirements shall be met:

- This information is applicable when method 1 as defined in Article 230 of Solvency II Directive is used, either exclusively or in combination with method 2 as defined in Article 233 of Solvency II Directive;
- When combination method is being used, this information is to be submitted only for the part of the group calculated with method 1 as defined in Article 230 of Solvency II Directive, and;
- This information does not apply to groups when method 2 as defined in Article 233 of Solvency II Directive is being used exclusively.

C0120	Sub RFF/MAP	Identify if the nature of the fund embedded in other funds. One of the options in the following closed list shall be used: 1 — Ring-fenced fund 2 — Matching portfolio
-------	-------------	--

S.02.01 — Balance sheet**General comments:**

This section relates to opening, quarterly and annual submission of information for groups, ring fenced-funds and remaining part.

This template is relevant when method 1 (Accounting consolidation-based method) is used, either exclusively or in combination with method 2 (Deduction and aggregation method). Holdings in related undertakings that are not consolidated row by row in accordance with Article 335, paragraph 1, (a), (b) or (c) of the Delegated Regulation (EU) 2015/35, including the holdings in related undertakings included with method 2 when combination of methods is used, shall be included in the item 'Holdings in related undertakings, including participations'.

Template SR.02.01 is only applicable in relation to RFF/MAP from undertakings consolidated according to Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35, when method 1 (Accounting consolidation-based method) is used, either exclusively or in combination with method 2 (Deduction and aggregation method).

The 'Solvency II value' column (C0010) shall be completed using the valuation principles set out in the Directive 2009/138/EC, Delegated Regulation (EU) 2015/35, Solvency 2 Technical Standards and Guidelines.

With regards to the 'Statutory accounts value' column (C0020), recognition and valuation methods are the ones used by groups in their statutory accounts in accordance with the local GAAP or IFRS if accepted as local GAAP. This column is by default mandatory. In the specific cases where the group does not produce official financial statements according to local GAAP or IFRS the specific situation should be discussed with the group supervisor. In template SR.02.01 this column is only applicable if the development of financial statements by RFF is required by national law.

The default instruction is that each item shall be reported in the 'Statutory accounts value' column, separately.

However, in the 'Statutory accounts value' column the dotted rows were introduced in order to enable the reporting of aggregated figures if the split figures are not available.

C0010– C0020/R0880	Any other liabilities, not elsewhere shown	This is the total of any other liabilities, not elsewhere already included in other Balance Sheet items.
C0010– C0020/R0900	Total liabilities	This is the overall total amount of all liabilities
C0010/R1000	Excess of assets over liabilities	This is the total of group's excess of assets over liabilities, valued in accordance with Solvency II valuation basis. Value of the assets minus liabilities.
C0020/R1000	Excess of assets over liabilities (statutory accounts value)	This is the total of excess of assets over liabilities of statutory accounts value column.

S.02.02 — Assets and liabilities by currency

General comment:

This section relates to annual submission of information for groups.

This template is to be filled in accordance to the Balance sheet (S.02.01). Valuation principles are laid down in Directive 2009/138/EC, Delegated Regulation (EU) 2015/35, Solvency II Technical Standards and Guidelines.

This template is not required to be submitted if one single currency represents more than 90 % of assets and also of liabilities.

If submitted, information on the reporting currency shall always be reported regardless of the amount of assets and liabilities. Information reported by currency shall at least represent 90 % of the total assets and of the total liabilities. The remaining 10 % shall be aggregated. If a specific currency has to be reported for either assets or liabilities to comply with the 90 % rule then that currency shall be reported for both assets and liabilities.

Status: Point in time view as at 31/12/2020.

S.03.01 — Off-balance sheet items — General

General comments:

This section relates to annual submission of information for groups.

This template shall include the information referring to off-balance sheet items and the maximum and solvency II value of contingent liabilities in Solvency II balance sheet also. As regards the Solvency II value, the instructions define the items from a recognition perspective. Valuation principles are laid down in Directive 2009/138/EC, Delegated Regulation (EU) 2015/35, Solvency II Technical Standards and Guidelines.

Guarantee require the issuer to make specified payments to reimburse the holder for a loss it incurs if a specified debtor fails to make payment when due under the original or modified terms of a debt instrument. These guarantees can have various legal forms, such as financial guarantees, letters of credit, credit default contracts. These items shall not include guarantees stemming from insurance contracts, which are recognised in technical provisions.

A contingent liability is defined as:

- a) a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or
- c) a present obligation that arises from past events even if:
 - iii. it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
 - iv. the amount of the obligation cannot be measured with sufficient reliability.

Collateral is an asset with a monetary value or a commitment that secure the lender against the defaults of the borrower.

[^{F1}The guarantees listed in this template are not reported in S.03.02 and S.03.03. This means that only limited guarantees are to be reported in this template. Internal guarantees within the scope of group supervision are not reported in this template.]

At group level, the template is applicable for all entities within the scope of group supervision — including other financial sectors and non-controlled participations — for method 1 (Accounting consolidation-based method), method 2 (Deduction and aggregation method) and a combination of methods 1 and 2.

For non-controlled participations guarantees provided and guarantees received are included on a proportional basis when method 1 is applied. When method 2 is applied these guarantees are reported with the total amount.

S.03.03 — Off-balance-sheet items — List of unlimited guarantees provided by the group

General comments:

This section relates to annual submission of information for groups.

As regards the Solvency II value, the instructions define the items from a recognition perspective. Valuation principles are laid down in Directive 2009/138/EC, Delegated Regulation (EU) 2015/35, Solvency II Technical Standards and Guidelines.

Unlimited guarantees refer to guarantees with unlimited amount, regardless of the date being limited or unlimited.

The guarantees listed in this template are not reported in S.03.01. At group level, the template is applicable for all entities within the scope of group supervision — including other financial sectors and non-controlled participations — for method 1 (Accounting consolidation-based method), method 2 (Deduction and aggregation method) and a combination of methods 1 and 2.

Internal guarantees within the scope of group supervision are not reported in this template but reported in the relevant Intra-group transactions (S.36) template.

	ITEM	INSTRUCTIONS
C0010	Code of guarantee	Code of guarantee provided. This number is attributed by the group, must be unique and be consistent over time. It shall not be reused for other guarantees.
C0020	Name of receiver of guarantee	Identification of the name of the receiver of the guarantee.
C0030	Code of receiver of guarantee	Identification code of receiver of guarantee using the Legal Entity Identifier (LEI) if available. If not available this item shall not be reported.

Status: Point in time view as at 31/12/2020.		
Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), reg. 2(1), Sch. 2. These amendments are not currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

S.05.01 — Premiums, claims and expenses by line of business

General comments:

This section relates to quarterly and annual submission of information for groups.

This template shall be reported from a consolidated accounting perspective, i.e.: Local GAAP or IFRS if accepted as local GAAP but using Solvency II lines of business. Groups shall use the recognition and valuation basis as for the published financial statements, no new recognition or re-valuation is required^[F11],^[F4], except for the classification between investment contracts and insurance contracts when this is applicable in the financial statements. This template shall include all insurance business regardless of the possible different classification between investment contracts and insurance contracts applicable in the financial statements.]

The template is based on a year-to-date basis.

This template covers only insurance and reinsurance business within the scope of the consolidated financial statements.

^[F1]For quarterly reporting administrative expenses, investment management expenses, acquisition expenses, claims management expenses, overhead expenses shall be presented aggregated.]

		of new insurance and reinsurance business, advertising insurance products, improvement of the internal processes such as investment in system required to support insurance and reinsurance business (e.g. buying new IT system and developing new software). The net overhead expenses represent the sum of the direct business and the accepted reinsurance business reduced by the amount ceded to reinsurance undertakings.
C0300/R1410–R2400	Total	Total for different items for all life lines of business.
C0300/R2500	Other expenses	Other technical expenses not covered by above mentioned expenses and not split by lines of business. Shall not include non-technical expenses such as tax, interest expenses, losses on disposals, etc.
C0300/R2600	Total expenses	Amount of all technical expenses.
C0210 to C0280/R2700	Total amount of surrenders	This amount represents the total amount of surrenders occurred during the year. This amount is also reported under claims incurred (item R1610).

S.05.02 — Premiums, claims and expenses by country

General comments:

This section relates to annual submission of information for groups. [F⁴The template is not due when the thresholds for reporting by country described below are not applicable, i.e. the home country represents 90 % or more of the total gross written premiums.]

This template shall be reported from an accounting perspective, i.e.: Local GAAP or IFRS (if accepted as local GAAP. Groups shall use the recognition and valuation basis as for the published financial statements, no new recognition or re-valuation is required[F¹¹].][F⁴, except for the classification between investment contracts and insurance contracts when this is applicable in the financial statements. This template shall include all insurance business regardless of

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2019. Details of such instruments can be found on their website/s. (See end of Document for details)

the possible different classification, between investment contracts and insurance contracts applicable in the financial statements.]

[^{F11}.....]

This template covers only insurance and reinsurance business within the scope of the consolidated accounting perspective.

The following criteria for the classification by country shall be used:

- The information, provided by country, shall be completed for the five countries with the biggest amount of gross written premiums in addition to the home country or until reaching 90 % of the total gross written premiums;
- For the direct insurance business for the lines of business ‘Medical expense’, ‘Income protection’, ‘Workers' compensation’, ‘Fire and other damage to property’ and ‘Credit and suretyship’ information shall be reported by country where the risk is situated as defined in Article 13 (13) of Directive 2009/138/EC;
- For direct insurance business for all other lines of business, information shall be reported by country where the contract was entered into;
- For proportional and non-proportional reinsurance information shall be reported by country of localisation of the ceding undertaking.

For the purposes of this template ‘country where the contract was entered into’ means:

- s) The country where the insurance undertaking is established (home country) when the contract was not sold through a branch or freedom to provide services;
- t) The country where the branch is located (host country) when the contract was sold through a branch;
- u) The country where the freedom to provide services was notified (host country) when the contract was sold through freedom to provide services.
- v) If an intermediary is used or in any other situation, it is a), b) or c) depending on who sold the contract.

C0220 to C0280/R1900	Expenses incurred	All technical expenses incurred by the group during the reporting period, on accrual basis.
C0280/R2500	Other expenses	Other technical expenses not covered by above mentioned expenses and not split by lines of business. Shall not include non-technical expenses such as tax, interest expenses, losses on disposals, etc.
C0280/R2600	Total expenses	Amount of all technical expenses corresponding to countries covered by this template.

S.06.01 — Summary of assets

General comments:

This section relates to annual submission of information for groups. This template is relevant at the level of the group where all insurance or reinsurance undertakings within the scope of group supervision benefit from the exemption in accordance with Article 35 (7) of Directive 2009/138/EC.

The asset categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation.

This template contains a summary of information on assets and derivatives regarding the participating insurance or reinsurance undertaking, the insurance holding company or the mixed financial holding company (at a group level), including assets and derivatives held in unit linked and index linked contracts.

Items shall be reported with positive values unless its Solvency II value is negative (e.g. the case of derivatives that are a liability of the undertaking).

The template is applicable for method 1 (Accounting consolidation-based method), method 2 (Deduction and aggregation method) and a combination of methods 1 and 2.

Where method 1 is used exclusively, the reporting shall reflect the consolidated position of the assets and derivatives net of intra-group transactions held within the scope of group supervision.

Where method 2 is used exclusively, the reporting shall include the assets and derivatives held by the participating insurance and reinsurance undertakings, the insurance holding companies, mixed-financial holding companies, subsidiaries and non-controlled participations regardless of the proportional share used. The assets held by undertakings from the other financial sectors shall not be included.

Where a combination of methods 1 and 2 is used, the reporting shall reflect the consolidated position of the assets and derivatives, net of intra-group transactions, held within the scope of group supervision and the assets and derivatives held by the participating insurance or reinsurance undertakings, the insurance holding companies, the mixed financial holding

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2019, registered with the Registrar of Companies, London, England. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

	ITEM	INSTRUCTIONS
C0010 to C0060/R0010	Assets listed	Value of listed assets by portfolio. For the purpose of this template an asset is considered as being listed if it is negotiated on a regulated market or on a multilateral trading facility, as defined by Directive 2004/39/EC. Portfolio corresponds to the distinction between life, non-life, ring-fenced funds, other internal funds, shareholder's funds and general (no split). The split by portfolio is not mandatory, except for identifying ring fenced funds, but shall be made if the undertaking uses it internally. When an undertaking does not apply a split by portfolio 'general' shall be used.
C0010 to C0060/R0020	Assets that are not listed in a stock exchange	Value of assets not listed in a stock exchange, by portfolio. For the purpose of this template, not listed assets are the ones that are not negotiated on a regulated market or on a multilateral trading facility, as defined by Directive 2004/39/EC. Portfolio corresponds to the distinction between life, non-life, ring-fenced funds, other internal funds, shareholder's funds and general (no split). The split by portfolio is not mandatory, except for identifying ring fenced funds, but shall be made if the undertaking uses it internally. When an undertaking does not apply a split by portfolio 'general' shall be used.
C0010 to C0060/R0030	Assets that are not exchange tradable	Value of assets that are not exchange tradable, by portfolio.

Status: Point in time view as at 31/12/2020.

S.06.02 — List of assets

General comments:

This section relates to quarterly and annual submission of information for groups.

The asset categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to Complementary Identification Code ('CIC') refer to Annex VI — CIC table of this Regulation.

This template shall reflect the list of all assets included in the Balance-sheet classifiable as asset categories 0 to 9 of Annex IV — Assets Categories of this Regulation. In particular in case of securities lending and repurchase agreements the underlying securities that are kept in the Balance-sheet shall be reported in this template.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

This template contains an item-by-item list of assets held directly by the group (i.e. not on a look-through basis), classifiable as asset categories 0 to 9 (in case of unit-linked and index-linked product managed by the (re)insurance undertaking, the assets to be reported are also only the ones covered by asset categories 0 to 9, e.g. recoverables and liabilities related to this products shall not be reported), with the following exceptions:

- f) Cash shall be reported in one row per currency, for each combination of items C0060, C0070, C0080, and C0090;
- g) Transferable deposits (cash equivalents) and other deposits with maturity of less than one year shall be reported in one row per pair of bank and currency, for each combination of items C0060, C0070, C0080, C0090 and C0290;
- h) Mortgages and loans to individuals, including loans on policies, shall be reported in two rows, one row regarding loans to administrative, management and supervisory body, for each combination of items C0060, C0070, C0080, C0090 and C0290 and another regarding loans to other natural persons, for each combination of items C0060, C0070, C0080, C0090 and C0290;
- i) Deposits to cedants shall be reported in one single line, for each combination of items C0060, C0070, C0080 and C0090;
- j) Plant and equipment for the own use of the undertaking shall be reported in one single line, for each combination of items C0060, C0070, C0080 and C0090.

This template comprises two tables: Information on positions held and Information on assets.

[^{F3}On the table Information on positions held, each asset shall be reported separately in as many lines as needed in order to properly fill in all non-monetary variables with the exception of item 'Quantity', requested in that table. If for the same asset two values can be attributed to one variable, then this asset needs to be reported in more than one line.]

On the table Information on assets, each asset shall be reported separately, with one row for each asset, filling in all applicable variables requested in that table.

The template is applicable for method 1 (Accounting consolidation-based method), method 2 (Deduction and aggregation method) and a combination of methods 1 and 2.

Where method 1 is used exclusively, the reporting shall reflect the consolidated position of the assets net of intra-group transactions held. The reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall not be reported;
- The assets held by the participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The assets held by undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35 shall be reported item by item;
- Participations in undertakings consolidated in accordance with Article 335, paragraph 1, (d), (e) and (f) of Delegated Regulation (EU) 2015/35 shall be reported in one row and identify it by using the available options in cell C0310.

Where method 2 is used exclusively, the reporting shall include the detailed list of the assets held by the participating undertakings, the insurance holding companies and subsidiaries and one row for each non-controlled participation. The assets reported shall not take into account the proportional share used for group solvency calculation. The reporting shall be made as follows:

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

— (EU Exit) **Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall be reported.** Pr-2. Use the entries in this Annex to identify the relevant legislation. **Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall be reported.** (See end of Document for details)

- The assets held by the participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The assets held by insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are subsidiaries (European Economic Area, equivalent non-European Economic Area and non-equivalent non-European Economic Area) shall be reported item by item by undertaking;
- Participations in insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are not subsidiaries (European Economic Area, equivalent non-European Economic Area and non-equivalent non-European Economic Area) shall be reported in one row for each participation;
- The assets held by undertakings from the other financial sectors shall not be included.

Where a combination of methods 1 and 2 is used, one part of the reporting reflects the consolidated position of the assets, net of intra-group transactions, which must be reported and the other part of the reporting shall include the detailed list of the assets held by the participating undertakings, the insurance holding companies or mixed-financial holding companies and subsidiaries and one row for each non-controlled participation, net of intra-group transactions and regardless of the proportional share used.

The first part of the reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall not be reported;
- The assets held by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The assets held by undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35 shall be reported item by item;
- Participations in undertakings consolidated in accordance with Article 335, paragraph 1, (d), (e) and (f) of Delegated Regulation (EU) 2015/35 shall be reported in one row and identify it by using the available options in cell C0310;
- Participations in undertakings under method 2 shall be reported one row for each subsidiary and non-controlled participation held and identify it by using the available options in cell C0310.

The second part of the reporting shall include the detailed list of the assets held by the participating undertakings, the insurance holding companies and subsidiaries and one row for each non-controlled participation, regardless of the proportional share used. The reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall be reported;
- The assets held by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies under method 2 shall be reported item by item;
- The assets held by insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are subsidiaries under method 2 (European Economic Area, equivalent non-European

S.06.03 — Collective investment undertakings — look-through approach

General comments:

This section relates to quarterly and annual submission of information for groups.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

This template contains information on the look-through of collective investment undertakings, or investments packaged as funds and similar undertakings, including when they are participations by underlying asset category, country of issue and currency. [F⁶Considering proportionality and specific instructions of the template, the look-through shall be performed until the asset categories, countries and currencies are identified. In case of funds of funds the look-through shall follow the same approach.]

[F¹The template shall include information corresponding to 100 % of the value invested in collective investment undertakings. However for the identification of countries the look-through shall be implemented in order to identify the exposures of 90 % of the total value of the funds minus the amounts related to CIC 8 and 9, and for the identification of currencies the look-through shall be implemented in order to identify the exposures of 90 % of the total value of the funds. Groups shall ensure that the 10 % not identified by country is diversified across geographical areas, for example that not more than 5 % is in one single country. The look-through shall be applied by groups starting from the major, considering the amount invested, to the lowest single fund and the approach shall be kept consistent over time.]

Quarterly information shall only be reported when the ratio of collective investments undertakings held by the group to total investments, measured as the ratio between item C0010/R0180 of template S.02.01 plus collective investments undertakings included in item C0010/R0220 of template S.02.01 plus collective investments undertakings included in item C0010/R0090 and the sum of item C0010/R0070 and C0010/RC0220 of template S.02.01, is higher than 30 % when method 1 as defined in Article 230 of Directive 2009/138/EC is used exclusively. When method 1 is used in combination with method 2 as defined in Article 233 of Directive 2009/138/EC or method 2 is used exclusively the ratio needs to be adjusted in order to capture the items of all entities included in the scope of template S.06.02.

Items shall be reported with positive values unless otherwise stated in the respective instructions.

The asset categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to CIC codes refer to Annex VI — CIC table of this Regulation.

This template shall include the look-through of all collective investment undertakings, or investments packaged as funds and similar undertakings, including when they are participations by underlying asset category, reported item-by-item in S.06.02. If one collective investment undertaking, or investment packaged as fund and similar undertaking is held by many undertakings, in this template it shall be reported only once.

Pt. 2. These amendments are assessed by the address of legislation.gov.uk. Details of relevant amending instruments can be found on their website (See also (S.I. 2018/1115)).</p>		
		<p>The localisation of the issuer is assessed by the address of the entity issuing the asset. One of the options shall be used:</p> <ul style="list-style-type: none"> — ISO 3166–1 alpha–2 code — XA: Supranational issuers — EU: European Union Institutions — AA: aggregated countries due to application of threshold <p>This item is not applicable to Categories 8 and 9 as reported in C0030.</p>
C0050	Currency	<p>[^{F1}Identify whether the currency of the asset category is the reporting currency or a foreign currency. All other currencies than the reporting currency are referred to as foreign currencies. One of the options in the following closed list shall be used:</p> <ul style="list-style-type: none"> 1 — Reporting currency 2 — Foreign currency 3 — Aggregated currencies due to application of threshold]
C0060	Total amount	<p>Total amount invested by asset category, country and currency through collective investment undertakings. [^{F6}For liabilities a positive amount shall be reported, unless the item is a derivative liability.] For derivatives the Total amount can be positive (if an asset) or negative (if a liability).</p>

S.07.01 — Structured products

General comments:

This section relates to annual submission of information for groups.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

The asset categories referred to in this template are the ones defined in Annex IV — Asset Categories of this Regulation and references to CIC codes refer to Annex VI — CIC Table of this Regulation.

Structured products are defined as assets falling into the asset categories 5 (Structured notes) and 6 (Collateralised securities).

This template shall only be reported when the amount of structured products, measured as the ratio between assets classified as asset categories 5 (Structured notes) and 6 (Collateralised securities) as defined in Annex IV — Asset Categories of this Regulation and the sum of item C0010/R0070 and C0010/R0220 of template S.02.01, is higher than 5 % when method 1 as defined in Article 230 of Directive 2009/138/EC is used exclusively. When method 1 is used in combination with method 2 as defined in Article 233 of Directive 2009/138/EC or method 2 is used exclusively the ratio needs to be adjusted in order to capture the items of all entities included in the scope of template S.06.02.

In some cases the types of structured products (C0070) identify the derivative embedded in the structured product. In this case this classification shall be used when the structured product has the referred derivative embedded.

The template is applicable for method 1 (Accounting consolidation–based method), method 2 (Deduction and aggregation method) and a combination of methods 1 and 2.

Where method 1 is used exclusively, the reporting shall reflect the consolidated position of the structured notes and collateralised securities net of intra–group transactions held within the scope of group supervision in its portfolio. The reporting shall be made as follows:

- Item ‘Legal name of the undertaking — C0010’ and ‘Identification code of the undertaking — C0020’ shall not be reported;
- The structured products held directly by participating insurance and reinsurance undertakings or insurance holding companies or mixed–financial holding companies shall be reported item by item;
- The structured products held by undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35 shall be reported item by item;
- The structured products held by other related undertakings shall not be included.

Where method 2 is used exclusively, the reporting shall include the detailed list of the structured notes and collateralised securities held by the participating undertakings, the insurance holding companies or mixed–financial holding companies and subsidiaries, and regardless of the proportional share used. The reporting shall be made as follows:

- Item ‘Legal name of the undertaking — C0010’ and ‘Identification code of the undertaking — C0020’ shall be reported;
- The structured products held directly by participating insurance and reinsurance undertakings or insurance holding companies or mixed–financial holding companies shall be reported item by item
- The structured products held by insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are subsidiaries (European Economic Area, equivalent non–European Economic Area and non–equivalent non–European Economic Area) shall be reported item by item by undertaking;
- The structured products held by other related undertakings shall not be included.

