REGULATION (EU) 2016/1011 OF THE EUROPEAN
PARLIAMENT AND OF THE COUNCIL

of 8 June 2016

on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 114 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Central Bank⁽¹⁾,

Having regard to the opinion of the European Economic and Social Committee⁽²⁾,

Acting in accordance with the ordinary legislative procedure⁽³⁾,

Whereas:

- (1) The pricing of many financial instruments and financial contracts depends on the accuracy and integrity of benchmarks. Serious cases of manipulation of interest rate benchmarks such as LIBOR and EURIBOR, as well as allegations that energy, oil and foreign exchange benchmarks have been manipulated, demonstrate that benchmarks can be subject to conflicts of interest. The use of discretion, and weak governance regimes, increase the vulnerability of benchmarks to manipulation. Failures in, or doubts about, the accuracy and integrity of indices used as benchmarks can undermine market confidence, cause losses to consumers and investors and distort the real economy. It is therefore necessary to ensure the accuracy, robustness and integrity of benchmarks and of the benchmark determination process.
- (2) Directive 2014/65/EU of the European Parliament and of the Council⁽⁴⁾ contains certain requirements with respect to the reliability of benchmarks used to price a listed financial instrument. Directive 2003/71/EC of the European Parliament and of the Council⁽⁵⁾ contains certain requirements on benchmarks used by issuers. Directive 2009/65/EC of the European Parliament and of the Council⁽⁶⁾ contains certain requirements on the

use of benchmarks by undertakings for collective investment in transferable securities (UCITS). Regulation (EU) No 1227/2011 of the European Parliament and of the Council⁽⁷⁾ contains certain provisions which prohibit the manipulation of benchmarks that are used for wholesale energy products. However, those legislative acts only cover certain aspects of certain benchmarks and they neither address all the vulnerabilities in the provision of all benchmarks, nor do they cover all uses of financial benchmarks in the financial industry.

- (3) Benchmarks are vital in pricing cross-border transactions, thereby facilitating the effective functioning of the internal market in a wide variety of financial instruments and services. Many benchmarks used as reference rates in financial contracts, in particular mortgages, are provided in one Member State but used by credit institutions and consumers in other Member States. In addition, such credit institutions often hedge their risks or obtain funding for granting those financial contracts in the cross-border interbank market. Only a few Member States have adopted national rules on benchmarks, but their respective legal frameworks on benchmarks already show divergences regarding aspects such as the scope of application. In addition, the International Organisation of Securities Commissions (IOSCO) agreed principles on financial benchmarks on 17 July 2013 ('IOSCO principles for financial benchmarks'), Principles for Oil Price Reporting Agencies on 5 October 2012 ('IOSCO principles for PRAs') (together, 'the IOSCO principles'), and since those principles provide a certain flexibility as to their exact scope and means of implementation, Member States are likely to adopt rules at national level which would implement such principles in a divergent manner.
- (4) Those divergent approaches would result in fragmentation of the internal market since administrators and users of benchmarks would be subject to different rules in different Member States. Thus, benchmarks provided in one Member State could be prevented from being used in other Member States. In the absence of a harmonised framework to ensure the accuracy and integrity of benchmarks used in financial instruments and financial contracts, or in order to measure the performance of investment funds, in the Union it is therefore likely that differences in Member States' laws will create obstacles to the smooth functioning of the internal market for the provision of benchmarks.
- (5) Union consumer protection rules do not cover the particular issue of adequate information on benchmarks in financial contracts. As a result of consumer complaints and litigation relating to the use of benchmarks in several Member States, it is likely that divergent measures, inspired by legitimate concerns of consumer protection, would be adopted at national level, which could result in fragmentation of the internal market due to the divergent conditions of competition attached to different levels of consumer protection.
- (6) Therefore, in order to ensure the proper functioning of the internal market and improve the conditions of its functioning, in particular with regard to financial markets, and to ensure a high level of consumer and investor protection, it is appropriate to lay down a regulatory framework for benchmarks at Union level.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- (7) It is appropriate and necessary for that framework to take the form of a regulation in order to ensure that provisions directly imposing obligations on persons involved in the provision, contribution and use of benchmarks are applied in a uniform manner throughout the Union. Since a legal framework for the provision of benchmarks necessarily involves measures specifying precise requirements concerning aspects inherent to such provision of benchmarks, even small divergences on the approach taken regarding one of those aspects could lead to significant impediments in the cross-border provision of benchmarks. Therefore, the use of a regulation, which is directly applicable, should reduce the possibility of divergent measures being taken at national level, and should ensure a consistent approach and greater legal certainty, and prevent the appearance of significant impediments in the cross-border provision of benchmarks.
- (8) The scope of this Regulation should be as broad as necessary to create a preventive regulatory framework. The provision of benchmarks involves discretion in their determination and is inherently subject to certain types of conflicts of interest, which implies the existence of opportunities and incentives to manipulate benchmarks. Such risk factors are common to all benchmarks and should be made subject to adequate governance and control requirements. The degree of risk, however, varies, and the approach adopted should therefore be tailored to the particular circumstances. Since the vulnerability and importance of a benchmark varies over time, restricting the scope by reference to indices that are currently important or vulnerable would not address the risks that any benchmark poses in the future. In particular, benchmarks that are currently not widely used could be used more in the future with the result that, in their regard, even a minor manipulation could have a significant impact.
- (9) The critical determinant of the scope of this Regulation should be whether the output value of the benchmark determines the value of a financial instrument or a financial contract, or measures the performance of an investment fund. Therefore, the scope should not be dependent on the nature of the input data. Benchmarks calculated from economic input data, such as share prices and non-economic numbers, or values such as weather parameters should thus be included. The framework provided for in this Regulation should also acknowledge the existence of a large number of benchmarks and the different impact that they have on financial stability and the real economy. This Regulation should also provide for a proportionate response to the risks that different benchmarks pose. This Regulation should therefore cover benchmarks which are used to price financial instruments listed or traded on regulated venues.
- (10) A large number of consumers are parties to financial contracts, in particular consumer credit agreements secured by mortgages, that reference benchmarks that are subject to the same risks. This Regulation should therefore cover credit agreements as defined in Directives 2008/48/EC⁽⁸⁾ and 2014/17/EU of the European Parliament and of the Council⁽⁹⁾.
- (11) Many investment indices involve significant conflicts of interest and are used to measure the performance of a fund such as a UCITS fund. Some of those benchmarks are published and others are made available, for free or upon payment of a fee, to the public or a section of the public and their manipulation can adversely affect investors.

This Regulation should therefore cover indices or reference rates that are used to measure the performance of an investment fund.

- (12) All contributors of input data to benchmarks can exercise discretion and are potentially subject to conflicts of interest, and so risk being a source of manipulation. Contributing to a benchmark is a voluntary activity. If any initiative requires contributors to significantly change their business models, they could cease to contribute. However, for entities already subject to regulation and supervision, requiring good governance and control systems is not expected to lead to substantial costs or disproportionate administrative burden. Therefore this Regulation imposes certain obligations on supervised contributors. When a benchmark is determined on the basis of readily available data, the source of such data should not be considered to be a contributor.
- (13) Financial benchmarks are not only used in the issuance and manufacturing of financial instruments and contracts. The financial industry also relies on benchmarks for measuring the performance of investment funds for the purpose of return tracking or of determining the asset allocation of a portfolio or of computing the performance fees. A given benchmark can be used either directly as a reference for financial instruments and financial contracts or to measure the performance of investment funds, or indirectly within a combination of benchmarks. In the latter case, the setting and review of the weights to be assigned to various indices within a combination for the purpose of determining the pay-out or the value of a financial instrument or a financial contract or measuring the performance of an investment fund also amounts to use as such an activity does not involve discretion, in contrast to the activity of provision of benchmarks. The holding of financial instruments referencing a certain benchmark is not considered to be use of the benchmark.
- (14) Central banks already meet principles, standards and procedures which ensure that they exercise their activities with integrity and in an independent manner. It is therefore not necessary that central banks be subject to this Regulation. When central banks provide benchmarks, especially where those benchmarks are intended for transaction purposes, it is their responsibility to set appropriate internal procedures in order to ensure the accuracy, integrity, reliability and independence of those benchmarks, in particular with respect to transparency in governance and computation methodology.
- (15) Furthermore, public authorities, including national statistics agencies, should not be subject to this Regulation where they contribute data to, provide or have control over the provision of, benchmarks for public policy purposes, including measures of employment, economic activity, and inflation.
- (16) An administrator is the natural or legal person that has control over the provision of a benchmark and in particular administers the arrangements for determining the benchmark, collects and analyses the input data, determines the benchmark and publishes it. An administrator should be able to outsource to a third party one or more of those functions, including the calculation or publication of the benchmark, or other relevant services and activities in the provision of the benchmark. However, where a person merely publishes or refers to a benchmark as part of that person's journalistic

- activities but does not have control over the provision of that benchmark, that person should not be subject to the requirements imposed on administrators by this Regulation.
- (17) An index is calculated using a formula or some other methodology on the basis of underlying values. There exists a degree of discretion in constructing the formula, performing the necessary calculation and determining the input data which creates a risk of manipulation. Therefore, all benchmarks sharing that characteristic of discretion should be covered by this Regulation.
- (18) However, where a single price or value is used as a reference to a financial instrument, for example where the price of a single security is the reference price for an option or future, there is no calculation, input data or discretion. Therefore single price or single value reference prices should not be considered to be benchmarks for the purposes of this Regulation.
- (19) Reference prices or settlement prices produced by central counterparties (CCPs) should not be considered to be benchmarks because they are used to determine settlement, margins and risk management and thus do not determine the amount payable under a financial instrument or the value of a financial instrument.
- (20) The provision of borrowing rates by creditors should not be considered to be benchmark provision for the purposes of this Regulation. A borrowing rate provided by a creditor is either set by an internal decision or calculated as a spread or mark-up over an index (e.g. EURIBOR). In the first case, the creditor is exempt from this Regulation for activity concerning financial contracts entered into by that creditor with its own clients, while in the latter case the creditor is considered to be only a user of a benchmark.
- (21) In order to ensure the integrity of benchmarks, benchmark administrators should be required to implement adequate governance arrangements to control conflicts of interest and to safeguard confidence in the integrity of benchmarks. Even where effectively managed, most administrators are subject to some conflicts of interest and could have to make judgements and decisions which affect a diverse group of stakeholders. It is therefore important that administrators have in place a function that operates with integrity to oversee the implementation and effectiveness of the governance arrangements that provide effective oversight.
- (22) The manipulation or unreliability of benchmarks can cause damage to investors and consumers. Therefore, this Regulation should set out a framework for retention of records by administrators and contributors as well as for providing transparency about a benchmark's purpose and methodology which facilitates a more efficient and fairer resolution of potential claims in accordance with national or Union law.
- (23) Auditing and the effective enforcement of this Regulation requires *ex post* analysis and evidence. This Regulation should therefore set out requirements for adequate record-keeping by benchmark administrators relating to the calculation of the benchmark for a sufficient period of time. The reality that a benchmark intends to measure and the environment in which it is measured are likely to change over time. Therefore it is necessary that the process and methodology of the provision of benchmarks are reviewed on a periodic basis to identify shortcomings and possible improvements.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. Many stakeholders can be impacted by failures in the provision of the benchmark and can help identify such shortcomings. This Regulation should therefore set out a framework for the establishment of a complaints handling mechanism by benchmark administrators to enable stakeholders to notify the benchmark administrator of complaints and ensure that the benchmark administrator objectively evaluates the merits of any complaint.

