COMMISSION IMPLEMENTING REGULATION (EU) 2017/2114

of 9 November 2017

amending Implementing Regulation (EU) No
680/2014 as regards templates and instructions

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No 648/2012⁽¹⁾, in particular the fourth subparagraph of Article 99(5), the third subparagraph of Article 101(4), the fourth subparagraph of Article 415(3), and the third subparagraph of Article 430(2) thereof,

Whereas:

- (1) Commission Implementing Regulation (EU) No 680/2014⁽²⁾ specifies the modalities according to which institutions are required to report information relevant to their compliance with Regulation (EU) No 575/2013. Given that the regulatory framework established by Regulation (EU) No 575/2013 is gradually being supplemented and amended in its non-essential elements by the adoption of further secondary legislation and, in this case, by Commission Delegated Regulation (EU) 2015/61⁽³⁾, Implementing Regulation (EU) No 680/2014 should also be updated to reflect those rules and to provide further precision in the instructions and definitions used for the purposes of the institutions' supervisory reporting, including with regard to a maturity ladder, which would allow the maturity mismatch of an institution's balance sheet to be reflected in the reporting.
- (2) Amendments to Implementing Regulation (EU) No 680/2014 are required in order to correct erroneous references and formatting inconsistencies which were discovered in the course of the application of that Regulation.
- (3) Amendments to Implementing Regulation (EU) No 680/2014 are also required to reflect competent authorities' ability to effectively monitor and assess the institutions' risk profile and to obtain a view on the risks posed to the financial sector, which requires changes to the reporting requirements in the areas of operational risk, credit risk and with regard to institutions' exposures towards sovereigns.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- (4) In order to provide institutions and competent authorities with sufficient time to implement the amendments set out in this Regulation, it should apply from 1 March 2018.
- (5) This Regulation is based on the draft implementing technical standards submitted by the European Banking Authority to the Commission.
- (6) The European Banking Authority has conducted open public consultations on the draft implementing technical standards on which this Regulation is based, analysed the potential related costs and benefits and requested the opinion of the Banking Stakeholder Group established in accordance with Article 37 of Regulation (EU) No 1093/2010 of the European Parliament and of the Council⁽⁴⁾.
- (7) Implementing Regulation (EU) No 680/2014 should therefore be amended accordingly,

HAS ADOPTED THIS REGULATION:

Article 1

Implementing Regulation (EU) No 680/2014 is amended as follows:

- (1) point (2) of Article 5(b) is replaced by the following:
 - (2) the information on material losses stemming from operational risk events as follows:
 - (a) institutions which calculate own funds requirements relating to operational risk in accordance with Chapter 4 of Title III of Part Three of Regulation (EU) No 575/2013 shall report this information as specified in templates 17.01 and 17.02 of Annex I, in accordance with the instructions in point 4.2 of Part II of Annex II;
 - (b) institutions which calculate the own funds requirements relating to operational risk in accordance with Chapter 3 of Title III of Part Three of Regulation (EU) No 575/2013 and that meet at least one of the following criteria shall report this information as specified in templates 17.01 and 17.02 of Annex I in accordance with the instructions in point 4.2 of Part II of Annex II:
 - (i) the ratio of the individual balance sheet total to the sum of individual balance sheet totals of all institutions within the same Member State is equal to or above 1 %, where balance sheet total figures are based on year-end figures for the year before the year preceding the reporting reference date;
 - (ii) the total value of the institution's assets exceeds EUR 30 billion;
 - (iii) the total value of the institution's assets exceeds both EUR 5 billion and 20 % of the GDP of the Member State where it is established;
 - (iv) the institution is one of the three largest institutions established in a particular Member State measured by the total value of its assets;
 - (v) the institution is the parent of subsidiaries, which are themselves credit institutions established in at least two Member States other

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- than the Member State where the parent institution is authorised and where both of the following conditions are met:
- the value of the institution's consolidated total assets exceeds EUR 5 billion,
 - more than 20 % of either the institution's consolidated total assets as defined in template 1.1 of Annex III or IV, as applicable, or the institution's consolidated total liabilities as defined in template 1.2 of Annex III or IV, as applicable, relates to activities with counterparties located in a Member State other than that where the parent institution is authorised;
- (c) institutions which calculate the own funds requirements relating to operational risk in accordance with Chapter 3 of Title III of Part Three of Regulation (EU) No 575/2013 and for which none of the conditions in point (b) is met, shall report the information referred to in points (i) and (ii) below in accordance with the instructions in point 4.2 of Part II of Annex II:
- (i) the information as specified for column 080 of template 17.01 of Annex I for the following rows:
 - number of events (new events) (row 910),

ANNEX II

REPORTING ON OWN FUNDS AND OWN FUNDS REQUIREMENTS

PART I: GENERAL INSTRUCTIONS

1. STRUCTURE AND CONVENTIONS
 - 1.1. STRUCTURE
 1. Overall, the framework consists of five blocks of templates:
 - (a) capital adequacy, an overview of regulatory capital; total risk exposure amount;
 - (b) group solvency, an overview of the fulfilment of the solvency requirements by all individual entities included in the scope of consolidation of the reporting entity
 - (c) credit risk (including counterparty, dilution and settlement risks);
 - (d) market risk (including position risk in trading book, foreign exchange risk, commodities risk and CVA risk);
 - (e) operational risk.
 2. For each template legal references are provided. Further detailed information regarding more general aspects of the reporting of each block of templates, instructions concerning specific positions as well as validation rules are included in this part of the Implementing Technical Standard.
 3. Institutions report only those templates that are relevant depending on the approach used for determining own funds requirements.
 - 1.2. NUMBERING CONVENTION
 4. The document follows the labelling convention set in the following table, when referring to the columns, rows and cells of the templates. These numerical codes are extensively used in the validation rules.
 5. The following general notation is followed in the instructions: {Template;Row;Column}.
 6. In the case of validations inside a template, in which only data points of that template is used, notations do not refer to a template: {Row;Column}.
 7. In the case of templates with only one column, only rows are referred to. {Template;Row}
 8. An asterisk sign is used to express that the validation is done for the rows or columns specified before.
 - 1.3. SIGN CONVENTION
 9. Any amount that increases the own funds or the capital requirements shall be reported as a positive figure. On the contrary, any amount that reduces the total own funds or the capital requirements shall be reported as a negative figure. Where there is a negative sign (-) preceding the label of an item no positive figure is expected to be reported for that item.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

PART II: TEMPLATE RELATED INSTRUCTIONS

1. CAPITAL ADEQUACY OVERVIEW (CA)
 - 1.1. GENERAL REMARKS
 10. CA templates contain information about Pillar 1 numerators (own funds, Tier 1, Common Equity Tier 1), denominator (own funds requirements), and transitional provisions and its structures in five templates:
 - (a) CA1 template contains the amount of own funds of the institutions, disaggregated in the items needed to get to that amount. The amount of own funds obtained includes the aggregate effect of transitional provisions per type of capital
 - (b) CA2 template summarizes the total risk exposures amounts as defined in Article 92(3) of Regulation (EU) No 575/2013 ('CRR')
 - (c) CA3 template contains the ratios for which CRR state a minimum level, and some other related data
 - (d) CA4 template contains memorandums items needed for calculating items in CA1 as well as information with regard to the CRD capital buffers.
 - (e) CA5 template contains the data needed for calculating the effect of transitional provisions in own funds. CA5 will cease to exist once the transitional provisions will expire.
 11. The templates shall apply to all reporting entities, irrespective of the accounting standards followed, although some items in the numerator are specific for entities applying IAS/IFRS-type valuation rules. Generally, the information in the denominator is linked to the final results reported in the correspondent templates for the calculation of the total risk exposure amount.
 12. The total own funds consist of different types of capital: Tier 1 capital (T1), which is the sum of Common Equity Tier 1 capital (CET1), Additional Tier 1 capital (AT1) as well as Tier 2 capital (T2).
 13. Transitional provisions are treated as follows in CA templates:
 - (a) The items in CA1 are generally gross of transitional adjustments. This means that figures in CA1 items are calculated according to the final provisions (i.e. as if there were no transitional provisions), with the exception of items summarizing the effect of the transitional provisions. For each type of capital (i.e. CET1; AT1 and T2) there are three different items in which all the adjustments due to transitional provisions are included.
 - (b) Transitional provisions may also affect the AT1 and the T2 shortfall (i.e. AT1 or T2 the excess of deduction, regulated in articles 36(1) point (j) and 56 point (e) of CRR respectively), and thus the items containing these shortfalls may indirectly reflect the effect of transitional provisions.
 - (c) Template CA5 is exclusively used for reporting the transitional provisions.
 14. The treatment of Pillar II requirements can be different within the EU (Article 104(2) CRD IV has to be transposed into national regulation). Only the impact of Pillar II requirements on the solvency ratio or the target ratio shall be included in the solvency reporting of CRR. A detailed reporting of Pillar II requirements is not within the mandate of Article 99 CRR.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- a) The templates CA1, CA2 or CA5 only contain data on Pillar I issues.
- b) The template CA3 contains the impact of additional Pillar II-requirements on the solvency ratio on an aggregated basis. One block focuses on the impact of amounts on the ratios, whereas the other block focuses on the ratio itself. Both blocks of ratios do not have any further link to the templates CA1, CA2 or CA5.
- c) The template CA4 contains one cell regarding additional own funds requirements relating to Pillar II. This cell has no link via validation rules to the capital ratios of the CA3 template and reflects Article 104(2) CRD which explicitly mentions additional own funds requirements as one possibility for Pillar II decisions.