Where a combination of methods 1 and 2 is used, one part of the reporting reflects the consolidated position of the structured notes and collateralised securities, net of intra–group

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (Transitional Provisions) Regulations 2017. The detailed list of the structured notes and collateralised securities held by the participating undertakings, the insurance holding companies or mixed-financial holding companies and subsidiaries, regardless of the proportional share used.

The first part of the reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall not be reported;
- The structured products held directly by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The structured products held by undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35 shall be reported item by item;
- The structured products held by other related undertakings shall not be included

The second part of the reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall be reported;
- The structured products held directly by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies under method 2 shall be reported item by item;
- The structured products held by insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are subsidiaries under method 2 (European Economic Area, equivalent non-European Economic Area and non-equivalent non-European Economic Area) shall be reported item by item by undertaking;
- The structured products held by other related undertakings under method 2 shall not be included.

	ITEM	INSTRUCTIONS
C0010	Legal name of the undertaking	Identify the legal name of the undertaking within the scope of group supervision that holds the structured product. This item shall be filled in only when it relates to structured products held by participating undertakings, insurance holding companies or mixed-financial holding companies and subsidiaries under deduction and aggregation method.
C0020	Identification code of the undertaking	Identification code by this order of priority if existent: <ul style="list-style-type: none"> — Legal Entity Identifier (LEI); — Specific code Specific code:

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not yet in force. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

		<p>undertakings and other EEA regulated undertakings within the scope of group supervision: identification code used in the local market, attributed by the undertaking's competent supervisory authority;</p> <p>— For non-EEA undertakings and non-regulated undertakings within the scope of group supervision, identification code will be provided by the group. When allocating an identification code to each non-EEA or non-regulated undertaking, the group should comply with the following format in a consistent manner:</p> <p>identification code of the parent undertaking + ISO 3166-1 alpha-2 code of the country of the undertaking + 5 digits</p>
C0030	Type of code of the ID of the undertaking	<p>Type of ID Code used for the 'Identification code of the undertaking' item. One of the options in the following closed list shall be used:</p> <p>1 — LEI 2 — Specific code</p>
C0040	Asset ID Code	<p>The Identification code of the structured product, as reported in S.06.02 using the following priority:</p>

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. Pt. 2. These amendments do not affect the structured product, if applicable, for CIC categories 5 (Structured notes) and 6 (Collateralised securities). This item is not applicable for non-credit structured product.

S.08.01 — Open derivatives

General comments:

This section relates to quarterly and annual submission of information for groups.

The derivatives categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to CIC codes refer to Annex VI — CIC table of this Regulation. This template contains an item-by-item list of derivatives held directly by the group (i.e. not on a look-through basis), classifiable as asset categories A to F.

[^{F3}Derivatives are considered assets if their Solvency II value is positive or zero. They are considered liabilities if their Solvency II value is negative. Both derivatives considered as assets or considered as liabilities shall be included.]

Information shall include all derivatives contracts that existed during the reporting period and were not closed prior to the reporting reference date.

If there are frequent trades on the same derivative, resulting in multiple open positions, the derivative can be reported on an aggregated or net basis, as long as all the relevant characteristics are common and following the specific instruction for each relevant item.

Items shall be reported with positive values unless otherwise stated in the respective instructions.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- g) Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying').
- h) It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- i) It is settled at a future date.

This template comprises two tables: Information on positions held and Information on derivatives.

[^{F1}On the table Information on positions held, each derivative shall be reported separately in as many rows as needed in order to properly fill in all non-monetary variables, requested in that table. If for the same derivative two values can be attributed to one variable, then this derivative needs to be reported in more than one line.]

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (No. 1) Regulations 2017/1353, as amended. The text of such instruments can be found on their website/s. (See end of Document for details)

In particular for derivatives that have more than a pair of currencies, it shall be split into the pair components and reported in different rows.

On the table Information on derivative, each derivative shall be reported separately, with one row for each derivative, filling in all variables requested in that table.

Where method 1 is used exclusively, the reporting shall reflect the consolidated position of the derivatives net of intra-group transactions held within the scope of group supervision. The reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall not be reported;
- The derivatives held by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The derivatives held by undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35 shall be reported item by item;
- The derivatives held by other related undertakings shall not be included

Where method 2 is used exclusively, the reporting shall include the detailed list of the derivatives held by the participating undertakings, the insurance holding companies or mixed-financial holding companies and subsidiaries, regardless of the proportional share used. The reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall be reported;
- The derivatives held by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The derivatives held by insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are subsidiaries (European Economic Area, equivalent non-European Economic Area and non-equivalent non-European Economic Area) shall be reported item by item by undertaking;
- The derivatives held by other related undertakings shall not be included.

Where a combination of methods 1 and 2 is used, one part of the reporting shall reflect the consolidated position of the derivatives, net of intra-group transactions held within the scope of group supervision which must be reported and the other part of the reporting shall include the detailed list of the derivatives held by the participating undertakings, the insurance holding companies or mixed-financial holding companies and subsidiaries, regardless of the proportional share used.

The first part of the reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall not be reported;
- The derivatives held by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The derivatives held by undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35 shall be reported item by item;
- The derivatives held by other related undertakings shall not be included.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

The second part of the reporting shall be made as follows: amendments are not currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

- item 'Legal name of the undertaking' C0010 and Identification code of the undertaking — C0020' shall be reported;
- The derivatives held by participating insurance and reinsurance undertakings or insurance holding companies or mixed–financial holding companies under method 2 shall be reported item by item;
 - The derivatives held by insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are subsidiaries under method 2 (European Economic Area, equivalent non–European Economic Area and non–equivalent non–European Economic Area) shall be reported item by item by undertaking;
 - The derivatives held by other related undertakings under method 2 shall not be included.

The information regarding the External rating (C0290) and Nominated ECAI (C0300) may be limited (not reported) in the following circumstances:

- g) through a decision of the national supervisory authority under Article 254(2) of the Directive 2009/138/EC; or
- h) through a decision of the national supervisory authority in the cases where the insurance and reinsurance undertakings have in place outsourcing arrangements in the area of investments that lead to this specific information not being available directly to the undertaking.

	ITEM	INSTRUCTIONS
Information on positions held		
C0010	Legal name of the undertaking	Identify the legal name of the undertaking within the scope of group supervision that holds the derivative. This item shall be filled in only when it relates to derivatives held by participating undertakings, insurance holding companies, mixed–financial holding companies and subsidiaries under deduction and aggregation method.
C0020	Identification code of the undertaking	Identification code by this order of priority if existent: <ul style="list-style-type: none"> — Legal Entity Identifier (LEI); — Specific code Specific code: <ul style="list-style-type: none"> — For EEA insurance and reinsurance undertakings and other EEA regulated undertakings

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not within the scope of legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

		<p>identification code used in the local market, attributed by the undertaking's competent supervisory authority;</p> <p>— For non-EEA undertakings and non-regulated undertakings within the scope of group supervision, identification code will be provided by the group. When allocating an identification code to each non-EEA or non-regulated undertaking, the group should comply with the following format in a consistent manner: identification code of the parent undertaking + ISO 3166-1 alpha-2 code of the country of the undertaking + 5 digits</p>
C0030	Type of code of the ID of the undertaking	Type of ID Code used for the 'Identification code of the undertaking' item. One of the options in the following closed list shall be used: 1 — LEI 2 — Specific code
C0040	Derivative ID Code	Derivative ID code using the following priority: — ISO 6166 code of ISIN when available — Other recognised codes (e.g.: CUSIP, Bloomberg Ticker, Reuters RIC)

Status: Point in time view as at 31/12/2020.

<p>C0110</p>	<p>Use of derivative</p>	<p>Describe the use of the derivative (micro / macro hedge, efficient portfolio management). Micro hedge refers to derivatives covering a single financial instrument (asset or liability), forecasted transaction or other liability. Macro hedge refers to derivatives covering a set of financial instruments (assets or liabilities), forecasted transactions or other liabilities. Efficient portfolio management refers usually to operations where the manager wishes to improve a portfolio' income by exchanging a (lower) cash-flow pattern by another with a higher value, using a derivative or set of derivatives, without changing the asset' portfolio composition, having a lower investment amount and less transaction costs. One of the options in the following closed list shall be used:</p> <ol style="list-style-type: none"> 1 — Micro hedge 2 — Macro hedge 3 — Matching assets and liabilities cash-flows used in the context of matching adjustment portfolios 4 — Efficient portfolio management, other than 'Matching assets and liabilities cash-flows' used in the context of matching adjustment portfolios

		<p>Measures the rate of change of option value with respect to changes in the underlying asset's price. This shall be reported as a decimal.</p>
C0130	Notional amount of the derivative	<p>The amount covered or exposed to the derivative. For futures and options corresponds to contract size multiplied by the trigger value and by the number of contracts reported in that line. For swaps and forwards it corresponds to the contract amount of the contracts reported in that line. When the trigger value corresponds to a range, the average value of the range shall be used. The notional amount refers to the amount that is being hedged / invested (when not covering risks). If several trades occur, it shall be the net amount at the reporting date.</p>
C0140	Buyer/Seller	<p>Only for futures and options, swaps and credit derivatives contracts [FII (currency, credit and securities swaps)]. Identify whether the derivative contract was bought or sold. The buyer and seller position for swaps is defined relatively to the security or notional amount and the swap flows. A seller of a swap owns the security or notional amount at the contract inception and agrees to deliver during the contract term that security or notional amount, including any other outflows related to the contract, when applicable. A buyer of a swap will own the security or the notional amount at the end of the</p>

Pt. 2. These amendments will be incorporated into the legislation.gov.uk. Details of relevant amending instruments can be found on their website.

		The number of contracts shall be the sum of outstanding at the reporting date.
C0180	Contract size	Number of underlying assets in the contract (e.g. for equity futures it is the number of equities to be delivered per derivative contract at maturity, for bond futures it is the reference amount underlying each contract). The way the contract size is defined varies according with the type of instrument. For futures on equities it is common to find the contract size defined as a function of the number of shares underlying the contract. For futures on bonds, it is the bond nominal amount underlying the contract. Only applicable for futures and options.
C0190	Maximum loss under unwinding event	Maximum amount of loss if an unwinding event occurs. Applicable to CIC category F. Where a credit derivative is 100 % collateralised, the maximum loss under an unwinding event is zero.
C0200	Swap outflow amount	Amount delivered under the swap contract (other than premiums), during the reporting period. Corresponds to interest paid for IRS and amounts delivered for currency swaps, credit swaps, total return swaps and other swaps. In the cases where the settlement is made on a net basis then only one of the items C0200 and C0210 shall be reported.
C0210	Swap inflow amount	Amount received under the swap contract (other than premiums), during the reporting period. Corresponds to interest received for IRS and amounts

Status: Point in time view as at 31/12/2020.

Pt. 2. These amendments are available at www.legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (Swaps of total return swaps and other swaps)

		swaps and other swaps. In the cases where the settlement is made on a net basis then only one of the items C0200 and C0210 shall be reported.
C0220	Initial date	Identify the ISO 8601 (yyyy-mm-dd) code of the date when obligations under the contract come into effect. When various dates occur for the same derivative, report only the one regarding the first trade date of the derivative and only one row for each derivative (no different rows for each trade) reflecting the total amount invested in that derivative considering the different dates of trade. In case of novation, the novation date becomes the trade date for that derivative.
C0230	Duration	Derivative duration, defined as the residual modified duration, for derivatives for which a duration measure is applicable. Calculated as the net duration between in and out flows from the derivative, when applicable.
C0240	Solvency II value	Value of the derivative as of the reporting date calculated as defined by Article 75 of the Directive 2009/138/EC. It can be positive, negative or zero.
C0250	Valuation method	Identify the valuation method used when valuing derivatives. One of the options in the following closed list shall be used: <ul style="list-style-type: none"> 1 — quoted market price in active markets for the same assets or liabilities

Status: Point in time view as at 31/12/2020.

		<p>the derivative with a new party</p> <p>5 — Multiple events or a combination of events</p> <p>6 — Other events not covered by the previous options</p> <p>9 — No unwind trigger</p>
C0410	Swap delivered currency	Identify the ISO 4217 alphabetic code of the currency of the swap price (only for currency swaps and currency and interest rate swaps).
C0420	Swap received currency	Identify the ISO 4217 alphabetic code of the currency of the swap notional amount (only for currency swaps and currency and interest rate swaps).
C0430	Maturity date	Identify the contractually defined ISO 8601 (yyyy–mm–dd) code of the date of close of the derivative contract, whether at maturity date, expiring date for options (European or American), etc.

S.08.02 — Derivatives Transactions

General comments:

This section relates to quarterly and annual submission of information for groups.

The derivatives categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to CIC codes refer to Annex VI — CIC table of this Regulation.

This template contains an item-by-item list of closed derivatives held directly by the group (i.e. not on a look-through basis), classifiable as asset categories A to F. When a contract is still open but has been reduced in size the closed portion shall be reported.

Derivatives are considered assets if their Solvency II value is positive or zero. ^[F6]They are considered liabilities if their Solvency II value is negative.] Both derivatives considered as assets or considered as liabilities shall be included.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2019. Closed derivatives are the ones that were open at some point of the reference period (i.e. last quarter if template is submitted quarterly or last year if template is only submitted annually) but were closed before the end of the reporting period.

If there are frequent trades on the same derivative, the derivative can be reported on an aggregated or net basis (indicating only the first and the last trade dates), as long as all the relevant characteristics are common, and following the specific instruction for each relevant item.

Items shall be reported with positive values unless otherwise stated in the respective instructions.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- j) Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying').
- k) It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- l) It is settled at a future date.

This template comprises two tables: Information on positions held and Information on derivatives.

[^{F1}On the table Information on positions held, each derivative shall be reported separately in as many rows as needed in order to properly fill in all non-monetary variables requested in that table.] If for the same derivative two values can be attributed to one variable, then this derivative needs to be reported in more than one line.

In particular, for derivatives that have more than a pair of currencies, it shall be split into the pair components and reported in different rows.

On the table Information on derivative, each derivative shall be reported separately, with one row for each derivative, filling in all variables requested in that table.

The template is applicable for method 1 (Accounting consolidation-based method), method 2 (Deduction and aggregation method) and a combination of methods 1 and 2.

Where method 1 is used exclusively, the reporting shall reflect the consolidated position of the closed derivatives net of intra-group transactions held within the scope of group supervision. The reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall not be reported;
- The closed derivatives held by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The closed derivatives held by undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35 shall be reported item by item;
- The closed derivatives held by other related undertakings shall not be included.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

Where method 2 is used exclusively, the reporting shall include the detailed list of the closed derivatives held by the participating undertakings, the insurance holding companies or mixed-financial holding companies and subsidiaries, regardless of the proportional share used. The reporting shall be made as follows:

- Item ‘Legal name of the undertaking — C0010’ and ‘Identification code of the undertaking — C0020’ shall be reported;
- The closed derivatives held by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The closed derivatives held by insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are subsidiaries (European Economic Area, equivalent non-European Economic Area and non-equivalent non-European Economic Area) shall be reported item by item by undertaking;
- The closed derivatives held by other related undertakings shall not be included.

Where a combination of methods 1 and 2 is used, one part of the reporting shall reflect the consolidated position of the closed derivatives, net of intra-group transactions held within the scope of group supervision which must be reported and the other part of the reporting shall include the closed detailed list of the derivatives held by the participating undertakings, the insurance holding companies or mixed-financial holding companies and subsidiaries, regardless of the proportional share used.

The first part of the reporting shall be made as follows:

- Item ‘Legal name of the undertaking — C0010’ and ‘Identification code of the undertaking — C0020’ shall not be reported;
- The closed derivatives held by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The closed derivatives held by undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35 shall be reported item by item;
- The closed derivatives held by other related undertakings shall not be included.

The second part of the reporting shall be made as follows:

- Item ‘Legal name of the undertaking — C0010’ and ‘Identification code of the undertaking — C0020’ shall be reported;
- The closed derivatives held by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies under method 2 shall be reported item by item of the closed derivatives held;
- The closed derivatives held by insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are subsidiaries under method 2 (European Economic Area, equivalent non-European Economic Area and non-equivalent non-European Economic Area) shall be reported item by item of the closed derivatives held by undertaking;
- The closed derivatives held by other related undertakings under method 2 shall not be included.

		the derivative contract.]
C0160	Profit and loss to date	[^{F6} Amount of profit and loss arising from the derivative since the moment the undertaking entered into the derivative contract, realised at the closing/maturing date. Corresponds to the difference between the value (price) at sale date and the value (price) at acquisition date.] This amount could be positive (profit) or negative (loss).
C0170	Number of contracts	Number of similar derivative contracts reported in the line. For Over-The-Counter derivatives, e.g., one swap contract, 1 shall be reported, if ten swaps with the same characteristics, 10 shall be reported. The number of contracts shall be the ones entered into and that were closed at the reporting date.
C0180	Contract size	Number of underlying assets in the contract (e.g. for equity futures it is the number of equities to be delivered per derivative contract at maturity, for bond futures it is the reference amount underlying each contract). The way the contract size is defined varies according with the type of instrument. For futures on equities it is common to find the contract size defined as a function of the number of shares underlying the contract. For futures on bonds, it is the bond nominal amount underlying the contract. Only applicable for futures and options.

C0190	Maximum loss under an unwinding event	Maximum amount of loss if an unwinding event occurs.
		Applicable to CIC category F.
C0200	Swap outflow amount	Amount delivered under the swap contract (other than premiums), during the reporting period. Corresponds to interest paid for IRS and amounts delivered for currency swaps, credit swaps, total return swaps and other swaps. In the cases where the settlement is made on a net basis then only one of the items C0200 and C0210 shall be reported.
C0210	Swap inflow amount	Amount received under the swap contract (other than premiums), during the reporting period. Corresponds to interest received for IRS and amounts received for currency swaps, credit swaps, total return swaps and other swaps. In the cases where the settlement is made on a net basis then only one of the items C0200 and C0210 shall be reported.
C0220	Initial date	Identify the ISO 8601 (yyyy-mm-dd) code of the date when obligations under the contract come into effect. When various trades occur for the same derivative, report only the one regarding the first trade date of the derivative and only one row for each derivative (no different rows for each trade) reflecting the total amount invested in that derivative considering the different dates of trade. In case of novation, the novation date becomes the trade date for that derivative.

S.09.01 — Information on gains / income and losses in the period

General comments:

This section relates to annual submission of information for groups.

This template contains information on gains / income and losses by asset category (including derivatives). i.e., no item-by-item reporting is required. The asset categories considered in this template are the ones defined in Annex IV — Assets Categories.

At group level, the template is applicable for method 1 (Accounting consolidation-based method), method 2 (Deduction and aggregation method) and a combination of methods 1 and 2.

Where method 1 is used exclusively, the reporting shall reflect the consolidated position of the portfolios (i.e. net of IGT) within the scope of group supervision. The reporting shall be made as follows:

- Item ‘Legal name of the undertaking — C0010’ and ‘Identification code of the undertaking — C0020’ shall not be reported;
- Gains/ income and losses of portfolios held by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported portfolio by portfolio, each by asset category;
- Gains / income and losses of portfolios held undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35 shall be reported portfolio by portfolio, each by asset category;
- Gains / income and losses of portfolios held by other related undertakings shall not be included;

Where method 2 is used exclusively, the reporting shall include the detailed list of the portfolios held by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies and its subsidiaries and their profitability by asset category. The reporting shall be made as follows:

- Item ‘Legal name of the undertaking — C0010’ and ‘Identification code of the undertaking — C0020’ shall be reported;
- Gains / income and losses of portfolios held by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported portfolio by portfolio, each by asset category;
- Gains / income and losses of portfolios held by subsidiaries (EEA, equivalent non – EEA, non-equivalent non-EEA) shall be reported portfolio by portfolio, each by asset category;
- Gains / income and losses of portfolios held by other related undertakings shall not be included;

Where a combination of methods 1 and 2 is used, one part of the reporting shall reflect the consolidated position of the portfolios (i.e. net of IGT) within the scope of group supervision which must be reported and the other part of the reporting shall include the detailed list of the portfolios held by subsidiaries and their profitability by asset category.

The first part of the reporting shall be made as follows:

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2019, Pt. 2. Use the end of this document to identify any relevant legislation.

— Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall not be reported.

- Gains/ income and losses of portfolios held by participating insurance and reinsurance undertakings or insurance holding companies or mixed–financial holding companies shall be reported portfolio by portfolio, each by asset category;
- Gains / income and losses of portfolios held undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35 shall be reported portfolio by portfolio, each by asset category;
- Gains / income and losses of portfolios held by other related undertakings shall not be included;

The second part of the reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall be reported;
- Gains / income and losses of portfolios held by participating insurance and reinsurance undertakings or insurance holding companies or mixed–financial holding companies shall be reported portfolio by portfolio, each by asset category;
- Gains / income and losses of portfolios held by subsidiaries (EEA, equivalent non – EEA, non–equivalent non–EEA) shall be reported portfolio by portfolio, each by asset category;
- Gains / income and losses of portfolios held by other related undertakings shall not be included.

Items shall be reported with positive values unless otherwise stated in the respective instructions.

	ITEM	INSTRUCTIONS
C0010	Legal name of the undertaking	Identify the legal name of the undertaking within the scope of group supervision for which the return on investment relates to. This item shall be filled in only when it relates to the return on investment by asset category for assets held by subsidiaries consolidated under deduction and aggregation method. The cell shall be filled in only when it relates to the list portfolio by portfolio of assets, each reported by asset category, held by subsidiaries under method 2. When the cell is filled in, the portfolios held by subsidiaries under method 2 cannot be reconciled with template S.06.02. When the cell is blank, the portfolios held by the

S.10.01 — Securities lending and repos

General comments:

This section relates to annual submission of information for groups.

This template contains an item-by-item list of securities lending transactions and repurchase agreements (buyer and seller) contracts, which include also the liquidity swaps referred to in Article 309 (2)(f) of the Delegated Regulation (EU) 2015/35.

It shall be reported only when the value of the underlying securities on and off balance sheet involved in lending or repurchase agreements, with maturity date falling after the reporting reference date represent more than 5 % of the total investments as reported in C0010/R0070 and C0010/R0220 of template S.02.01. when method 1 as defined in Article 230 of Directive 2009/138/EC is used exclusively. When method 1 is used in combination with method 2 as defined in Article 233 of Directive 2009/138/EC or method 2 is used exclusively the ratio needs to be adjusted in order to capture the items of all entities included in the scope of template S.06.02.

All contracts that are on the balance sheet or off balance sheet shall be reported. The information shall include all contracts in the reporting period regardless of whether they were open or closed at the reporting date. For contracts which are part of a roll-over strategy, where they substantially are the same transaction, only open positions shall be reported.

A repurchase agreement (repo) is defined as the sale of securities together with an agreement for the seller to buy back the securities at a later date. Securities lending is defined as the lending of securities by one party to another, which requires that the borrower provides the lender with collateral.