- (24) The provision of benchmarks frequently involves the outsourcing of important functions such as calculating the benchmark, gathering input data and disseminating the benchmark. In order to ensure the effectiveness of the governance arrangements, it is necessary to ensure that any such outsourcing does not relieve benchmark administrators of any of their obligations and responsibilities, and is done in such a way that it does not interfere with either the administrators' ability to meet their obligations or responsibilities, or the relevant competent authority's ability to supervise them.
- (25) The benchmark administrator is the central recipient of input data and is able to evaluate the integrity and accuracy of input data on a consistent basis. It is therefore necessary that this Regulation requires administrators to take certain measures where an administrator considers that input data does not represent the market or economic reality that a benchmark intends to measure, comprising measures to change the input data, the contributors or the methodology or else to cease providing that benchmark. Furthermore, an administrator should, as part of its control framework, establish measures to monitor, where feasible, input data prior to the publication of the benchmark and to validate input data after publication, including comparing that data against historical patterns where applicable.
- (26) Any discretion that can be exercised in providing input data creates an opportunity to manipulate a benchmark. Where the input data is transaction-based data, there is less discretion and therefore the opportunity to manipulate the data is reduced. As a general rule, benchmark administrators should therefore use actual transaction-based input data where possible but other data can be used in those cases where the transaction data is insufficient or inappropriate to ensure the integrity and accuracy of the benchmark.
- (27) The accuracy and reliability of a benchmark in measuring the economic reality it is intended to measure depends on the methodology and input data used. It is therefore necessary to adopt a transparent methodology that ensures the benchmark's reliability and accuracy. Such transparency does not mean the publication of the formula applied for the determination of a given benchmark, but rather the disclosure of elements sufficient to allow stakeholders to understand how the benchmark is derived and to assess its representativeness, relevance and appropriateness for its intended use.
- (28) It could become necessary to change the methodology to ensure the continued accuracy of the benchmark, but any changes in the methodology have an impact on users and stakeholders of the benchmark. It is therefore necessary to specify the procedures to be followed when changing the benchmark methodology, including the need for consultation, so that users and stakeholders can take the necessary action in light of those changes or notify the administrator if they have concerns about those changes.

- (29) Employees of the administrator can identify possible infringements of this Regulation or potential vulnerabilities that could lead to manipulation or attempted manipulation. This Regulation should therefore put in place a framework to enable employees to alert administrators confidentially of possible infringements of this Regulation.
- (30) The integrity and accuracy of benchmarks depends on the integrity and accuracy of the input data provided by contributors. It is essential that the obligations of contributors in respect of such input data are clearly specified, that compliance with those obligations can be relied upon, and that the obligations are consistent with the benchmark administrator's controls and methodology. It is therefore necessary that the benchmark administrator produces a code of conduct to specify those requirements and the contributor's responsibilities concerning the provision of input data. The administrator should be satisfied that contributors adhere to the code of conduct. Where contributors are located in third countries, the administrator should be satisfied to the extent possible.
- (31) Contributors are potentially subject to conflicts of interest and are able to exercise discretion in the determination of input data. Therefore, it is necessary for contributors to be subject to governance arrangements in order to ensure that those conflicts are managed and that the input data is accurate, conforms to the administrator's requirements and can be validated.
- (32) Many benchmarks are determined by the application of a formula using input data that is provided by the following entities: a trading venue, an approved publication arrangement, a consolidated tape provider, an approved reporting mechanism, an energy exchange or an emission allowance auction platform. In some situations, data collection is outsourced to a service provider that receives the data entirely and directly from those entities. In those cases, existing regulation and supervision ensure the integrity and transparency of the input data and provide for governance requirements and procedures for the notification of infringements. Therefore, those benchmarks are less vulnerable to manipulation, are subject to independent verifications, and the relevant administrators are accordingly released from certain obligations set out in this Regulation.
- (33) Different types of benchmarks and different benchmark sectors have different characteristics, vulnerabilities and risks. The provisions of this Regulation should be further specified for particular benchmark sectors and types. Interest rate benchmarks are benchmarks that play an important role in the transmission of monetary policy and so it is necessary to introduce specific provisions in this Regulation for such benchmarks.
- (34) Physical commodities markets have unique characteristics which should be taken into account. Commodity benchmarks are widely used and can have sector-specific characteristics, so it is necessary to introduce specific provisions in this Regulation for such benchmarks. Certain commodity benchmarks are exempt from this Regulation but would need to nevertheless respect the relevant IOSCO principles. Commodity benchmarks can become critical since the regime is not limited to benchmarks based on submissions by contributors which are in majority supervised entities. For critical commodity benchmarks subject to Annex II, the requirements of this Regulation regarding mandatory contribution and colleges are not applicable.

- (35) The failure of critical benchmarks can impact market integrity, financial stability, consumers, the real economy, or the financing of households and businesses in Member States. Those potentially destabilising effects of the failure of a critical benchmark could be felt in a single Member State or in more than one. It is therefore necessary that this Regulation provides for a process to determine those benchmarks that should be considered to be critical benchmarks and that additional requirements apply to ensure the integrity and robustness of such benchmarks.
- (36) Critical benchmarks can be determined using a quantitative criterion or a combination of quantitative and qualitative criteria. In addition, in cases where a benchmark does not meet the appropriate quantitative threshold, it could nonetheless be recognised as critical where the benchmark has no or very few market-led substitutes and its existence and accuracy are relevant for market integrity, financial stability or consumer protection in one or more Member States, and where all the relevant competent authorities agree that such a benchmark should be recognised as critical. In the event of disagreement between the relevant competent authorities, the decision of the competent authority of the administrator on whether such a benchmark should be recognised as critical should prevail. In such a case, the European Securities and Markets Authority (ESMA), established by Regulation (EU) No 1095/2010 of the European Parliament and of the Council⁽¹⁰⁾, should be able to publish an opinion on the assessment made by the competent authority of the administrator. Furthermore, a competent authority can also designate a benchmark as critical based on certain qualitative criteria where the administrator and the majority of the contributors to the benchmark are located in its Member State. All critical benchmarks should be included in a list established by a way of an implementing act by the Commission, which should be reviewed and updated regularly.
- (37) The cessation of the administration of a critical benchmark by an administrator could render financial contracts or financial instruments invalid, cause losses to consumers and investors, and impact financial stability. It is therefore necessary to include a power for the relevant competent authority to require mandatory administration of a critical benchmark in order to preserve the existence of the benchmark in question. In the event of insolvency proceedings of a benchmark administrator, the competent authority should provide an assessment for the consideration of the relevant judicial authority of whether and how the critical benchmark could be transitioned to a new administrator or could cease to be provided.
- (38) Without prejudice to the application of Union competition law and the ability of Member States to take measures to facilitate compliance with it, it is necessary to require administrators of critical benchmarks, including critical commodity benchmarks, to take adequate steps to ensure that licences of, and information on, benchmarks are provided on a fair, reasonable, transparent and non-discriminatory basis to all users.
- (39) Contributors that cease to contribute input data to critical benchmarks can undermine the credibility of such benchmarks, as the capability of such benchmarks to measure the underlying market or economic reality would as a result be impaired. It is therefore necessary to include a power for the relevant competent authority to require mandatory

contributions from supervised entities to critical benchmarks in order to preserve the credibility of the benchmark in question. Mandatory contribution of input data is not intended to impose an obligation on supervised entities to enter into, or to commit to entering into, transactions.

- (40) Due to the existence of a large variety of types and sizes of benchmarks, it is important to introduce proportionality in this Regulation and to avoid putting an excessive administrative burden on administrators of benchmarks the cessation of which poses less threat to the wider financial system. Thus, in addition to the regime for critical benchmarks, two distinct regimes should be introduced: one for significant benchmarks and one for non-significant benchmarks.
- (41) Administrators of significant benchmarks should be able to choose not to apply a limited number of detailed requirements of this Regulation. Competent authorities should, however, maintain the right to require the application of those requirements, based on criteria outlined in this Regulation. Delegated acts and implementing acts that apply to significant benchmark administrators should take due account of the principle of proportionality and aim to avoid administrative burden where possible.
- (42) Administrators of non-significant benchmarks are subject to a less detailed regime, whereby administrators should be able to choose not to apply some requirements of this Regulation. In such a case, the administrator in question should explain why it is appropriate not to do so in a compliance statement which should be published and provided to the administrator's competent authority. That competent authority should review the compliance statement and should be able to request additional information or require changes to ensure compliance with this Regulation. While non-significant benchmarks could still be vulnerable to manipulation, they are more easily substitutable, therefore transparency to users should be the main tool used for market participants to make informed choices about the benchmarks they consider appropriate for use. For that reason, the delegated acts in Title II should not apply to non-significant benchmark administrators.
- (43) In order for users of benchmarks to choose appropriately from among, and understand the risks of, benchmarks, they need to know what a given benchmark intends to measure and its susceptibility to manipulation. Therefore, the benchmark administrator should publish a benchmark statement specifying those elements. In order to ensure uniform application and that benchmark statements are of reasonable length but at the same time focus on providing the key information needed to users in an easily accessible manner, ESMA should provide further specification of the content of the benchmark statement, differentiating appropriately among the different types and specificities of benchmarks and their administrators.
- (44) This Regulation should take into account the IOSCO principles, which serve as global standards for regulatory requirements for benchmarks. As an overarching principle, in order to ensure investor protection, supervision and regulation in a third country should be equivalent to Union supervision and regulation of benchmarks. Therefore, benchmarks provided from that third country can be used by supervised entities in the Union where a positive decision on equivalence of the third- country regime has been

taken by the Commission. In such circumstances, competent authorities should enter into cooperation arrangements with supervisory authorities in third countries. ESMA should coordinate the development of such cooperation arrangements and the exchange between competent authorities of information received from third countries. However, in order to avoid any adverse impact resulting from a possible abrupt cessation of the use in the Union of benchmarks provided from a third country, this Regulation also provides for certain other mechanisms (namely, recognition and endorsement) under which third-country benchmarks can be used by supervised entities located in the Union.