1.6. TRANSITIONAL PROVISIONS AND GRANDFATHERED INSTRUMENTS: INSTRUMENTS NOT CONSTITUTING STATE AID (CA 5)

1.6.1. General remarks

15. CA5 summarizes the calculation of own funds elements and deductions subject to the transitional provisions laid down in Articles 465 to 491 of CRR.

16. CA5 is structured as follows:

(a) Template 5.1 summarizes the total adjustments which need to be made to the different components of own funds (reported in CA1 according to the final provisions) as a consequence of the application of the transitional provisions. The elements of this table are presented as ‘adjustments’ to the different capital components in CA1, in order to reflect in own funds components the effects of the transitional provisions.

(b) Template 5.2 provides further details on the calculation of those grandfathered instruments which do not constitute state aid.

17. Institutions shall report in the first four columns the adjustments to Common Equity Tier 1 capital, Additional Tier 1 capital and Tier 2 capital as well as the amount to be treated as risk weighted assets. Institutions are also required to report the applicable percentage in column 050 and the eligible amount without the recognition of transitional provisions in column 060.

18. Institutions shall only report elements in CA5 during the period where transitional provisions in accordance with Part Ten of CRR apply.

19. Some of the transitional provisions require a deduction from Tier 1. If this is the case the residual amount of a deduction or deductions is applied to Tier 1 and there is insufficient AT1 to absorb this amount then the excess shall be deducted from CET1.

1.6.2. C 05.01 — TRANSITIONAL PROVISIONS (CA5.1)

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

20. Institutions shall report in Table 5.1 the transitional provisions to own funds components as laid down in Articles 465 to 491 of CRR, compared to applying the final provisions laid down in Title II of Part Two of CRR.
21. Institutions shall report in rows 020 to 060 information in relation with the transitional provisions of grandfathered instruments. The figures to be reported in columns 010 to 030 of row 060 of CA 5.1 can be derived from the respective sections of CA 5.2.
22. Institutions shall report in rows 070 to 092 information in relation with the transitional provisions of minority interests and additional Tier 1 and Tier 2 instruments issued by subsidiaries (in accordance with Articles 479 and 480 of CRR).
23. In rows 100 onwards institutions shall report information in relation with the transitional provisions of unrealized gains and losses, deductions as well as additional filters and deductions.
24. There might be cases where the transitional deductions of CET1, AT1 or T2 capital exceed the CET1, AT1 or T2 capital of an institution. This effect – if it results from transitional provisions – shall be shown in the CA1 template using the respective cells. As a consequence, the adjustments in the columns of the CA5 template do not include any spill-over effects in the case of insufficient capital available.

030	Adjustments to T2
040	<p>Adjustments included in RWAs</p> <p>Column 040 includes the relevant amounts adjusting the total risk exposure amount of Article 92(3) of CRR due to transitional provisions. The amounts reported shall consider the application of provisions of Chapter 2 or 3 of Title II of Part Three or of Title IV of Part Three in accordance with Art. 92 (4) of CRR. This means that transitional amounts subject to provisions of Chapter 2 or 3 of Title II of Part Three should be reported as risk weighted exposure amounts, whereas transitional amounts subject to Title IV of Part Three should represent the own funds requirements multiplied by 12,5.</p> <p>Whereas columns 010 to 030 have a direct link to the CA1 template, the adjustments to the total risk exposure amount do not have a direct link to the relevant templates for credit risk. If there are adjustments stemming from the transitional provisions to the total risk exposure amount, those adjustments shall be included directly in the CR SA, CR IRB, CR EQU IRB, MKR SA TDI, MKR SA</p>

2. GROUP SOLVENCY: INFORMATION ON AFFILIATES (GS)
- 2.1. GENERAL REMARKS
26. Templates C 06.01 and C 06.02 shall be reported if own funds requirements are calculated on a consolidated basis. This template consists of four parts in order to gather different information on all individual entities (including the reporting institution) included in the scope of consolidation.
- (a) Entities within the scope of consolidation;
- (b) Detailed group solvency information;
- (c) Information on the contribution of individual entities to group solvency;
- (d) Information on capital buffers;
27. Institutions waived according to Article 7 of CRR shall only report the columns 010 to 060 and 250 to 400.
28. The figures reported take into account all applicable transitional provisions of Regulation (EU) No 575/2013 which are applicable at the respective reporting date.
- 2.2. DETAILED GROUP SOLVENCY INFORMATION
29. The second part of this template (detailed group solvency information) in columns 070 to 210 is designed to gather information on credit and other regulated financial institutions which are effectively subject to particular solvency requirements on individual basis. It provides, for each of those entities within the scope of the reporting, the own funds requirements for each risk category and the own funds for solvency purposes.
30. In the case of proportional consolidation of participations, the figures related to own funds requirements and own funds shall reflect the respective proportional amounts.
- 2.3. INFORMATION ON THE CONTRIBUTIONS OF INDIVIDUAL ENTITIES TO GROUP SOLVENCY
31. The objective of the third part of this template (information on the contributions of all entities within CRR scope of consolidation to group solvency), including those that are not subject to particular solvency requirements on an individual basis, in columns 250 to 400, is to identify which entities within the group generate the risks and raise own funds from the market, based on data that are readily available or can easily be reprocessed, without having to reconstruct the capital ratio on a solo or sub-consolidated basis. At the entity level, both risk and own fund figures are contributions to the group figures and not elements of a solvency ratio on a solo basis and as such must not be compared to each other.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

32. The third part also includes the amounts of minority interests, qualifying AT1, and qualifying T2 eligible in the consolidated own funds.
 33. As this third part of the template refers to ‘contributions’, the figures to be reported herein shall defer, when applicable, from the figures reported in the columns referring to detailed group solvency information.
 34. The principle is to delete the cross-exposures within the same groups in a homogeneous way both in terms of risks or own funds, in order to cover the amounts reported in the group's consolidated CA template by adding the amounts reported for each entity in ‘Group Solvency’ template. In cases where the 1 % threshold is not exceeded a direct link to the CA template is not possible.
 35. The institutions shall define the most appropriate breakdown method between the entities to take into account the possible diversification effects for market risk and operational risk.
 36. It is possible for one consolidated group to be included within another consolidated group. This means that the entities within a subgroup shall be reported entity-by-entity in the GS of the entire group, even if the sub-group itself is subject to reporting requirements. If the subgroup is subject to reporting requirements, it shall also report the GS template on an entity-by-entity basis, although those details are included in the GS template of a higher consolidated group.
 37. An institution shall report data of the contribution of an entity when its contribution to the total risk exposure amount exceeds 1 % of the total risk exposure amount of the group or when its contribution to the total own funds exceeds 1 % of the total own funds of the group. This threshold does not apply in the case of subsidiaries or subgroups that provide own funds (in the form of minority interests or qualifying AT1 or T2 instruments included in own funds) to the group.