Items shall be reported with positive values unless otherwise stated in the respective instructions.

The asset categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to CIC codes refer to Annex VI — CIC table of this Regulation.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2019. Each repo and securities lending contract shall be reported in as many rows as needed to provide the information requested. If for one item one option fits one part of the instrument being reported and a different option fits the other part then the contract needs to be unbundled unless is stated otherwise in the instructions.

The template is applicable for method 1 (Accounting consolidation-based method), method 2 (Deduction and aggregation method) and a combination of methods 1 and 2.

Where method 1 is used exclusively, the reporting shall reflect the consolidated position of the repos and securities lending contracts net of intra-group transactions held within the scope of group supervision. The reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall not be reported;
- The repurchase agreements and securities lending contracts held directly (i.e. not on a look-through basis) by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The repurchase agreements and securities lending contracts held directly (i.e. not on a look-through basis) by undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35 shall be reported item by item;
- The repurchase agreements and securities lending contracts held by other related undertakings shall not be included.

Where method 2 is used exclusively, the reporting shall include the detailed list of the repos and securities lending contracts held by the participating undertakings, the insurance holding companies or mixed-financial holding companies and its subsidiaries, regardless of the proportional share used. The reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall be reported;
- The repurchase agreements and securities lending contracts held directly (i.e. not on a look-through basis) by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The repurchase agreements and securities lending contracts held directly (i.e. not on a look-through basis) by insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are subsidiaries (European Economic Area, equivalent non-European Economic Area and non-equivalent non-European Economic Area) shall be reported item by item;
- The repurchase agreements and securities lending contracts held by other related undertakings shall not be included.

Where a combination of methods 1 and 2 is used, one part of the reporting shall reflect the consolidated position of the repos and securities lending contracts, net of intra-group transactions, held within the scope of group supervision which must be reported and the other part of the reporting shall include the detailed list of the repos and securities lending contracts held by the participating undertakings, the insurance holding companies or mixed-financial holding companies and its subsidiaries, regardless of the proportional share used.

The first part of the reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall not be reported;

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

- The repurchase agreements and securities lending contracts held directly (i.e. not on a look-through basis) by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;
- The repurchase agreements and securities lending contracts held directly (i.e. not on a look-through basis) by undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35 shall be reported item by item;
- The repurchase agreements and securities lending contracts held by other related undertakings shall not be included.

The second part of the reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall be reported;
- The repurchase agreements and securities lending contracts held directly (i.e. not on a look-through basis) by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies under method 2 shall be reported item by item;
- The repurchase agreements and securities lending contracts held directly (i.e. not on a look-through basis) by insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are subsidiaries under method 2 (European Economic Area, equivalent non-European Economic Area and non-equivalent non-European Economic Area) shall be reported item by item;
- The repurchase agreements and securities lending contracts held by other related undertakings under method 2 shall not be included.

	ITEM	INSTRUCTIONS
C0010	Legal name of the undertaking	Identify the legal name of the undertaking within the scope of group supervision that holds the repo and securities lending. This item shall be filled in only when it relates to the repos and securities lending contracts held by participating undertakings, insurance holding companies or mixed-financial holding companies and subsidiaries under deduction and aggregation method.
C0020	Identification code of the undertaking	Identification code by this order of priority if existent: — Legal Entity Identifier (LEI); — Specific code Specific code: — For EEA insurance and reinsurance

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. C0170	Solvency II Value	This item is only applicable for contracts that are still open at the reporting date. Value of the repo or securities lending contract, following Article 75 of Directive 2009/138/EC rules for valuation of contracts. This value can be positive, negative or zero.

S.11.01 — Assets held as collateral

General comments:

This section relates to annual submission of information for groups.

This template contains an item-by-item list of off-balance sheet assets held as collateral for covering balance sheet.

It consists of detailed information from the perspective of the assets held as collateral and not from the perspective of the collateral arrangement.

If there is a pool of collaterals or a collateral arrangement comprising multiple assets, as many rows as the assets in the pool or arrangement shall be reported.

This template comprises two tables: Information on positions held and Information on assets.

On the table Information on positions held, each asset held as collateral shall be reported separately in as many rows as needed in order to properly fill in all variables requested in that table. If for the same asset two values can be attributed to one variable, then this asset needs to be reported in more than one line. [F²Real estate held as collateral of the mortgages related to individuals shall be reported in one single line.]

On the table Information on assets, each asset held as collateral shall be reported separately, with one row for each asset, filling in all variables requested in that table.

All items except items ‘Type of asset for which the collateral is held’ (C0140), ‘Name of the counterparty pledging the collateral’ (C0060) and ‘Name of the group of the counterparty pledging the collateral’ (C0070) relate to information on the assets held as collateral. Item C0140 relates to the asset on the balance sheet for which the collateral is held while items C0060 and C0070 relate to the counterparty pledging the collateral.

The asset categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to CIC codes refer to Annex VI — CIC table of this Regulation.

The template is applicable for method 1 (Accounting consolidation-based method), method 2 (Deduction and aggregation method) and a combination of methods 1 and 2.

Where method 1 is used exclusively, the reporting shall reflect the consolidated position of the assets held as collateral within the scope of group supervision net of intra-group transactions. The reporting shall be made as follows:

- Item ‘Legal name of the undertaking — C0010’ and ‘Identification code of the undertaking — C0020’ shall not be reported;

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

- ~~(EU Exit) 2015/2450, rec. 2, 3 and 2. The look-through basis is collateral by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;]~~
- ^[F3]The assets held directly (i.e. not on a look-through basis) as collateral by undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) in of Delegated Regulation (EU) 2015/35 shall be reported item by item;]
- The assets held as collateral by other related undertakings shall not be included.

Where method 2 is used exclusively, the reporting shall include the detailed list of the assets held as collateral by the participating undertakings, the insurance holding companies and subsidiaries, regardless of the proportional share used. The reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall be reported;
- ^[F3]The assets held directly (i.e. not on a look-through basis) as collateral by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies under method 2 shall be reported item by item;]
- ^[F3]The assets held directly (i.e. not on a look-through basis) as collateral by insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are subsidiaries (European Economic Area, equivalent non-European Economic Area and non-equivalent non-European Economic Area) shall be reported item by item by undertaking;]
- The assets held as collateral by other related undertakings shall not be included.

Where a combination of methods 1 and 2 is used, one part of the reporting shall reflect the consolidated position of the assets held as collateral within the scope of group supervision, net of intra-group transactions, which must be reported and the other part of the reporting shall include the detailed list of the assets held as collateral by the participating undertakings, the insurance holding companies or mixed-financial holding companies and subsidiaries, regardless of the proportional share used.

The first part of the reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall not be reported;
- ^[F3]The assets held directly (i.e. not on a look-through basis) as collateral by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;]
- ^[F3]The assets held directly (i.e. not on a look-through basis) as collateral by undertakings consolidated in accordance with Article 335, paragraph 1, (a), (b) and (c) in of Delegated Regulation (EU) 2015/35 shall be reported item by item;]
- The assets held as collateral by other related undertakings shall not be included.

The second part of the reporting shall be made as follows:

- Item 'Legal name of the undertaking — C0010' and 'Identification code of the undertaking — C0020' shall be reported;
- ^[F3]The assets held directly (i.e. not on a look-through basis) as collateral by participating insurance and reinsurance undertakings or insurance holding companies or mixed-financial holding companies shall be reported item by item;]
- ^[F3]The assets held directly (i.e. not on a look-through basis) as collateral by insurance and reinsurance undertakings, insurance holding companies, ancillary services undertakings and special purpose vehicle which are subsidiaries under method 2 (European Economic Area, equivalent non-European Economic Area and

General comments: 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

This section relates to annual submission of information for groups.

This template shall only be reported by groups in relation to the direct business and only for those entities outside the EEA that have variable annuities portfolios.

Variable annuities are unit-linked life insurance contracts with investment guarantees which, in exchange for single or regular premiums, allow the policyholder to benefit from the upside of the unit but be partially or totally protected when the unit loses value.

If Variable Annuities policies are split between two insurance undertakings, for instance a life company and a non-life company for the variable annuities guarantee, the company with the guarantee shall report this template. Only one row per product shall be reported.

	ITEM	INSTRUCTIONS
C0010	Legal name of the undertaking	Identify the legal name of non-EEA undertaking selling the product.
C0020	Identification code of the undertaking	Identification code by this order of priority: — Legal Entity Identifier (LEI); — Specific code Specific code: Identification code will be provided by the group. When allocating an identification code to each non-EEA or non-regulated undertaking, the group should comply with the following format in a consistent manner: identification code of the parent undertaking + ISO 3166-1 alpha-2 code of the country of the undertaking + 5 digits
C0030	Type of code of the ID of the undertaking	Type of ID Code used for the 'Identification code of the undertaking' item. One of the options in the following closed list shall be used: 1 — LEI 2 — Specific code

S.15.02 — Hedging of guarantees of variable annuities

General comments:

This section relates to annual submission of information for groups.

This template shall only be reported by groups in relation to the direct business and only for those entities outside the EEA that have variable annuities portfolios.

Variable annuities are unit-linked life insurance contracts with investment guarantees which, in exchange for single or regular premiums, allow the policyholder to benefit from the upside of the unit but be partially or totally protected when the unit loses value.

If Variable Annuities policies are split between two insurance undertakings, for instance a life company and a non-life company for the Variable Annuities guarantee, the company with the guarantee shall report this template. Only one row per product shall be reported.

	ITEM	INSTRUCTIONS
C0010	Legal name of the undertaking	Identify the legal name of non-EEA undertaking selling the product.
C0020	Identification code of the undertaking	Identification code by this order of priority: — Legal Entity Identifier (LEI); — Specific code Specific code: Identification code will be provided by the group. When allocating an identification code to each non-EEA or non-regulated undertaking, the group should comply with the following format in a consistent manner: identification code of the parent undertaking + ISO 3166-1 alpha-2 code of the country of the undertaking + 5 digits
C0030	Type of code of the ID of the undertaking	Type of ID Code used for the 'Identification code of the undertaking' item. One of the options in the following closed list shall be used: 1 — LEI

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

S.22.01 ~~Impact of long term guarantees, measures and transitionals~~ ^{EU Exit} ~~Impact of long term guarantees, measures and transitionals~~ currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

General comments:

This section relates to annual submission of information for groups.

This template is relevant when at least one long term guarantee measure or transitional is used by any undertaking within the scope of group supervision.

This template shall reflect the impact on the financial positions when no transitional is used and each LTG measures or transitional is set to zero. For that purpose, a step-by-step approach should be followed taking out each transitional and LTG measure one by one and without recalculating the impact of the remaining measures after each step. [F⁴As it is possible within a group for both types of transitional measure to be applied the template follows a cumulative step by step approach.]

The impacts need to be reported positive if they increase the amount of the item being reported and negative if they decrease the amount of the item (e.g. if amount of SCR increases or if amount of Own Funds increases then positive values shall be reported).

The amounts reported in this template shall be net of Intra Group Transactions.

	ITEM	INSTRUCTIONS
C0010/R0010	Amount with LTG measures and transitionals — Technical Provisions	[F ⁶ Total amount of gross technical provisions] including long term guarantee measures and transitional measures
C0020/R0010	Without transitional on technical provisions — Technical Provisions	[F ⁶ Total amount of gross technical provisions] without the adjustment due to the transitional deduction to technical provisions, but keeping adjustments due to the volatility adjustment and the matching adjustment. [F ⁴ If transitional deduction to technical provisions is not applicable report the same amount as in C0010.]
C0030/R0010	Impact of transitional on technical provisions — Technical provisions	Amount of the [F ⁶ adjustment to the gross technical provisions] due to the application of the transitional deduction to technical provisions. It shall be the difference between the technical provisions without transitional deduction to technical provisions and the technical provisions

Status: Point in time view as at 31/12/2020.

This section relates to opening, quarterly and annual submissions for groups. It is currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

The template is applicable under all three calculation methods for group solvency capital requirement. Since most of the items are applicable to the part of the group that is covered by method 1, the items applicable when Deduction and Aggregation is used, exclusively or in combination with method 1, are clearly identified in the instructions.

	ITEM	INSTRUCTIONS
Basic own funds before deduction for participations in other financial sector		
R0010/C0010	Ordinary share capital (gross of own shares) — total	This is the total ordinary share capital, both held directly and indirectly (before deduction of own shares). This is the total ordinary share capital of the group that fully satisfies the criteria for Tier 1 or Tier 2 items. Any ordinary share capital that does not fully satisfy the criteria shall be treated as preference shares capital and classified accordingly notwithstanding their description or designation.
R0010/C0020	Ordinary share capital (gross of own shares) — tier 1 unrestricted	This is the amount of paid up ordinary share capital that meets unrestricted Tier 1–criteria.
R0010/C0040	Ordinary share capital (gross of own shares) — tier 2	This is the amount of called up ordinary share capital that meets the criteria for Tier 2.
R0020/C0010	Non–available called but not paid in ordinary share capital at group level — total	This is the total amount of called but not paid in ordinary share capital which is deemed non–available as defined in Article 222(2)–(5) of the Directive 2009/138/EC.
R0020/C0020	Non–available called but not paid in ordinary share capital at group level — tier 1 unrestricted	This is the total amount of called but not paid in ordinary share capital which is deemed non–available as defined in Article 222(2)–(5) of the Directive 2009/138/EC that meets tier 1 unrestricted criteria.
R0020/C0040	Non–available called but not paid in ordinary share capital at group level –tier 2	This is the amount of called but not paid in ordinary share capital which is deemed non–available as defined in Article

		<p>adjustment due to the recognition of diversification effects in the partially consolidated (in the case where the SCR diversified (numerator) calculated in accordance to Article 336(a) of the Delegated Regulation (EU) 2015/35 is greater than the sum of the individual SCR of the participating undertaking and each related insurance and reinsurance undertaking included in the calculation of the SCR diversified (denominator) the value of the ratio is capped to 1).</p> <p>The assessment of non available own funds shall be made also for own funds in non controlled undertakings taking into account the proportionality principle. For method 2 the contribution of the related undertaking to the group SCR is the proportional share of the individual SCR.</p>
C0750	Non available minority interests	Non available minority interests, when the method 1 is applied, that is any minority interests in the eligible own funds (after deducting other non available own funds) of (re) insurance subsidiary exceeding the contribution of the solo SCR to the group SCR.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C0760	Non available own funds related to other own fund items approved by supervisory authority	Total amount for non available own funds related to other own fund items approved by supervisory authority.
C0770	Non available surplus funds	Non available surplus funds at group level both in EEA and non-EEA entities (Article 222 (2) to (5) of Directive 2009/138/EC and Article 330 (4) of Delegated Regulation (EU) 2015/35)
C0780	Non available called up but not yet paid in capital	Non available called up but not yet paid in capital at group level both in EEA and non-EEA entities (Article 222 (2) to (5) of Directive 2009/138/EC and Article 330 (4) of Delegated Regulation (EU) 2015/35)
C0790	Non available ancillary own funds	Non available ancillary own funds at group level both in EEA and non-EEA entities (Article 222 (2) to (5) of Directive 2009/138/EC and Article 330 (4) of Delegated Regulation (EU) 2015/35)
C0800	Non available subordinated mutual member accounts	Non available subordinated mutual member accounts at group level both in EEA and non-EEA entities (Article 222 (2) to (5) of Directive 2009/138/EC and Article 330 (4) of Delegated Regulation (EU) 2015/35)
C0810	Non available preference shares	Non available preference shares at group level both in EEA and non-EEA entities (Article 222 (2) to (5) of Directive 2009/138/EC and Article 330 (4) of Delegated Regulation (EU) 2015/35)
C0820	Non available Subordinated Liabilities	Non available Subordinated Liabilities at group level both in EEA and non-EEA entities (Article 222 (2) to (5) of Directive 2009/138/EC and Article 330 (4) of Delegated Regulation (EU) 2015/35)

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C0830	An amount equal to the value of non available net deferred tax assets at the group level	An amount equal to the value of non available net deferred tax assets at the group level both in EEA and non-EEA entities (Article 222 (2) to (5) of Directive 2009/138/EC and Article 330 (4) of Delegated Regulation (EU) 2015/35)
C0840	Non available share premium account related to preference shares at group level	Non available share premium account related to preference shares at group level.
C0850	Total non available excess own funds	Non available excess own funds at group level.
C0860	Non available minority interests	This is the overall total amount of non — available minority interests at group level.
C0870	Non available own funds related to other own fund items approved by supervisory authority	Total amount for non available own funds related to other own fund items approved by supervisory authority.
C0880	Non available surplus funds	This is the overall total amount of non available surplus funds at group level.
C0890	Non available called but not paid in capital	This is the total overall amount of non available called but not paid in capital at group level.
C0900	Non available ancillary own funds	This is the total overall amount of non available ancillary own funds at group level.
C0910	Non available subordinated mutual member accounts	This is the total overall amount of non available subordinated mutual member accounts
C0920	Non available preference shares	This is the total overall amount of non available preference shares at group level.
C0930	Non available Subordinated Liabilities	This is the total overall amount of non available subordinated liabilities at group level.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C0940	An amount equal to the value of non available net deferred tax assets at the group level	This is the total overall amount equal to the value of non available net deferred tax assets at the group level
C0950	Non available share premium account related to preference shares at group level	This is the total overall amount of non available share premium account related to preference shares at group level
C0960	Total non available excess own funds	This is the total overall amount of non available excess own funds. According to Article 222(4) of the Directive 2009/138/EC, the total non available own funds is calculated, undertaking by undertaking, by adding up own funds indicated in Article 222(2) of the directive (i.e. surplus funds and any subscribed but not paid-up capital) and in Article 330 of Delegated Regulation (EU) 2015/35 (i.e. ancillary own funds, preferences shares, subordinated mutual member account, subordinated liabilities and the value of net deferred tax assets). The part of such own funds that exceeds the contribution of the related undertaking to the group SCR cannot be considered as available for covering the group SCR. If the total amount of such own funds does not exceed the contribution of the related undertaking to the group SCR, such limitation doesn't apply.

S.25.01 — Solvency Capital Requirement — for groups on Standard Formula

General comments:

This section relates to opening and annual submission of information for individual entities, ring fenced-funds, matching adjustment portfolios and remaining part.

Template SR.25.01 has to be filled in for each ring-fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2019. ~~a MAP/RFF embedded in the fund should be treated as different funds. This template shall be reported for all sub-funds of a material RFF/MAP as identified in the second table of template S.01.03.~~

Template SR.25.01 is only applicable in relation to RFF/MAP from undertakings consolidated according to Article 335, paragraph 1, (a) and (c) of Delegated Regulation (EU) 2015/35, when method 1 (Accounting consolidation-based method) is used, either exclusively or in combination with method 2 (Deduction and aggregation method).

Where the entity has MAP or RFF (except those under the scope of Article 304 of Directive 2009/138/EC) when reporting at the level of the whole undertaking, the notional Solvency Capital Requirement ('nSCR') at risk module level and the loss-absorbing capacity (LAC) of technical provisions and deferred taxes to be reported shall be calculated as follows:

- Where the undertaking applies the full adjustment due to the aggregation of the nSCR of the RFF/MAP at entity level the nSCR is calculated as if no loss of diversification exists and the LAC shall be calculated as the sum of the LAC across all RFF/MAP and remaining part;
- Where the undertaking applies the Simplification at risk sub-module level to aggregate the nSCR of the RFF/MAP at entity level the nSCR is calculated considering a direct summation at sub-module level method and the LAC shall be calculated as the sum of the LAC across all RFF/MAP and remaining part,
- Where the undertaking applies the simplification at risk module level to aggregate the nSCR of the RFF/MAP at entity level the nSCR is calculated considering a direct summation at module level method and the LAC shall be calculated as the sum of the LAC across all RFF/MAP and remaining part.

The adjustment due to the aggregation of the nSCR of the RFF/MAP at entity level shall be allocated (C0050) to the relevant risk modules (i.e. market risk, counterparty default risk, life underwriting risk, health underwriting risk and non-life underwriting risk). The amount to be allocated to each relevant risk module shall be calculated as follows:

- q^{F3}

$$\text{Calculation of } q^{F3} \text{ factor} = \frac{\text{adjustment}}{BSCR - nSCR_{int}}$$
, where
 - *adjustment* = Adjustment calculated according to one of the three methods referred above
 - *BSCR* = Basic solvency capital requirement calculated according to the information reported in this template (C0040/R0100)
 - *nSCR_{int}* = nSCR for intangible assets risk according to the information reported in this template (C0040/R0070)]
- Multiplication of this 'q factor' by the nSCR of each relevant risk module (i.e. market risk, counterparty default risk, life underwriting risk, health underwriting risk and non-life underwriting risk)

For group reporting the following specific requirements shall be met:

- a) The information until R0460 is applicable when method 1 as defined in Article 230 of Directive 2009/138/EC is used, either exclusively or in combination with method 2 as defined in Article 233 of Directive 2009/138/EC;
- b) When combination method is being used, the information until R0460 is to be submitted only for the part of the group calculated with method 1 as defined in Article 230 of Directive 2009/138/EC.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. ITEM	INSTRUMENT	INSTRUCTIONS
Z0010	Article 112	Identifies whether the reported figures have been requested under Article 112(7) of Solvency II, to provide an estimate of the SCR using standard formula. One of the options in the following closed list shall be used: 1 — Article 112(7) reporting 2 — Regular reporting
Z0020	Ring-fenced fund, matching adjustment portfolio or remaining part	Identifies whether the reported figures are with regard to a RFF, matching adjustment portfolio or to the remaining part. One of the options in the following closed list shall be used: 1 — RFF/MAP 2 — Remaining part
Z0030	Fund/Portfolio number	When item Z0020 = 1, identification number for a ring fenced fund or matching adjustment portfolio. This number is attributed by the undertaking within the scope of group supervision and must be consistent over time and with the fund/portfolio number reported in other templates. [^{F11} When item Z0020 = 2, then report '0']
R0010–R0050/C0030	Net solvency capital requirement	Amount of the net capital charge for each risk module, as calculated using the standard formula. The difference between the net and the gross SCR is the consideration of the future discretionary benefits according to Article 205 of Delegated Regulation (EU) 2015/35. This amount shall fully consider diversification effects according to Article

Status: Point in time view as at 31/12/2020.