- (45) This Regulation introduces a process for the recognition of administrators located in a third country by the competent authority of the Member State of reference. Recognition should be granted to administrators complying with the requirements of this Regulation. Acknowledging the role of the IOSCO principles as a global standard for the provision of benchmarks, the competent authority of the Member State of reference should be able to grant recognition to administrators on the basis of them applying the IOSCO principles. To do so, the competent authority should assess the application of the IOSCO principles by a specific administrator and determine whether such application is equivalent, for the administrator in question, to compliance with the various requirements established in this Regulation, taking into account the specificities of the regime of recognition as compared to the equivalence regime.
- (46) This Regulation also introduces an endorsement regime allowing, under certain conditions, administrators or supervised entities located in the Union to endorse benchmarks provided from a third country in order for such benchmarks to be used in the Union. To do so, the competent authority should take into account whether, in providing the benchmark to be endorsed, compliance with the IOSCO principles would be equivalent to compliance with this Regulation, taking into account the specificities of the regime of endorsement as compared to the equivalence regime. An administrator or a supervised entity that has endorsed a benchmark provided from a third country should be fully responsible for such endorsed benchmarks and for the fulfilment of the relevant conditions referred to in this Regulation.
- (47) All benchmark administrators are able to exercise discretion, are potentially subject to conflicts of interest, and risk having inadequate governance and control systems in place. As administrators control the benchmark determination process, requiring authorisation or registration and supervision of administrators is the most effective way of ensuring the integrity of benchmarks.
- (48) Certain administrators should be authorised and supervised by the competent authority of the Member State where the administrator in question is located. Entities already subject to supervision and that provide financial benchmarks other than critical benchmarks should be registered and supervised by the competent authority for the purposes of this Regulation. Entities that provide only indices that qualify as non-significant benchmarks should also be registered by the relevant competent authority. Authorisation and registration should be distinct processes with authorisation requiring a more extensive assessment of the administrator's application. Whether an administrator is authorised or registered should not affect the supervision of that

administrator by the relevant competent authorities. Additionally, a transitional regime should be introduced, according to which persons providing benchmarks which are not critical and are not widely used in one or more Member States could be registered, with a view to facilitating the initial phase of application of this Regulation. ESMA should maintain at the Union level a register that contains information on authorised or registered administrators, on benchmarks and the administrators that provide those benchmarks by virtue of a positive decision under either the equivalence regime or the recognition regime, on Union administrators or supervised entities that have endorsed benchmarks from a third country, and on any such endorsed benchmarks and their administrators located in a third country.

- (49) In some circumstances a person provides an index but could be unaware that the index in question is being used as a reference for a financial instrument, a financial contract or an investment fund. That is particularly the case where the users and benchmark administrator are located in different Member States. It is therefore necessary to increase the level of transparency concerning which specific benchmark is being used. Such transparency can be achieved by improving the content of the prospectuses or key information documents required by Union law and the content of the notifications required by Regulation (EU) No 596/2014 of the European Parliament and of the Council⁽¹¹⁾.
- (50) A set of effective tools and powers and resources for the competent authorities of Member States guarantees supervisory effectiveness. This Regulation should therefore, in particular, provide for a minimum set of supervisory and investigative powers which should be entrusted to competent authorities of Member States in accordance with national law. When exercising their powers under this Regulation, competent authorities and ESMA should act objectively and impartially and remain autonomous in their decision-making.
- (51) For the purpose of detecting infringements of this Regulation, it is necessary for competent authorities to be able to access, in accordance with national law, the premises of legal persons in order to seize documents. Access to such premises is necessary when there is reasonable suspicion that documents and other data related to the subject-matter of an inspection or investigation exist and could be relevant to prove an infringement of this Regulation. Additionally, access to such premises is necessary where the person to whom a demand for information has already been made fails to comply with it, or where there are reasonable grounds for believing that if a demand were to be made, it would not be complied with, or that the documents or information to which the information requirement relates would be removed, tampered with or destroyed. If prior authorisation is needed from the judicial authority of the Member State concerned, in accordance with national law, access to premises should take place after having obtained that prior judicial authorisation.
- (52) Existing recordings of telephone conversations and data traffic records from supervised entities can constitute crucial, and sometimes the only, evidence to detect and prove the existence of infringements of this Regulation, in particular the compliance with governance and control requirements. Such records and recordings can help to verify

the identity of the person responsible for the submission of input data, those responsible for its approval and whether organisational separation of employees is maintained. Therefore, competent authorities should be able to require existing recordings of telephone conversations, electronic communications and data traffic records held by supervised entities, in those cases where a reasonable suspicion exists that such recordings or records related to the subject-matter of the inspection or investigation could be relevant to prove an infringement of this Regulation.

- (53) This Regulation respects the fundamental rights and observes the principles recognised in the Treaty on the Functioning of the European Union (TFEU) and in the Charter of Fundamental Rights of the European Union, in particular the right to respect for private and family life, the protection of personal data, the right to freedom of expression and information, the freedom to conduct a business, the right to property, the right to consumer protection, the right to an effective remedy, the right of defence. Accordingly, this Regulation should be interpreted and applied in accordance with those rights and principles.
- (54) The rights of defence of the persons concerned should be fully respected. In particular, persons subject to proceedings should be provided with access to the findings upon which the competent authorities has based the decision and should be given the right to be heard.
- (55) Transparency regarding benchmarks is necessary for reasons of financial market stability and investor protection. Any exchange or transmission of information by competent authorities should take place in accordance with the rules on the transfer of personal data laid down in Directive 95/46/EC of the European Parliament and of the Council⁽¹²⁾. Any exchange or transmission of information by ESMA should take place in accordance with the rules on the transfer of personal data laid down in Regulation (EC) No 45/2001 of the European Parliament and of the Council⁽¹³⁾.
- (56) Taking into consideration the principles set out in the Commission's Communication of 8 December 2010 on reinforcing sanctioning regimes in the financial services sector, and legal acts of the Union adopted as a follow-up to that Communication, Member States should, in order to ensure a common approach and deterrent effect, lay down rules on administrative sanctions and other administrative measures, including pecuniary sanctions, applicable to infringements of the provisions of this Regulation and should ensure that they are implemented. Those administrative sanctions and other administrative measures should be effective, proportionate and dissuasive.
- (57) Administrative sanctions and other administrative measures applied in specific cases should be determined taking into account, where appropriate, factors such as the repayment of any identified financial benefit, the gravity and duration of the infringement, any aggravating or mitigating factors, the need for administrative pecuniary sanctions to have a deterrent effect and, where appropriate, include a reduction in return for cooperation with the competent authority. In particular, the actual amount of administrative pecuniary sanctions to be imposed in a specific case should be able to reach the maximum level provided for in this Regulation, or the higher level provided for in national law, for very serious infringements, while

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. administrative pecuniary sanctions significantly lower than the maximum level should be able to be applied to minor infringements or in case of settlement. The possibility of imposing a temporary ban on the exercise of management functions within benchmark administrators or contributors should be available to the competent authority.

- (58) This Regulation should not limit the ability of Member States to provide for higher levels of administrative sanctions and should be without prejudice to any provisions in the law of Member States relating to criminal sanctions.
- (59) Even though nothing prevents Member States from laying down rules for administrative and criminal sanctions for the same infringement, Member States should not be required to lay down rules for administrative sanctions for the infringements of this Regulation which are subject to national criminal law. In accordance with national law, Member States are not obliged to impose both administrative and criminal sanctions for the same offence, but they should be able to do so if their national law so permits. However, the maintenance of criminal sanctions instead of administrative sanctions for infringements of this Regulation should not reduce or otherwise affect the ability of competent authorities to cooperate, access and exchange information in a timely way with competent authorities in other Member States for the purposes of this Regulation, including after any referral of the relevant infringements to the competent judicial authorities for criminal prosecution.
- (60) It is necessary to reinforce provisions on exchange of information between competent authorities and to strengthen the duties of assistance and cooperation which they owe to each other. Due to increasing cross-border activity, competent authorities should provide each other with the relevant information for the exercise of their function, so as to ensure the effective enforcement of this Regulation, including in situations where an infringement or suspected infringement is of concern to authorities in two or more Member States. When exchanging information, strict professional secrecy is needed to ensure the smooth transmission of that information and the protection of particular rights.
- (61) In order to ensure that decisions made by competent authorities to impose an administrative sanction or other administrative measure have a deterrent effect on the public at large, they should be published. The publication of decisions imposing an administrative sanction or other administrative measure is also an important tool for competent authorities to inform market participants of the type of behaviour that is considered to infringe this Regulation and to promote wider good behaviour amongst market participants. If such publication risks causing disproportionate damage to the persons involved, or jeopardises the stability of financial markets or an on-going investigation, the competent authority should either publish the administrative sanction or other administrative measure on an anonymous basis or delay the publication. In addition, competent authorities should have the option not to publish a decision imposing administrative sanctions or other administrative measures at all where anonymous or delayed publication is considered insufficient to ensure that the stability of financial markets is not jeopardised. Competent authorities are also not required to

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. publish administrative sanctions or other administrative measures which are deemed to be of a minor nature where publication would be disproportionate.