070-240	<p>INFORMATION ON ENTITIES SUBJECT TO OWN FUNDS REQUIREMENT</p> <p>The section of detailed information (i.e. columns 070 to 240) shall gather information only on those entities and subgroups which, being within the scope of consolidation (Chapter 2 of Title II of Part One of CRR), are effectively subject to solvency requirements according to CRR or provisions at least equivalent to Basel provisions (i.e. reported yes in column 030).</p> <p>Information shall be included about all individual institutions of a consolidated group that are subject to own funds requirements, regardless where they are located.</p> <p>The information reported in this part shall be according to the local solvency rules where the institution is operating (therefore for this template it is not necessary to do a double calculation on an individual basis according to the parent institution's rules). When local solvency rules differ from CRR and a comparable breakdown is not given, the information shall be completed where data is available in the respective granularity. Therefore, this part is a factual template that summarises the calculations</p>

250-400	INFORMATION ON THE CONTRIBUTION OF ENTITIES TO SOLVENCY OF THE GROUP
250-290	CONTRIBUTION TO RISKS The information reported in the following columns shall be according to the solvency rules applicable to the reporting institution.
250	TOTAL RISK EXPOSURE AMOUNT The sum of the columns 260 to 290 shall be reported.
260	CREDIT; COUNTERPARTY CREDIT; DILUTION RISKS, FREE DELIVERIES AND SETTLEMENT/DELIVERY RISK The amount to be reported shall be the risk weighted exposure amounts for credit risk and own funds requirements of settlement/delivery risk as per CRR, excluding any amount related to transactions with other entities included in the Group consolidated solvency ratio computation.
270	POSITION, FX AND COMMODITY RISKS Risk exposure amounts for market risks are to be computed at each entity level following CRR. Entities shall report the contribution to the total risk exposure amounts for position, FX and commodity risk of the group. The sum of amounts reported here corresponds to the amount reported in row 520 'TOTAL RISK EXPOSURE AMOUNTS FOR POSITION, FOREIGN EXCHANGE AND COMMODITY RISKS' of the consolidated report.
280	OPERATIONAL RISK In case of AMA, the reported risk exposure amounts for operational risk include the effect of diversification. Fixed overheads shall be included in this column.

3. CREDIT RISK TEMPLATES

3.1. GENERAL REMARKS

38. There are different sets of templates for the Standardised approach and the IRB approach for credit risk. Additionally, separate templates for the geographical breakdown of positions subject to credit risk shall be reported if the relevant threshold as set out in Article 5(a)(4) is exceeded.

3.1.1. Reporting of CRM techniques with substitution effect

39. Article 235 of CRR describes the computation procedure of the exposure which is fully protected by unfunded protection.

40. Article 236 of CRR describes the computation procedure of exposure which is fully protected by unfunded protection in the case of full protection/partial protection — equal seniority.

41. Articles 196, 197 and 200 of CRR regulate the funded credit protection.

42. Reporting of exposures to obligors (immediate counterparties) and protection providers which are assigned to the same exposure class shall be done as an inflow as well as an outflow to the same exposure class.

43. The exposure type does not change because of unfunded credit protection.

44. If an exposure is secured by an unfunded credit protection, the secured part is assigned as an outflow e.g. in the exposure class of the obligor and as an inflow in the exposure class of the protection provider. However, the type of the exposure does not change due to the change of the exposure class.

45. The substitution effect in the COREP reporting framework shall reflect the risk weighting treatment effectively applicable to the covered part of the exposure. As such, the covered part of the exposure is risk weighted according to the SA approach and shall be reported in the CR SA template.

3.1.2. Reporting of Counterparty Credit Risk

46. Exposures stemming from Counterparty Credit Risk positions shall be reported in templates CR SA or CR IRB independent from whether they are Banking Book items or Trading Book items.

3.2. C 07.00 — CREDIT AND COUNTERPARTY CREDIT RISKS AND FREE DELIVERIES: STANDARDISED APPROACH TO CAPITAL REQUIREMENTS (CR SA)

3.2.1. General remarks

47. The CR SA templates provide the necessary information on the calculation of own funds requirements for credit risk according to the standardised approach. In particular, they provide detailed information on:

a) the distribution of the exposure values according to the different, exposure types, risk weights and exposure classes;

b) the amount and type of credit risk mitigation techniques used for mitigating the risks.

3.2.2. Scope of the CR SA template

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

48. According to Article 112 of CRR each SA exposure shall be assigned to one of the 16 SA exposure classes in order to calculate the own funds requirements.
49. The information in CR SA is requested for the total exposure classes and individually for each of the exposure classes as defined for the standardised approach. The total figures as well as the information of each exposure class are reported in a separate dimension.
50. However the following positions are not within the scope of CR SA:
 - (a) Exposures assigned to exposure class 'items representing securitisation positions' according to Article 112 (m) of CRR which shall be reported in the CR SEC templates.
 - (b) Exposures deducted from own funds.
51. The scope of the CR SA template covers the following own funds requirements:
 - (a) Credit risk in accordance with Chapter 2 (Standardised Approach) of Title II of Part Three of CRR in the banking book, among which Counterparty credit risk in accordance with Chapter 6 (Counterparty credit risk) of Title II of Part Three of CRR in the banking book;
 - (b) Counterparty credit risk in accordance with Chapter 6 (Counterparty credit risk) of Title II of Part Three of CRR in the trading book;
 - (c) Settlement risk arising from free deliveries in accordance with Article 379 of CRR in respect of all the business activities.
52. The scope of the template are all exposures for which the own funds requirements are calculated according to part 3 title II chapter 2 of CRR in conjunction with part 3 title II chapter 4 and 6 of CRR. Institutions that apply Article 94(1) of CRR also need to report their trading book positions in this template when they apply part 3 title II chapter 2 of CRR to calculate the own funds requirements thereof (part 3 title II chapter 2 and 6 and title V of CRR). Therefore the template provides not only detailed information on the type of the exposure (e.g. on balance sheet/off balance sheet items), but also information on the allocation of risk weights within the respective exposure class.
53. In addition CR SA includes memorandum items in rows 290 to 320 in order to collect further information about exposures secured by mortgages on immovable property and exposures in default.
54. These memorandum items shall only be reported for the following exposure classes:
 - (a) Central governments or central banks (Article 112 point (a) of CRR)
 - (b) Regional governments or local authorities (Article 112 point (b) of CRR)
 - (c) Public sector entities (Article 112 point (c) of CRR)
 - (d) Institutions (Article 112 point (f) of CRR)
 - (e) Corporates (Article 112 point (g) of CRR)
 - (f) Retail (Article 112 point (h) of CRR).
55. The reporting of the memorandum items affect neither the calculation of the risk weighted exposure amounts of the exposure classes according to Article 112 points a)

Status: Point in time view as at 31/12/2020.

- to c) and f) to h) of CRR nor of the exposure classes according to Article 112 points i) and j) of CRR reported in CR SA.
56. The memorandum rows provide additional information about the obligor structure of the exposure classes ‘in default’ or ‘secured by immovable property’. Exposures shall be reported in these rows where the obligors would have been reported in the exposure classes ‘Central governments or central banks’, ‘Regional governments or local authorities’, ‘Public sector entities’, ‘Institutions’, ‘Corporates’ and ‘Retail’ of CR SA, if those exposures were not assigned to the exposure classes ‘in default’ or ‘secured by immovable property’. However the figures reported are the same as used to calculate the risk weighted exposure amounts in the exposure classes ‘in default’ or ‘secured by immovable property’.
57. E.g. if an exposure, the risk exposure amounts of which are calculated subject to Article 127 of CRR and the value adjustments are less than 20 %, then this information is reported in CR SA, row 320 in the total and in the exposure class ‘in default’. If this exposure, before it defaulted, was an exposure to an institution then this information shall also be reported in row 320 of exposure class ‘institutions’.
- 3.2.3. Assignment of exposures to exposure classes under the Standardised Approach
58. In order to ensure a consistent categorisation of exposures into the different exposure classes as defined in Article 112 of CRR the following sequential approach shall be applied:
- (a) In the first step the Original exposure pre conversion factors is classified into the corresponding (original) exposure class as referred to in Article 112 of CRR, without prejudice to the specific treatment (risk weight) that each specific exposure shall receive within the assigned exposure class.
- (b) In a second step the exposures may be redistributed to other exposure classes due to the application of credit risk mitigation (CRM) techniques with substitution effects on the exposure (e.g. guarantees, credit derivatives, financial collateral simple method) via inflows and outflows.
59. The following criteria apply for the classification of the Original exposure pre conversion factors into the different exposure classes (first step) without prejudice to the subsequent redistribution caused by the use of CRM techniques with substitution effects on the exposure or to the treatment (risk weight) that each specific exposure shall receive within the assigned exposure class.
60. For the purpose of classifying the original exposure pre conversion factor in the first step, the CRM techniques associated to the exposure shall not be considered (note that they shall be considered explicitly in the second phase) unless a protection effect is intrinsically part of the definition of an exposure class as it is the case in the exposure class mentioned in Article 112 point (i) of CRR (exposures secured by mortgages on immovable property).
61. Article 112 of CRR does not provide criteria for disjoining the exposure classes. This might imply that one exposure could potentially be classified in different exposure classes if no prioritisation in the assessment criteria for the classification is provided. The most obvious case arises between exposures to institutions and corporate with a short-term credit assessment (Article 112 point (n) of CRR) and exposures to institutions (Article 112 point (f) of CRR)/exposures to corporates (Article 112 point (g) of CRR). In this case it is clear that there is an implicit prioritisation in the CRR since it shall be assessed first if a certain exposure fit for being assigned to Short-