Pt. 2. These amendments are available at www.legislation.gov.uk. Details of relevant amending instruments can be found on their websites where applicable. (See end of Document for details)

		These cells do not include the allocation of the adjustment due to the aggregation of the nSCR of the RFF/MAP at entity level. These figures represent the SCR as if there was no loss of diversification.
R0010–R0050/C0040	Gross solvency capital requirement	Amount of the gross capital charge for each risk module, as calculated using the standard formula. The difference between the net and the gross SCR is the consideration of the future discretionary benefits according to Article 205 of Delegated Regulation (EU) 2015/35. This amount shall fully consider diversification effects according to Article 304 of Directive 2009/138/EC where applicable. These cells do not include the allocation of the adjustment due to the aggregation of the nSCR of the RFF/MAP at entity level. These figures represent the SCR as if there was no loss of diversification.
R0010–R0050/C0050	Allocation of RFF adjustment due to RFF and Matching adjustments portfolios	Part of the adjustment allocated to each risk module according to the procedure described in the general comments. This amount shall be positive.
R0060/C0030	Net solvency capital requirement Diversification	Amount of the diversification effects between Basic SCR of net risk modules due to the application of the correlation matrix defined in Annex IV of Directive 2009/138/EC. This amount shall be reported as a negative value.
R0060/C0040	Gross solvency capital requirement Diversification	Amount of the diversification effects between Basic SCR of gross risk modules due to the application of the correlation

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. R0550/C0100	Capital requirement for residual undertakings	Amount determined in accordance with Article 336 (1) (d) of Delegated Regulation (EU) 2015/35.
R0560/C0100	SCR for undertakings included via D and A	Amount of the Solvency Capital Requirement for undertakings included under method 2 as defined in Article 233 of Directive 2009/138/EC when the combination of methods is used.
R0570/C0100	Solvency capital requirement	Overall SCR for all undertakings regardless of the method used. [^{F4} The total solvency capital requirement is expected to be equal to the sum of R0220 and R0560.]

S.25.02 — Solvency Capital Requirement — for groups using the standard formula and partial internal model

General comments:

This section relates to opening and annual submission of information for groups, ring fenced-funds, matching adjustment portfolios and remaining part.

The components to be reported shall be agreed between national supervisory authorities and groups.

Template SR.25.02 shall be reported by ring-fenced fund, matching adjustment portfolio and the remaining part for every group under a partial internal model. This includes undertakings where a partial internal model is applied to a full ring-fenced fund and/or matching adjustment portfolio while the other ring-fenced funds and/or matching adjustment portfolios are under the standard formula. This template shall be reported for all sub-funds of a material RFF/MAP as identified in the second table of S.01.03

Template SR.25.02 is only applicable in relation to RFF/MAP from undertakings consolidated according to Article 335, paragraph 1, (a) and (c) of Delegated Regulation (EU) 2015/35, when method 1 (Accounting consolidation-based method) is used, either exclusively or in combination with method 2 (Deduction and aggregation method).

For those undertakings under a partial internal model to which the adjustment due to the aggregation of the nSCR of RFF/MAP is applicable, where the entity has MAP or RFF (except those under the scope of Article 304 of Directive 2009/138/EC) when reporting at the level of the whole undertaking, the nSCR at risk module level and the loss-absorbing capacity (LAC) of technical provisions and deferred taxes to be reported shall be calculated as follows:

- Where the undertaking applies the full adjustment due to the aggregation of the nSCR of the RFF/MAP at entity level: the nSCR is calculated as if no RFF and the LAC shall be calculated as the sum of the LAC across all RFF/MAP and remaining part;

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2019.

- Where the undertaking applies the Simplification at risk sub-module level to aggregate the nSCR of the RFF/MAP at entity level the nSCR and LAC are calculated considering a direct summation at sub-module level method,
- Where the undertaking applies the Simplification at risk module level to aggregate the nSCR of the RFF/MAP at entity level the nSCR and LAC are calculated considering a direct summation at module level method.

The adjustment due to the aggregation of the nSCR of the RFF/MAP at entity level shall be allocated (C0060) to the relevant risk modules (i.e. market risk, counterparty default risk, life underwriting risk, health underwriting risk and non-life underwriting risk) when calculated according to the standard formula. The amount to be allocated to each relevant risk module shall be calculated as follows:

$$\text{Calculation of 'q factor' }^{(1)} = \frac{\text{adjustment}}{BSCR - nSCR_{int}}$$

, where

- *adjustment* = Adjustment calculated according to one of the three methods referred above
- *BSCR'* = Basic solvency capital requirement calculated according the information reported in this template
- *nSCR_{int}* = nSCR for intangible assets risk according to the information reported in this template
- Multiplication of this 'q factor' by the nSCR of each relevant risk module (i.e. market risk, counterparty default risk, life underwriting risk, health underwriting risk and non-life underwriting risk)

For group reporting the following specific requirements shall be met:

- c) The information until R0470 is applicable when method 1 as defined in Article 230 of Directive 2009/138/EC is used, either exclusively or in combination with method 2 as defined in Article 233 of Directive 2009/138/EC;
- d) When combination method is being used, the information until R0470 is to be submitted only for the part of the group calculated with method 1 as defined in Article 230 of Directive 2009/138/EC.

	ITEM	INSTRUCTIONS
Z0020	Ring-fenced fund, matching adjustment portfolio or Remaining Part	Identifies whether the reported figures are with regard to a RFF, matching adjustment portfolio or to the remaining part. One of the options in the following closed list shall be used: 1 — RFF/MAP 2 — Remaining part
Z0030	Fund/Portfolio number	When item Z0020 = 1, identification number for a ring fenced fund or matching adjustment portfolio. This number is attributed by the undertaking within the scope of group supervision and

R0560/C0100	SCR for undertakings included via D and A	Amount of the Solvency Capital Requirement for undertakings included under method 2 as defined in Article 233 of Directive 2009/138/EC when the combination of methods is used.
R0570/C0100	Solvency capital requirement	Overall SCR for all undertakings regardless of the method used. [^{F4} The total solvency capital requirement is expected to be equal to the sum of R0220 and R0560.]

S.25.03 — Solvency Capital Requirement — for groups using full internal model

General comments:

This section relates to opening and annual submission of information for groups, ring fenced–funds, matching adjustment portfolios and remaining part.

The components to be reported shall be agreed between national supervisory authorities and groups.

Template SR.25.03 has to be filled in for each ring–fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part for every group under a full internal model. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub–funds of a material RFF/MAP as identified in the second table of S.01.03.

Template SR.25.03 is only applicable in relation to RFF/MAP from undertakings consolidated according to Article 335, paragraph 1, (a) and (c) of Delegated Regulation (EU) 2015/35, when method 1 (Accounting consolidation–based method) is used, either exclusively or in combination with method 2 (Deduction and aggregation method).

For group reporting the following specific requirements shall be met:

- e) The information until R0470 is applicable when method 1 as defined in Article 230 of Directive 2009/138/EC is used, either exclusively or in combination with method 2 as defined in Article 233 of Directive 2009/138/EC;
- f) When combination method is being used, the information until R0470 is to be submitted only for the part of the group calculated with method 1 as defined in Article 230 of Directive 2009/138/EC.

		future management actions.
R0110/C0100	Total of undiversified components	Sum of all components.
R0060/C0100	Diversification	The total amount of the diversification among components reported in C0030 calculated using the full internal model. This amount does not include diversification effects inside each component, which shall be embedded in the values reported in C0030. This amount shall be negative.
R0160/C0100	Capital requirement for business operated in accordance with Art. 4 of Directive 2003/41/EC	Amount of the capital requirement, calculated according to the rules stated in article 17 of Directive 2003/41/EC, for ring-fenced funds relating to pension business operated under article 4 of Directive 2003/41/EC to which transitional measures are applied. This item is to be reported only during the transitional period.
R0200/C0100	Solvency capital requirement, excluding capital add-on	Amount of the total diversified SCR before any capital add-on.
R0210/C0100	Capital add-ons already set	Amount of capital add-on that had been set at the reporting reference date. It will not include capital add-ons set between that date and the submission of the data to the supervisory authority, nor any set after the submission of the data.
R0220/C0100	Solvency capital requirement	Amount of total SCR calculated using full internal model.
Other information on SCR		
R0300/C0100	Amount/estimate of the overall loss-absorbing	Amount/Estimate of the overall adjustment for

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1013). These amendments are also reflected in the consolidated legislation.gov.uk. Details of relevant amendments can be found on their website (for details)

		including the part embedded in each component and the part reported as a single component.
R0310/C0100	Amount/estimate of the overall loss-absorbing capacity of deferred taxes	Amount/Estimate of the overall adjustment for loss-absorbing capacity for deferred taxes, including the part embedded in each component and the part reported as a single component.
R0410/C0100	Total amount of notional Solvency Capital Requirements for remaining part	Amount of the notional SCRs of remaining part when group has RFF.
R0420/C0100	Total amount of Notional Solvency Capital Requirements for ring fenced funds	Amount of the sum of notional SCRs of all ring-fenced funds when group has RFF (other than those related to business operated in accordance with article 4 of Directive 2003/41/EC (transitional)).
R0430/C0100	Total amount of Notional Solvency Capital Requirements for matching adjustment portfolios	Amount of the sum of notional SCRs of all matching adjustment portfolios.
R0440/C0100	Diversification effects due to RFF nSCR aggregation for Article 304	Amount of the adjustment for a diversification effect between ring fenced funds under Article 304 of Directive 2009/138/EC and remaining part where applicable.
R0460/C0100	Net future discretionary benefits	Amount of technical provisions without risk margin in relation to future discretionary benefits net of reinsurance
R0470/C0100	Minimum consolidated group solvency capital requirement	Amount of the minimum consolidated group Solvency Capital Requirement as stated in article 230 of Directive 2009/138/EC. This item is applicable to group reporting only.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. R0500/C0100	Capital requirement for other financial sectors	Amount of capital requirement for other financial sectors.
	(Non–insurance capital requirements)	[^{F4} R0500 is expected to be equal to the sum of R0510, R0520 and R0530.] This item is only applicable to group reporting where the group includes an undertaking which is subject to non–insurance capital requirements, such as a bank, and is the capital requirement calculated in accordance with the appropriate requirements.
R0510/C0100	Capital requirement for other financial sectors (Non–insurance capital requirements) — Credit institutions, investment firms and financial institutions, alternative investment funds managers, UCITS management companies	Amount of capital requirement for credit institutions, investment firms and financial institutions. This item is only applicable to group reporting where the group includes undertakings which are credit institutions, investment firms and financial institutions, alternative investment funds managers, UCITS management companies and they are subject to capital requirements, calculated in accordance with the relevant sectoral rules.
R0520/C0100	Capital requirement for other financial sectors (Non–insurance capital requirements) — Institutions for occupational retirement provisions	Amount of capital requirement for institutions for occupational retirement provisions. This item is only applicable to group reporting where the group includes undertaking which are institutions for occupational retirement provision and subject to non–insurance capital requirements calculated in accordance with the relevant sectoral rules.
R0530/C0100	Capital requirement for other financial sectors (Non–insurance capital requirements) — Capital requirement for non–	Amount of capital requirement for non–regulated entities carrying out financial activities. This figure represents a notional

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1013) and any amendments made by subsequent EU Exit Instruments made by the Prudential Regulation Authority. Details of relevant amendments can be found on their website (<https://www.fca.org.uk/legislation>). Details of relevant amendments can be found on their website (<https://www.fca.org.uk/legislation>).

	regulated entities carrying out financial activities	Solvency requirements applicable on the relevant sectoral rules were to be applied. This item is only applicable to group reporting where the group includes undertakings which are non — regulated entities carrying out financial activities.
R0540/C0100	Capital requirement for non-controlled participation requirements	Amount of the proportional share of the Solvency Capital Requirements of the related insurance and reinsurance undertakings and insurance holding companies which are not subsidiaries. This item is only applicable to group reporting and corresponds, for those entities which are not subsidiaries, to the capital requirement calculated in accordance with Solvency 2.
R0550/C0100	Capital requirement for residual undertakings	Amount determined in accordance with Article 336 (1) (d) of Delegated Regulation (EU) 2015/35.

S.26.01 — Solvency Capital Requirement — Market risk

General comments:

This section relates to annual submission of information for groups, ring fenced—funds, matching adjustment portfolios and remaining part.

The template SR.26.01 has to be filled in for each ring—fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub—funds of a material RFF/MAP as identified in the second table of S.01.03.

Template SR.26.01 is only applicable in relation to RFF/MAP from undertakings consolidated according to Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35, when method 1 (Accounting consolidation—based method) is used, either exclusively or in combination with method 2 (Deduction and aggregation method).

Amounts before and after shock shall be filled in with the amount of assets and liabilities sensitive to that shock. For the liabilities the assessment shall be done at the most granular level available between contract and homogeneous risk group. This means that if a contract/HRG is sensitive to a shock the amount of liabilities associated to that contract/HRG shall be reported as amount sensitive to that shock.

For group reporting the following specific requirements shall be met:

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

- a) This information is applicable when method 1 as defined in Article 230 of Directive 2009/138/EC is used, either exclusively or in combination with method 2 as defined in Article 233 of Directive 2009/138/EC;
- b) When combination method is being used, this information is to be submitted only for the part of the group calculated with method 1 as defined in Article 230 of Directive 2009/138/EC, and;
- c) This information does not apply to groups when method 2 as defined in Article 233 of Directive 2009/138/EC is being used exclusively.

	ITEM	INSTRUCTIONS
Z0010	Article 112	Identifies whether the reported figures have been requested under Article 112 (7), to provide an estimate of the SCR using standard formula. One of the options in the following closed list shall be used: 1 — Article 112 (7) reporting 2 — Regular reporting
Z0020	Ring-fenced fund, matching adjustment portfolio or remaining part	Identifies whether the reported figures are with regard to a RFF, matching adjustment portfolio or to the remaining part. One of the options in the following closed list shall be used: 1 — RFF/MAP 2 — Remaining part
Z0030	Fund/Portfolio number	When item Z0020 = 1, identification number for a ring fenced fund or matching adjustment portfolio. This number is attributed by the undertaking within the scope of group supervision and must be consistent over time and with the fund/portfolio number reported in other templates. [^{F11} When item Z0020 = 2, then report '0']

calculation of market risk concentration (The following)		
		options shall be used: 1 — Simplifications used 2 — Simplifications not used
Interest rate risk		
R0100/C0060	Absolute value after shock — Net solvency capital requirement — interest rate risk	This is the net capital charge for interest rate risk, i.e. after adjustment for the loss absorbing capacity of technical provisions. If R0020/C0010=1, this item represents the net capital charge for interest rate risk calculated using simplified calculations for captive undertakings within the scope of group supervision.
R0100/C0080	Absolute value after shock — Gross solvency capital requirement — interest rate risk	This is the gross capital charge for interest rate risk, i.e. before the loss absorbing capacity of technical provisions. If R0020/C0010=1, this item represents the gross capital charge for interest rate risk calculated using simplified calculations for captive undertakings within the scope of group supervision.
R0110–R0120/C0020	Initial absolute values before shock — Assets — Interest rate risk — interest rate down/up shock	This is the total value of the assets sensitive to interest rate down/up risk, before shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0110–R0120/C0030	Initial absolute values before shock — Liabilities — Interest rate risk — interest rate down/up shock	This is the total value of the liabilities sensitive to interest rate down/up risk, before shock. The amount of technical provisions ('TP') shall be net of reinsurance and SPV recoverables.
R0110–R0120/C0040	Absolute values after shock — Assets — Interest	This is the absolute value of assets sensitive to interest

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. S.26.02 — Solvency Capital Requirement — Counterparty default risk

General comments

This section relates to annual submission of information for groups, ring fenced–funds, matching adjustment portfolios and remaining part.

Template SR.26.02 has to be filled in for each ring–fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub–funds of a material RFF/MAP as identified in the second table of S.01.03.

Template SR.26.02 is only applicable in relation to RFF/MAP from undertakings consolidated according to Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35, when method 1 (Accounting consolidation–based method) is used, either exclusively or in combination with method 2 (Deduction and aggregation method).

For group reporting the following specific requirements shall be met:

- a) This information is applicable when method 1 as defined in Article 230 of Solvency II Directive is used, either exclusively or in combination with method 2 as defined in Article 233 of Directive 2009/138/EC;
- b) When combination method is being used, this information is to be submitted only for the part of the group calculated with method 1 as defined in Article 230 of Directive 2009/138/EC, and;

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

c) This information does not apply to groups when method 2 as defined in Article 233 (EU Exit) of Directive 2009/138/EC is being used exclusively. (EU Exit) This information does not apply to groups when method 2 as defined in Article 233 of Directive 2009/138/EC is being used exclusively. (See end of Document for details)

R0500/C0090	Losses stemming from type 2 mortgage loans	Amount of the overall losses stemming from mortgage loans that has been classified as type 2 exposures according to Article 191 (13) of Delegated Regulation (EU) 2015/35.
R0510/C0090	Overall losses stemming from mortgage loans	Amount of the overall losses stemming from mortgage loans according to Article 191 (13) of Delegated Regulation (EU) 2015/35.

S.26.03 — Solvency Capital Requirements — Life underwriting risk

General comments:

This section relates to annual submission of information for groups, ring fenced–funds, matching adjustment portfolios and remaining part.

Template SR.26.03 has to be filled in for each ring–fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub–funds of a material RFF/MAP as identified in the second table of S.01.03.

Template SR.26.03 is only applicable in relation to RFF/MAP from undertakings consolidated according to Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35, when method 1 (Accounting consolidation–based method) is used, either exclusively or in combination with method 2 (Deduction and aggregation method).

All values shall be reported net of reinsurance and other risk mitigating techniques.

Amounts before and after shock shall be filled in with the amount of assets and liabilities sensitive to that shock. For the liabilities the assessment shall be done at the most granular level available between contract and homogeneous risk group. This means that if a contract/HRG is sensitive to a shock the amount of liabilities associated to that contract/HRG shall be reported as amount sensitive to that shock.

For group reporting the following specific requirements shall be met:

- This information is applicable when method 1 as defined in Article 230 of Directive 2009/138/EC is used, either exclusively or in combination with method 2 as defined in Article 233 of Directive 2009/138/EC;
- When combination method is being used, this information is to be submitted only for the part of the group calculated with method 1 as defined in Article 230 of Directive 2009/138/EC, and;
- This information does not apply to groups when method 2 as defined in Article 233 of Directive 2009/138/EC is being used exclusively.

	Disability — morbidity risk	disability — morbidity risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0300/C0030	Initial absolute values before shock — Liabilities — Disability— morbidity risk	This is the absolute value of liabilities sensitive to disability — morbidity risk, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0300/C0040	Absolute values after shock — Assets — Disability — morbidity risk	This is the absolute value of the assets sensitive to disability — morbidity risk, after the shock (i.e. as prescribed by standard formula: an increase in disability and morbidity rates which are used in calculation of technical provisions to reflect the disability and morbidity experience in the next following 12 months, and for all months after the following 12 months and a decrease in the disability and morbidity rates recovery rates used in the calculation of technical provisions in respect of next 12 months and for all year thereafter. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0300/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Disability — morbidity risk	This is the absolute value of liabilities (after the loss absorbing capacity of technical provisions) sensitive to disability — morbidity risk, after the shock (i.e. as prescribed by standard formula, see description provided in definition to cell R0300/C0040). The amount of TP shall be net of reinsurance and SPV recoverables.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

R0300/C0080	Absolute value after shock — Net solvency capital requirement — Disability — morbidity risk	This is the net capital charge for disability — morbidity risk, after adjustment for the loss absorbing capacity of technical provisions. If R0030/C0010=1, this item represents net capital charge for disability and morbidity risk calculated using simplifications.
R0300/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions) — Disability — morbidity risk	This is the absolute value of the liabilities (before the loss absorbing capacity of technical provisions) sensitive to disability — morbidity risk, after the shock (i.e. as prescribed by standard formula, see description provided in definition to cell R0300/C0040). The amount of TP shall be net of reinsurance and SPV recoverables.
R0300/C0080	Absolute value after shock — Gross solvency capital requirement — Disability — morbidity risk	This is the gross capital charge for disability — morbidity risk (before the loss absorbing capacity of technical provisions). If R0030/C0010=1, this item represents gross capital charge for disability and morbidity risk calculated using simplifications.
R0400/C0060	Absolute value after shock — Net solvency capital requirement — Lapse risk	This is the overall net capital charge for lapse risk, after adjustment for the loss absorbing capacity of technical provisions. If R0040/C0010=1, this item represents net capital charge for lapse risk calculated using simplifications.
R0400/C0080	Absolute value after shock — Gross solvency capital requirement — Lapse risk	This is the overall gross capital charge (before the loss-absorbing capacity of technical provisions) for lapse risk. If R0040/C0010=1, this item represents gross

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments apply to the extent permitted by the legislation.gov.uk. Details of relevant amending instruments can be found on their websites (see end of Document for details)

		capital charge for lapse risk calculated using simplifications.
R0410/C0020	Initial absolute values before shock — Assets — Lapse risk— risk of increase in lapse rates	This is the absolute value of the assets sensitive to the risk of an increase in lapse rates, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0410/C0030	Initial absolute values before shock — Liabilities — Lapse risk — risk of increase in lapse rates	This is the absolute value of liabilities sensitive to the risk of an increase in lapse rates, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0410/C0040	Absolute values after shock — Assets — Lapse risk –risk of increase in lapse rates	This is the absolute value of the assets sensitive to the risk of an increase in lapse rates, after the shock (i.e. permanent increase in the lapse rates). Recoverables from reinsurance and SPVs shall not be included in this cell.
R0410/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Lapse risk — risk of increase in lapse rates	This is the absolute value of liabilities (after the loss absorbing capacity of technical provisions) sensitive to the risk of an increase in lapse rates, after the shock (i.e. permanent increase in the lapse rates). The amount of TP shall be net of reinsurance and SPV recoverables.
R0410/C0060	Absolute value after shock — Net solvency capital requirement — Lapse risk — risk of increase in lapse rates	This is the net capital charge for the risk of a permanent increase in lapse rates, after adjustment for the loss absorbing capacity of technical provisions. If R0040/C0010=1, this item represents net capital charge for a permanent increase in lapse rates, calculated using simplified calculation for lapse rate.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. Pt. 2. These amendments have been made to the original legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (See end of Document for details)

		technical provisions) of the single risk sub-modules. Diversification shall be reported as a negative value if they reduce the capital requirement.
R0800/C0080	Diversification within life underwriting risk module — Gross	This is the diversification effect within the life underwriting risk module as a result of the aggregation of the gross capital requirements (before the loss absorbing capacity of technical provisions) of the single risk sub-modules. Diversification shall be reported as a negative value if they reduce the capital requirement.
R0900/C0060	Total net solvency capital requirement for life underwriting risk	This is the total net capital charge for life underwriting risk, after adjustment for the loss absorbing capacity of technical provisions.
R0900/C0080	Total gross solvency capital requirement for life underwriting risk	This is the total gross capital charge for life underwriting risk, before the loss absorbing capacity of technical provisions.
Further details on revision risk		
R1000/C0090	USP — Factors applied for the revision risk shock	Revision shock — group specific parameter ('USP') as calculated by the group and approved by the supervisory authority. This item is not reported where no group specific parameter is used.

S.26.04 — Solvency Capital Requirement — Health underwriting risk

General Comments:

This section relates to annual submission of information for groups, ring fenced-funds, matching adjustment portfolios and remaining part.

Template SR.26.04 has to be filled in for each ring-fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2019. ~~a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub-funds of a material RFF/MAP as identified in the second table of SR.26.04.~~

Template SR.26.04 is only applicable in relation to RFF/MAP from undertakings consolidated according to Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35, when method 1 (Accounting consolidation-based method) is used, either exclusively or in combination with method 2 (Deduction and aggregation method).