- (62) Critical benchmarks can involve contributors, administrators and users in more than one Member State. Thus, the cessation of the provision of such a benchmark or any events that can significantly undermine its integrity could have an impact in more than one Member State, meaning that the supervision of such a benchmark only by the competent authority of the Member State in which the administrator of the benchmark is located will not be efficient and effective in terms of addressing the risks that the critical benchmark poses. In such a case, in order to ensure the effective exchange of supervisory information among competent authorities and coordination of their activities and supervisory measures, colleges, comprising competent authorities and ESMA, should be formed. The activities of the colleges should contribute to the harmonised application of rules under this Regulation and to the convergence of supervisory practices. The competent authority of the administrator should establish written arrangements regarding the exchange of information, the decision-making process, which could include rules on voting procedures, any cooperation for the purposes of mandatory contribution measures, and the cases where the competent authorities should consult each other. ESMA's legally binding mediation is a key element of the achievement of coordination, supervisory consistency and convergence of supervisory practices.
- (63) Benchmarks can reference financial instruments and financial contracts that have a long duration. In certain cases, such benchmarks risk no longer being permitted to be provided once this Regulation comes into effect because they have characteristics that cannot be adjusted to conform to the requirements of this Regulation. At the same time, prohibiting the continued provision of such a benchmark could result in the termination or frustration of the financial instruments or financial contracts and so harm investors. It is therefore necessary to make provision to allow for the continued provision of such benchmarks for a transitional period.
- (64) In cases where this Regulation captures or potentially captures supervised entities and markets covered by Regulation (EU) No 1227/2011, the Agency for the Cooperation of Energy Regulators (ACER) would need to be consulted by ESMA in order to draw upon ACER's expertise in energy markets and to mitigate any dual regulation.
- (65) In order to specify further technical elements of this Regulation, the power to adopt acts in accordance with Article 290 of TFEU should be delegated to the Commission in respect of the specification of technical elements of definitions; in respect of the calculation of the nominal amounts of financial instruments, notional amount of derivatives and the net asset value of investment funds referencing a benchmark to determine whether such benchmark is critical; in respect of reviewing the calculation method used to determine the threshold for the determination of critical and significant benchmarks; in respect of establishing the objective reasons for the endorsement of a benchmark or family of benchmarks provided in a third country; in respect of establishing the elements to assess whether the cessation or the changing of an existing benchmark could reasonably result in a force majeure event, frustrate or otherwise

breach the terms of any financial contract or financial instrument, or the rules of any investment fund, which references such benchmark; and in respect of the extension of the 24-month period envisaged for the registration instead of authorisation of certain administrators. When adopting those acts, the Commission should take into account the market or technological developments and the international convergence of supervisory practice in relation to benchmarks, in particular the work of IOSCO. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level, and that those consultations be conducted in accordance with the principles laid down in the Interinstitutional Agreement between the European Parliament, the Council of the European Union and the European Commission on Better Law-Making⁽¹⁴⁾ of 13 April 2016. In particular, to ensure equal participation in the preparation of delegated acts, the European Parliament and the Council receive all documents at the same time as Member States' experts, and their experts systematically have access to meetings of Commission expert groups dealing with the preparation of delegated acts.

- (66) Technical standards should ensure consistent harmonisation of the requirements for the provision of and contribution to indices used as benchmarks and adequate protection of investors and consumers across the Union. As a body with highly specialised expertise, it would be efficient and appropriate to entrust ESMA with the elaboration of draft regulatory technical standards which do not involve policy choices for submission to the Commission. The Commission should adopt draft regulatory technical standards developed by ESMA by means of delegated acts pursuant to Article 290 TFEU and in accordance with Articles 10 to 14 of Regulation (EU) No 1095/2010, regarding the procedures and the characteristics of the oversight function; regarding how to ensure the appropriateness and the verifiability of the input data as well as the internal oversight and verification procedures of a contributor; regarding the information to be provided by an administrator about the benchmark and methodology; regarding the elements of the code of conduct; regarding the requirements concerning systems and controls; regarding the criteria that the competent authority should take into account when deciding whether to apply certain additional requirements; regarding the contents of the benchmark statement and the cases in which an update of such a statement is required; regarding the minimum content of the cooperation arrangements between the competent authorities and ESMA; regarding the form and content of the application for recognition of a third country administrator and presentation of the information that is to be provided with such an application; and regarding the information to be provided in the application for authorisation or registration.
- (67) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission to establish and review a list of public authorities in the Union, to establish and review the list of critical benchmarks, and to determine the equivalence of the legal framework to which providers of benchmarks of third countries are subject for the purposes of full or partial equivalence. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council⁽¹⁵⁾.

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- (68) The Commission should also be empowered to adopt implementing technical standards developed by ESMA establishing templates for the compliance statements, procedures and forms for exchange of information between competent authorities and ESMA, by means of implementing acts pursuant to Article 291 TFEU and in accordance with Article 15 of Regulation (EU) No 1095/2010.
- (69) Since the objectives of this Regulation, namely to lay down a consistent and effective regime to address the vulnerabilities that benchmarks pose, cannot be sufficiently achieved by the Member States, given that the overall impact of the problems relating to benchmarks can be fully perceived only in a Union context, but can rather, by reason of the scale and effects of this Regulation, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives.
- (70) Given the urgency of the need to restore confidence in benchmarks and promote fair and transparent financial markets, this Regulation should enter into force on the day following that of its publication.
- (71) Consumers are able to enter into financial contracts, in particular mortgages and consumer credit contracts, that reference a benchmark, but unequal bargaining power and the use of standard terms mean that they can have a limited choice about the benchmark used. It is therefore necessary to ensure that at least adequate information is provided by creditors or credit intermediaries to consumers. To that end, Directives 2008/48/EC and 2014/17/EU should therefore be amended accordingly.
- (72) Regulation (EU) No 596/2014 requires persons discharging managerial responsibilities, as well as persons closely associated with them, to notify the issuer and the competent authority of every transaction conducted on their own account relating to financial instruments that are themselves linked to shares and debt instruments of their issuer. However, there are a variety of financial instruments that are linked to shares and debt instruments of a given issuer. Such financial instruments include units in collective investment undertakings, structured products or financial instruments embedding a derivative that provides exposure to the performance of shares or debt instruments issued by an issuer. Every transaction in such financial instruments above a *de minimis* threshold should be subject to notification to the issuer and the competent authority. An exception should be made where either the linked financial instrument provides an exposure of 20 % or less to the issuer's shares or debt instruments, or the person discharging managerial responsibilities or person closely associated with them did not and could not know the investment composition of the linked financial instrument. Regulation (EU) No 596/2014 should therefore be amended,

TITLE II

BENCHMARK INTEGRITY AND RELIABILITY

CHAPTER 1

Governance of and control by administrators

Article 4

Governance and conflict of interest requirements

1 An administrator shall have in place robust governance arrangements which include a clear organisational structure with well-defined, transparent and consistent roles and responsibilities for all persons involved in the provision of a benchmark.

Administrators shall take adequate steps to identify and to prevent or manage conflicts of interest between themselves, including their managers, employees or any person directly or indirectly linked to them by control, and contributors or users, and to ensure that, where any judgement or discretion in the benchmark determination process is required, it is independently and honestly exercised.

2 The provision of a benchmark shall be operationally separated from any part of an administrator's business that may create an actual or potential conflict of interest.

3 Where a conflict of interest arises within an administrator due to the latter's ownership structure, controlling interests or other activities conducted by any entity owning or controlling the administrator or by an entity that is owned or controlled by the administrator or any of the administrator's affiliates, that cannot be adequately mitigated, the [^{F55}FCA] may require the administrator to establish an independent oversight function which shall include a balanced representation of stakeholders, including users and contributors.

4 If such a conflict of interest cannot be adequately managed, the [^{F56}FCA] may require the administrator to either cease the activities or relationships that create the conflict of interest or cease providing the benchmark.

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

5 An administrator shall publish or disclose all existing or potential conflicts of interest to users of a benchmark, to the [F⁵⁷FCA] and, where relevant, to contributors, including conflicts of interest arising from the ownership or control of the administrator.

6 An administrator shall establish and operate adequate policies and procedures, as well as effective organisational arrangements, for the identification, disclosure, prevention, management and mitigation of conflicts of interest in order to protect the integrity and independence of benchmark determinations. Such policies and procedures shall be regularly reviewed and updated. The policies and procedures shall take into account and address conflicts of interest, the degree of discretion exercised in the benchmark determination process and the risks that the benchmark poses, and shall:

- a ensure the confidentiality of information contributed to or produced by the administrator, subject to the disclosure and transparency obligations under this Regulation; and
- b specifically mitigate conflicts of interest due to the administrator's ownership or control, or due to other interests in the administrator's group or as a result of other persons that may exercise influence or control over the administrator in relation to determining the benchmark.

7 Administrators shall ensure that their employees and any other natural persons whose services are placed at their disposal or under their control and who are directly involved in the provision of a benchmark:

- a have the necessary skills, knowledge and experience for the duties assigned to them and are subject to effective management and supervision;
- b are not subject to undue influence or conflicts of interest and that the compensation and performance evaluation of those persons do not create conflicts of interest or otherwise impinge upon the integrity of the benchmark determination process;
- c do not have any interests or business connections that compromise the activities of the administrator concerned;
- d are prohibited from contributing to a benchmark determination by way of engaging in bids, offers and trades on a personal basis or on behalf of market participants, except where such way of contribution is explicitly required as part of the benchmark methodology and is subject to specific rules therein; and
- e are subject to effective procedures to control the exchange of information with other employees involved in activities that may create a risk of conflicts of interest or with third parties, where that information may affect the benchmark.

8 An administrator shall establish specific internal control procedures to ensure the integrity and reliability of the employee or person determining the benchmark, including at least internal sign-off by management before the dissemination of the benchmark.

Article 5

Oversight function requirements

1 Administrators shall establish and maintain a permanent and effective oversight function to ensure oversight of all aspects of the provision of their benchmarks.

2 Administrators shall develop and maintain robust procedures regarding their oversight function, which shall be made available to the [F58FCA].

3 The oversight function shall operate with integrity and shall have the following responsibilities, which shall be adjusted by the administrator based on the complexity, use and vulnerability of the benchmark:

- a reviewing the benchmark's definition and methodology at least annually;
- b overseeing any changes to the benchmark methodology and being able to request the administrator to consult on such changes;
- c overseeing the administrator's control framework, the management and operation of the benchmark, and, where the benchmark is based on input data from contributors, the code of conduct referred to in Article 15;
- d reviewing and approving procedures for cessation of the benchmark, including any consultation about a cessation;
- e overseeing any third party involved in the provision of the benchmark, including calculation or dissemination agents;
- f assessing internal and external audits or reviews, and monitoring the implementation of identified remedial actions;
- g where the benchmark is based on input data from contributors, monitoring the input data and contributors and the actions of the administrator in challenging or validating contributions of input data;
- h where the benchmark is based on input data from contributors, taking effective measures in respect of any breaches of the code of conduct referred to in Article 15; and
- i reporting to the [F59FCA] any misconduct by contributors, where the benchmark is based on input data from contributors, or administrators, of which the oversight function becomes aware, and any anomalous or suspicious input data.

4 The oversight function shall be carried out by a separate committee or by means of another appropriate governance arrangement.

5 [F60The FCA may make] technical standards to specify

[F61a] the procedures regarding the oversight function and the characteristics of the oversight function including its composition as well as its positioning within the organisational structure of the administrator, so as to ensure the integrity of the function and the absence of conflicts of interest;

[F62b] [F63... a non-exhaustive list of appropriate governance arrangements as laid down in paragraph 4.

[F64The technical standards] shall distinguish between the different types of benchmarks and sectors as set out in this Regulation and [F65when making the standards, the FCA]

CHAPTER 2

Input data, methodology and reporting of infringements

Article 11

Input data

1 The provision of a benchmark shall be governed by the following requirements in respect of its input data:

- a the input data shall be sufficient to represent accurately and reliably the market or economic reality that the benchmark is intended to measure.

