

Commission Regulation (EU) 2016/67 of 19 January 2016 amending Annexes II, III and V to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for ametoctradin, chlorothalonil, diphenylamine, flonicamid, fluazinam, fluoxastrobin, halauxifen-methyl, propamocarb, prothioconazole, thiacloprid and trifloxystrobin in or on certain products (Text with EEA relevance)

COMMISSION REGULATION (EU) 2016/67

of 19 January 2016

amending Annexes II, III and V to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for ametoctradin, chlorothalonil, diphenylamine, flonicamid, fluazinam, fluoxastrobin, halauxifen-methyl, propamocarb, prothioconazole, thiacloprid and trifloxystrobin in or on certain products

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC<sup>(1)</sup>, and in particular Article 14(1) (a) thereof,

Whereas:

- (1) For chlorothalonil, propamocarb, thiacloprid and trifloxystrobin, maximum residue levels (MRLs) were set in Annex II to Regulation (EC) No 396/2005. For ametoctradin, flonicamid, fluazinam, fluoxastrobin and prothioconazole MRLs were set in Part A of Annex III to that Regulation. For diphenylamine MRLs were set in Annex V and Part A of Annex III to that Regulation. For halauxifen-methyl, no specific MRLs were set nor was that substance included in Annex IV to that Regulation, so the default value of 0,01 mg/kg laid down in Article 18(1)(b) thereof applies.
- (2) In the context of a procedure for the authorisation of the use of a plant protection product containing the active substance ametoctradin on sage and basil, an application was submitted in accordance with Article 6(1) of Regulation (EC) No 396/2005 for modification of the existing MRLs.
- (3) As regards flonicamid, such an application was submitted for peppers, Brussels sprouts, peas (without pods), cotton seeds, barley, oat and rye. As regards fluazinam, such an application was submitted for tomatoes. As regards fluoxastrobin and prothioconazole, such applications were submitted for shallots. As regards propamocarb, such an application was submitted for leeks. As regards thiacloprid, such an application was submitted for Jerusalem artichokes.

- (4) In accordance with Article 6(2) and (4) of Regulation (EC) No 396/2005 an application was submitted for chlorothalonil used on cranberries. The applicant claims that the authorised uses of that substance on such crop in the United States of America lead to residues exceeding the MRL contained in Regulation (EC) No 396/2005 and that a higher MRL is necessary to avoid trade barriers for the importation of that crop.
- (5) In accordance with Article 8 of Regulation (EC) No 396/2005, those applications were evaluated by the Member States concerned and the evaluation reports were forwarded to the Commission.
- (6) The European Food Safety Authority, hereinafter ‘the Authority’, assessed the applications and the evaluation reports, examining in particular the risks to the consumer and, where relevant, to animals and gave reasoned opinions on the proposed MRLs<sup>(2)</sup>. It forwarded those opinions to the Commission and the Member States and made them available to the public.
- (7) As regards propamocarb, the Authority recommends setting a new MRL on leeks at the level of 30 mg/kg, which was derived by rounding up the value of 20 mg/kg calculated with the Organisation for Economic Cooperation and Development (OECD) MRL calculator. By applying the cooking factor of 0,88 derived for leafy crops to leeks, such proposed MRL will not result in an exceedence of the acute reference dose, thus being safe for the consumer. However, given the concerns raised by some Member States, it is more appropriate to set the MRL at the unrounded level of 20 mg/kg. Such value adequately covers the intended uses on leeks.
- (8) As regards all other applications, the Authority concluded that all requirements with respect to data were met and that the modifications to the MRLs requested by the applicants were acceptable with regard to consumer safety on the basis of a consumer exposure assessment for 27 specific European consumer groups. It took into account the most recent information on the toxicological properties of the substances. The Authority also concluded that neither the lifetime exposure to these substances via consumption of all food products that may contain them, nor the short-term exposure due to high consumption of the relevant crops and products showed that there is a risk that the acceptable daily intake or the acute reference dose is exceeded.
- (9) As regards diphenylamine, Commission Regulation (EU) No 772/2013<sup>(3)</sup> set temporary MRLs for apples and pears. Monitoring data show that an unavoidable cross-contamination affecting untreated apples and pears still occurs. In order to provide the necessary time for business operators to completely remove the residues of diphenylamine in storage facilities, it is appropriate to maintain those temporary MRLs, which will be reviewed. The review will take into account the information available within 2 years from the publication of this Regulation.
- (10) On 5 July 2013 the Codex Alimentarius Commission (CAC)<sup>(4)</sup> adopted a Codex maximum residue limit (CXL) for trifloxystrobin in olives for oil production. The CXL is safe for consumers in the Union<sup>(5)</sup> and should therefore be included in Regulation (EC) No 396/2005 as MRL.

- (11) As regards thiacloprid and trifloxystrobin, several MRLs were modified by Commission Regulation (EU) 2015/1200<sup>(6)</sup>. That Regulation lowered the MRLs for thiacloprid in Jerusalem artichokes and for trifloxystrobin in olives for oil production to the relevant limits of determination as of 12 February 2016. In the interest of legal certainty, it is appropriate for the MRLs provided for by this Regulation, to apply from the same date.
- (12) For halauxifen-methyl, the Authority submitted a conclusion on the peer review of the pesticide risk assessment of that active substance<sup>(7)</sup>. In that framework, it recommended to set MRLs covering the representative uses according to good agricultural practices in the Union. The Commission consulted the European Union reference laboratories on the appropriate limits of determination.
- (13) Based on the reasoned opinions of the Authority and taking into account the factors relevant to the matter under consideration, the appropriate modifications to the MRLs fulfil the requirements of Article 14(2) of Regulation (EC) No 396/2005.
- (14) Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (15) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

*Article 1*

Annexes II, III and V to Regulation (EC) No 396/2005 are amended in accordance with the Annex to this Regulation.