All values shall be reported net of reinsurance and other risk mitigating techniques.

Amounts before and after shock shall be filled in with the amount of assets and liabilities sensitive to that shock. For the liabilities the assessment shall be done at the most granular level available between contract and homogeneous risk group. This means that if a contract/HRG is sensitive to a shock the amount of liabilities associated to that contract/HRG shall be reported as amount sensitive to that shock.

For group reporting the following specific requirements shall be met:

- a) This information is applicable when method 1 as defined in Article 230 of Directive 2009/138/EC is used, either exclusively or in combination with method 2 as defined in Article 233 of Directive 2009/138/EC;
- b) When combination method is being used, this information is to be submitted only for the part of the group calculated with method 1 as defined in Article 230 of Directive 2009/138/EC, and;
- c) This information does not apply to groups when method 2 as defined in Article 233 of Directive 2009/138/EC is being used exclusively.

	ITEM	INSTRUCTIONS
Z0010	Article 112	Identifies whether the reported figures have been requested under Article 112 (7), to provide an estimate of the SCR using standard formula. One of the options in the following closed list shall be used: 1 — Article 112 (7) reporting 2 — Regular reporting
Z0020	Ring-fenced fund, matching adjustment portfolio or remaining part	Identifies whether the reported figures are with regard to a RFF, matching adjustment portfolio or to the remaining part. One of the options in the following closed list shall be used: 1 — RFF/MAP 2 — Remaining part
Z0030	Fund/Portfolio number	When item Z0020 = 1, identification number for a ring fenced fund or matching

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not Simplifications not used. (See end of Document for details) legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

R0060/C0010	Simplifications used: health expense risk	Identify whether an undertaking within the scope of group supervision used simplifications for the calculation of health expense risk. The following options shall be used: 1 — Simplifications used 2 — Simplifications not used If R0060/C0010 = 1, only C0060 and C0080 shall be filled in for R0500.
SLT health underwriting risk		
R0100/C0020	Initial absolute values before shock — Assets — Health mortality risk	This is the absolute value of the assets sensitive to health mortality risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0100/C0030	Initial absolute values before shock — Liabilities — Health mortality risk	This is the absolute value of liabilities sensitive to health mortality risk, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0100/C0040	Absolute values after shock — Assets — Health mortality risk	This is the absolute value of the assets sensitive to health mortality risk charge, after the shock (i.e. permanent increase in mortality rates). Recoverables from reinsurance and SPVs shall not be included in this cell.
R0100/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Health mortality risk	This is the absolute value of the liabilities (after the loss absorbing capacity of technical provisions) sensitive to health mortality risk charge, after the shock (i.e. permanent increase in mortality rates). The amount of TP shall be net of reinsurance and SPV recoverables.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

R0100/C0080	Absolute value after shock — Net solvency capital requirement — Health mortality risk	This is the net capital charge for health mortality risk, after adjustment for the loss absorbing capacity of technical provisions. If R0010/C0010=1, this item represents net capital charge for health mortality risk calculated using simplifications.
R0100/C0070	Absolute value after shock — Liabilities (before the loss absorbing capacity of technical provisions) — Health mortality risk	This is the absolute value of the liabilities (before the loss absorbing capacity of technical provisions) sensitive to health mortality risk charge, after the shock (permanent increase in mortality rates). The amount of TP shall be net of reinsurance and SPV recoverables.
R0100/C0080	Absolute value after shock — Gross solvency capital requirement — Health mortality risk	This is the gross capital charge (before the loss absorbing capacity of technical provisions) for health mortality risk. If R0010/C0010=1, this item represents gross capital charge for health mortality risk calculated using simplifications.
R0200/C0020	Initial absolute values before shock — Assets — Health longevity risk	This is the absolute value of the assets sensitive to health longevity risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0200/C0030	Initial absolute values before shock — Liabilities — Health longevity risk	This is the absolute value of liabilities sensitive to health longevity risk, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0200/C0040	Absolute values after shock — Assets — Health longevity risk	This is the absolute value of the assets sensitive to health longevity risk after the shock (i.e. permanent decrease in mortality rates).

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are available on legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (Recoverables from reinsurance and SPVs shall not be included in this cell.)

		Recoverables from reinsurance and SPVs shall not be included in this cell.
R0200/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Health longevity risk	This is the absolute value of the liabilities (after the loss absorbing capacity of technical provisions) sensitive to health longevity risk, after the shock (i.e. permanent decrease in mortality rates). The amount of TP shall be net of reinsurance and SPV recoverables.
R0200/C0060	Absolute value after shock — Net solvency capital requirement — Health longevity risk	This is the net capital charge for health longevity risk, after adjustment for the loss absorbing capacity of technical provisions. If R0020/C0010=1, this item represents net capital charge for health longevity risk calculated using simplifications.
R0200/C0070	Absolute value after shock — Liabilities (before the loss absorbing capacity of technical provisions) — Health longevity risk	This is the absolute value of the liabilities (before the loss absorbing capacity of technical provisions) sensitive to health longevity risk, after the shock (permanent decrease in mortality rates). The amount of TP shall be net of reinsurance and SPV recoverables.
R0200/C0080	Absolute value after shock — Gross solvency capital requirement — Health longevity risk	This is the gross capital charge (before the loss absorbing capacity of technical provisions) for health longevity risk. If R0020/C0010=1, this item represents gross capital charge for health longevity risk calculated using simplifications.
R0300/C0060	Absolute value after shock — Net solvency capital requirement — Health disability — morbidity risk	This is the net capital charge for health disability — morbidity risk, after adjustment for the loss

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1013). These amendments to the technical provisions on health lapse risk and mass lapse risk are found on their website (<https://www.fca.org.uk/legislation>). Details of relevant amendments to the technical provisions on health lapse risk and mass lapse risk are found on their website (<https://www.fca.org.uk/legislation>).

	lapse risk	after the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0430/C0080	Absolute value after shock — Gross solvency capital requirement — SLT health lapse risk — mass lapse risk	This is the gross capital charge (excluding the loss absorbing capacity for technical provisions) for SLT health lapse risk — mass lapse risk referred to in Title I Chapter V Section 4 of Delegated Regulation (EU) 2015/35.
R0500/C0020	Initial absolute values before shock — Assets — Health expense risk	This is the absolute value of the assets sensitive to expense risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0500/C0030	Initial absolute values before shock — Liabilities — Health expense risk	This is the absolute value of liabilities sensitive to expense risk, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0500/C0040	Absolute values after shock — Assets — Health expense risk	This is the absolute value of the assets sensitive to health expense risk, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0500/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Health expense risk	This is the absolute value of liabilities (after the loss absorbing capacity of technical provisions) sensitive to health expense risk, after the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0500/C0060	Absolute value after shock — Net solvency capital requirement — Health expense risk	This is the net capital charge for health expense risk, after adjustment for the loss absorbing capacity of technical provisions. If R0060/C0010=1, this item represents net capital

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments have been incorporated into the legislation.gov.uk. Details of relevant amending instruments can be found on their websites (including EU Exit details)

		charge for health expense risk calculated using simplified calculations.
R0500/C0070	Absolute value after shock — Liabilities (before the loss absorbing capacity of technical provisions) — Health expense risk	This is the absolute value of the liabilities (before the loss absorbing capacity of technical provisions) sensitive to expense risk charge, after the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0500/C0080	Absolute value after shock — Gross solvency capital requirement — Health expense risk	This is the gross capital charge (excluding the loss absorbing capacity of technical provisions) for health expense risk. If R0060/C0010=1, this item represents gross capital charge for health expense risk calculated using simplified calculations.
R0600/C0020	Initial absolute values before shock — Assets — Health revision risk	This is the absolute value of the assets sensitive to health revision risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0600/C0030	Initial absolute values before shock — Liabilities — Health revision risk	This is the absolute value of liabilities sensitive to health revision risk charge, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0600/C0040	Absolute values after shock — Assets — Health revision risk	This is the absolute value of the assets sensitive to health revision risk, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0600/C0050	Absolute values after shock — Liabilities (after the loss absorbing capacity of technical provisions) — Health revision risk	This is the absolute value of liabilities (after the loss absorbing capacity of technical provisions) sensitive to health revision risk, after the shock.

		the loss absorbing capacity of technical provisions) of the single risk sub-modules. Diversification shall be reported as a negative value if they reduce the capital requirement.
R0800/C0060	Net solvency capital requirements — SLT health underwriting risk	This is the total net capital charge for SLT health underwriting risk referred to in Title I Chapter V Section 4 of Delegated Regulation (EU) 2015/35, after adjustment of the loss absorbing capacity of technical provisions.
R0800/C0080	Gross solvency capital — SLT health underwriting risk	This is the total gross capital charge for SLT health underwriting risk, before adjustment of the loss absorbing capacity of technical provisions.
Further details on revision risk		
R0900/C0090	Revision shock USP	Revision shock — group specific parameter as calculated by the group and approved by the supervisory authority. This item is not reported where no group specific parameter is used.
NSLT health premium and reserve risk		
R1000–R1030/C0100	Standard deviation for premium risk — USP	This is the group specific standard deviation for premium risk for each lines of business and its proportional reinsurance as calculated by the group and approved or prescribed by the supervisory authority. This item is not reported where no group specific parameter is used.
R1000–R1030/C0110	USP Standard Deviation gross/net	Identify if the USP standard Deviation was applied gross or net. One of the options in the following closed list shall be used: 1 — USP gross

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not currently shown on legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

R1000–R1030/C0120	Standard deviation for premium risk — USP — Adjustment factor for non — proportional reinsurance	This is the group specific adjustment factor for non-proportional reinsurance of each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, which allows groups to take into account the risk-mitigating effect of particular per risk excess of loss reinsurance — as calculated by the group and approved or prescribed by the supervisory authority. Where no group specific parameter is used, this cell shall be left blank.
R1000–R1030/C0130	Standard deviation for reserve risk — USP	This is the group specific standard deviation for reserve risk for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, and its proportional reinsurance as calculated by the group and approved or prescribed by the supervisory authority. This item is not reported where no group specific parameter is used.
R1000–R1030/C0140	Volume measure for premium and reserve risk — volume measure for premium risk: Vprem	The volume measure for premium risk for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, and its proportional reinsurance
R1000–R1030/C0150	Volume measure for premium and reserve risk – Volume measure reserve risk: Vres	The volume measure for reserve risk for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, and its proportional reinsurance
R1000–R1030/C0160	Volume measure for premium and reserve risk — Geographical Diversification	This represents the geographical diversification to be used for the volume measure for premium and reserve risk for each line of business, as defined in Annex I to Delegated Regulation

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. Pt. 2. These amendments are available on legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (EU) 2015/2450 and its proportional reinsurance details)

		If the factor for geographical diversification is not calculated, then this item is set to the default value of 1.
R1000–R1030/C0170	Volume measure for premium and reserve risk — V	The volume measure for NSLT health premium and reserve risk referred to in Title I Chapter V Sections 4 and 12 of Delegated Regulation (EU) 2015/35, for each line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, and its proportional reinsurance.
R1040/C0170	Total Volume measure for premium and reserve risk	The total volume measure for premium and reserve risk, equal to the sum of the volume measures for premium and reserve risk for all lines of business.
R1050/C0100	Combined standard deviation	This is the combined standard deviation for premium and reserve risk for all segments.
R1100/C0180	Solvency capital requirement — NSLT health premium and reserve risk	This is the total capital charge for the NSLT health premium and reserve risk sub module referred to in Title I Chapter V Sections 4 and 12 of Delegated Regulation (EU) 2015/35.
R1200/C0190	Initial absolute values before shock — Assets — Lapse risk	This is the absolute value of the assets sensitive to the NSLT health lapse risk referred to in Title I Chapter V Section 4 of Delegated Regulation (EU) 2015/35, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R1200/C0200	Initial absolute values before shock — Liabilities — Lapse risk	This is the absolute value of liabilities sensitive to the NSLT health lapse risk referred to in Title I Chapter V Section 4 of Delegated Regulation (EU) 2015/35, before the shock.

Status: Point in time view as at 31/12/2020.

R1700/C0276	Total net solvency capital requirement for health underwriting risk	This is the total net solvency capital requirement for the health underwriting risk module.
R1700/C0280	Total gross solvency capital requirement for health underwriting risk	This is the total gross solvency capital requirement for the health underwriting risk module.

S.26.05 — Solvency Capital Requirement — Non–Life underwriting risk

General comments:

This section relates to annual submission of information for groups, ring fenced–funds, matching adjustment portfolios and remaining part.

Template SR.26.05 has to be filled in for each ring–fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub–funds of a material RFF/MAP as identified in the second table of S.01.03.

Template SR.26.05 is only applicable in relation to RFF/MAP from undertakings consolidated according to Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35, when method 1 (Accounting consolidation–based method) is used, either exclusively or in combination with method 2 (Deduction and aggregation method).

All values shall be reported net of reinsurance and other risk mitigating techniques.

Amounts before and after shock shall be filled in with the amount of assets and liabilities sensitive to that shock. For the liabilities the assessment shall be done at the most granular level available between contract and homogeneous risk group. This means that if a contract/HRG is sensitive to a shock the amount of liabilities associated to that contract/HRG shall be reported as amount sensitive to that shock.

For group reporting the following specific requirements shall be met:

- This information is applicable when method 1 as defined in Article 230 of Directive 2009/138/EC is used, either exclusively or in combination with method 2 as defined in Article 233 of Directive 2009/138/EC;
- When combination method is being used, this information is to be submitted only for the part of the group calculated with method 1 as defined in Article 230 of Directive 2009/138/EC, and;
- This information does not apply to groups when method 2 as defined in Article 233 of Directive 2009/138/EC is being used exclusively.

	ITEM	INSTRUCTIONS
Z0010	Article 112	Identifies whether the reported figures have been requested under Article 112 (7), to provide an estimate of the SCR using standard formula. One of the options

Status: Point in time view as at 31/12/2020.

<p>Non-life lapse risk R0400/C0110 Initial absolute values before shock — Assets — Non-life underwriting risk — Lapse risk</p>		
R0400/C0110	Initial absolute values before shock — Assets — Non-life underwriting risk — Lapse risk	This is the absolute value of the assets sensitive to the non-life lapse risk, before the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0400/C0120	Initial absolute values before shock — Liabilities — Non-life underwriting risk — Lapse risk	This is the absolute value of liabilities sensitive to the non-life lapse risk, before the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0400/C0130	Absolute values after shock — Assets — Non-life underwriting risk — Lapse risk	This is the absolute value of the assets sensitive to non-life lapse risk, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0400/C0140	Absolute values after shock — Liabilities — Non-life underwriting risk — Lapse risk	This is the absolute value of the liabilities sensitive to non-life lapse risk, after the shock. The amount of TP shall be net of reinsurance and SPV recoverables.
R0400/C0150	Solvency capital requirement — Non-life underwriting risk — Lapse risk	This is the capital charge for non-life underwriting lapse risk.
<p>Non-life catastrophe risk</p>		
R0500/C0160	Capital requirement for non-life catastrophe risk	This is the total non-life catastrophe risk capital requirement.
<p>Total non-life underwriting risk</p>		
R0600/C0160	Diversification within non-life underwriting risk module	This is the diversification effect within the non-life underwriting risk sub-module as a result of the aggregation of the capital requirements premium and reserve risk, catastrophe risk and lapse risk. Diversification shall be reported as a negative value if they reduce the capital requirement.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

R0700/00180	Total capital requirement for non-life underwriting risk	This is the solvency capital requirement for non-life underwriting risk sub module.
-------------	--	---

S.26.06 — Solvency Capital Requirements — Operational risk

General comments:

This section relates to annual submission of information for groups, ring fenced-funds, matching adjustment portfolios and remaining part.

Template SR.26.06 has to be filled in for each ring-fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub-funds of a material RFF/MAP as identified in the second table of S.01.03.

Template SR.26.06 is only applicable in relation to RFF/MAP from undertakings consolidated according to Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35, when method 1 (Accounting consolidation-based method) is used, either exclusively or in combination with method 2 (Deduction and aggregation method).

For group reporting the following specific requirements shall be met:

- This information is applicable when method 1 as defined in Article 230 of Directive 2009/138/EC is used, either exclusively or in combination with method 2 as defined in Article 233 of Directive 2009/138/EC;
- When combination method is being used, this information is to be submitted only for the part of the group calculated with method 1 as defined in Article 230 of Directive 2009/138/EC, and;
- This information does not apply to groups when method 2 as defined in Article 233 of Directive 2009/138/EC is being used exclusively.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

R0400/C0320	Windstorm – risk weight chosen in the NAT CAT simplifications	Include risk weight used in windstorm simplifications
R0400/C0330	Windstorm – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to windstorm simplifications
R0410/C0320	Hail – risk weight chosen in the NAT CAT simplifications	Include risk weight chosen in hail simplifications
R0410/C0330	Hail – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to hail simplifications
R0420/C0320	Earthquake – risk weight chosen in the NAT CAT simplifications	Include risk weight chosen in earthquake simplifications
R0420/C0330	Earthquake – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to earthquake simplifications
R0430/C0320	Flood – risk weight chosen in the NAT CAT simplifications	Include risk weight chosen in flood simplifications
R0430/C0330	Flood – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to flood simplifications
R0440/C0320	Subsidence – risk weight chosen in the NAT CAT simplifications	Include risk weight chosen in the subsidence simplifications
R0440/C0330	Subsidence – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to subsidence simplifications]

S.27.01 — Solvency Capital Requirement — Non-life and health catastrophe risk

General comments:

This section relates to annual submission of information for groups, ring fenced–funds, matching adjustment portfolios and remaining part.

Template S.27.01 has to be filled in for each ring–fenced fund (RFF), each matching adjustment portfolio (MAP) and for the remaining part. However, where a RFF/MAP includes a MAP/RFF embedded, the fund should be treated as different funds. This template shall be reported for all sub–funds of a material RFF/MAP as identified in the second table of S.01.03.

Template SR.27.01 is only applicable in relation to RFF/MAP from undertakings consolidated according to Article 335, paragraph 1, (a), (b) and (c) of Delegated Regulation (EU) 2015/35, when method 1 (Accounting consolidation–based method) is used, either exclusively or in combination with method 2 (Deduction and aggregation method).

This template is designed to allow an understanding of how the catastrophe risk module of the SCR has been calculated and what are the main drivers.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2019.

For every type of catastrophe risk, the risk mitigating effect of the undertaking's specific reinsurance contracts and special purpose vehicles must be determined. This calculation is prospective and must be based on the reinsurance program of the next reporting year as described in the reinsurance templates for Facultative covers (S.30.01 and S.30.02 of Annex II) and Outgoing reinsurance program in the next reporting year (S.30.03 and S.30.04 of Annex II).

Undertakings need to estimate their recoveries from risk mitigation in line with the Directive 2009/138/EC, Delegated Regulation (EU) 2015/35 and any relevant technical standard. Undertakings shall complete the catastrophe reporting template only to the granularity required to perform this calculation.

Under the non-life and health underwriting risk modules, catastrophe risk is defined as the risk of loss, or of adverse change in the value of insurance liabilities, resulting from significant uncertainty of pricing and provisioning assumptions related to extreme or exceptional events as set out in Article 105(2)(b) and (4)(c) of the Directive 2009/138/EC.

The reported capital requirements reflects the capital requirements before and after risk mitigation which is the risk mitigating effect of the undertaking's specific reinsurance contracts and special purpose vehicles. The reported capital requirement after risk mitigation is before the loss absorbing capacity of technical provisions. The default value of the risk mitigation shall be reported as a positive value in order to be deducted.

In case the diversification effect reduces the capital requirement the default value of the diversification shall be reported as a negative value.

For group reporting the following specific requirements shall be met:

- d) This information is applicable when method 1 as defined in Article 230 of Directive 2009/138/EC is used, either exclusively or in combination with method 2 as defined in Article 233 of Directive 2009/138/EC;
- e) When combination method is being used, this information is to be submitted only for the part of the group calculated with method 1 as defined in Article 230 of Directive 2009/138/EC, and;
- f) This information does not apply to groups when method 2 as defined in Article 233 of Directive 2009/138/EC is being used exclusively.

[^{F10}]

Z0020	Ring-fenced fund, matching adjustment portfolio or remaining part	Identifies whether the reported figures are with regard to a RFF, matching adjustment portfolio or to the remaining part. One of the options in the following closed list shall be used: 1 — RFF/MAP 2 — Remaining part
Z0030	Fund/Portfolio number	When item Z0020 = 1, identification number for a ring fenced fund or matching adjustment portfolio. This number is attributed by the undertaking within the scope

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments must be consistent over time and with the fund/portfolio number reported in other templates. [F11 When item Z0020 = 2, then report '0']

		and with the fund/portfolio number reported in other templates. [F11 When item Z0020 = 2, then report '0']
[F5 R0001/C001	Simplifications used – fire risk	Identify whether an undertaking within the scope of group for the SCR calculation used simplifications for the calculation of fire risk. The following options shall be used: 1 – Simplifications for the purposes of Article 90c 9 – Simplifications not used Where R0001/C0001 = 1, only C0880 shall be filled in for R2600.
R0002/C001	Simplifications used – natural catastrophe risk	Identify whether an undertaking within the scope of group for the SCR calculation used simplifications for the calculation of natural catastrophe risk. The following options shall be used: 1 – Simplification for the purposes of Article 90b windstorm 2 – Simplification for the purposes of Article 90b earthquake 3 – Simplification for the purposes of Article 90b flood 4 – Simplification for the purposes of Article 90b hail 5 – Simplification for the purposes of Article 90b subsidence 9 – Simplifications not used

Status: Point in time view as at 31/12/2020.

Pt. 2. These amendments may be used simultaneously. (See end of Document for details) legislation.gov.uk. Details of relevant amending instruments can be found on their website.

Non-life catastrophe risk — Summary

C0010/R0010	SCR before risk mitigation — Natural catastrophe risk	This is the total catastrophe risk before risk mitigation arising from all natural catastrophe perils and taking into consideration the diversification effect between the perils given in C0010/R0070.
C0010/R0020–R0060	SCR before risk mitigation — Natural catastrophe risk perils	This is the total capital requirement before risk mitigation per natural catastrophe peril, taking into consideration the diversification effect between zones and regions. Per natural peril this amount is equal to the Catastrophe Risk Charge before risk mitigation.
C0010/R0070	SCR before risk mitigation — Diversification between perils	Diversification effect arising from the aggregation of the total capital charges before risk mitigation relating to different natural catastrophe perils.
C0020/R0010	Total risk mitigation — Natural catastrophe risk	This is the total risk mitigation effect of the group's specific reinsurance contracts and special purpose vehicles arising from all natural catastrophe perils and taking into consideration the diversification effect between the perils given in C0020/R0070.
C0020/R0020–R0060	Total risk mitigation — Natural catastrophe risk perils	This is the total risk mitigation effect of the group's specific reinsurance contracts and special purpose vehicles per natural catastrophe peril.
C0020/R0070	Total risk mitigation — Diversification between perils	Diversification effect arising from the aggregation of the risk mitigation effect of the group's specific reinsurance contracts and special purpose

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments relate to different vehicles relating to different natural catastrophe perils. (See end of Document for details) legislation.gov.uk. Details of relevant amending instruments can be found on their website.