The input data shall be transaction data, if available and appropriate. If transaction data is not sufficient or is not appropriate to represent accurately and reliably the market or economic reality that the benchmark is intended to measure, input data which is not transaction data may be used, including estimated prices, quotes and committed quotes, or other values;

- b the input data referred to in point (a) shall be verifiable;
- c the administrator shall draw up and publish clear guidelines regarding the types of input data, the priority of use of the different types of input data and the exercise of expert judgement, to ensure compliance with point (a) and the methodology;
- d where a benchmark is based on input data from contributors, the administrator shall obtain, where appropriate, the input data from a reliable and representative panel or sample of contributors so as to ensure that the resulting benchmark is reliable and representative of the market or economic reality that the benchmark is intended to measure;
- e the administrator shall not use input data from a contributor if the administrator has any indication that the contributor does not adhere to the code of conduct referred to in Article 15, and in such a case shall obtain representative publicly available data.

2 Administrators shall ensure that their controls in respect of input data include:

- a criteria that determine who may contribute input data to the administrator and a process for selecting contributors;
- b a process for evaluating a contributor's input data and for stopping the contributor from providing further input data, or applying other penalties for non-compliance against the contributor, where appropriate; and
- c a process for validating input data, including against other indicators or data, to ensure its integrity and accuracy.

3 Where the input data of a benchmark is contributed from a front office function, meaning any department, division, group, or personnel of contributors or any of its affiliates

Status: Point in time view as at 01/01/2024.

that performs any pricing, trading, sales, marketing, advertising, solicitation, structuring, or brokerage activities, the administrator shall:

- a obtain data from other sources that corroborate that input data; and
- b ensure that contributors have in place adequate internal oversight and verification procedures.

4 Where an administrator considers that the input data does not represent the market or economic reality that a benchmark is intended to measure, that administrator shall, within a reasonable time period, either change the input data, the contributors or the methodology in order to ensure that the input data does represent such market or economic reality, or else cease to provide that benchmark.

[^{F73}4A In the case of a critical benchmark, paragraph 4 does not require the administrator to cease providing the benchmark before the end of a period during which the administrator is required to continue publishing the benchmark by Article 21(1) or (2) or by a decision of the FCA under Article 21(3).

4B In the case of a critical benchmark in respect of which measures adopted under Article 23(6) have effect—

- a paragraph 4 does not require the administrator to cease providing the benchmark while those measures have effect, and
- b the administrator's duty under paragraph 4 to make changes is a duty to make changes so far as compatible with those measures.]

5 [^{F74}The FCA may make] technical standards to specify further how to ensure that input data is appropriate and verifiable, as required under points (a) and (b) of paragraph 1, as well as the internal oversight and verification procedures of a contributor that the administrator has to ensure are in place, in compliance with point (b) of paragraph 3, in order to ensure the integrity and accuracy of input data. However, the ^{F75}... technical standards shall not cover or apply to administrators of non-significant benchmarks.

[^{F76}The FCA] shall take into account the different types of benchmarks and sectors as set out in this Regulation, the nature of input data, the characteristics of the underlying market or economic reality and the principle of proportionality, the vulnerability of the benchmarks to manipulation as well as the international convergence of supervisory practice in relation to benchmarks.

Article 12

Methodology

- 1 An administrator shall use a methodology for determining a benchmark that:
 - a is robust and reliable;
 - b has clear rules identifying how and when discretion may be exercised in the determination of that benchmark;
 - c is rigorous, continuous and capable of validation including, where appropriate, back-testing against available transaction data;
 - d is resilient and ensures that the benchmark can be calculated in the widest set of possible circumstances, without compromising its integrity;
 - e is traceable and verifiable.
- 2 When developing a benchmark methodology, a benchmark administrator shall:
 - a take into account factors including the size and normal liquidity of the market, the transparency of trading and the positions of market participants, market concentration, market dynamics, and the adequacy of any sample to represent the market or economic reality that the benchmark is intended to measure;
 - b determine what constitutes an active market for the purposes of that benchmark; and
 - c establish the priority given to different types of input data.
- 3 An administrator shall have in place clear published arrangements that identify the circumstances in which the quantity or quality of input data falls below the standards necessary for the methodology to determine the benchmark accurately and reliably, and that describe whether and how the benchmark is to be calculated in such circumstances.

Article 13

Transparency of methodology

- 1 An administrator shall develop, operate and administer the benchmark and methodology transparently. To that end, the administrator shall publish or make available the following information:

1 The FCA must conduct a proportionate review of critical benchmarks in accordance with paragraphs 2 to 4, taking into account information provided to it under paragraph A1 of Article 20.

2 The review must consider:

- [^{F118}a whether an administrator located in the United Kingdom provides a benchmark that satisfies one or more of conditions (a), (b), (c) or (d) of paragraph 1 of Article 20;] and
- b where a benchmark satisfies [^{F119}point (a)] of this paragraph, whether the FCA recommends that the benchmark is recognised as critical.

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- 3 The FCA must provide a written report to the Treasury:
 - a setting out the result of the review; and
 - b making a recommendation as to whether any benchmark that satisfies [^{F120}point (a)] of paragraph 2 should be recognised as critical.
- 4 The FCA must conduct the review and provide the report to the Treasury:
 - a within the period of two years beginning with IP completion day; and
 - b thereafter, at intervals of at least every two years, with each interval beginning with the date on which the last report was provided.
- 5 The Treasury must by regulations specify that a benchmark is critical if:
 - a the FCA has recommended that the benchmark is recognised as critical in accordance with the review procedure specified in paragraphs 2 and 3; and
 - b the Treasury [^{F121}determine] that the FCA's review complies with the requirements of paragraphs 2 and 3.
- 6 The Treasury may by regulations specify that a benchmark is critical if:
 - a the benchmark is provided by an administrator located in the United Kingdom; and
 - [^{F122}b the Treasury consider that the benchmark satisfies one or more of conditions (a), (b), (c) or (d) of paragraph 1 of Article 20.]
- 7 The Treasury may not specify a regulated-data benchmark as a critical benchmark under paragraph 5 or 6 of this Article or under paragraph 5 of Article 20.]

Article 20

[^{F123}Critical benchmarks: conditions and other matters]

[^{F124}A1 An administrator shall immediately notify the FCA when the administrator's benchmark:

- a exceeds the threshold in paragraph 1(a); or
- b fulfils the criterion in paragraph 1(c)(ii) and there is reason to believe that it also fulfils the criterion in paragraph 1(c)(iii).]

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- 1 ^{F125}The conditions are:]
- a the benchmark is used directly or indirectly within a combination of benchmarks as a reference for financial instruments or financial contracts or for measuring the performance of investment funds, having a total value of at least EUR 500 billion on the basis of all the range of maturities or tenors of the benchmark, where applicable;
 - b the benchmark is based on submissions by contributors the majority of which are located in ^{F126}the United Kingdom] and is recognised as being critical ^{F127}... in accordance with the procedure laid down in paragraphs 2, 3, 4 and 5 of this Article;
 - c the benchmark fulfils ^{F128}both] of the following criteria:
 - (i) ^{F129}...
 - (ii) the benchmark has no, or very few, appropriate market-led substitutes;
 - (iii) in the event that the benchmark ceases to be provided, or is provided on the basis of input data no longer fully representative of the underlying market or economic reality or on the basis of unreliable input data, there would be significant and adverse impacts on market integrity, financial stability, consumers, the real economy, or the financing of households and businesses in ^{F130}the United Kingdom];

^{F131}...

- ^{F132}d the benchmark has a sufficient number of appropriate market-led substitutes that it does not fulfil the criterion in point (c)(ii), but:
- i it is not reasonably practicable for one or more users of the benchmark to switch to one of those substitutes, and
 - ii the benchmark fulfils the criterion in point (c)(iii).]

^{F133}2 Where the FCA considers that a benchmark should be recognised as critical based on an assessment under paragraph 3, and that benchmark is based on submissions by contributors the majority of which are located in the United Kingdom, the FCA shall notify the Treasury and transmit to the Treasury a documented assessment.]

3 For the purposes of paragraph 2, the ^{F134}FCA] shall assess whether the cessation of the benchmark or its provision on the basis of input data or of a panel of contributors no longer representative of the underlying market or economic reality would have an adverse impact on market integrity, financial stability, consumers, the real economy, or the financing of households and businesses in ^{F135}the United Kingdom]. The ^{F136}FCA] shall take into consideration in its assessment:

- a the value of financial instruments and financial contracts that reference the benchmark and the value of investment funds referencing the benchmark for measuring their performance within the ^{F137}United Kingdom] and their relevance in terms of the total value of financial instruments and of financial contracts outstanding, and of the total value of investment funds, in the ^{F137}United Kingdom];
- b the value of financial instruments and financial contracts that reference the benchmark and the value of investment funds referencing the benchmark for measuring their performance within the ^{F137}United Kingdom] and their relevance in terms of the gross national product of the ^{F137}United Kingdom];
- c any other figure to assess on objective grounds the potential impact of the discontinuity or unreliability of the benchmark on market integrity, financial stability, consumers, the real economy, or the financing of households and businesses in the ^{F137}United Kingdom].

^{F138}...

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. 4 Within six weeks of receipt of the notification referred to in paragraph 2, [F139]the Treasury must determine whether the FCA's assessment complies with the requirements of paragraph 3.]

[F140]5 The Treasury must make regulations specifying that a benchmark is critical if:

- a the FCA has recommended that the benchmark is recognised as critical in accordance with the procedure specified in paragraphs 2 and 3; and
- b the Treasury [F141]determine] that the FCA's assessment complies with the requirements of paragraph 3.]

[F142]5A The FCA must:

- a review [F143]the value in point (a) of paragraph 1 (“the paragraph 1(a) value”)] in the light of market, price and regulatory developments and the appropriateness of the classification of benchmarks with a total value of financial instruments, financial contracts, or investment funds referencing them that is close [F144]to the paragraph 1(a) value]; and
- b provide a written report to the Treasury setting out the results of the review and making a recommendation as to whether [F145]the paragraph 1(a) value] should be amended.

5B The FCA must conduct the review and provide the report to the Treasury:

- a within the period of two years beginning with IP completion day; and
- b thereafter, at intervals of at least every two years, with each interval beginning with the date on which the last report was provided.]