*Article 2*

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

It shall however apply from 12 February 2016 as regards the MRL for thiacloprid in Jerusalem artichokes and the MRL for trifloxystrobin in olives for oil production.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 19 January 2016.

*For the Commission*

*The President*

Jean-Claude JUNCKER

## ANNEX

Annexes II, III and V to Regulation (EC) No 396/2005 are amended as follows:

(1) Annex II is amended as follows:

- (a) the columns for chlorothalonil, propamocarb, thiacloprid and trifloxystrobin are replaced by the following:

**PESTICIDE RESIDUES AND  
MAXIMUM RESIDUE LEVELS (MG/KG)**

| <b>Code number</b> | <b>Groups and examples of individual products to which the MRLs apply<sup>b</sup></b> | <b>Chlorothalonil (R)</b> | <b>Propamocarb (Sum of propamocarb and its salts, expressed as propamocarb) (R)</b> | <b>Thiacloprid (A) (F) (R)</b> | <b>Trifloxystrobin (R)</b> |
|--------------------|---|---------------------------|---|--------------------------------|----------------------------|
| (1)                | (2)   | (3)                       | (4)   | (5)                            | (6)                        |
| 0100000            | <b>FRUITS, FRESH or FROZEN; TREE NUTS</b>   |                           | 0,01 <sup>a</sup>   |                                |                            |
| 0110000            | <b>Citrus fruits</b>  | 0,01 <sup>a</sup>         |   | 0,01 <sup>a</sup>              | 0,5                        |

**a** Indicates lower limit of analytical determination

**b** For the complete list of products of plant and animal origin to which MRLs apply, reference should be made to Annex I.

(\*\*) Pesticide-code combination for which the MRL as set in Annex III Part B applies.

(F) = Fat soluble

**Chlorothalonil (R)**

(R) = The residue definition differs for the following combinations pesticide-code number:  
Chlorothalonil — codes 1000000 to 1070000, except 1040000: 2,5,6-trichloro-4-hydroxyphthalonitrile (SDS-3701)

(+) The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 October 2016, or, if that information is not submitted by that date, the lack of it. Moreover, the European Food Safety Authority highlights that the metabolite 2,5,6-trichloro-4-hydroxyphthalonitrile (SDS-3701) has not been taken into account, given that a validated method for enforcement, a complete set of residue trials, storage stability studies and data on processing of SDS-3701 are unavailable for all plant commodities. When re-viewing the MRL, the Commission will take this information into account, if it is submitted by 29 October 2016, or, if that information is not submitted by that date, the lack of it.

**a** Indicates lower limit of analytical determination

**b** For the complete list of products of plant and animal origin to which MRLs apply, reference should be made to Annex I.

(\*\*) Pesticide-code combination for which the MRL as set in Annex III Part B applies.

**Halauxifen-methyl (sum of halauxifen-methyl and X11393729 (halauxifen), expressed as halauxifen-methyl)**

(+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

**0840040 Horseradish**

- (2) In Part A of Annex III, the columns for ametoctradin, diphenylamine, flonicamid, fluazinam, fluoxastrobin and prothioconazole are replaced by the following:

**PESTICIDE RESIDUES AND MAXIMUM RESIDUE LEVELS (MG/KG)**

| Code number | Groups and examples of individual products to which the MRLs apply <sup>b</sup> | Ametoctradin (R) | Diphenylamine (sum of flonicamid, TNFG and TNFA) (R) | Fluazinam (F) | Fluoxastrobin | Prothioconazole (Prothioconazole-desthio) (R) |                   |
|-------------|---|------------------|--|---------------|---------------|---|-------------------|

**a** Indicates lower limit of analytical determination

**b** For the complete list of products of plant and animal origin to which MRLs apply, reference should be made to Annex I.

(F) = Fat soluble

Ametoctradin (R)

(R) = The residue definition differs for the following combinations pesticide-code number:  
Ametoctradin — code 1000000 except 1040000:  
Ametoctradin, metabolite 4-(7-amino-5-ethyl [1,2,4]triazolo, [1,5-a]pyrimidin-6-yl) butanoic acid (M650F01) and metabolite 6-(7-amino-5-ethyl [1,2,4]triazolo [1,5-a]pyrimidin-6-yl) hexanoic acid (M650F06), expressed as ametoctradin

(+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

## 0840040 Horseradish

Diphenylamine

(+) Monitoring data show that an unavoidable cross-contamination affecting untreated apples and pears still occurs. When re-viewing the MRL, the Commission will take into account the information available within 2 years from the date of publication.

0130010 Apples

**0130020****Pears**

(+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

**0840040****Horseradish****Flonicamid (sum of flonicamid, TNFG and TNFA) (R)**

(R) = The residue definition differs for the following combinations pesticide-code number:  
Flonicamid — code 1000000: Sum of flonicamid and TNFA-AM

(+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

**0840040****Horseradish****Fluazinam (F)**

(+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

**0840040****Horseradish****Fluoxastrobin**

(+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

**0840040****Horseradish****Prothioconazole (Prothioconazole-desthio) (R)**

(R) = The residue definition differs for the following combinations pesticide-code number:  
Prothioconazole — code 1000000 except 1040000: Sum of prothioconazole-desthio and its glucuronide conjugate, expressed as prothioconazoledesthio.

(+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

**0840040****Horseradish**

- (3) In Annex V, the column for diphenylamine is deleted.