C0030/R0010	SCR after risk mitigation — Natural catastrophe risk	This is the total catastrophe risk after risk mitigation arising from all natural catastrophe perils and taking into consideration the diversification effect between the perils given in C0030/R0070.
C0030/R0020–R0060	SCR after risk mitigation — Natural catastrophe risk perils	This is the total capital requirement after risk mitigation per natural catastrophe peril, taking into consideration the diversification effect between zones and regions. Per natural peril this amount is equal to the Catastrophe Risk Charge after risk mitigation.
C0030/R0070	SCR after risk mitigation — Diversification between perils	Diversification effect arising from the aggregation of the total capital charges after risk mitigation relating to different natural catastrophe perils.
C0010/R0080	SCR before risk mitigation — Catastrophe risk non–proportional property reinsurance	This is the total catastrophe risk before risk mitigation arising from non–proportional property reinsurance.
C0020/R0080	Total risk mitigation — Catastrophe risk non–proportional property reinsurance	This is the total risk mitigation effect of the group's specific reinsurance contracts and special purpose vehicles for non–proportional property reinsurance.
C0030/R0080	SCR after risk mitigation — Catastrophe risk non–proportional property reinsurance	This is the total catastrophe risk after risk mitigation arising from non–proportional property reinsurance.
C0010/R0090	SCR before risk mitigation — Man–made catastrophe risk	This is the total catastrophe risk before risk mitigation arising from all man–made perils and taking into consideration the diversification effect between

Pt. 2. These amendments are available on legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (See end of Document for details)

		onshore property damage by Windstorm and where the risk is situated in this particular [^{F3} specified] region.
C0050/R0600	Exposure — Total Windstorm [^{F3} specified] Regions before diversification	Total of the exposure before diversification for the 20 [^{F3} specified] regions.
C0060/R0400–R0590	Specified Gross Loss — [^{F3} specified] Region	Specified gross windstorm loss per each of the 20 [^{F3} specified] regions, taking into consideration the effect of diversification effect between zones.
C0060/R0600	Specified Gross Loss — Total Windstorm [^{F3} specified] Regions before diversification	Total of the specified gross loss before diversification for the 20 [^{F3} specified] regions.
C0070/R0400–R0590	Catastrophe Risk Charge Factor before risk mitigation — [^{F3} specified] Region	The risk charge factor per each of the 20 [^{F3} specified] regions for Windstorm, taking into consideration the effect of diversification effect between zones.
C0070/R0600	Catastrophe Risk Charge Factor before risk mitigation — Total Windstorm [^{F3} specified] Regions before diversification	Ratio between total specified gross loss and total exposure.
C0080/R0400–R0590	Scenario A or B — [^{F3} specified] Region	The larger of the capital requirement for Windstorm risk for each of the 20 [^{F3} specified] regions according to scenario A or scenario B. When determining the largest amount of scenario A and B, the risk mitigation effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, shall be taken into account.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C0090/R0400–R0590	Catastrophe Risk Charge before risk mitigation — Total Windstorm for the 20 [F ³ specified] Regions before diversification	Capital requirement before risk mitigation arising from
	[F ³ specified] Region	Windstorm for each of the 20 [F ³ specified] Regions corresponding to the larger of scenario A or B.
C0090/R0600	Catastrophe Risk Charge before risk mitigation — Total Windstorm [F ³ specified] Regions before diversification	Total of the capital requirement before risk mitigation arising from Windstorm for the 20 [F ³ specified] regions.
C0090/R0790	Catastrophe Risk Charge before risk mitigation — Total Windstorm Other Regions before diversifications	The capital requirement before risk mitigation for Windstorm risk in regions other than the [F ³ specified] Regions. It is the amount of the instantaneous loss, without deduction of the amounts recoverable from reinsurance contracts and Special Purpose Vehicles.
C0090/R0800	Catastrophe Risk Charge before risk mitigation — Total Windstorm all Regions before diversification	Total of the capital requirement before risk mitigation arising from Windstorm for all regions.
C0090/R0810	Catastrophe Risk Charge before risk mitigation — Diversification effect between regions	Diversification effect arising from the aggregation of the Windstorm risks relating to the different regions (both [F ³ specified] Regions and 'other regions')
C0090/R0820	Catastrophe Risk Charge before risk mitigation — Total Windstorm after diversification	This is the total capital requirement before risk mitigation for Windstorm risk, taking into consideration the diversification effect reported in item C0090/R0810.
C0100/R0400–R0590	Estimated Risk Mitigation — [F ³ specified] Region	Per each of the 20 [F ³ specified] Regions, the estimated risk mitigation effect, corresponding to the selected scenario, of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, excluding the estimated reinstatement premiums.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C0100/R0600	Estimated Risk Mitigation — Total Windstorm	Total of the estimated risk mitigation arising from
	[^{F3} specified] Regions before diversification	Windstorm for the 20 [^{F3} specified] regions.
C0100/R0790	Estimated Risk Mitigation — Total Windstorm Other Regions before diversifications	For all the regions other the [^{F3} specified] Regions, the estimated risk mitigation effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, excluding the estimated reinstatement premiums.
C0100/R0800	Estimated Risk Mitigation — Total Windstorm all Regions before diversification	Total of the estimated risk mitigation arising from Windstorm for all regions.
C0110/R0400–R0590	Estimated Reinstatement Premiums — [^{F3} specified] Region	For each of the 20 [^{F3} specified] Regions, the estimated reinstatement premiums, corresponding to the selected scenario, as a result of the group's specific reinsurance contracts and special purpose vehicles relating to this peril.
C0110/R0600	Estimated Reinstatement Premiums — Total Windstorm [^{F3} specified] Regions before diversification	Total of the estimated reinstatement premiums for the 20 [^{F3} specified] regions.
C0110/R0790	Estimated Reinstatement Premiums — Total Windstorm Other Regions before diversifications	For all the regions other than the [^{F3} specified] Regions, the estimated reinstatement premiums, as a result of the group's specific reinsurance contracts and special purpose vehicles relating to this peril.
C0110/R0800	Estimated Reinstatement Premiums — Total Windstorm all Regions before diversification	Total of the estimated reinstatement premiums for all regions.
C0120/R0400–R0590	Catastrophe Risk Charge after risk mitigation — [^{F3} specified] Region	Capital requirement, after the deduction of the risk mitigating effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, arising from Windstorms

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments affect the [F3 specified] regions, corresponding to the selected scenario. (See end of Document for details) legislation.gov.uk. Details of relevant amending instruments can be found on their websites.

C0120/R0600	Catastrophe Risk Charge after risk mitigation — Total Windstorm [F3 specified] Regions before diversification	Total of the capital requirement, after the deduction of the risk mitigating effect of the group's specific reinsurance contracts and special purpose vehicles for the 20 [F3 specified] regions.
C0120/R0790	Catastrophe Risk Charge after risk mitigation — Total Windstorm Other Regions before diversifications	Capital requirement after risk mitigation for Windstorm risk in regions other than the [F3 specified] Regions. It is the amount of the instantaneous loss, including the deduction of the amounts recoverable from reinsurance contracts and Special Purpose Vehicles.
C0120/R0800	Catastrophe Risk Charge after risk mitigation — Total Windstorm all Regions before diversification	Total of the capital requirement, after the deduction of the risk mitigating effect of the group's specific reinsurance contracts and special purpose vehicles for all regions.
C0120/R0810	Catastrophe Risk Charge after risk mitigation — Diversification effect between regions	Diversification effect arising from the aggregation of the capital requirement after risk mitigations for Windstorm risks relating to the different regions (both [F3 specified] Regions and 'other regions').
C0120/R0820	Catastrophe Risk Charge after risk mitigation — Total Windstorm after diversification	This is the total capital requirement after risk mitigation for Windstorm risk, taking into consideration the diversification effect given in item C0120/R0810.
Natural catastrophe risk — Earthquake		
C0130/R1040–R1210	Estimation of the gross premium to be earned — Other Regions	An estimate of the premiums to be earned by the insurance or reinsurance group, during the following year in relation to each of the 14 regions other than the [F3 specified] Regions (include regions as specified in Annex III,

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments, except the ones specified in legislation.gov.uk. Details of relevant amending instruments can be found on their website. (See end of Annex XIII for details)

		Delegated Regulation (EU) 2015/35), for the contract in relation to the obligations of lines of business: Fire and other damage covering earthquake risk, including the proportional reinsurance obligations; and Marine, aviation and transport insurance covering onshore property damage by earthquake, including the proportional reinsurance obligations. Premiums shall be gross, without deduction of premiums for reinsurance contracts.
C0130/R1220	Estimation of the gross premium to be earned — Total Earthquake Other Regions before diversification	Total of the estimate of the premiums to be earned, by the insurance or reinsurance group, during the following year for the other regions.
C0140/R0830–R1020	Exposure — [^{F3} specified] Region	The sum of the total insured per each of the 20 [^{F3} specified] regions for the lines of business: Fire and other damage, including the proportional reinsurance obligations, in relation to contracts that cover Earthquake risk and where the risk is situated in this particular [^{F3} specified] region; and For lines of business Marine, aviation and transport insurance, including the proportional reinsurance obligations, in relation to contracts that cover onshore property damage by Earthquake and where the risk is situated in this particular [^{F3} specified] region.
C0140/R1030	Exposure — Total Earthquake [^{F3} specified]	Total of the exposure for the 20 [^{F3} specified] regions.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1055) Sch. Pt. 2. These amendments are not currently available on legislation.gov.uk. Details of relevant amendments can be found on their website/s. (See end of Document for details)

C0150/R0830–R1020	Specified Gross Loss — [^{F3} specified] Region	Specified gross Earthquake loss for each of the 20 [^{F3} specified] regions, taking into consideration the effect of diversification effect between zones.
C0150/R1030	Specified Gross Loss — Total Earthquake [^{F3} specified] Regions before diversification	Total of the specified gross Earthquake loss for the 20 [^{F3} specified] regions.
C0160/R0830–R1020	Catastrophe Risk Charge Factor before risk mitigation — [^{F3} specified] Region	The Risk Charge Factor per each of the 20 [^{F3} specified] regions for Earthquake according to the Standard Formula, taking into consideration the effect of diversification effect between zones.
C0160/R1030	Catastrophe Risk Charge Factor before risk mitigation — Total Earthquake [^{F3} specified] Regions before diversification	Ratio between total specified gross loss and total exposure.
C0170/R0830–R1020	Catastrophe Risk Charge before risk mitigation — [^{F3} specified] Region	Capital requirement before risk mitigation arising from Earthquakes in each of the 20 [^{F3} specified] Regions.
C0170/R1030	Catastrophe Risk Charge before risk mitigation — Total Earthquake [^{F3} specified] Regions before diversification	Total of the capital requirement before risk mitigation arising from Earthquakes for the 20 [^{F3} specified] regions.
C0170/R1220	Catastrophe Risk Charge before risk mitigation — Total Earthquake Other Regions before diversification	The capital requirement before risk mitigation for Earthquake risk in regions other than the [^{F3} specified] Regions. It is the amount of the instantaneous loss, without deduction of the amounts recoverable from reinsurance contracts and Special Purpose Vehicles.
C0170/R1230	Catastrophe Risk Charge before risk mitigation Total	Total of the capital requirement before risk

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1043), as amended, which may be found on their website (<https://www.fca.org.uk/legislation/gov.uk>). Details of relevant amendments can be found on their website (<https://www.fca.org.uk/legislation/gov.uk>). Details of relevant amendments can be found on their website (<https://www.fca.org.uk/legislation/gov.uk>).

	Earthquake — All Regions before diversification	Mitigation arising from Earthquakes for all regions
C0170/R1240	Catastrophe Risk Charge before risk mitigation — Diversification effect between regions	Diversification effect arising from the aggregation of the Earthquake risks relating to the different regions (both [^{F3} specified] Regions and Other regions).
C0170/R1250	Catastrophe Risk Charge before risk mitigation — Total Earthquake after diversification	This is the total capital requirement before risk mitigation for Earthquake risk, taking into consideration the diversification effect given in C0170/R1240.
C0180/R0830–R1020	Estimated Risk Mitigation — [^{F3} specified] Region	Per each of the 20 [^{F3} specified] Regions the estimated risk mitigation effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, excluding the estimated reinstatement premiums.
C0180/R1030	Estimated Risk Mitigation — Total Earthquake [^{F3} specified] Regions before diversification	Total of the estimated Risk Mitigation for the 20 [^{F3} specified] regions.
C0180/R1220	Estimated Risk Mitigation — Total Earthquake — Other Regions before diversification	For all the regions other than the [^{F3} specified] Regions, the estimated risk mitigation effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, excluding the estimated reinstatement premiums.
C0180/R1230	Estimated Risk Mitigation — Total Earthquake — All Regions before diversification	Total of the estimated Risk Mitigation for all regions.
C0190/R0830–R1020	Estimated Reinstatement Premiums — [^{F3} specified] Region	Per each of the 20 [^{F3} specified] Regions the estimated reinstatement premiums as a result of the group's specific reinsurance contracts and special purpose vehicles relating to this peril.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. C0190/R1030	Estimated Reinstatement Premiums — Total	Total of the estimated reinstatement premiums for the 20 [F3 specified] regions.
	Earthquake [F3 specified] Regions before diversification	
C0190/R1220	Estimated Reinstatement Premiums — Total Earthquake — Other Regions before diversification	For all the regions other than the [F3 specified] Regions, the estimated reinstatement premiums, as a result of the group's specific reinsurance contracts and special purpose vehicles relating to this peril.
C0190/R1230	Estimated Reinstatement Premiums — Total Earthquake — All Regions before diversification	Total of the estimated reinstatement premiums for all regions.
C0200/R0830–R1020	Catastrophe Risk Charge after risk mitigation — [F3 specified] Region	Capital requirement, after the deduction of the risk mitigating effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, arising from Earthquake in each of the 20 [F3 specified] regions.
C0200/R1030	Catastrophe Risk Charge after risk mitigation — Total Earthquake [F3 specified] Regions before diversification	Total of the capital requirement, after the deduction of the risk mitigating effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, arising from Earthquake for the 20 [F3 specified] regions.
C0200/R1220	Catastrophe Risk Charge after risk mitigation — Total Earthquake — Other Regions before diversification	Capital requirement after risk mitigation for Earthquake risk in regions other than the [F3 specified] Regions. It is the amount of the instantaneous loss, including the deduction of the amounts recoverable from reinsurance contracts and Special Purpose Vehicles.
C0200/R1230	Catastrophe Risk Charge after risk mitigation — Total Earthquake — All Regions before diversification	Total of the capital requirement, after the deduction of the risk mitigating effect of the group's specific reinsurance contracts and special purpose

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1013), Regs 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

	Total Flood Other Regions before diversification	the insurance or reinsurance group, during the following year for the other regions.
C0220/R1260–R1390	Exposure — [^{F3} specified] Region	The sum of the total insured per each of the 14 [^{F3} specified] regions of lines of business: Fire and other damage, including the proportional reinsurance obligations, in relation to contracts that cover Flood risk and where the risk is situated in this particular [^{F3} specified] region; Marine, aviation and transport insurance, including the proportional reinsurance obligations, in relation to contracts that cover onshore property damage by Flood and where the risk is situated in this particular [^{F3} specified] region; and Other motor insurance, including the proportional reinsurance obligations, multiplied by 1.5, in relation to contracts that cover onshore property damage by Flood and where the risk is situated in this particular [^{F3} specified] region.
C0220/R1400	Exposure — Total Flood [^{F3} specified] Regions before diversification	Total of the exposure for the 14 [^{F3} specified] regions.
C0230/R1260–R1390	Specified Gross Loss — [^{F3} specified] Region	Specified gross Flood loss in each of the 14 [^{F3} specified] regions, taking into consideration the effect of diversification effect between zones.
C0230/R1400	Specified Gross Loss — Total Flood [^{F3} specified] Regions before diversification	Total of the specified gross Flood loss for the 14 [^{F3} specified] regions.
C0240/R1260–R1390	Catastrophe Risk Charge Factor before risk	The Risk Charge Factor per each of the 14 [^{F3} specified] regions for Flood according

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1013) and/or by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1013) and/or by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1013). Details of relevant amending instruments can be found on their websites (including the Standard Formula taking into consideration the effect of diversification effect between zones).

		effect of diversification effect between zones.
C0240/R1400	Catastrophe Risk Charge Factor before risk mitigation — Total Flood [^{F3} specified] Regions before diversification	Ratio between total specified gross loss and total exposure.
C0250/R1260–R1390	Scenario A or B — [^{F3} specified] Region	The larger of the capital requirement for Flood risk in each of the 14 [^{F3} specified] regions according to scenario A or scenario B. When determining the largest amount of scenario A and B, the risk mitigation effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, must be taken into account.
C0260/R1260–R1390	Catastrophe Risk Charge before risk mitigation — [^{F3} specified] Region	Capital requirement before risk mitigation arising from Floods in each of the 14 [^{F3} specified] Regions, corresponding to the larger of scenario A or B.
C0260/1400	Catastrophe Risk Charge before risk mitigation — Total Flood [^{F3} specified] Regions before diversification	Total of the capital requirement before risk mitigation arising from Floods for the 14 [^{F3} specified] regions.
C0260/R1590	Catastrophe Risk Charge before risk mitigation — Total Flood Other Regions before diversification	The capital requirement before risk mitigation for Flood risk in regions other than the [^{F3} specified] Regions. It is the amount of the instantaneous loss, without deduction of the amounts recoverable from reinsurance contracts and Special Purpose Vehicles.
C0260/R1600	Catastrophe Risk Charge before risk mitigation — Total Flood All Regions before diversification	Total of the capital requirement before risk mitigation arising from Floods for all regions.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C0260/R1610	Catastrophe Risk Charge before risk mitigation	Diversification effect arising from the aggregation of
	Diversification effect between regions	the Flood risks relating to the different regions (both [F ³ specified] Regions and Other regions).
C0260/R1620	Catastrophe Risk Charge before risk mitigation — Total Flood after diversification	This is the total capital requirement before risk mitigation for Flood risk, taking into consideration the diversification effect given in C0260/R1610.
C0270/R1260–R1390	Estimated Risk Mitigation — [F ³ specified] Region	Per each of the 14 [F ³ specified] Regions the estimated risk mitigation effect, corresponding to the selected scenario, of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, excluding the estimated reinstatement premiums.
C0270/R1400	Estimated Risk Mitigation — Total Flood [F ³ specified] Regions before diversification	Total of the estimated Risk Mitigation for the 14 [F ³ specified] regions.
C0270/R1590	Estimated Risk Mitigation — Total Flood Other Regions before diversification	For all the regions other than the [F ³ specified] Regions, the estimated risk mitigation effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, excluding the estimated reinstatement premiums.
C0270/R1600	Estimated Risk Mitigation — Total Flood All Regions before diversification	Total of the estimated Risk Mitigation for all regions.
C0280/R1260–R1390	Estimated Reinstatement Premiums — [F ³ specified] Region	Per each of the 14 [F ³ specified] Regions the estimated reinstatement premiums, corresponding to the selected scenario, as a result of the group's specific reinsurance contracts and special purpose vehicles relating to this peril.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C0280/R1400	Estimated Reinstatement Premiums — Total Flood	Total of the estimated reinstatement premiums for the 14 [F3 specified] regions.
	[F3 specified] Regions before diversification	
C0280/R1590	Estimated Reinstatement Premiums — Total Flood — Other Regions before diversification	For all the regions other than the [F3 specified] Regions, the estimated reinstatement premiums, as a result of the group's specific reinsurance contracts and special purpose vehicles relating to this peril.
C0280/R1600	Estimated Reinstatement Premiums — Total Flood — All Regions before diversification	Total of the estimated reinstatement premiums for all regions.
C0290/R1260–R1390	Catastrophe Risk Charge after risk mitigation — [F3 specified] Region	Capital requirement, after the deduction of the risk mitigating effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, arising from Flood in each of the 14 [F3 specified] regions, corresponding to the selected scenario.
C0290/R1400	Catastrophe Risk Charge after risk mitigation — Total Flood — [F3 specified] Regions before diversification	Total of the capital requirement, after the deduction of the risk mitigating effect of the group's specific reinsurance contracts and special purpose vehicles for the 14 [F3 specified] regions.
C0290/R1590	Catastrophe Risk Charge after risk mitigation — Total Flood — Other Regions before diversification	Capital requirement after risk mitigation for Flood risk in regions other than the [F3 specified] Regions. It is the amount of the instantaneous loss, including the deduction of the amounts recoverable from reinsurance contracts and Special Purpose Vehicles.
C0290/R1600	Catastrophe Risk Charge after risk mitigation — Total Flood — All Regions before diversification	Total of the capital requirement, after the deduction of the risk mitigating effect of the group's specific reinsurance

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments apply to special purpose vehicles in all regions. (See end of Document for details) legislation.gov.uk. Details of relevant amending instruments can be found on their websites.

C0290/R1610	Catastrophe Risk Charge after risk mitigation — Diversification effect between regions	Diversification effect arising from the aggregation of the capital requirement after risk mitigations for Flood risks relating to the different regions (both [^{F3} specified] Regions and Other regions).
C0290/R1620	Catastrophe Risk Charge after risk mitigation — Total Flood after diversification	This is the total capital requirement after risk mitigation for Flood risk, taking into consideration the diversification effect given in C0290/R1610.
Natural catastrophe risk — Hail		
C0300/R1730–R1900	Estimation of the gross premium to be earned — Other Regions	An estimate of the premiums to be earned by the insurance or reinsurance group, during the following year and in relation to each of the 9 regions other than the [^{F3} specified] Regions (include regions as specified in Annex III, except the ones specified in Annex V or in Annex XIII of Delegated Regulation (EU) 2015/35), for the contract in relation to the obligations of lines of business: Fire and other damage covering hail risk, including the proportional reinsurance obligations; Marine, aviation and transport insurance covering onshore property damage by hail, including the proportional reinsurance obligations; and Other motor insurance, including the proportional reinsurance obligations. Premiums shall be gross, without deduction of premiums for reinsurance contracts.
C0300/R1910	Estimation of the gross premium to be earned —	Total of the estimate of the premiums to be earned, by the insurance or reinsurance

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1071), which may be amended by the Prudential Regulation Authority. Details of relevant amendments can be found on their website: www.pra.gov.uk. Details of relevant amendments can be found on their website: www.pra.gov.uk.