6 [F146]The Treasury may by regulations]

- a specify how the nominal amount of financial instruments other than derivatives, the notional amount of derivatives and the net asset value of investment funds are to be assessed, including in the event of an indirect reference to a benchmark within a combination of benchmarks, in order to be compared with the [F147]values] referred to in paragraph 1 of this Article and in point (a) of Article 24(1);

[F148]b amend [F149]the value in point (a)] of paragraph 1 having regard to:

- i the matters referred to in point (a) of paragraph 5A; and
- ii any report prepared by the FCA under paragraph 5A;]
- c specify how the criteria referred to in point (c)(iii) of paragraph 1 of this Article are to be applied, taking into consideration any data which helps assess on objective grounds the potential impact of the discontinuity or unreliability of the benchmark on market integrity, financial stability, consumers, the real economy, or the financing of households and businesses in [F150]the United Kingdom].

Where applicable, the [F151]Treasury] shall take into account relevant market or technological developments.

Article 21

Mandatory administration of a critical benchmark

1 If an administrator of a critical benchmark intends to cease providing such benchmark, the administrator shall:

- a immediately notify [^{F152}the FCA]; and
- b within four weeks of such notification submit an assessment of how the benchmark:
 - (i) is to be transitioned to a new administrator; or
 - (ii) is to be ceased to be provided, taking into account the procedure established in Article 28(1).

During the period referred to in point (b) of the first subparagraph, the administrator shall not cease provision of the benchmark.

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

2 Upon receipt of the assessment of the administrator referred to in paragraph 1, [^{F153}the FCA] shall:

- ^{F154}a
- b within four weeks, make its own assessment of how the benchmark is to be transitioned to a new administrator or be ceased to be provided, taking into account the procedure established in accordance with Article 28(1).

During the period of time referred to in point (b) of the first subparagraph of this paragraph, the administrator shall not cease the provision of the benchmark without the written consent of [^{F155}the FCA].

3 Following completion of the assessment referred to in point (b) of paragraph 2, [^{F156}the FCA] shall have the power to compel the administrator to continue publishing the benchmark until such time as:

- a the provision of the benchmark has been transitioned to a new administrator;
- b the benchmark can be ceased to be provided in an orderly fashion [^{F157}(whether by the exercise of the FCA's powers under Article 23D or otherwise)]; or
- c the benchmark is no longer critical.

For the purposes of the first subparagraph, the period for which [^{F156}the FCA] may compel the administrator to continue to publish the benchmark shall not exceed 12 months.

[^{F79}By the end of that period, [^{F156}the FCA] shall review its decision to compel the administrator to continue to publish the benchmark. [^{F156}The FCA] may, where necessary, extend that period by an appropriate period not exceeding 12 months. The maximum period of mandatory administration shall not exceed [^{F158}10 years].]

[^{F159}3A If the FCA decides to compel the administrator to continue publishing the benchmark under paragraph 3, the FCA must assess the capability of the benchmark to measure the underlying market or economic reality, taking into account, among other things, the procedure established by the administrator in accordance with Article 28(1).

3B After making its assessment under paragraph 3A, the FCA must give the administrator—

- a a written notice stating that it considers that the benchmark is not representative of the market or economic reality that it is intended to measure or that the representativeness of the benchmark is at risk, or
- b a written notice stating that it considers that the representativeness of the benchmark is not at risk.

3C The FCA must make its assessment under paragraph 3A, and give the notice under paragraph 3B, before the end of the period of 28 days beginning with the day on which the FCA notifies the administrator of its decision to compel the administrator to continue publishing the benchmark.]

4 Without prejudice to paragraph 1, in the event that the administrator of a critical benchmark is to be wound down due to insolvency proceedings, [^{F160}the FCA] shall make an assessment of whether and how the critical benchmark can be transitioned to a new administrator or can cease to be provided in an orderly fashion, taking into account the procedure established in accordance with Article 28(1).

F184 Article 23A

Designation of certain critical benchmarks

1 If the FCA gives the administrator of a critical benchmark a notice under Article 21(3B)(a) or Article 22B(3)(a) (benchmark unrepresentative or representativeness at risk), the FCA must, before the end of the period of 21 days beginning with the day on which it gave the notice—

- a consider whether it is appropriate for the FCA to designate the benchmark under this Article, and
- b if it proposes to do so, inform the benchmark administrator by written notice.

2 The FCA may not designate a benchmark under this Article if it considers that it is, and is likely to continue to be, the case that—

- a the representativeness of the benchmark can reasonably be restored and maintained by the administrator or by the FCA exercising its powers under Article 23(6), and
- b there are good reasons to restore and maintain its representativeness.

3 A notice under paragraph 1(b) must—

- a explain when the FCA proposes that the designation of the benchmark should take effect,
- b give reasons for the FCA's proposed decision, and
- c state that the administrator may make written representations to the FCA during the period of 14 days beginning with the day on which the notice is given.

4 If, after considering any representations made in accordance with paragraph 3(c), the FCA decides to designate the benchmark under this Article, it must give the administrator a written notice of its decision.

5 A notice under paragraph 4 must—

- a state when the designation of the benchmark takes effect,

- b give reasons for the FCA's decision,
 - c explain how the FCA has taken account of the relevant policy statement (see Article 23F),
 - d state that the prohibition on use of the benchmark under Article 23B will take effect when the designation of the benchmark takes effect, unless the FCA exercises its powers under Article 23B(2) or 23C,
 - e inform the administrator of its right to refer the decision to the Upper Tribunal and of the procedure for doing so, and
 - f provide any further information that the FCA considers appropriate for assisting supervised entities to understand the effects of the designation of the benchmark.
- 6 The FCA may, before a designation under this Article takes effect, decide to change when it takes effect to a later time.
- 7 If it decides to make such a change—
- a the FCA must give the benchmark administrator a written notice of its decision, and
 - b the notice must satisfy the requirements in paragraph 5(a) to (d) and (f).
- 8 The FCA may withdraw a designation of a benchmark under this Article if—
- a the designation has not taken effect,
 - b paragraph 1 applies again in relation to the benchmark, and
 - c the FCA designates the benchmark again under this Article with effect from an earlier date.
- 9 If the FCA decides to withdraw the designation of a benchmark under paragraph 8—
- a the FCA must include notice of the withdrawal in the notice under paragraph 4 of the further designation of the benchmark, and
 - b the notice must satisfy the requirements in paragraph 5(b), (c) and (f) in relation to the decision to withdraw.
- 10 A notice under paragraph 4 or 7—
- a may identify when the designation takes effect in any manner that the FCA considers appropriate, including by specifying a day or by describing a day by reference to the process for a reference to the Upper Tribunal or another process or event, and
 - b must be published by the FCA—
 - i) before the day on which the notice provides for the designation to take effect, and
 - ii) in the manner that appears to the FCA to be best calculated to bring it to the attention of the public.
- 11 The FCA—
- a must give a copy of a notice under this Article to the Treasury before publishing it, and
 - b may charge a reasonable fee for providing a person with a copy of a notice under this Article.
- 12 If the FCA decides to designate a benchmark under this Article and gives the administrator a notice under paragraph 4, the benchmark administrator may refer the matter to the Upper Tribunal.
- 13 Part 9 of FSMA (hearings and appeals) applies in relation to references to the Upper Tribunal made under this Article as it applies in relation to references made to that Tribunal under that Act.

- b immediately before the benchmark became an Article 23A benchmark,

the contract or arrangement is to be treated for all purposes as having always provided for the reference to have the meaning provided for by paragraph 1 (and, where relevant, paragraph 2) when the benchmark is an Article 23A benchmark.

6 Nothing in this Article is to be taken to create any right, obligation or liability of a party to a contract or other arrangement or of another person—

- a in relation to an act or omission that is relevant to the formation or variation of the contract or arrangement (such as, among other things, an act or omission in connection with the making of a representation or the giving of advice), where the formation or variation took place before the benchmark in question became an Article 23A benchmark, or
- b in relation to the operation of the contract or arrangement before the benchmark in question became an Article 23A benchmark.

7 Nothing in this Article is to be taken to extinguish, or otherwise affect, any cause of action that arose in relation to a contract or arrangement before the benchmark in question became an Article 23A benchmark, except that the effect of this Article is to be taken into account when determining any loss or damage incurred.

8 This Article has effect subject to Article 23FB and any regulations made under that Article.

9 For the purposes of this Article and Article 23FB, a contract or other arrangement refers to a benchmark if it refers to an index, whether or not the index is used as a benchmark for the purposes of the contract or arrangement (and references to a benchmark are to be interpreted accordingly).

10 In this Article and Article 23FB—

- a “arrangement” means a legally binding arrangement between two or more parties;
- b references to a contract or an arrangement—

[^{F189} Article 23FB

References to Article 23A benchmarks: further provision

1 Article 23FA(1) and (2) do not apply to the extent that the contract or arrangement provides expressly that those paragraphs do not apply.

2 Article 23FA(1) does not apply to a reference to a benchmark to which it would otherwise apply (taking account of Article 23FA(2), where relevant) to the extent that the contract or arrangement provides expressly that the reference does not include the benchmark as it exists at the times described in Article 23FA(1).

3 Article 23FA(1) to (5) do not prevent or otherwise affect the operation of fallback provision, either before or after the benchmark in question became an Article 23A benchmark, subject to paragraph 5 and any regulations made under paragraph 6.

4 “Fallback provision” means express provision for the contract or arrangement—
a to operate, or to be varied so as to operate, by reference to something other than the benchmark in question (temporarily or permanently), or
b to terminate,

either on a particular date or in particular circumstances (such as, among other things, circumstances relating to the benchmark’s representativeness, its designation under Article 23A or the way in which it is determined).

5 To the extent that fallback provision provides that it is triggered when the benchmark in question ceases to exist or to be published or otherwise made available (temporarily or permanently), Article 23FA(1) to (5) prevent it from being triggered by reason of the benchmark’s designation under Article 23A or the exercise of a power, discretion or permission under Article 23D.

6 The Treasury may by regulations provide—
a that Article 23FA(1) and (2) do not apply—
i to a specified benchmark or to benchmarks of a specified description;
ii to contracts or other arrangements of a specified description;
b that references in this Article to “fallback provision” include (in addition to the provision described in paragraph 4) express provision of a specified description;

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. - c that fallback provision is not triggered in cases of a specified description relating to a benchmark's designation under Article 23A (in addition to the cases described in paragraph 5).

In this paragraph “specified” means specified in the regulations.

7 Regulations under paragraph 6 may make provision that applies generally or only for specific purposes (for example, provision that only applies in relation to a particular benchmark, a particular description of contracts or other arrangements or a particular type of fallback provision).]

- d the FCA's duty under Article 23E(1) is a duty to carry out a review of its exercise of its powers under Article 23D(2) in relation to each version of the umbrella benchmark (and the first review period begins when the first notice under Article 23D(2) relating to any version of the benchmark is published).

5 Notices given under the provisions listed in paragraph 3 may relate to one version, several versions or all versions of the umbrella benchmark.