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

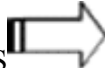

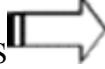

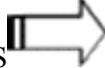

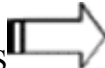

term exposures to institutions and corporate and only afterwards do the same process for exposures to institutions and exposures to corporates. Otherwise it is obvious that the exposure class mentioned in Article 112 point (n) of CRR shall never be assigned an exposure. The example provided is one of the most obvious examples but not the only one. It is worth noting that the criteria used for establishing the exposure classes under the standardised approach are different (institutional categorisation, term of the exposure, past due status, etc.) which is the underlying reason for non disjoint groupings.

62. For a homogeneous and comparable reporting it is necessary to specify prioritisation assessment criteria for the assignment of the Original exposure pre conversion factor by exposure classes, without prejudice to the specific treatment (risk weight) that each specific exposure shall receive within the assigned exposure class. The prioritisation criteria presented below using a decision tree scheme are based on the assessment of the conditions explicitly laid down in the CRR for an exposure to fit in a certain exposure class and, if it is the case, on any decision on the part of the reporting institutions or the supervisor on the applicability of certain exposure classes. As such, the outcome of the exposure assignment process for reporting purposes would be in line with CRR provisions. This does not preclude institutions to apply other internal assignment procedures that may also be consistent with all relevant CRR provisions and its interpretations issued by the appropriate fora.
63. An exposure class shall be given priority to others in the assessment ranking in the decision tree (i.e. it shall be first assessed if an exposure can be assigned to it, without prejudice to the outcome of that assessment) if otherwise no exposures would potentially be assigned to it. This would be the case when in the absence of prioritisation criteria one exposure class would be a subset of others. As such the criteria graphically depicted in the following decision tree would work on a sequential process.
64. With this background the assessment ranking in the decision tree mentioned below would follow the following order:
 1. Securitisation positions;
 2. Items associated with particular high risk;
 3. Equity exposures
 4. Exposures in default;
 5. Exposures in the form of units or shares in collective investment undertakings ('CIU')/
Exposures in the form of covered bonds (disjoint exposure classes);
 6. Exposures secured by mortgages on immovable property;
 7. Other items;
 8. Exposures to institutions and corporates with a short-term credit assessment;
 9. All other exposure classes (disjoint exposure classes) which include Exposures to central governments or central banks; Exposures to regional governments or local authorities; Exposures to public sector entities; Exposures to multilateral development banks; Exposures to international organisations; Exposures to institutions; Exposures to corporate and Retail exposures.

Status: Point in time view as at 31/12/2020.

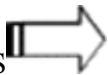

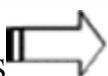

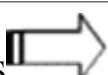

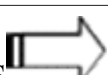

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

65. In the case of exposures in the form of units or shares in collective investment undertakings and where the look through approach (Article 132(3) to (5) of CRR) is used, the underlying individual exposures shall be considered and classified into their corresponding risk weight line according to their treatment, but all the individual exposures shall be classified within the exposure class of exposures in the form of units or shares in collective investment undertakings ('CIU').
66. In the case of 'nth' to default credit derivatives specified in Article 134(6) of CRR, if they are rated, they shall be directly classified as securitisation positions. If they are not rated, they shall be considered in the 'Other items' exposure class. In this latter case the nominal amount of the contract shall be reported as the Original exposure pre conversion factors in the line for 'Other risk weights' (the risk weight used shall be that specified by the sum indicated under Article 134(6) of CRR.
67. In a second step, as a consequence of credit risk mitigation techniques with substitution effects, exposures shall be reallocated to the exposure class of the protection provider.
- DECISION TREE ON HOW TO ASSIGN THE ORIGINAL EXPOSURE PRE CONVERSION FACTORS TO THE EXPOSURE CLASSES OF THE STANDARDISED APPROACH ACCORDING TO CRR**

Original exposure pre conversion factors		
Does it fit for being assigned to the exposure class of Article 112 (m)?	YES 	Securitisation positions
NO 		
Does it fit for being assigned to the exposure class of Article 112 point (k)?	YES 	Items associated with particular high risk (also see Article 128)
NO 		
Does it fit for being assigned to the exposure class of Article 112 point (p)?	YES 	Equity exposures (also see Article 133)
NO 		
Does it fit for being assigned to the exposure class of Article 112 point (j)?	YES 	Exposures in default
NO 		

Status: Point in time view as at 31/12/2020.

Does it fit for being assigned to the exposure classes of Article 112 points (l) and (o)?	YES 	Exposures in the form of units or shares in collective investment undertakings (CIU) Exposures in the form of covered bonds (also see Article 129) These two exposure classes are disjoint among themselves (see comments on the look-through approach in the answer above). Therefore the assignment to one of them is straightforward.
NO 		
Does it fit for being assigned to the exposure class of Article 112 point (i)?	YES 	Exposures secured by mortgages on immovable property (also see Article 124)
NO 		
Does it fit for being assigned to the exposure class of Article 112 point (q)?	YES 	Other items
NO 		
Does it fit for being assigned to the exposure class of Article 112 point (n)?	YES 	Exposures to institutions and corporates with a short-term credit assessment
NO 		

The exposure classes below are disjoint among themselves. Therefore the assignment to one of them is straightforward.

- Exposures to central governments or central banks
- Exposures to regional governments or local authorities
- Exposures to public sector entities
- Exposures to multilateral development banks
- Exposures to international organisations
- Exposures to institutions
- Exposures to corporates
- Retail exposures

3.2.4. Clarifications on the scope of some specific exposure classes referred to in Article 112 of CRR

3.2.4.1. Exposure Class ‘Institutions’

68. Reporting of intra-group exposures according to Article 113(6) to (7) of CRR shall be done as follows:

69. Exposures which fulfil the requirements of Article 113(7) of CRR shall be reported in the respective exposure classes where they would be reported if they were no intra-group exposures.

70. According Article 113(6) and (7) of CRR ‘an institution may, subject to the prior approval of the competent authorities, decide not to apply the requirements of paragraph 1 of this Article to the exposures of that institution to a counterparty which is its parent undertaking, its subsidiary, a subsidiary of its parent undertaking or an undertaking linked by a relationship within the meaning of Article 12(1) of Directive 83/349/EEC.’ This means that intra-group counterparties are not necessarily institutions but also undertakings which are assigned to other exposure classes, e.g. ancillary services undertakings or undertakings within the meaning of Article 12(1) of Directive 83/349/EEC. Therefore intra-group exposures shall be reported in the corresponding exposure class.

3.2.4.2. Exposure Class ‘Covered Bonds’

71. The assignment of SA exposures to the exposure class ‘covered bonds’ shall be done as follows:

72. Bonds as defined in Article 52(4) of Directive 2009/65/EC shall fulfil the requirements of Article 129(1) to (2) of CRR to be classified in the exposure class ‘Covered Bonds’. The fulfilment of those requirements has to be checked in each case. Nevertheless, bonds according to Article 52(4) of Directive 2009/65/EC and issued before 31 December 2007, are also assigned to the exposure class ‘Covered Bonds’ because of Article 129(6) of CRR.

3.2.4.3. Exposure class ‘Collective Investment Undertakings’

73. Where the possibility according to Article 132(5) of CRR is used, exposures in the form of units or shares in CIUs shall be reported as on balance sheet items according to Article 111(1) sentence 1 of CRR.