	Total Hail before diversification	Other Regions group during the following year for the other regions
C0310/R1630–R1710	Exposure — [^{F3} specified] Region	The sum of the total insured per each of the 9 [^{F3} specified] regions for lines of business: Fire and other damage, including the proportional reinsurance obligations, in relation to contracts that cover Hail risk and where the risk is situated in this particular [^{F3} specified] region; Marine, aviation and transport insurance, including the proportional reinsurance obligations, in relation to contracts that cover onshore property damage by Hail and where the risk is situated in this particular [^{F3} specified] region; and Other motor insurance, including the proportional reinsurance obligations, multiplied by 5, in relation to contracts that cover onshore property damage by Hail and where the risk is situated in this particular [^{F3} specified] region.
C0310/R1720	Exposure — Total Hail [^{F3} specified] Regions before diversification	Total of the exposure for the 9 [^{F3} specified] regions.
C0320/R1630–R1710	Specified Gross Loss — [^{F3} specified] Region	Specified gross Hail loss in each of the 9 [^{F3} specified] regions, taking into consideration the effect of diversification effect between zones.
C0320/R1720	Specified Gross Loss — Total Hail [^{F3} specified] Regions before diversification	Total of the specified gross Hail loss for the 9 [^{F3} specified] regions.
C0330/R1630–R1710	Catastrophe Risk Charge Factor before risk mitigation — [^{F3} specified] Region	The Risk Charge Factor per each of the 9 [^{F3} specified] regions for Hail according to the Standard Formula, taking into consideration the

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments have no effect on the effect of diversification effect between zones. (See end of Document for details) legislation.gov.uk. Details of relevant amending instruments can be found on their websites.

C0330/R1720	Catastrophe Risk Charge Factor before risk mitigation — Total Hail [^{F3} specified] Regions before diversification	Ratio between total specified gross loss and total exposure.
C0340/R1630–R1710	Scenario A or B — [^{F3} specified] Region	The larger of the capital requirement for Hail risk in each of the 9 [^{F3} specified] regions according to scenario A or scenario B. When determining the largest amount of scenario A and B, the risk mitigation effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, must be taken into account.
C0350/R1630–R1710	Catastrophe Risk Charge before risk mitigation — [^{F3} specified] Region	Capital requirement before risk mitigation arising from Hails in each of the 9 [^{F3} specified] Regions corresponding to the larger of scenario A or B.
C0350/R1720	Catastrophe Risk Charge before risk mitigation — Total Hail [^{F3} specified] Regions before diversification	Total of the capital requirement before risk mitigation arising from Hails for the 9 [^{F3} specified] regions.
C0350/R1910	Catastrophe Risk Charge before risk mitigation — Total Hail Other Regions before diversification	The capital requirement before risk mitigation for Hail risk in regions other than the [^{F3} specified] Regions. It is the amount of the instantaneous loss, without deduction of the amounts recoverable from reinsurance contracts and Special Purpose Vehicles.
C0350/R1920	Catastrophe Risk Charge before risk mitigation — Total Hail All Regions before diversification	Total of the capital requirement before risk mitigation arising from Hails for all regions.
C0350/R1930	Catastrophe Risk Charge before risk mitigation —	Diversification effect arising from the aggregation of the Hail risks relating to

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1005). These amendments affect the different regions (both between regions and other regions). Details of relevant amendments can be found on their web site. (See end of Document for details)

		the different regions (both between regions and other regions).
C0350/R1940	Catastrophe Risk Charge before risk mitigation — Total Hail after diversification	This is the total capital requirement before risk mitigation for Hail risk, taking into consideration the diversification effect given in C0350/R1930.
C0360/R1630–R1710	Estimated Risk Mitigation — [F ³ specified] Region	Per each of the 9 [F ³ specified] Regions the estimated risk mitigation effect, corresponding to the selected scenario, of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, excluding the estimated reinstatement premiums.
C0360/R1720	Estimated Risk Mitigation — Total Hail [F ³ specified] Region before diversification	Total of the estimated risk mitigation for the 9 [F ³ specified] regions.
C0360/R1910	Estimated Risk Mitigation — Total Hail Other Regions before diversification	For all the regions other than the [F ³ specified] Regions, the estimated risk mitigation effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, excluding the estimated reinstatement premiums.
C0360/R1820	Estimated Risk Mitigation — Total Hail All Regions before diversification	Total of the estimated risk mitigation for all regions.
C0370/R1630–R1710	Estimated Reinstatement Premiums — [F ³ specified] Region	Per each of the 9 [F ³ specified] Regions the estimated reinstatement premiums, corresponding to the selected scenario, as a result of the group's specific reinsurance contracts and special purpose vehicles relating to this peril.
C0370/R1720	Estimated Reinstatement Premiums — Total Hail [F ³ specified] Regions before diversification	Total of the estimated reinstatement premiums for the 9 [F ³ specified] regions.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C0370/R1910	Estimated Reinstatement Premiums — Total Hail	For all the regions other than the [F ³ specified] Regions,
	Other Regions before diversification	the estimated reinstatement premiums, as a result of the group's specific reinsurance contracts and special purpose vehicles relating to this peril.
C0370/R1920	Estimated Reinstatement Premiums — Total Hail All Regions before diversification	Total of the estimated reinstatement premiums for all regions.
C0380/R1630–R1710	Catastrophe Risk Charge after risk mitigation — [F ³ specified] Region	Capital requirement, after the deduction of the risk mitigating effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, arising from Hail in each of the 9 [F ³ specified] Regions, corresponding to the selected scenario.
C0380/R1720	Catastrophe Risk Charge after risk mitigation — Total Hail [F ³ specified] Regions before diversification	Total of the capital requirement, after the deduction of the risk mitigating effect of the group's specific reinsurance contracts and special purpose vehicles for the 9 [F ³ specified] regions.
C0380/R1910	Catastrophe Risk Charge after risk mitigation — Total Hail Other Regions before diversification	Capital requirement after risk mitigation for Hail risk in regions other than the [F ³ specified] Regions. It is the amount of the instantaneous loss, including the deduction of the amounts recoverable from reinsurance contracts and Special Purpose Vehicles.
C0380/R1920	Catastrophe Risk Charge after risk mitigation — Total Hail All Regions before diversification	Total of the capital requirement, after the deduction of the risk mitigating effect of the group's specific reinsurance contracts and special purpose vehicles for all regions.
C0380/R1930	Catastrophe Risk Charge after risk mitigation — Diversification effect between regions	Diversification effect arising from the aggregation of the capital requirement after risk mitigations for Hail

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments relate to the different risks relating to the different regions (both I specified legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (See end of Document for details)

		Regions and Other regions).
C0380/R1940	Catastrophe Risk Charge after risk mitigation — Total Hail after diversification	This is the total capital requirement after risk mitigation for Hail risk, taking into consideration the diversification effect given in C0380/R1930.
Natural catastrophe risk — Subsidence		
C0390/R1950	Estimation of the gross premium to be earned — Total Subsidence before diversification	An estimate of the premiums to be earned, by the insurance or reinsurance group, during the following year, for the contract in relation to the obligations of fire and other damage, including the proportional reinsurance obligations. Premiums shall be gross, without deduction of premiums for reinsurance contracts, and in relation to the territory of France.
C0400/R1950	Exposure — Total Subsidence before diversification	The sum of the total insured made up of the geographical divisions of the territory of France for fire and other damage, including the proportional reinsurance obligations, which are sufficiently homogeneous in relation to the subsidence risk that the insurance and reinsurance groups are exposed to in relation to the territory. Together the zones shall comprise the whole territory.
C0410/R1950	Specified Gross Loss — Total Subsidence before diversification	[^{F3} Specified gross subsidence loss, before taking into consideration the effect of diversification effect between zones.]
C0420/R1950	Catastrophe Risk Charge Factor before risk mitigation — Total Subsidence before diversification	[^{F3} The Risk Charge Factor of the territory of France for subsidence, before taking into consideration the effect of

		liability risks.
C0970/R2800	Estimated Total Risk Mitigation — Total before diversification	This is the estimated total risk mitigation, before diversification effect between types of cover, for liability risks.
C0980/R2800	Catastrophe Risk Charge Liability after risk mitigation — Total before diversification	This is the total capital requirement after risk mitigation, before diversification effect between types of cover, for liability risks.
C0980/R2810	Catastrophe Risk Charge Liability after risk mitigation — Diversification between type of cover	Diversification effect arising from the aggregation of the total capital charges after risk mitigation relating to different type of covers for liability risks.
C0980/R2820	Catastrophe Risk Charge Liability after risk mitigation — Total after diversification	This is the total capital requirement after risk mitigation, after diversification effect between the types of covers, for liability risks.
Man-made catastrophe risk — Credit & Suretyship		
C0990/R2900–R2910	Exposure (individual or group) — Largest exposure	Two largest gross credit insurance exposures of the insurance or reinsurance group based on a comparison of the net loss-given-default of the credit insurance exposures, being the loss-given-default after deduction of the amounts recoverable from reinsurance contracts and special purpose vehicles.
C0990/R2920	Exposure (individual or group) — Total	Total of the two largest gross credit insurance exposures of the insurance or reinsurance group based on a comparison of the net loss-given-default of the credit insurance exposures, being the loss-given-default after deduction of the amounts recoverable from reinsurance contracts and special purpose vehicles.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C1000/R2900-R2910	Proportion of damage caused by scenario — Largest exposure	Percentage representing the loss given default of the gross credit exposure without deduction of the amounts recoverable from reinsurance contracts and special purpose vehicles, for each of the two largest gross credit insurance exposures of the insurance or reinsurance group.
C1000/R2920	Proportion of damage caused by scenario — Total	Average loss given default of the two largest gross credit exposures without deduction of the amounts recoverable from reinsurance contracts and special purpose vehicles.
C1010/R2900–R2910	Catastrophe Risk Charge Credit & Suretyship before risk mitigation — Large Credit Default –Largest exposure	This is the capital requirement before risk mitigation, per largest exposure, arising from the Large Credit Default scenario of Credit & Suretyship risks.
C1010/R2920	Catastrophe Risk Charge Credit & Suretyship before risk mitigation — Large Credit Default — Total	This is the total capital requirement before risk mitigation arising from the Large Credit Default scenario of Credit & Suretyship risks.
C1020/R2900–R2910	Estimated Risk Mitigation — Largest exposure	The estimated risk mitigation effect, per largest exposure, of the group's specific reinsurance contracts and special purpose vehicles relating to risks arising from the Large Credit Default scenario of Credit & Suretyship, excluding the estimated reinstatement premiums.
C1020/R2920	Estimated Risk Mitigation — Total	The estimated risk mitigation effect, for the two largest exposures, of the group's specific reinsurance contracts and special purpose vehicles relating to risks arising from the Large Credit Default scenario of Credit & Suretyship, excluding the estimated reinstatement premiums.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C1030/R2900-R2910	Estimated Reinstatement Premiums — Largest exposure	The estimated reinstatement premiums, per largest exposure, as a result of the group's specific reinsurance contracts and special purpose vehicles relating to risks arising from the Large Credit Default scenario of Credit & Suretyship.
C1030/R2920	Estimated Reinstatement Premiums — Total	The estimated reinstatement premiums, for the two largest exposures, as a result of the group's specific reinsurance contracts and special purpose vehicles relating to risks arising from the Large Credit Default scenario of Credit & Suretyship.
C1040/R2900–R2910	Catastrophe Risk Charge Credit & Suretyship after risk mitigation — Large Credit Default — Largest exposure	Net capital requirement, per largest exposure, after the deduction of the risk mitigating effect of the group's specific retrocession contracts and special purpose vehicles, relating to risks arising from the Large Credit Default scenario of Credit & Suretyship.
C1040/R2920	Catastrophe Risk Charge Credit & Suretyship after risk mitigation — Large Credit Default — Total	The total capital requirement after risk mitigation, after the deduction of the risk mitigating effect of the group's specific retrocession contracts and special purpose vehicles, relating to risks arising from the Large Credit Default scenario of Credit & Suretyship.
C1050/R3000	Earned premium following 12 months	Gross premiums earned by the insurance or reinsurance group, during the following 12 months, in lines of business Credit and Suretyship insurance including proportional reinsurance obligations.
C1060/R3000	Catastrophe Risk Charge Credit & Suretyship before risk mitigation — Recession Risk	This is the total capital requirement before risk mitigation for the Recession

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are available on legislation.gov.uk. Details of relevant amending instruments can be found on their website. (See end of Document for details)

C1070/R3000	Estimated Risk Mitigation	The estimated risk mitigation effect of the group's specific retrocession contracts and special purpose vehicles relating to risks arising from the Recession scenario of Credit & Suretyship, excluding the estimated reinstatement premiums.
C1080/R3000	Estimated Reinstatement Premiums	The estimated reinstatement premiums as a result of the group's specific reinsurance contracts and special purpose vehicles relating to risks arising from the Recession scenario of Credit & Suretyship.
C1090/R3000	Catastrophe Risk Charge Credit & Suretyship after risk mitigation — Recession Risk	The total capital requirement after risk mitigation, after the deduction of the risk mitigating effect of the group's specific retrocession contracts and special purpose vehicles, relating to risks arising from the Recession scenario of Credit & Suretyship.
C1100/R3100	Catastrophe Risk Charge Credit & Suretyship before risk mitigation — Total before diversification	This is the total capital requirement before risk mitigation, before diversification effect between types of events, for Credit & Suretyship risks.
C1100/R3110	Catastrophe Risk Charge Credit & Suretyship before risk mitigation — Diversification between type of event	Diversification effect arising from the aggregation of the total capital charges before risk mitigation relating to different type of events for Credit & Suretyship risks.
C1100/R3120	Catastrophe Risk Charge Credit & Suretyship before risk mitigation — Total after diversification	This is the total capital requirement before risk mitigation, after diversification effect between the types of events, for Credit & Suretyship risks.

Status: Point in time view as at 31/12/2020.

C1510/R4100–R4410	Catastrophe Risk Charge before risk mitigation — Countries	Capital requirement before risk mitigation, for each of the countries identified, arising from the health sub-module pandemic.
C1550	Other countries to be considered in the Pandemic	Identify the ISO code of other countries to be considered in the Concentration accident.
C1420/R4420	Income protection — Number of insured persons — Total Pandemic all countries	Total number of insured persons for all countries identified covered by the income protection insurance or reinsurance obligations other than workers' compensation insurance or reinsurance obligations.
C1430/R4420	Income protection — Total pandemic exposure — Total Pandemic all countries	The total of all income protection pandemic exposure for all countries identified of insurance and reinsurance groups. The value of the benefits payable for the insured person shall be the sum insured or where the insurance contract provides for recurring benefit payments the best estimate of the benefit payments assuming that the insured person is permanently disabled and will not recover.
C1510/R4420	Catastrophe Risk Charge before risk mitigation — Total Pandemic all countries	This is the total capital requirement before risk mitigation for the health sub-module pandemic for all countries identified.
C1520/R4420	Estimated Risk Mitigation — Total Pandemic all countries	The total estimated risk mitigation effect of the group's specific reinsurance contracts and special purpose vehicles relating to this peril, excluding the estimated reinstatement premiums for all countries identified.

Status: Point in time view as at 31/12/2020.		
Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs 12-23, Sch Pt 2. These amendments are available on legislation.gov.uk . Details of relevant amending instruments can be found on their website/s. (See end of Document for details)		
C1590/R4420	Estimated Reinstatement Premiums — Total Pandemic all countries	The total estimated reinstatement premiums as a result of the group's specific reinsurance contracts and special purpose vehicles relating to this peril for all countries identified.
C1540/R4420	Catastrophe Risk Charge after risk mitigation — Total Pandemic all countries	The total capital requirement after risk mitigation for the health sub-module pandemic for all countries identified.

S.31.01 — Share of reinsurers (including Finite Reinsurance and SPV's)

General comments:

This section relates to annual submission of information for groups.

This template shall be filled by the insurance and reinsurance groups where a recoverable is recognised by related insurance undertakings in relation to the EEA or Non-EEA-reinsurer which is not in the scope of the group (even if all contracts with that reinsurer have terminated) and whose reinsurer is reducing the gross technical provisions as per end of the reporting year.

The template collects information on reinsurers and not on separate treaties. All ceded technical provisions, including those ceded under Finite reinsurance (as defined in S.30.03 Column C0060 of Annex II), shall be completed. This also means that if an SPV or a syndicate of Lloyd's acts as a reinsurer the SPV or the syndicate must be listed.

	ITEM	INSTRUCTIONS
C0010	Legal name of reinsured undertaking	Name of reinsured entity, identifying the cedent (re)insurance undertaking. This item is only applicable to groups.
C0020	Identification code of the undertaking	Identification code of the undertaking, using the following priority: <ul style="list-style-type: none"> — Legal Entity Identifier (LEI) — Specific code When the undertaking uses the option 'Specific code' the following shall be considered: <ul style="list-style-type: none"> — For EEA (re) insurance undertakings within the scope of group supervision: identification code used in the local market, attributed

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. -------	-----------------	---

S.31.02 — Special Purpose Vehicles

General comments:

This section relates to annual submission of information for groups.

This template is relevant for each group transferring risk(s) to a Special Purpose Vehicle (SPV), to ensure sufficient disclosure has been made where SPVs are used as alternative risk transfer methods to traditional reinsurance treaties.

The template applies to the use of:

- e) SPVs defined under Article 13 (26) and authorised under Article 211 (1) of Directive 2009/138/EC;
- f) SPVs meeting conditions of Article 211 (3) of Directive 2009/138/EC;
- g) SPVs regulated by third country supervisors where these meet equivalent measures to the conditions set out in Article 211 (2) of Directive 2009/138/EC;
- h) Other SPVs, not meeting the definitions above, where risks are transferred under arrangements with the economic substance of a reinsurance contract.

The template covers risk mitigation techniques (recognised or not) carried out by the (re)insurance undertaking within the scope of group supervision whereby a SPV assumes risks from the undertaking within the scope of group supervision through a reinsurance contract; or assume insurance risks from the undertaking within the scope of group supervision transferred through a similar arrangement that is 'reinsurance like'.

This template shall include data of special purpose vehicles to which the participating insurance or reinsurance undertaking or one of its insurance or reinsurance subsidiaries has transferred risk.

	ITEM	INSTRUCTIONS
C0010	Name of reinsured undertaking	Identify the legal name of the reinsured undertaking, identifying the cedent (re)insurance undertaking within the scope of group supervision.
C0020	Identification code of the undertaking	Identification code by this order of priority: — Legal Entity Identifier (LEI); — Specific code

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not automatically incorporated into this legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

		— Multiple ECAI]
C0290	Credit quality step	<p>Identify the credit quality step attributed to the SPV. The credit quality step shall reflect any readjustments to the credit quality made internally by the group.</p> <p>[^{F12}One of the options in the following closed list shall be used:</p> <ul style="list-style-type: none"> 0 — Credit quality step 0 1 — Credit quality step 1 2 — Credit quality step 2 3 — Credit quality step 3 4 — Credit quality step 4 5 — Credit quality step 5 6 — Credit quality step 6 9 — No rating available]
C0300	Internal rating	<p>Internal rating of the SPV for groups using internal model to the extent that the internal ratings are used in their internal modelling. If an internal model group is using solely external ratings this item shall not be reported.</p>

S.32.01 — Undertakings in the scope of the group

General comments:

This section relates to opening and annual submission of information for groups.

This template is relevant under method 1 as defined in Article 230 of Directive 2009/138/EC, method 2 as defined in Article 233 of the Directive 2009/138/EC and a combination of methods. It is a list of all undertakings in the scope of the group in the meaning of Article 212(1)(c) of Directive 2009/138/EC, including the participating insurance and reinsurance undertakings, insurance holding companies, mixed financial holding companies or mixed activity insurance holding company.

- Cells C0010 to C0080 are related to the identification of the undertaking;
- Cells C0090 to C0170 are related to ranking criteria (in the group reporting currency);
- Cells C0180 to C0230 are related to criteria of influence;

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date.

Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation

Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

— Cells C0240 and C0250 are related to the inclusion in the scope of group supervision; (EU Exit) Regulation (EU) 2015/2450, reg. 2, (c) and (d).
 — Cell C0260 is related to group solvency calculation.
 — Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

	ITEM	INSTRUCTIONS
C0010	Country	Identify the ISO 3166–1 alpha–2 code of the country in which the registered head office of each undertaking within the scope of the group, in the meaning of Article 212(1)(c) of Directive 2009/138/EC, is located
C0020	Identification code of the undertaking	Identification code by this order of priority: <ul style="list-style-type: none"> — Legal Entity Identifier (LEI); — Specific code Specific code: <ul style="list-style-type: none"> — For EEA insurance and reinsurance undertakings and other EEA regulated undertakings within the scope of the group, in the meaning of Article 212(1)(c) of Directive 2009/138/EC: identification code used in the local market, attributed by the undertaking's competent supervisory authority; — For non–EEA undertakings and non–regulated undertakings within the scope of the group, in the meaning of Article 212(1)(c) of Directive 2009/138/EC, identification code will be provided by the group. When allocating an identification code

		2 — Notional (for non-regulated undertakings) 3 — No capital requirement
C0060	Notional SCR or Sectoral capital requirement	The capital requirement, either sectoral or notional, that triggers first intervention by individual supervisor, assuming a so-called intervention ladder.
C0070	Notional MCR or Sectoral minimum capital requirement	Minimum capital requirement, either sectoral or notional, that triggers final intervention, assuming a so-called intervention ladder where available. This item is not requested for entities for which a final trigger level is not set.
C0080	Notional or Sectoral Eligible Own Funds	Total own funds to cover the (notional or sectoral) capital requirement. No restrictions on availability for the group apply.

S.35.01 — Contribution to group Technical Provisions

General comments:

This section relates to annual submission of information for groups.

The information to be reported between C0050 to C0210 shall be after the volatility adjustment, the matching adjustment and interest rate transitional is applied. The transitional deduction to technical provisions is reported separately in C0220 and C0230.

This template is relevant under method 1 as defined in Article 230 of Directive 2009/138/EC, method 2 as defined in Article 233 of the Directive 2009/138/EC and a combination of methods.

Related insurance and reinsurance undertakings which are not subsidiaries are excluded from the scope of this template since they are assessed through the adjusted equity method.

Pt. 2. These amendments (C0050) subject to matching adjustment. (See end of Document for details)</p>		
		The cell shall be filled in with amounts gross of reinsurance and IGT, including intra-group reinsurance.

S.36.01 — IGT — Equity-type transactions, debt and asset transfer

General comments:

This section relates to annual submission of information for groups.

The purpose of this template is to collect information on all (significant, very significant and transactions required to be reported in all circumstances) IGTs related to equity, debt, reciprocal financing and asset transfers related transactions within a group identified according to Article 213(2)(a) to (c) of Directive 2009/138/EC. These include, but are not limited to:

- equity and other capital items including participations in related entities and transfer shares of related entities of the group;
- debt including bonds, loans, collateralised debt, and other transactions of similar nature e.g. with periodic pre-determined interest or coupon or premium payments for a pre-determined period of time.
- other asset transfer such as transfer of properties and transfer of shares of other companies unrelated (i.e. outside) to the group.

[^{F10}.....]

This template shall include IGTs that were:

- in-force at the start of the reporting period.
- incepted during the reporting period and outstanding at the reporting date.
- incepted and expired/matured during the reporting period.

Where similar transactions with a related entity may be excluded from IGT reporting when considered individually against the thresholds for significant and very significant, these transactions must nevertheless be individually reported where collectively they are at or above the corresponding threshold values for significant or very significant IGTs.

Each transaction shall be reported separately.

