

Commission Implementing Regulation (EU) 2015/2452 of 2 December 2015 laying down implementing technical standards with regard to the procedures, formats and templates of the solvency and financial condition report in accordance with Directive 2009/138/EC of the European Parliament and of the Council (Text with EEA relevance)

COMMISSION IMPLEMENTING REGULATION (EU) 2015/2452

of 2 December 2015

laying down implementing technical standards with regard to the procedures, formats and templates of the solvency and financial condition report in accordance with Directive 2009/138/EC of the European Parliament and of the Council

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Directive 2009/138/EC of 25 November 2009 of the European Parliament and of the Council on the taking-up and pursuit of the business of Insurance and Reinsurance (Solvency II)⁽¹⁾, and in particular the fourth paragraph of Article 56 and Article 256(5) thereof,

Whereas:

- (1) The harmonised disclosure requirements on quantitative information included in the solvency and financial condition report should be assured by the application of a prescribed set of disclosure templates, which allow for an improved understanding of the information being disclosed to the public, especially for comparison across time and across different undertakings. The application of templates should also assure the equal treatment of insurance and reinsurance undertakings and should improve the understanding of disclosures performed by groups.
- (2) When insurance and reinsurance undertakings, participating insurance and reinsurance undertakings, insurance holding companies or mixed financial holding companies are authorised to publish a single solvency and financial condition report they should disclose separately, as part of their report, the information specified in this Regulation for individual undertakings for each insurance and reinsurance subsidiary covered by that report and the information prescribed for groups.
- (3) To ensure the consistent use of the means of disclosure, the relevant provisions on means of disclosure of Commission Delegated Regulation (EU) 2015/35⁽²⁾ should apply to the disclosure of group and single solvency and financial condition reports.
- (4) Insurance and reinsurance undertakings and groups should only disclose the information applicable for their business. For example, certain options provided for by Directive 2009/138/EC, like the use of the matching adjustment for the calculation of the technical provisions or the use of a full or partial internal model or of underwriting-

specific parameters for the calculation of the solvency capital requirement, affect the scope of the information to be disclosed. In most cases, only a subset of the templates provided for in this Regulation should be disclosed, as not all the templates are applicable for all undertakings.

- (5) The provisions in this Regulation are closely linked to each other, since they deal with the procedures and templates for the disclosure of the solvency and financial condition report. To ensure coherence between those provisions, which should enter into force at the same time, and to facilitate a comprehensive view and access to them by persons subject to those obligations, including investors that are non-Union residents, it is desirable to include all the implementing technical standards required by Article 56 and 256(5) of Directive 2009/138/EC in a single Regulation.
- (6) This Regulation is based on the draft implementing technical standards submitted by the European Insurance and Occupational Pensions Authority to the Commission.
- (7) The European Insurance and Occupational Pensions Authority has conducted open public consultations on the draft implementing technical standards on which this Regulation is based, analysed the potential related costs and benefits and requested the opinion of the Insurance and Reinsurance Stakeholder Group established in accordance with Article 37 of Regulation (EU) No 1094/2010 of the European Parliament and of the Council⁽³⁾,

HAS ADOPTED THIS REGULATION:

S.12.01 — Life and Health SLT Technical Provisions

General comments:

This section relates to annual disclosure of information for individual entities.

Undertakings may apply appropriate approximations in the calculation of the technical provisions as referred to in Article 21 of Delegated Regulation (EU) 2015/35. In addition, Article 59 of the Delegated Regulation (EU) 2015/35 may be applied to calculate the risk margin during the financial year.

Line of Business for life obligations: The lines of business, referred to in Article 80 of the Directive 2009/138/EC, as defined in the Annex I of Delegated Regulation (EU) 2015/35. The segmentation shall reflect the nature of the risks underlying the contract (substance), rather than the legal form of the contract (form). By default, where an insurance or reinsurance contract covers risks across the lines of business undertakings shall, where possible, unbundled the obligations into the appropriate lines of business (Article 55 of Delegated Regulation (EU) 2015/35).

Status: This is the original version (as it was originally adopted).

Lines of business ‘Index–linked and unit–linked insurance’, ‘Other life insurance’ and ‘Health insurance’ are split between ‘Contracts without options and guarantees’ and ‘Contracts with options or guarantees’. For this split the following should be considered:

- ‘Contracts without options and guarantees’ should include the amounts related to contracts without any financial guarantees or contractual options, meaning that the technical provision calculation does not reflect the amount of any financial guarantees or contractual options.
- Contracts with non–material contractual options or financial guarantees that are not reflected in the technical provisions calculation should also be disclosed in this column;
- ‘Contracts with options or guarantees’ should include contracts that have either financial guarantees, contractual options, or both as far as the technical provision calculation reflect the existence of those financial guarantees or contractual options.

The information disclosed should be gross of reinsurance as information on Recoverables from reinsurance/SPV and Finite reinsurance is requested in specific rows.

The information to be disclosed between R0010 and R0100 shall be after the volatility adjustment, the matching adjustment and the transitional adjustment to the relevant risk-free interest rate term structure if applied but shall not include the transitional deduction to technical provisions. The amount of transitional deduction to technical provisions is requested separately between rows R0110 and R0130.

S.19.01. — Non–life insurance claims

This section relates to annual disclosure of information for individual entities.

Claims development triangles show the insurer's estimate of the cost of claims (claims paid and claims provisions under Solvency II valuation principle) and how this estimate develops over time.

Undertakings are required to disclose data on an accident year or underwriting year basis, in accordance with any requirements of the National Supervisory Authority. If the National Supervisory Authority has not stipulated which to use then the undertaking may use accident or underwriting year according to how they manage each line of business, provided that they use the same year consistently, year on year.

This template shall be disclosed for the total for non–life business but split by underwriting year and accident year if different bases are used by the undertaking.

The default length of run–off triangle is 10+1 years but the disclosure requirement is based on the undertakings' claims development (if length of the claims settlement cycle is shorter than 10 years, undertakings are required to disclose according to the internal shorter development).

Historical data, starting from the first time application of Solvency II, are required for claims paid (i.e. the complete set shall be disclosed,) but not for Best Estimate of Claims Provision. For the compilation of the historical data for claims paid the same approach concerning the length of triangle for the on–going disclosure will be applied (i.e. the shorter between 10+1 years and the undertakings' claims settlement cycle).