3.3. CREDIT AND COUNTERPARTY CREDIT RISKS AND FREE DELIVERIES: IRB APPROACH TO OWN FUNDS REQUIREMENTS (CR IRB)

3.3.1. Scope of the CR IRB template

74. The scope of the CR IRB template covers own funds requirements for:

- i. Credit risk in the banking book, among which:
 - Counterparty credit risk in the banking book;
 - Dilution risk for purchased receivables;
- ii. Counterparty credit risk in the trading book;

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- iii. Free deliveries resulting from all business activities..
- 75. The scope of the template refers to the exposures for which the risk weighted exposure amounts are calculated according to Articles 151 to 157 Part Three Title II Chapter 3 CRR (IRB approach).
- 76. The CR IRB template does not cover the following data:
 - i. Equity exposures, which are reported in the CR EQU IRB template;
 - ii. Securitisation positions, which are reported in the CR SEC SA, CR SEC IRB and/or CR SEC Details templates;
 - iii. ‘Other non-obligation assets’, according to Article 147(2) point (g) CRR. The risk weight for this exposure class has to be set at 100 % at any time except for cash in hand, equivalent cash items and exposures that are residual values of leased assets, according to Article 156 CRR. The risk weighted exposure amounts for this exposure class are reported directly in the CA-Template;
 - iv. Credit valuation adjustment risk, which is reported on the CVA Risk template;

The CR IRB template does not require a geographical breakdown of IRB exposures by residence of the counterparty. This breakdown is reported in the template CR GB.
- 77. In order to clarify whether the institution uses its own estimates for LGD and/or credit conversion factors the following information shall be provided for each reported exposure class:
 - ‘NO’ = in case the supervisory estimates of LGD and credit conversion factors are used (Foundation IRB)
 - ‘YES’ = in case own estimates of LGD and credit conversion factors are used (Advanced IRB)

In any case, for the reporting of the retail portfolios ‘YES’ has to be reported.

In case an institution uses own estimates of LGDs to calculate risk weighted exposure amounts for a part of its IRB exposures as well as uses supervisory LGDs to calculate risk weighted exposure amounts for the other part of its IRB exposures, an CR IRB Total for F-IRB positions and one CR IRB Total for A-IRB positions has to be reported.

3.3.2. Breakdown of the CR IRB template

- 78. The CR IRB consists of two templates. CR IRB 1 provides a general overview of IRB exposures and the different methods to calculate total risk exposure amounts as well as a breakdown of total exposures by exposure types. CR IRB 2 provides a breakdown of total exposures assigned to obligor grades or pools. The templates CR IRB 1 and CR IRB 2 shall be reported separately for the following exposure and sub-exposure classes:
 - 1. Total

(The Total template must be reported for the Foundation IRB and, separately for the Advanced IRB approach.)
 - 2. Central banks and central governments

(Article 147(2)(a) CRR)
 - 3. Institutions

010	<p>INTERNAL RATING SYSTEM/PD ASSIGNED TO THE OBLIGOR GRADE OR POOL (%)</p> <p>The PD assigned to the obligor grade or pool to be reported shall be based on the provisions laid down in Article 180 of CRR. For each individual grade or pool, the PD assigned to the specific obligor grade or pool shall be reported. For figures corresponding to an aggregation of obligor grades or pools (e.g. total exposures) the exposure weighted average of the PDs assigned to the obligor grades or pools included in the aggregation shall be provided. The exposure value (column 110) shall be used for the calculation of the exposure-weighted average PD.</p>

	<p>For each individual grade or pool the PD assigned to the specific obligor grade or pool shall be reported. All reported risk parameters shall be derived from the risk parameters used in the internal rating system approved by the respective competent authority.</p> <p>It is neither intended nor desirable to have a supervisory master scale. If the reporting institution applies a unique rating system or is able to report according to an internal master scale, this scale is used.</p> <p>Otherwise, the different rating systems shall be merged and ordered according to the following criteria: Obligor grades of the different rating systems shall be pooled and ordered from the lower PD assigned to each obligor grade to the higher. Where the institution uses a large number of grades or pools, a reduced number of grades or pools to be reported may be agreed with the competent authorities.</p> <p>Institutions shall contact their competent authority in advance, if they want to report a different number of grades in comparison with the internal number of grades.</p> <p>For the purposes of weighting the average PD the exposure value reported in column 110 is used. All exposures, including defaulted exposures are to be considered for the purpose of the calculation of the exposure weighted average PD (e.g. for ‘total exposure’). Defaulted exposures are those assigned to the last rating grade/s with a PD of 100 %.</p>
020	<p>ORIGINAL EXPOSURE PRE CONVERSION FACTORS</p> <p>Institutions report the exposure value before taking into account any value adjustments, provisions, effects due to credit risk mitigation techniques or credit conversion factors.</p> <p>The original exposure value shall be reported in accordance with Article 24 of CRR and Article 166(1) and (2) and (4) to (7) of CRR. The effect resulting from Article 166(3) of CRR (effect of on balance sheet netting of loans and deposits) is reported separately as Funded Credit Protection and therefore shall not reduce the Original Exposure.</p>

020	Defaulted exposures Original exposure pre conversion factors for those exposures which have been classified as ‘exposures in default’ and for defaulted exposures assigned to the exposure classes ‘exposures associated with particularly high risk’ or ‘equity exposures’. This ‘memorandum item’ provides additional information about the obligor structure of defaulted exposures. Exposures classified as ‘exposures in default’ in accordance with Article 112 point (j) CRR shall be reported where the obligors would have been reported if those exposures were not assigned to the exposure classes ‘exposures in default’. This information is a ‘memorandum item’ – hence does not affect the calculation of risk weighted exposure amounts of exposure classes ‘exposures in default’, ‘exposures associated with particularly high risk’ or ‘equity exposures’ according to Article 112 points (j), (k) respectively (p) of CRR.

3.4.3. C 09.04 – Breakdown of credit exposures relevant for the calculation of the countercyclical buffer by country and institution-specific countercyclical buffer rate (CCB)

3.4.3.1. General remarks

82. This table is implemented in order to receive more information regarding the elements of the institution specific countercyclical capital buffer. The information requested refers to the own funds requirements determined in accordance with Part Three, Title II and Title IV of the CRR and the geographical location for credit exposures, securitisation exposures and trading book exposures relevant for the calculation of the institution specific counter-cyclical capital buffer (CCB) in accordance with Article 140 CRD (relevant credit exposures).

83. Information in template C 09.04 is requested for the ‘Total’ of relevant credit exposures across all jurisdictions where these exposures are located and individually for each of the jurisdictions in which relevant credit exposures are located. The total figures as well as the information of each jurisdiction are reported in a separate dimension.

84. The threshold set in Article 5 (a) (4) of this Regulation is not relevant for the reporting of this breakdown.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

85. In order to determine the geographical location, the exposures are allocated on an immediate obligor basis as provided for in Commission Delegated Regulation (EU) No 1152/2014 of 4 June 2014 with regard to regulatory technical standards on the identification of the geographical location of the relevant credit exposures for calculating institution-specific countercyclical capital buffer rates. Therefore CRM techniques do not change the allocation of an exposure to its geographical location for the purpose of reporting information set out in this template.

3.5. C 10.01 AND C 10.02 – EQUITY EXPOSURES UNDER THE INTERNAL RATINGS BASED APPROACH (CR EQU IRB 1 AND CR EQU IRB 2)

3.5.1. General remarks

- 86. The CR EQU IRB template consists of two templates: CR EQU IRB 1 provides a general overview of IRB exposures of the equity exposure class and the different methods to calculate total risk exposure amounts. CR EQU IRB 2 provides a breakdown of total exposures assigned to obligor grades in the context of the PD/LGD approach. 'CR EQU IRB' refers to both 'CR EQU IRB 1' and 'CR EQU IRB 2' templates, as applicable, in the following instructions.
- 87. The CR EQU IRB template provides information on the calculation of risk weighted exposure amounts for credit risk (Article 92(3) point (a) of CRR) according to the IRB method (Part Three, Title II, Chapter 3 of CRR) for equity exposures referred to in Article 147(2) point (e) of CRR.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

88. According to Article 147(6) of CRR, the following exposures shall be assigned to the equity exposure class:
- (a) non-debt exposures conveying a subordinated, residual claim on the assets or income of the issuer; or
 - (b) debt exposures and other securities, partnerships, derivatives, or other vehicles, the economic substance of which is similar to the exposures specified in point (a).
89. Collective investment undertakings treated according to the simple risk weight approach as referred to in Article 152 of CRR shall also be reported in the CR EQU IRB template.
90. In accordance with Article 151(1) of CRR, institutions shall provide the CR EQU IRB template when applying one of the three approaches referred to in Article 155 of CRR:
- the Simple Risk Weight approach,
 - the PD/LGD approach, or
 - the Internal Models approach.