TITLE IV

TRANSPARENCY AND CONSUMER PROTECTION

Article 27

Benchmark statement

1 Within two weeks of the inclusion of an administrator in the [F²²⁰FCA register], the administrator shall publish, by means that ensure fair and easy access, a benchmark statement for each benchmark or, where applicable, for each family of benchmarks, that may be used in the [F²²¹United Kingdom] in accordance with Article 29.

Where that administrator begins providing a new benchmark or family of benchmarks that may be used in the [F²²¹United Kingdom] in accordance with Article 29, the administrator shall publish, within two weeks and by means that ensure a fair and easy access, a benchmark statement for each new benchmark or, where applicable, family of benchmarks.

The administrator shall review and, where necessary, update the benchmark statement for each benchmark or family of benchmarks in the event of any changes to the information to be provided under this Article and at least every two years.

The benchmark statement shall:

- a clearly and unambiguously define the market or economic reality measured by the benchmark and the circumstances in which such measurement may become unreliable;
- b lay down technical specifications that clearly and unambiguously identify the elements of the calculation of the benchmark in relation to which discretion may be exercised, the criteria applicable to the exercise of such discretion and the position of the persons that can exercise discretion, and how such discretion may be subsequently evaluated;
- c provide notice of the possibility that factors, including external factors beyond the control of the administrator, may necessitate changes to, or the cessation of, the benchmark; and
- d advise users that changes to, or the cessation of, the benchmark may have an impact upon the financial contracts and financial instruments that reference the benchmark or the measurement of the performance of investment funds.

2 A benchmark statement shall contain at least:

- a the definitions for all key terms relating to the benchmark;
- b the rationale for adopting the benchmark methodology and procedures for the review and approval of the methodology;
- c the criteria and procedures used to determine the benchmark, including a description of the input data, the priority given to different types of input data, the minimum data needed to determine a benchmark, the use of any models or methods of extrapolation and any procedure for rebalancing the constituents of a benchmark's index;
- d the controls and rules that govern any exercise of judgement or discretion by the administrator or any contributors, to ensure consistency in the use of such judgement or discretion;
- e the procedures which govern the determination of the benchmark in periods of stress or periods where transaction data sources may be insufficient, inaccurate or unreliable and the potential limitations of the benchmark in such periods;

- f the procedures for dealing with errors in input data or in the determination of the benchmark, including when a re-determination of the benchmark is required; and
- g the identification of potential limitations of the benchmark, including its operation in illiquid or fragmented markets and the possible concentration of inputs.

[^{F30}2a By 30 April 2020, for each of the requirements referred to in paragraph 2, the benchmark statement shall contain an explanation of how ESG factors are reflected in each benchmark or family of benchmarks provided and published. For those benchmarks or families of benchmarks that do not pursue ESG objectives, it shall be sufficient for benchmark administrators to clearly state in the benchmark statement that they do not pursue such objectives.

Where no [^{F222}UK Climate Transition Benchmark or UK Paris-aligned Benchmark] is available in the portfolio of that individual benchmark administrator, or the individual benchmark administrator has no benchmarks that pursue ESG objectives or take into account ESG factors, this shall be stated in the benchmark statements of all benchmarks provided by that administrator. For significant equity and bond benchmarks, as well as for [^{F223}UK Climate Transition Benchmarks and UK Paris-aligned Benchmarks], benchmark administrators shall disclose in their benchmark statements details on whether or not and to what extent a degree of overall alignment with the target of reducing carbon emissions or the attainment of the objectives of the Paris Agreement is ensured [^{F224}...

Article 32

Recognition of an administrator located in a third country

1 Until such time as ^{F263}regulations are made in accordance with Article 30(2) or (3)], a benchmark provided by an administrator located in a third country may be used by supervised entities in the ^{F264}[United Kingdom] provided that the administrator acquires prior recognition by the ^{F265}[FCA] in accordance with this Article.

2 An administrator located in a third country intending to obtain prior recognition as referred to in paragraph 1 of this Article shall comply with the requirements established in this Regulation, excluding Article 11(4) and Articles 16, 20, 21 and 23. The administrator may fulfil that condition by applying the IOSCO principles for financial benchmarks or the IOSCO principles for PRAs, as applicable, provided that such application is equivalent to compliance with the requirements established in this Regulation, excluding Article 11(4), and Articles 16, 20, 21 and 23.

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

For the purposes of determining whether the condition referred to in the first subparagraph is fulfilled, and in order to assess compliance with the IOSCO principles for financial benchmarks or the IOSCO principles for PRAs, as applicable, the [F266FCA] may rely on an assessment by an independent external auditor or, where the administrator located in a third country is subject to supervision, on the certification provided by the competent authority of the third country where the administrator is located.

If, and to the extent that, an administrator is able to demonstrate that a benchmark it provides is a regulated-data benchmark or a commodity benchmark that is not based on submissions by contributors the majority of which are supervised entities, there shall be no obligation on the administrator to comply with requirements not applicable to the provision of regulated-data benchmarks and of commodity benchmarks as provided for in Article 17 and Article 19(1) respectively.

3 An administrator located in a third country intending to obtain prior recognition as referred to in paragraph 1 shall have a legal representative established in [F267the United Kingdom]. The legal representative shall be a natural or legal person located in the [F268United Kingdom], and which, expressly appointed by the administrator located in a third country, acts on behalf of such administrator vis-à-vis the authorities and any other person in the [F268United Kingdom] with regard to the administrator's obligations under this Regulation. The legal representative shall perform the oversight function relating to the provision of benchmarks performed by the administrator under this Regulation together with the administrator and, in that respect, shall be accountable to the [F269FCA].

F270 4

5 An administrator located in a third country intending to obtain prior recognition as referred to in paragraph 1 shall apply for recognition with the [F271FCA]. The applicant administrator shall provide all information necessary to [F272satisfy the FCA] that it has established, at the time of recognition, all the necessary arrangements to meet the requirements referred to in paragraph 2 and shall provide the list of its actual or prospective benchmarks which may be used in the [F273United Kingdom] and shall, where applicable, indicate the competent authority responsible for its supervision in the third country.

Within 90 working days of receipt of the application referred to in the first subparagraph of this paragraph, the [F274FCA] shall verify that the conditions laid down in paragraphs [F2752 and 3] are fulfilled.

If the [F276FCA] considers that the conditions laid down in paragraphs [F2772 and 3] are not fulfilled, it shall refuse the recognition request and set out the reasons for that refusal. In addition, no recognition shall be granted unless the following additional conditions are fulfilled:

- a where an administrator located in a third country is subject to supervision, an appropriate cooperation arrangement is in place between the [F278FCA] and the competent authority of the third country where the administrator is located, in compliance with the [F279technical standards made] pursuant to Article 30(5), in order to ensure an efficient exchange of information that [F280allows the FCA] to carry out its duties in accordance with this Regulation;
- b the effective exercise by the [F281FCA] of its supervisory functions under this Regulation is neither prevented by the laws, regulations or administrative provisions of the third country where the administrator is located, nor, where applicable, by limitations in the supervisory and investigatory powers of that third country's supervisory authority.

Article 33

Endorsement of benchmarks provided in a third country

1 An administrator located in the [F287United Kingdom] and authorised or registered in accordance with Article 34, or any other supervised entity located in the [F287United Kingdom] with a clear and well-defined role within the control or accountability framework of a third country administrator, which is able to monitor effectively the provision of a benchmark, may apply to the [F288FCA] to endorse a benchmark or a family of benchmarks provided in a third country for their use in the [F287United Kingdom], provided that all of the following conditions are fulfilled:

- a the endorsing administrator or other supervised entity has verified and is able to demonstrate on an on-going basis to [F289the FCA] that the provision of the benchmark or family of benchmarks to be endorsed fulfils, on a mandatory or on a voluntary basis, requirements which are at least as stringent as the requirements of this Regulation;
- b the endorsing administrator or other supervised entity has the necessary expertise to monitor effectively the activity of the provision of a benchmark in a third country and to manage the associated risks;
- c there is an objective reason to provide the benchmark or family of benchmarks in a third country and for said benchmark or family of benchmarks to be endorsed for their use in the [F290United Kingdom].

For the purpose of point (a), when assessing whether the provision of the benchmark or family of benchmarks to be endorsed fulfils requirements which are at least as stringent as the requirements of this Regulation, the [F291FCA] may take into account whether the compliance of the provision of the benchmark or family of benchmarks with the IOSCO principles for financial benchmarks or the IOSCO principles for PRAs, as applicable, would be equivalent to compliance with the requirements of this Regulation.

2 An administrator or other supervised entity that makes an application for endorsement as referred to in paragraph 1 shall provide all information necessary to satisfy the [F292FCA] that, at the time of application, all the conditions referred to in that paragraph are fulfilled.

3 Within 90 working days of receipt of the application for endorsement referred to in paragraph 1, the [F293FCA] shall examine the application and adopt a decision either to authorise the endorsement or to refuse it. F294 ...

4 An endorsed benchmark or an endorsed family of benchmarks shall be considered to be a benchmark or family of benchmarks provided by the endorsing administrator or other supervised entity. The endorsing administrator or other supervised entity shall not use the endorsement with the intention of avoiding the requirements of this Regulation.

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

5 An administrator or other supervised entity that has endorsed a benchmark or a family of benchmarks provided in a third country shall remain fully responsible for such a benchmark or family of benchmarks and for compliance with the obligations under this Regulation.

6 Where the [^{F295}FCA] has well-founded reasons to consider that the conditions laid down under paragraph 1 of this Article are no longer fulfilled, it shall have the power to require the endorsing administrator or other supervised entity to cease the endorsement ^{F296}.... Article 28 shall apply in case of cessation of the endorsement.

7 The [^{F297}Treasury may make regulations] to determine the conditions under which the [^{F298}FCA] may assess whether there is an objective reason for the provision of a benchmark or family of benchmarks in a third country and their endorsement for their use in the [^{F299}United Kingdom]. [^{F300}When determining the conditions, the Treasury] shall take into account elements such as the specificities of the underlying market or economic reality the benchmark intends to measure, the need for proximity of the provision of the benchmark to such market or economic reality, the need for proximity of the provision of the benchmark to contributors, the material availability of input data due to different time zones, and specific skills required in the provision of the benchmark.