Any additions / top-ups to significant IGTs shall be reported as a separate IGT, even if the top-up in its own right falls below the significant threshold limit. For example, if an undertaking increases the initial loan amount to another related undertaking the addition to the loan should be recorded as a separate item with its issue date as the date of the top-up.

Where the transaction value is different for two transacting parties (e.g. a EUR 10 m transaction between A and B where A records EUR 10 m but B only receive EUR 9,5 m because of transactions costs, of say EUR 0,5 m has been expensed) the template shall record the maximum amount as the transaction amount, in this case EUR 10 m.

Where there is a chain of related IGTs (say A invests in B and B invests in C), each link of the chain needs to be reported as a separate IGT.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not group solvency calculation through legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

		<p>method 1</p> <p>— Third country insurance, reinsurance, insurance holding companies and mixed financial holding companies included in the group solvency calculation through method 2 based in non-equivalent regimes</p> <p>Collateral arrangement between other types of undertakings, e.g. IGTs between two credit institutions within a group, may be valued in accordance with the sectoral rules.</p>
C0160	Amount of redemption/prepayments/ paybacks during reporting period	Amount of total redemptions/prepayments/paybacks during the reporting period if applicable, reported in the reporting currency of the group.
C0170	Amount of dividends/ interest/ coupon and other payments made during reporting period	<p>This cell shall capture any payments made in relation to the IGTs recorded in this template for the reporting period (12 months up to the reporting date).</p> <p>This includes, but not limited to:</p> <p>— Dividends for the current year including paid or declared but unpaid dividends.</p> <p>— Any deferred dividends from previous years paid during the reporting period (i.e. any deferred dividends paid that impacted the P&L for the reporting period).</p>

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not Interest payments made in relation to debt instruments. legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

		<p>— Any other payments made in relation to the IGTs that are reported in this template, e.g. charges on asset transfers.</p> <p>— Amount of total tops-ups if applicable, i.e. total additional money invested during the reporting period such as a additional payments on partly paid shares or increasing loan amount during the period (when reporting tops-ups as a separate item).</p> <p>This amount shall be reported in the reporting currency of the group.</p>
C0180	Balance of contractual amount of transaction at reporting date	Outstanding amount of the transaction at the reporting date if applicable e.g. for debt issue, reported in the reporting currency of the group. If there has been a full early settlement/prepayment, the balance of contractual amount will be zero.
C0190	Coupon/ Interest rate	The interest or coupon rate as a percentage, if applicable. For variable interest rate, this shall include the reference rate and the interest rate above it.

S.36.02 — IGT — Derivatives

General comments:

This section relates to annual submission of information for groups.

This template shall report all IGTs between entities in scope of group supervision according to Article 213 (2) (a) to (c) of Directive 2009/138/EC, irrespective of the choice of calculation

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (Higher Hierarchical Instruments) Regulations 2017, or by other instruments made by the Prudential Regulation Authority. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

[^{F10}.....]

This template shall include IGTs that were:

- in-force at the start of the reporting period.
- incepted during the reporting period and outstanding at the reporting date.
- incepted and expired/matured during the reporting period.

Where similar transactions with a related entity may be excluded from IGT reporting when considered individually against the thresholds for significant and very significant, these transactions must nevertheless be reported individually where collectively, they are at or above the corresponding threshold values for significant or very significant IGTs.

Each transaction shall be reported separately.

Any additions / top-ups to significant IGTs shall be reported as a separate IGT, even if the top-up in its own right falls below the significant threshold limit. For example, if an undertaking increases the initial loan amount to another related undertaking the addition to the loan should be recorded as a separate item with its issue date as the date of the top-up.

Where the transaction value is different for two transacting parties (e.g. a EUR 10 m transaction between A and B where A records EUR 10 m but B only receive EUR 9,5 m because of transactions costs, of say EUR 0,5m has been expensed) the template should record the maximum amount as the transaction amount, in this case EUR 10 m.

Where there is a chain of related IGTs (say A invests in B and B invests in C), each link of the chain needs to be reported as a separate IGT.

	ITEM	INSTRUCTIONS
C0010	ID of intragroup transaction	Unique internal identification code for each intragroup transaction. Must be consistent over time.
C0020	Investor/ Buyer name	Name of the entity that is investing/buying the derivative, or the counterparty with the long position. For swaps the payer is the payer of the fixed rate that receives the floating rate.
C0030	Identification code of the investor / buyer	The unique identification code attached to the investor/ buyer/transferee by this order of priority: <ul style="list-style-type: none"> — Legal Entity Identifier (LEI); — Specific code Specific code: <ul style="list-style-type: none"> — For EEA insurance and reinsurance undertakings

S.36.03 — IGT — Internal reinsurance

General comments:

This section relates to annual submission of information for groups.

The purpose of this template is to collect information on all IGTs (significant, very significant and transactions required to be reported in all circumstances) related to internal reinsurance within a group identified according to Article 213(2)(a) to (c) of Directive 2009/138/EC. These include, but not limited to:

- reinsurance treaties between related undertakings of a group;
- facultative reinsurance between related undertakings of a group; and
- any other transaction that results in transferring underwriting risk (insurance risk) between related undertakings of a group..

[^{F10}.....]

This template shall include IGTs that were:

- in–force at the start of the reporting period.
- incepted during the reporting period and outstanding at the reporting date.
- incepted and expired/matured during the reporting period.

Where similar transactions with a related entity may be excluded from IGT reporting when considered individually against the thresholds for significant and very significant, these transactions must nevertheless be individually reported where collectively they are at or above the corresponding threshold values for significant or very significant IGTs.

Each transaction shall be reported separately. Undertakings shall report as many rows as needed to properly identify the transaction, including if different types of reinsurance contracts/ treaties are used.

Any additions / top–ups to significant IGTs shall be reported as a separate IGT, even if the top–up in its own right falls below the significant threshold limit. For example, if an undertaking increases the initial loan amount to another related undertaking the addition to the loan should be recorded as a separate item with its issue date as the date of the top–up.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

Where the transaction value is different for two transacting parties (e.g. EUR 10 m transaction between A and B where A records EUR 10 m but B only records EUR 0,5 m because of transactions costs, of say EUR 0,5 m has been expensed) the template should record the maximum amount as the transaction amount, in this case EUR 10 m.

Where there is a chain of related IGTs (say A invests in B and B invests in C), each link of the chain needs to be reported as a separate IGT.

	ITEM	INSTRUCTIONS
C0010	ID of intragroup transaction	Unique internal identification code for each intragroup transaction. Must be consistent over time.

C0060	Identification code of reinsurer	<p>The unique identification code attached to the investor/buyer/transferee by this order of priority: — Legal Entity Identifier (LEI); — Specific code Specific code: — For EEA insurance and reinsurance undertakings and other EEA regulated undertakings within the scope of the group, in</p>

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not the amendments on legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of Document for details)

		<p>(c) of Directive 2009/138/EC: identification code used in the local market, attributed by the undertaking's competent supervisory authority;</p> <p>— For non-EEA undertakings and non-regulated undertakings within the scope of the group, in the meaning of Article 212(1) (c) of Directive 2009/138/EC, identification code will be provided by the group. When allocating an identification code to each non-EEA or non-regulated undertaking, the group should comply with the following format in a consistent manner:</p> <p>identification code of the parent undertaking + ISO 3166-1 alpha-2 code of the country of the undertaking + 5 digits</p>
C0070	ID code type of code of the reinsurer	<p>Identification of the code used in item 'Identification code for the reinsurer':</p> <p>1 — LEI</p> <p>2 — Specific code</p>
C0080	Validity period (start date)	Identify the ISO 8601 (yyyy-mm-dd) code of the date of commencement of the specific reinsurance contract/treaty.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

C0090	Validity period (expiry date)	Identify the ISO 8604 (yyyy-mm-dd) code of the
		expiry date of the specific reinsurance contract/treaty (i.e. the last date the specific reinsurance contract/treaty is in force). This item is not reported if there is no expiry date (for example, contract is continuous and ends by one of the parties giving notice).
C0100	Currency of contract/treaty	Identify the ISO 4217 alphabetic code of the currency of payments for the specific reinsurance contract/treaty.
C0110	Type of reinsurance contract/treaty	Identify the type of reinsurance contract/treaty. The following close list shall be used: <ul style="list-style-type: none"> 1 — quota share 2 — variable quota share 3 — surplus 4 — excess of loss (per event and per risk) 5 — excess of loss (per risk) 6 — excess of loss (per event) 7 — excess of loss 'back-up' (protection against follow-on events which certain catastrophes can cause such as flooding or fire) 8 — excess of loss with basis risk 9 — reinstatement cover 10 — aggregate excess of loss 11 — unlimited excess of loss 12 — stop loss 13 — other proportional treaties

Status: Point in time view as at 31/12/2020.		
<p>Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. S.36.04 — IGT — Cost Sharing, contingent liabilities, off BS and other items

General comments:

This section relates to annual submission of information for groups.

The purpose of this template is to collect information on all other IGTs (significant, very significant and transactions required to be reported in all circumstances) which have not been captured in 36.01 to 36.03 templates within a group identified according to Article 213(2)(a) to (c) of Directive 2009/138/EC. These include, but not limited to:

- Internal cost sharing;
- Contingent liabilities (other than derivatives);
- Off balance sheet guarantees;
- Any other transactions between related undertakings or natural persons in scope of the group supervision.

[^{F10}]

This template shall include IGTs that were:

- in–force at the start of the reporting period.
- incepted during the reporting period and outstanding at the reporting date.
- incepted and expired/matured during the reporting period.

Where similar transactions with a related entity may be excluded from IGT reporting when considered individually against the thresholds for significant and very significant, these transactions must nevertheless be individually reported where collectively they are at or above the corresponding threshold values for significant or very significant IGTs.

Each transaction shall be reported separately.

Any additions / top–ups to significant IGTs shall be reported as a separate IGT, even if the top–up in its own right falls below the significant threshold limit. For example, if an undertaking increases the initial loan amount to another related undertaking the addition to the loan should be recorded as a separate item with its issue date as the date of the top–up.

Where the transaction value is different for two transacting parties (e.g. a EUR 10 m transaction between A and B where A records EUR 10 m but B only receive EUR 9,5 m because of transactions costs, of say EUR 0,5 m has been expensed) the template should record the maximum amount as the transaction amount, in this case EUR 10 m.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations. (See end of Document for details) **Where there is a chain of related IGTs (say, A invests in B and B invests in C), each link of the chain needs to be reported as a separate IGT. Links can be found on their website/s. (See end of Document for details)**

	ITEM	INSTRUCTIONS
C0010	ID of intragroup transaction	Unique internal identification code for each intragroup transaction. Must be consistent over time.
C0020	Investor/ Buyer/ Beneficiary name	Legal name of the entity that is purchasing/investing in the asset/investment or receiving the service/guarantee.
C0030	Identification code of the Investor/ Buyer/ Beneficiary	The unique identification code attached to the investor/ buyer/transferee by this order of priority: <ul style="list-style-type: none"> — Legal Entity Identifier (LEI); — Specific code Specific code: <ul style="list-style-type: none"> — For EEA insurance and reinsurance undertakings and other EEA regulated undertakings within the scope of the group, in the meaning of Article 212(1) (c) of Directive 2009/138/EC: identification code used in the local market, attributed by the undertaking's competent supervisory authority; — For non-EEA undertakings and non-regulated undertakings within the scope of the group, in the meaning of Article 212(1) (c) of Directive 2009/138/EC, identification code will be provided

C0090	Transaction Issue date	Identify the ISO 8601 (yyyy-mm-dd) code of the date when the transaction/issue takes effect.
C0100	Effective date of agreement/contract underlying transaction	Where applicable, Identify the ISO 8601 (yyyy-mm-dd) code of the date when the transaction or contract underlying the transactions takes effect if different from the transaction date. If same as the transaction date, the transaction date is to be reported.
C0110	Expiry date of agreement / contract underlying transaction	Where applicable, identify the ISO 8601 (yyyy-mm-dd) code of the date when the agreement/contract ceases. If the expiry date is perpetual use '9999-12-31'.
C0120	Currency of transaction	Identify the ISO 4217 alphabetic code of the currency in which the transaction took place.
C0130	Trigger event	Where applicable, brief description of event that would trigger the transaction/payment/liability/none e.g. event that would result in a contingent liability occurring.
C0140	Value of transaction/collateral /Guarantee	Value of the transaction, collateral pledged or contingent liability recognised on the Solvency II balance sheet. This item is to be reported in the reporting currency of the group. All items shall be reported on Solvency II value. However where Solvency II value is not available (e.g. non-EEA operations under method 2 in equivalent regimes or banks and credit institutions) then the local or sectoral valuation rules should be used.
C0150	Maximum possible value of contingent liabilities	Maximum possible value, if possible, regardless of their

Status: Point in time view as at 31/12/2020.

		<p>contingent liability over the lifetime of that contingent liability, discounted at the relevant risk-free interest rate term structure) of contingent liabilities included in Solvency II Balance Sheet.</p>
<p>C0160</p>	<p>Maximum possible value of contingent liabilities not included in Solvency II Balance Sheet</p>	<p>Enter the maximum amount of the contingent liability, for those not included in the Solvency II Balance Sheet, that could be due from the Provider. This item is to be reported in the reporting currency of the group.</p>
<p>C0170</p>	<p>Maximum value of letters of credit/guarantees</p>	<p>Sum of all possible cash flows if events triggering guarantees were all to happen in relation to guarantees provided by the ‘provider’ (cell C0050) to the ‘beneficiary’ (Cell C0020) to guarantee the payment of the liabilities due by the undertaking (includes letter of credit, undrawn committed borrowing facilities). This item shall not include amounts already reported under C0150 and C0160.</p>
<p>C0180</p>	<p>Value of guaranteed assets</p>	<p>Value of the guaranteed asset for which the guarantees are received. Other local/sectoral valuation principles than Solvency II ones may be relevant in this case.</p>

S.37.01 — Risk concentration

General comments:

This section relates to annual submission of information for groups.

This template shall include all significant risk concentrations between entities in scope of group supervision and third parties, irrespective of the choice of calculation method or whether sectoral solvency rules have been used for the purposes of the group solvency calculation.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

The aim is to list the most important exposures (value of the exposure) by counterparty and by type of exposure (group or an entity) outside the scope of the reinsurer's group (maximum exposure per contract and if a reinsurer fails; off balance sheet risk concentration). It can be understood as the maximum possible exposure on a contractual basis and not necessarily be reflected on the balance sheet, but not taking into account any risk mitigation instruments or techniques. Thresholds can be fixed by the group supervisor after consulting the group itself and the college.

	ITEM	INSTRUCTIONS
C0010	Name of the external counterparty	This is the name of the external counterparty of the group.
C0020	Identification code of the counterparty of the Group	The Legal Entity Identifier (LEI) attached to the investor/buyer/transferee if existent. If none is available this item shall not be reported.
C0030	ID code type of the counterparty of the Group	Identification of the code used in item 'Identification code of the counterparty of the Group': 1 — LEI 9 — None
C0040	Country of the exposure	Identify the ISO Code (3166–1 alpha–2) of country from which the exposure comes from. If there is an issuer of for example a bond, this is the country where the headquarter of the entity issuing the bond is located.
C0050	Nature of exposure	Description of the type of exposure. Derivatives and collaterals are also to be included as well as exposures to sovereign counterparties. If there is more than one type of exposure per counterparty, separate entries have to be reported in separate rows. The following closed list shall be used:: 1 — Assets — bonds 2 — Assets — equity 3 — Assets — reinsurance

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are not currently available on legislation.gov.uk. Details of relevant amending instruments can be found on their website/s. (See end of document for details)

		<p>4 — Assets — others</p> <p>5 — Liabilities — insurance</p> <p>6 — Liabilities — loans</p> <p>7 — Liabilities — debts</p> <p>8 — Liabilities — others</p> <p>9 — Off-balance-sheet (contingent asset)</p> <p>10 — Off-balance-sheet (contingent liability)</p> <p>Derivatives shall be reported net of collateral.</p>
C0060	Identification code of the exposure	<p>Exposure ID code using the following priority:</p> <ul style="list-style-type: none"> — ISO 6166 code of ISIN when available — Other recognised codes (e.g.: CUSIP, Bloomberg Ticker, Reuters RIC) — Code attributed by the undertaking, when the options above are not available. This code must be consistent over time. <p>For exposures types 3 and 5 of C0050 reporting should be done by the counterparty and this cell should not be reported.</p>
C0070	Identification code type of the exposure	<p>Type of ID Code used for the 'Asset ID Code' item. One of the options in the following closed list shall be used:</p> <ul style="list-style-type: none"> 1 — ISO 6166 for ISIN code 2 — CUSIP (The Committee on Uniform Securities Identification Procedures number assigned by the CUSIP Service)

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. ANNEX VI **U.K.**

DEFINITIONS OF THE CIC TABLE

[^{F3} First 2 positions — Assets listed in		Definition
Country	ISO 3166-1-alpha-2 country code	Identify the ISO 3166-1-alpha-2 country code where the asset is listed in. An asset is considered as being listed if it is negotiated on a regulated market or on a multilateral trading facility, as defined by Directive 2014/65/EU. If the asset is listed in more than one country or the undertaking uses for valuation purposes a price provider which is one of the regulated markets or multilateral trading facility where the asset is listed in, the country shall be the one of that regulated market or multilateral trading facility used as the reference for valuation purposes.
XV	Assets listed in one or more than one country	Identify assets that are listed in one or more countries but when the undertaking uses for valuation purposes a price provider which is not one of the regulated markets or multilateral trading facility where the asset is listed in.
XL	Assets that are not listed in a stock exchange	Identify assets that are not negotiated on a regulated market or on a multilateral

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments have been incorporated into the legislation.gov.uk. Details of relevant amending instruments can be found on their website. **Trading facility as defined by Directive 2014/65/EU** (for details)

XT	Assets that are not exchange tradable	Identify assets that by their nature are not subject to negotiation on a regulated market or on a multilateral trading facility, as defined by Directive 2014/65/EU.]
Third and fourth position — Category		Definition
1	Government bonds	Bonds issued by public authorities, whether by central governments supra-national government institutions, regional governments or local authorities local authorities and bonds that are fully, unconditionally and irrevocably guaranteed by the European Central Bank, Member States' central government and central banks denominated and funded in the domestic currency of that central government and the central bank, multilateral development banks referred to in paragraph 2 of Article 117 of Regulation (EU) No 575/2013 or international organisations referred to in Article 118 of Regulation (EU) No 575/2013, where the guarantee meets the requirements set out in Article 215 of Delegated Regulation 2015/35. Regarding bonds with a qualifying guarantee, the third and fourth position shall be attributed by reference to the entity providing the guarantee.
11	Central Government bonds	Bonds issued by central governments
12	Supra-national bonds	[^{F1} Bonds issued by public institutions established by a commitment between national states, e.g.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments issued by the multilateral development bank referred to in paragraph 2 of Article 117 of Regulation (EU) No 575/2013 or issued by the international organisation referred to in Article 118 of Regulation (EU) No 575/2013] legislation.gov.uk. Details of relevant amending instruments can be found on their websites (see the details)

		to in paragraph 2 of Article 117 of Regulation (EU) No 575/2013 or issued by the international organisation referred to in Article 118 of Regulation (EU) No 575/2013]
13	Regional government bonds	Regional government or autonomous communities debt instruments offered to the public in a public offering on the capital market
14	Local authorities bonds	Bonds issued by local authorities, including cities, provinces, districts and other municipal authorities
15	Treasury bonds	Short term government bonds, issued by central governments (issued with a maturity term up to 1 year)
16	Covered bonds	Government bonds which have a pool of assets that secures or 'covers' the bond. Those assets remain on the issuer balance sheet.
17	National Central banks	Bonds issued by national central banks
19	Other	Other government bonds, not classified under the above categories
2	Corporate bonds	Bonds issued by corporations
21	Corporate bonds	Bonds issued by corporations, with simple characteristics, usually covering the ones referred to as 'plain vanilla', and that don't have any special feature described in the categories 22 to 28
22	Convertible bonds	Corporate bonds that the holder can convert into shares of common stock in the issuing company or cash of equal value, having debt and equity-like features

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.)

23	Commercial paper	Unsecured short-term debt instrument issued by a
		corporation, typically for the financing of accounts receivable, inventories and meeting short-term liabilities, usually with original maturity lesser than 270 days.
24	Money market instruments	[^{F1} Very short term debt securities (usually with maturities ranging from 1 day up to 1 year), consisting mainly of negotiable certificates of deposit (CDs), bankers acceptances and other highly liquid instruments. Commercial Paper is excluded from this category.]
25	Hybrid bonds	Corporate bonds that have debt and equity-like features, but are not convertible.
26	Common covered bonds	Corporate bonds which have a pool of assets that secures or 'covers' the bond. Those assets remain on the issuer balance sheet. Covered bonds subject to specific law are excluded from this category
27	Covered bonds subject to specific law	Corporate bonds which have a pool of assets that secures or 'covers' the bond if the originator becomes insolvent and are subject by law to special public supervision designed to protect bondholders, as defined in Article 22(4) of Directive 2009/65/CE. An example of this category is Pfandbrief: 'Covered bonds which are issued on the basis of the Pfandbrief Act. They are used to refinance loans for which collateral is furnished in the form of loans secured by real estate liens (Mortgage Pfandbriefe), public-sector loans (Public Pfandbriefe),

Status: Point in time view as at 31/12/2020.

		<p>Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details) EUR 2015 No. 2450 may be subject to amendment by EU Exit Instruments made by the Prudential Regulation Authority under powers set out in The Financial Regulators' Powers (Technical Standards etc.) (Amendment etc.) (EU Exit) Regulations 2018 (S.I. 2018/1115), regs. 2, 3, Sch. Pt. 2. These amendments are available on www.legislation.gov.uk. Details of relevant amending instruments can be found on their websites. (Ship mortgages (Ship mortgages (Aircraft Pfandbriefe) or aircraft Pfandbriefe) details)</p>
		<p>mortgages (Aircraft Pfandbriefe). Thus, the distinction made between these Pfandbrief types refers to the cover pool created for each type of Pfandbrief.'</p>
28	Subordinated bonds	Corporate bonds which have a lower priority than other bonds of the issuer in case of liquidation.
29	Other	Other corporate bonds, with other characteristics than the ones identified in the above categories
3	Equity	Shares and other securities equivalent to shares representing corporations' capital, i.e., representing ownership in a corporation
31	Common equity	Equity that represents basic property rights on corporations
32	Equity of real estate related corporation	Equity representing capital from real estate related corporations
33	Equity rights	Rights to subscribe to additional shares of equity at a set price
34	Preferred equity	Equity security that is senior to common equity, having a higher claim on the assets and earnings than common equity, but is subordinate to bonds
39	Other	Other equity, not classified under the above categories
4	Collective Investment Undertakings	Collective investment undertaking' means an undertaking for collective investment in transferable securities (UCITS) as defined in Article 1(2) of Directive 2009/65/EC of the European Parliament and of the Council or an alternative investment

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2015/2450 is up to date with all changes known to be in force on or before 18 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations.