Moreover, institutions applying the IRB approach shall also report in the CR EQU IRB template risk-weighted exposure amounts for those equity exposures which attract a fixed risk-weight treatment (without however being explicitly treated according to the Simple Risk Weight approach or the (temporary or permanent) partial use of the credit risk standardised approach (e.g. equity exposures attracting a risk-weight of 250 % in accordance with Article 48(4) of CRR, respectively a risk-weight of 370 % in accordance with Article 471(2) of CRR)).

91. The following equity claims shall not be reported in the CR EQU IRB template:
- Equity exposures in the trading book (in case where institutions are not exempted from calculating own funds requirements for trading book positions according to Article 94 of CRR).
 - Equity exposures subject to the partial use of the standardised approach (Article 150 of CRR), including:
 - Grandfathered equity exposures according to Article 495(1) of CRR,
 - Equity exposures to entities whose credit obligations are assigned a 0 % risk weight under the Standardised Approach, including those publicly sponsored entities where a 0 % risk weight can be applied (Article 150(1) point (g) of CRR),
 - Equity exposures incurred under legislated programmes to promote specified sectors of the economy that provide significant subsidies for the investment to the institution and involve some form of government oversight and restrictions on the equity investments (Article 150(1) point (h) of CRR).
 - Equity exposures to ancillary services undertakings whose risk weighted exposure amounts may be calculated according to the treatment of ‘other non credit-obligation assets’ (in accordance with Article 155(1) of CRR).
 - Equity claims deducted from own funds in accordance with Articles 46 and 48 of the CRR.

- 3.5.2. Instructions concerning specific positions (applicable to both CR EQU IRB 1 and CR EQU IRB 2)

Institutions applying the PD/LGD approach (Article 155(3) of CRR) report the requested information in the CR EQU IRB 2 template. In case where institutions using the PD/LGD approach apply a unique rating system or are able to report according to an internal master scale, they report in CR EQU IRB 2 the rating grades or pools associated to this unique rating system/masterscale. In any other case, the different rating systems shall be merged and ordered according to the following criteria: Obligor grades or pools of the different rating systems shall be pooled together and ordered from the lower PD assigned to each obligor grade or pool to the higher.

3.6. C 11.00 – SETTLEMENT/DELIVERY RISK (CR SETT)

3.6.1. General remarks

93. This template requests information on both trading and non-trading book transactions which are unsettled after their due delivery dates, and their corresponding own funds requirements for settlement risk according to Articles 92(3) point (c) ii) and 378 of CRR.
94. Institutions report in the CR SETT template information on the settlement/delivery risk in connection with debt instruments, equities, foreign currencies and commodities held in their trading or non-trading book.
95. According to Article 378 of CRR, repurchase transactions, securities or commodities lending and securities or commodities borrowing in connection with debt instruments, equities, foreign currencies and commodities are not subject to settlement/delivery risk. Note however that, derivatives and long settlement transactions unsettled after their due delivery dates are nevertheless subject to own funds requirements for settlement/delivery risk as determined in Article 378 of CRR.
96. In the case of unsettled transactions after the due delivery date, institutions calculate the price difference to which they are exposed. This is the difference between the agreed settlement price for the debt instrument, equity, foreign currency or commodity in question and its current market value, where the difference could involve a loss for the institution.
97. Institutions multiply this difference by the appropriate factor of Table 1 of Article 378 of CRR to determine the corresponding own funds requirements.
98. According to Article 92(4) Point (b), the own funds requirements for settlement/delivery risk shall be multiplied by 12.5 to calculate the risk exposure amount.
99. Note that own funds requirements for free deliveries as laid down in Article 379 of CRR are not within the scope of the CR SETT template; the latter shall be reported in the credit risk templates (CR SA, CR IRB).

3.7. C 12.00 – CREDIT RISK: SECURITISATION — STANDARDISED APPROACH TO OWN FUNDS REQUIREMENTS (CR SEC SA)

3.7.1. General remarks

100. The information in this template is requested for all securitisations for which a significant risk transfer is recognised and in which the reporting institution is involved in a securitisation treated under the Standardised Approach. The information to be reported is contingent on the role of the institution as for the securitisation. As such, specific reporting items are applicable for originators, sponsors and investors.
101. The CR SEC SA template gathers joint information on both traditional and synthetic securitisations held in the banking book, as defined in Article 242(10) and (11) of CRR, respectively.

3.7.2. Instructions concerning specific positions

102. The CR SEC SA template is divided into three major blocks of rows which gather data on the originated/sponsored/retained or purchased exposures by originators, investors and sponsors. For each of them, the information is broken down by on-balance sheet items and off-balance sheet items and derivatives as well as by securitisations and re-securitisations.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

103. Positions treated according to the ratings based method and unrated positions (exposures at reporting date) are also broken down according to the credit quality steps applied at inception (last block of rows). Originators, sponsors as well as investors shall report this information.

Rows	
010	<p>TOTAL EXPOSURES Total exposures refer to the total amount of outstanding securitisations. This row summarizes all the information reported by originators, sponsors and investors in subsequent rows.</p>
020	<p>OF WHICH: RE-SECURITISATIONS Total amount of outstanding re-securitisations according to definitions in Article 4(1)(63) and (64) of CRR.</p>
030	<p>ORIGINATOR: TOTAL EXPOSURES This row summarizes information on on-balance items and off-balance sheet items and derivatives and early amortisation of those securitisation positions for which the institution plays the role of originator, as defined by Article 4(1)(13) of CRR.</p>
040-060	<p>ON-BALANCE SHEET ITEMS Article 246(1) point (a) of CRR states that for those institutions which calculate risk-weighted exposure amounts under the Standardised Approach, the exposure value of an on-balance sheet securitisation position shall be its accounting value after application of specific credit risk adjustments. On-balance sheet items are broken down by securitisations (row 050) and re-securitisations (row 060).</p>
070-090	<p>OFF-BALANCE SHEET ITEMS AND DERIVATIVES These rows gather information on off-balance sheet items and derivatives securitisation positions subject to a conversion factor under the securitisation framework. The exposure value of an off-balance sheet securitisation position shall be its nominal value, less any specific credit risk adjustment of that securitisation position, multiplied by a 100 % conversion figure unless otherwise specified. 3.8. C 13.00 — CREDIT RISK – SECURITISATIONS: INTERNAL RATINGS BASED APPROACH TO OWN FUNDS REQUIREMENTS (CR SEC IRB)

3.8.1. General remarks

104. The information in this template is requested for all securitisations for which a significant risk transfer is recognised and in which the reporting institution is involved in a securitisation treated under the Internal Ratings Based Approach.

105. The information to be reported is contingent on the role of the institution as for the securitisation. As such, specific reporting items are applicable for originators, sponsors and investors.

106. The CR SEC IRB template has the same scope as the CR SEC SA, it gathers joint information on both traditional and synthetic securitisations held in the banking book.

3.8.2. Instructions concerning specific positions

Columns

010	TOTAL AMOUNT OF SECURITISATION EXPOSURES ORIGINATED

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

	<p>For the row total on balance sheet items the amount reported under this column corresponds to the outstanding amount of securitised exposures at the reporting date. See column 010 of CR SEC SA.</p>
020-040	<p>SYNTHETIC SECURITISATIONS: CREDIT PROTECTION TO THE SECURITISED EXPOSURES Articles 249 and 250 of CRR. Maturity mismatches shall not be taken into account in the adjusted value of the credit risk mitigation techniques involved in the securitisation structure.</p>
020	<p>(-) FUNDED CREDIT PROTECTION (C_{VA}) The detailed calculation procedure of the volatility-adjusted value of the collateral (C_{VA}) which is expected to be reported in this column is established in Article 223(2) of CRR.</p>
030	<p>(-) TOTAL OUTFLOWS: UNFUNDED CREDIT PROTECTION ADJUSTED VALUES (G*) Following the general rule for ‘inflows’ and ‘outflows’ the amounts reported under column 030 of the CR SEC IRB template shall appear as ‘inflows’ in the corresponding credit risk template (CR SA or CR IRB) and exposure class relevant for the protection provider (i.e. the third party to which the tranche is transferred by means of unfunded credit protection). The calculation procedure of the ‘foreign exchange risk’- adjusted nominal amount of the credit protection (G*) is established in Article 233(3) of CRR.</p>
040	<p>NOTIONAL AMOUNT RETAINED OR REPURCHASED OF CREDIT PROTECTION All tranches which have been retained or bought back, e.g. retained first loss positions, shall be reported with their nominal amount. The effect of supervisory haircuts in the credit protection shall not be taken into account when computing the retained or repurchased amount of credit protection.</p>
050	<p>SECURITISATION POSITIONS: ORIGINAL EXPOSURE PRE CONVERSION FACTORS</p>