- a authorisation if it provides or intends to provide indices which are used or intended to be used as benchmarks within the meaning of this Regulation;

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. ANNEX II

COMMODITY BENCHMARKS

Methodology

1. The administrator of a commodity benchmark shall formalise, document, and make public any methodology that the administrator uses for a benchmark calculation. At a minimum, such methodology shall contain and describe the following:
 - (a) all criteria and procedures that are used to develop the benchmark, including how the administrator uses input data including the specific volume, concluded and reported transactions, bids, offers and any other market information in its assessment or assessment time periods or windows, why a specific reference unit is used, how the administrator collects such input data, the guidelines that control the exercise of judgement by assessors and any other information, such as assumptions, models or extrapolation from collected data that are considered in making an assessment;
 - (b) procedures and practices that are designed to ensure consistency between its assessors in exercising their judgement;
 - (c) the relative importance that shall be assigned to each criterion used in benchmark calculation, in particular the type of input data used and the type of criterion used to guide judgement so as to ensure the quality and integrity of the benchmark calculation;
 - (d) criteria that identify the minimum amount of transaction data required for a particular benchmark calculation. If no such threshold is provided for, the reasons why a minimum threshold is not established shall be explained, including setting out the procedures to be used where no transaction data exist;
 - (e) criteria that address the assessment periods where the submitted data fall below the methodology's recommended transaction data threshold or the requisite

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. administrator's quality standards, including any alternative methods of assessment including theoretical estimation models. Those criteria shall explain the procedures to be used where no transaction data exist;

- (f) criteria for timeliness of contributions of input data and the means for such contributions of input data whether electronically, by telephone or otherwise;
 - (g) criteria and procedures that address assessment periods where one or more contributors submit input data that constitute a significant proportion of the total input data for that benchmark. The administrator shall also define in those criteria and procedures what constitutes a significant proportion for each benchmark calculation;
 - (h) criteria according to which transaction data may be excluded from a benchmark calculation.
2. The administrator of a commodity benchmark shall publish or make available the key elements of the methodology that the administrator uses for each commodity benchmark provided and published or, when applicable, for each family of benchmarks provided and published.
3. Along with the methodology referred to in paragraph 2, the administrator of a commodity benchmark shall also describe and publish all of the following:
- (a) the rationale for adopting a particular methodology, including any price adjustment techniques and a justification of why the time period or window within which input data is accepted is a reliable indicator of physical market values;
 - (b) the procedure for internal review and approval of a given methodology, as well as the frequency of such review;
 - (c) the procedure for external review of a given methodology, including the procedures to gain market acceptance of the methodology through consultation with users on important changes to their benchmark calculation processes.

Changes to a methodology

4. The administrator of a commodity benchmark shall adopt and make public to users explicit procedures and the rationale of any proposed material change in its methodology. Those procedures shall be consistent with the overriding objective that an administrator must ensure the continued integrity of its benchmark calculations and implement changes for good order of the particular market to which such changes relate. Such procedures shall provide:
- (a) advance notice in a clear time frame that gives users sufficient opportunity to analyse and comment on the impact of such proposed changes, having regard to the administrator's calculation of the overall circumstances;
 - (b) for users' comments, and the administrator's response to those comments, to be made accessible to all market users after any given consultation period, except where the commenter has requested confidentiality.
5. The administrator of a commodity benchmark shall regularly examine its methodologies for the purpose of ensuring that they reliably reflect the physical market under assessment and shall include a process for taking into account the views of relevant users.

Quality and integrity of benchmark calculations

6. The administrator of a commodity benchmark shall:

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- (a) specify the criteria that define the physical commodity that is the subject of a particular methodology;
- (b) give priority to input data in the following order, where consistent with its methodologies:
 - (i) concluded and reported transactions;
 - (ii) bids and offers;
 - (iii) other information.

If concluded and reported transactions are not given priority, the reasons should be explained, as required in point 7(b).

- (c) employ sufficient measures designed to use input data submitted and considered in a benchmark calculation which are bona fide, meaning that the parties submitting the input data have executed, or are prepared to execute, transactions generating such input data and the concluded transactions were executed at arms-length from each other and particular attention shall be paid to inter-affiliate transactions;
- (d) establish and employ procedures to identify anomalous or suspicious transaction data and keep records of decisions to exclude transaction data from the administrator's benchmark calculation process;
- (e) encourage contributors to submit all of their input data that falls within the administrator's criteria for that calculation. Administrators shall seek, so far as they are able and is reasonable, to ensure that input data submitted is representative of the contributors' actual concluded transactions; and
- (f) employ a system of appropriate measures to ensure that contributors comply with the administrator's applicable quality and integrity standards for input data.

7. The administrator of a commodity benchmark shall describe and publish for each calculation, to the extent reasonable without prejudicing due publication of the benchmark:

- (a) a concise explanation, sufficient to facilitate a benchmark subscriber's or competent authority's ability to understand how the calculation was developed including, at a minimum, the size and liquidity of the physical market being assessed (such as the number and volume of transactions submitted), the range and average volume and range and average of price, and indicative percentages of each type of input data that have been considered in a calculation; terms referring to the pricing methodology shall be included such as transaction-based, spread-based or interpolated or extrapolated; and
- (b) a concise explanation of the extent to which, and the basis upon which, any judgement including the exclusions of data which otherwise conformed to the requirements of the relevant methodology for that calculation, basing prices on spreads or interpolation, extrapolation, or weighting bids or offers higher than concluded transactions, if any, was used in any calculation.

Integrity of the reporting process

8. The administrator of a commodity benchmark shall:

- (a) specify the criteria that define who may submit input data to the administrator;

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- (b) have in place quality control procedures to evaluate the identity of a contributor and any submitter who reports input data and the authorisation of such submitter to report input data on behalf of a contributor;
- (c) specify the criteria applied to employees of a contributor who are permitted to submit input data to an administrator on behalf of a contributor; encourage contributors to submit transaction data from back office functions and seek corroborating data from other sources where transaction data is received directly from a trader; and
- (d) implement internal controls and written procedures to identify communications between contributors and assessors that attempt to influence a calculation for the benefit of any trading position (whether of the contributor, its employees or any third party), attempt to cause an assessor to violate the administrator's rules or guidelines or identify contributors that engage in a pattern of submitting anomalous or suspicious transaction data. Those procedures shall include, to the extent possible, provision for escalation of the inquiry by the administrator within the contributor's company. Controls shall include cross-checking market indicators to validate submitted information.

Assessors

- 9. In relation to the role of an assessor, the administrator of a commodity benchmark shall:
 - (a) adopt and have in place explicit internal rules and guidelines for selecting assessors, including their minimum level of training, experience and skills, as well as the process for periodic review of their competence;
 - (b) have in place arrangements to ensure that calculations can be made on a consistent and regular basis;
 - (c) maintain continuity and succession planning in respect of its assessors in order to ensure that calculations are made consistently and by employees who possess the relevant levels of expertise; and
 - (d) establish internal control procedures to ensure the integrity and reliability of calculations. At a minimum, such internal controls and procedures shall require the ongoing supervision of assessors to ensure that the methodology was properly applied and procedures for internal sign-off by a supervisor prior to releasing prices for dissemination to the market.

Audit trails

- 10. The administrator of a commodity benchmark shall have rules and procedures in place to document contemporaneously relevant information, including:
 - (a) all input data;
 - (b) the judgements that are made by assessors in reaching each benchmark calculation;
 - (c) whether a calculation excluded a particular transaction which otherwise conformed to the requirements of the relevant methodology for that calculation, and the rationale for doing so;
 - (d) the identity of each assessor and of any other person who submitted or otherwise generated any of the information in points (a), (b) or (c).

Status: Point in time view as at 01/01/2024.

Changes to legislation: Regulation (EU) 2016/1011 of the European Parliament and of the Council is up to date with all changes known to be in force on or before 01 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

11. The administrator of a commodity benchmark shall have rules and procedures in place to ensure that an audit trail of relevant information is retained for at least five years in order to document the construction of its calculations.

Conflicts of interest

12. The administrator of a commodity benchmark shall establish adequate policies and procedures for the identification, disclosure, management or mitigation and avoidance of any conflict of interest and the protection of integrity and independence of calculations. Those policies and procedures shall be reviewed and updated regularly and shall:

- (a) ensure that benchmark calculations are not influenced by the existence of, or potential for, a commercial or personal business relationship or interest between the administrator or its affiliates, its personnel, clients, any market participant or persons connected with them;
- (b) ensure that personal interests and business connections of the administrator's personnel are not permitted to compromise the administrator's functions, including outside employment, travel, and acceptance of entertainment, gifts and hospitality provided by the administrator's clients or other commodity market participants;
- (c) ensure, in respect of identified conflicts, appropriate segregation of functions within the administrator by way of supervision, compensation, systems access and information flows;
- (d) protect the confidentiality of information submitted to or produced by the administrator, subject to the disclosure obligations of the administrator;
- (e) prohibit managers, assessors and other employees of the administrator from contributing to a benchmark calculation by way of engaging in bids, offers and trades on either a personal basis or on behalf of market participants; and
- (f) effectively address any identified conflict of interest which may exist between the administrator's provision of a benchmark (including all employees who perform or otherwise participate in benchmark calculation responsibilities), and any other business of the administrator.

13. The administrator of a commodity benchmark shall ensure that its other business operations have in place appropriate procedures and mechanisms designed to minimise the likelihood that a conflict of interest will affect the integrity of benchmark calculations.

14. The administrator of a commodity benchmark shall ensure that it has in place segregated reporting lines amongst its managers, assessors and other employees and from the managers to the administrator's most senior level management and its board to ensure:

- (a) that the administrator satisfactorily implements the requirements of this Regulation; and
- (b) that responsibilities are clearly defined and do not conflict or cause a perception of conflict.

15. The administrator of a commodity benchmark shall disclose to its users as soon as it becomes aware of a conflict of interest arising from the ownership of the administrator.

Complaints

16. The administrator of a commodity benchmark shall have in place and publish a complaints handling policy setting out procedures for receiving, investigating and retaining records concerning complaints made about an administrator's calculation process. Such complaint mechanisms shall ensure that:
- (a) subscribers of the benchmark may submit complaints on whether a specific benchmark calculation is representative of market value, proposed benchmark calculation changes, applications of methodology in relation to a specific benchmark calculation and other editorial decisions in relation to the benchmark calculation processes;
 - (b) there is in place a target timetable for the handling of complaints;
 - (c) formal complaints made against the administrator and its personnel are investigated by that administrator in a timely and fair manner;
 - (d) the inquiry is conducted independently of any personnel who may be involved in the subject of the complaint;

 - (h) all documents relating to a complaint, including those submitted by the complainant as well as an administrator's own record, are retained for a minimum of five years.
17. Disputes as to daily pricing determinations, which are not formal complaints, shall be resolved by the administrator of a commodity benchmark with reference to its appropriate standard procedures. If a complaint results in a change in price, the details of that change in price shall be communicated to the market as soon as possible.

External auditing

18. The administrator of a commodity benchmark shall appoint an independent external auditor with appropriate experience and capability to review and report on the administrator's adherence to its stated methodology criteria and with the requirements of this Regulation.