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. 	<p>Securitisation positions held by the reporting institution, calculated according to Article 246(1)(b), (d) and (e), and (2) of CRR, without applying credit conversion factors and gross of value adjustments and provisions. Netting only relevant with respect to multiple derivative contracts provided to the same SSPE, covered by eligible netting agreement.</p> <p>Value adjustments and provisions to be reported in this column only refer to securitisation positions. Value adjustments of securitized positions are not considered.</p> <p>In case of early amortisation clauses, institutions must specify the amount of 'originator's' interest' as defined in Article 256(2) of CRR.</p> <p>In synthetic securitisations, the positions held by the originator in the form of on-balance sheet items and/or investor's interest (early amortisation) shall be the result of the aggregation of columns 010 to 040.</p>
060-090	<p>CREDIT RISK MITIGATION (CRM) TECHNIQUES WITH SUBSTITUTION EFFECTS ON THE EXPOSURE</p> <p>See Article 4(1)(57) and Part Three, Title II, Chapter 4 of CRR.</p> <p>This block of columns gathers information on credit risk mitigation techniques that reduce the credit risk of an exposure or exposures via the substitution of exposures (as indicated below for Inflows and Outflows).</p>
060	<p>(-) UNFUNDED CREDIT PROTECTION: ADJUSTED VALUES (G_A)</p> <p>Unfunded credit protection is defined in Article 4(1)(59) of CRR.</p> <p>Article 236 of CRR describes the computation procedure of G_A in the case of full protection/partial protection — equal seniority.</p> <p>This piece of information is related to columns 040 and 050 of the CR IRB template.</p>
070	<p>(-) FUNDED CREDIT PROTECTION</p> <p>Funded credit protection is defined in Article 4(1)(58) of CRR.</p> <p>Since the Financial Collateral Simple Method is not applicable, only funded credit protection according to Article 200 of CRR shall be reported in this column.</p>

	This piece of information is related to column 060 of the CR IRB template.
080-090	SUBSTITUTION OF THE EXPOSURE DUE TO CRM: Inflows and outflows within the same exposure classes and, when relevant, risk weights or obligor grades shall also be reported.
080	(-) TOTAL OUTFLOWS Article 236 of CRR. Outflows correspond to the covered part of the ‘Exposure net of value adjustments and provisions’, that is deducted from the obligor’s exposure class and, when relevant, risk weight or obligor grade, and subsequently assigned to the protection provider’s exposure class and, when relevant, risk weight or obligor grade. This amount shall be considered as an Inflow into the protection provider’s exposure class and, when relevant, risk weights or obligor grades. This piece of information is related to column 070 of the CR IRB template.
090	TOTAL INFLOWS This piece of information is related to column 080 of the CR IRB template.
100	EXPOSURE AFTER CRM SUBSTITUTION EFFECTS PRE CONVERSION FACTORS Exposure assigned in the corresponding risk weight and exposure class after taking into account outflows and inflows due to ‘Credit risk mitigation (CRM) techniques with substitution effects on the exposure’. This piece of information is related to column 090 of the CR IRB template.
110	(-) CREDIT RISK MITIGATION TECHNIQUES AFFECTING THE AMOUNT OF THE EXPOSURE: FUNDED CREDIT PROTECTION FINANCIAL COLLATERAL COMPREHENSIVE METHOD ADJUSTED VALUE (CVAM) Articles 218 to 222 of CRR. This item also includes credit linked notes (Article 218 of CRR).
120	FULLY ADJUSTED EXPOSURE VALUE (E*)

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. 	Securitisation positions according to Article 246 of CRR, therefore without applying the conversion factors laid down in Article 246(1) point (c) of CRR.
130-160	<p>BREAKDOWN OF THE FULLY ADJUSTED EXPOSURE VALUE (E*) OF OFF BALANCE SHEET ITEMS ACCORDING TO CONVERSION FACTORS</p> <p>Article 246(1) point (c) of CRR foresees that the exposure value of an off-balance sheet securitisation position shall be its nominal value multiplied by a conversion figure. This conversion figure shall be 100 % unless otherwise specified.</p> <p>In this respect, Article 4(1)(56) of CRR defines conversion factor.</p> <p>For reporting purposes, fully adjusted exposure values (E*) shall be reported according to the following four mutually exclusive intervals of conversion factors: 0 %, (0 %, 20 %], (20 %, 50 %] and (50 %, 100 %].</p>
170	<p>EXPOSURE VALUE</p> <p>Securitisation positions according to Article 246 of CRR.</p> <p>This piece of information is related to column 110 of the CR IRB template.</p>
180	<p>(-) EXPOSURE VALUE DEDUCTED FROM OWN FUNDS</p> <p>Article 266(3) of CRR foresees that in case of a securitisation position in respect of which a 1 250 % risk weight applies, institutions may, as an alternative to including the position in their calculation of risk-weighted exposure amounts, deduct from own funds the exposure value of the position.</p>
190	<p>EXPOSURE VALUE SUBJECT TO RISK WEIGHTS</p>
200-320	<p>RATINGS BASED METHOD (CREDIT QUALITY STEPS)</p> <p>Article 261 of CRR.</p> <p>IRB-Securitisation positions with an inferred rating according to Article 259(2) of CRR shall be reported as positions with a rating. Exposure values subject to risk weights are broken down according to credit quality steps (CQS) as envisaged for the IRB Approach Article 261(1) Table 4 of CRR.</p>

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

330	<p>SUPERVISORY FORMULA METHOD For the Supervisory Formula Method (SFM), Article 262 of CRR. The risk weight for a securitisation position shall be the greater of 7 % or the risk weight to be applied in accordance with the formulas provided.</p>
340	<p>SUPERVISORY FORMULA METHOD: AVERAGE RISK WEIGHT Credit risk mitigation on securitisation positions may be recognised in accordance with Article 264 of CRR. In this case, the institution shall indicate the ‘effective risk weight’ of the position when full protection has been received, according to what is established in Article 264(2) of CRR (the effective risk weight equals the risk-weighted exposure amount of the position divided by the exposure value of the position, multiplied by 100). When the position benefits from partial protection, the institution must apply the Supervisory Formula Method using the ‘T’ adjusted according to what is established in Article 264(3) of CRR. Weighted average risk weights shall be reported in this column.</p>
350	<p>LOOK-THROUGH The look-through columns comprise all the cases of unrated exposures where the risk weight is obtained from the underlying portfolio of exposures (highest risk weight of the pool). Article 263(2) and (3) of CRR envisage an exceptional treatment where K_{irb} cannot be calculated. The undrawn amount of the liquidity facilities shall be reported under ‘Off balance sheet items and derivatives’. As long as an originator would be under the exceptional treatment where K_{irb} cannot be calculated, then column 350 would be the right column to use for the reporting of the risk weighting treatment given to the exposure value of a liquidity facility subject to the treatment laid down in Article 263 of CRR. For early amortisations see Articles 256(5) and 265 of CRR.</p>

	Exposure value weighted average risk weight shall be provided.
370	INTERNAL ASSESSMENT APPROACH Article 259(3) and (4) of CRR envisages the 'Internal Assessment Approach' (IAA) for positions in ABCP programmes.
380	IAA: AVERAGE RISK WEIGHT Weighted average risk weights shall be reported in this column.
390	(-) REDUCTION IN RISK WEIGHTED EXPOSURE AMOUNT DUE TO VALUE ADJUSTMENTS AND PROVISIONS Institutions applying the IRB Approach shall follow Article 266(1) (only applicable for originators, when the exposure has not been deducted from own funds) and (2) of CRR. Value adjustments and provisions (Article 159 of CRR) for credit losses made in accordance with the accounting framework to which the reporting entity is subject. Value adjustments include any amount recognized in profit or loss for credit losses of financial assets since their initial recognition in the balance sheet (including losses due to credit risk of financial assets measured at fair value that shall not be deducted from the exposure value) plus the discounts on exposures purchased when in default according to Article 166(1) of CRR. Provisions include accumulated amounts of credit losses in off-balance sheet items.
400	RISK-WEIGHTED EXPOSURE AMOUNT Total risk-weighted exposure amount calculated according to Part Three, Title II, Chapter 5, Section 3 of CRR prior to adjustments due to maturity mismatches or infringement of due diligence provisions, and excluding any risk weighted exposure amount corresponding to exposures redistributed via outflows to another template.
410	RWEA OF WHICH: SYNTHETIC SECURITISATIONS For synthetic securitisations with maturity mismatches, the amount to be reported in this column shall ignore any maturity mismatch.
420	OVERALL EFFECT (ADJUSTMENT) DUE TO INFRINGEMENT OF THE DUE DILIGENCE PROVISIONS

Status: Point in time view as at 31/12/2020.

	<p>Articles 14(2), 406(2) and 407 of CRR foresee that whenever certain requirements are not met by the institution, Member States shall ensure that the competent authorities impose a proportionate additional risk weight of no less than 250 % of the risk weight (capped at 1 250 %) which would apply to the relevant securitisation positions under Part Three, Title II, Chapter 5, Section 3 of CRR.</p>
<p>430</p>	<p>ADJUSTMENT TO THE RISK-WEIGHTED EXPOSURE AMOUNT DUE TO MATURITY MISMATCHES For maturity mismatches in synthetic securitisations RW*-RW(SP), as defined in Article 250 of CRR, shall be included, except in the case of tranches subject to a risk weighting of 1 250 % where the amount to be reported is zero. Note that RW(SP) not only includes the risk weighted exposure amounts reported under column 400 but also the risk weighted exposure amounts corresponding to exposures redistributed via outflows to other templates. Negative values shall be reported in this column.</p>
<p>440-450</p>	<p>TOTAL RISK-WEIGHTED EXPOSURE AMOUNT: BEFORE CAP/AFTER CAP Total risk-weighted exposure amount calculated according to Part Three, Title II, Chapter 5, Section 3 of CRR, before (col 440)/after (col 450) applying the limits specified in Article 260 of CRR. Additionally Article 265 of CRR (additional own funds requirements for securitisations of revolving exposures with early amortisation provisions) has to be considered.</p>

110. This template is to be reported for:
- a. Securitisations originated/sponsored by the reporting institution in case it holds at least one position in the securitisation. This means that, regardless of whether there has been a significant risk transfer or not, institutions shall report information on all the positions they hold (either in the banking book or trading book). Positions held include those positions retained due to Article 405 of CRR.
 - b. Securitisations originated/sponsored by the reporting institution during the year of report⁽⁵⁾, in case it holds no position.
 - c. Securitisations, the ultimate underlying of which are financial liabilities originally issued by the reporting institution and (partially) acquired by a securitisation vehicle. This underlying could include covered bonds or other liabilities and shall be identified as such in column 160.
 - d. Positions held in securitisations where the reporting institution is neither originator nor sponsor (i.e. investors and original lenders).
111. This template shall be reported by consolidated groups and stand-alone institutions⁽⁶⁾ located in the same country where they are subject to own funds requirements. In case of securitisations involving more than one entity of the same consolidated group, the entity-by-entity detail breakdown shall be provided.
112. On account of Article 406(1) of CRR, which establishes that institutions investing in securitisation positions shall acquire a great deal of information on them in order to comply with due diligence requirements the reporting scope of the template is applied to a limited extent to investors. In particular, they shall report columns 010-040; 070-110; 160; 190; 290-400; 420-470.
113. Institutions playing the role of original lenders (not performing also the role of originators or sponsors in the same securitisation) shall generally report the template to the same extent as investors.

030	<p>IDENTIFIER OF THE ORIGINATOR (Code/Name) The code given by the supervisory authority to the originator or, if not available, the name of the institution itself shall be reported for this column. In the case of multi-seller securitisations the reporting entity shall provide the identifier of all the entities within its consolidated group that are involved (as originator, sponsor or original lender) in the transaction. Whenever the code is not available or is not known by the reporting entity, the name of the institution shall be reported.</p>
040	<p>SECURITISATION TYPE: (TRADITIONAL/SYNTHETIC) Report the following abbreviations: — ‘T’ for Traditional; — ‘S’ for Synthetic. The definitions of ‘traditional securitisation’ and ‘synthetic securitisation’ is provided in Article 242(10) and (11) of CRR.</p>
050	<p>ACCOUNTING TREATMENT: SECURITISED EXPOSURES ARE KEPT OR REMOVED FROM THE BALANCE SHEET? Originators, sponsors and original lenders shall report one of the following abbreviations: — ‘K’ if entirely recognised — ‘P’ if partially derecognised — ‘R’ if entirely derecognised — ‘N’ if not applicable. This column summarises the accounting treatment of the transaction. In case of synthetic securitisations, originators shall report that securitised exposures are removed from the balance sheet. In case of the securitisations of liabilities originators shall not report this column. <p>060</p>	<p>SOLVENCY TREATMENT: SECURITISATION POSITIONS SUBJECT TO OWN FUNDS REQUIREMENTS? Originators, only, shall report the following abbreviations: — ‘N’ not subject to own funds requirements; — ‘B’ banking book; — ‘T’ trading book; — ‘A’ partly in both books. Articles 109, 243 and 244 of CRR. This column summarises the solvency treatment of the securitisation scheme by the originator. It indicates whether own funds requirements are computed according to securitised exposures or securitisation positions (banking book/trading book). If own funds requirements are based on <i>securitised exposures</i> (for not being significant risk transfer) the computation of own funds requirements for credit risk shall be reported in the CR SA template, in case the Standardised Approach is used, or in the CR IRB template, in case the Internal Ratings Based Approach is used by the institution. Conversely, if own funds requirements are based on <i>securitisation positions held in the banking book</i> (for being significant risk transfer) the computation of own funds requirements for credit risk shall be reported in the CR SEC SA template or in the CR SEC IRB template. In the case of <i>securitisation positions held in the trading book</i> the computation of own funds requirements for market risk shall be reported in the MKR SA TDI (standardised general position risk) and in the MKR SA SEC or MKR SA CTP (standardised specific position risk) or in the MKR IM (internal models) templates. In the case of the securitisations of liabilities originators shall not report this column.</p>

<p>090</p>	<p>% OF RETENTION AT REPORTING DATE</p> <p>The retention of <i>material net economic interest by the originator, sponsor or original lender</i> of the securitisation shall be no less than 5 % (at origination date). Notwithstanding Article 405(1) of CRR, measurement of retention at origination can typically be interpreted as being when the exposures were first securitised, and not when the exposures were first created (for instance, not when the underlying loans were first extended). Measurement of retention at origination means that 5 % is the retention percentage that is required at the point in time when such retention level was measured and the requirement fulfilled (for instance, when the exposures were first securitised); dynamic re-measurement and readjustment of the retained percentage throughout the life of the transaction is not required. 140-220	<p>SECURITISED EXPOSURES Columns 140 to 220 request information on several features of the securitised portfolio by the reporting entity.</p>
140	<p>TOTAL AMOUNT Institutions shall report the value of the securitised portfolio at reporting date, i.e. the outstanding amount of the securitised exposures. In the case of traditional securitisations no other assets of the securitisation pool shall be included. In the case of multi-seller securitisation schemes (i.e. with more than one originator) only the amount corresponding to the reporting entity's contribution in the securitised portfolio shall be reported. In the case of securitisation schemes backed by closed pools (i.e. the portfolio of securitised assets cannot be enlarged after the origination date) the amount will progressively be reduced. This piece of information shall be reported even when the reporting entity does not hold any positions in the securitisation.</p>
150	<p>INSTITUTION'S SHARE (%) It shall be reported the institution's share (percentage with two decimals) at reporting date in the securitised portfolio. The figure to be reported in this column is, by default, 100 % except for multi-seller securitisation schemes. In that case the reporting entity shall report its current contribution to the securitised portfolio (equivalent to column 140 in relative terms). This piece of information shall be reported even when the reporting entity does not hold any positions in the securitisation.</p>
160	<p>TYPE This column gathers information on the type of assets ('1' to '8') or liabilities ('9' and '10') of the securitised portfolio. 190	<p>COUNTRY Report the code (ISO 3166-1 alpha-2) of the country of origin of the ultimate underlying of the transaction, i.e. the country of the immediate obligor of the original securitised exposures (look through). In case the pool of the securitisation consists of different countries, the institution shall indicate the most important country. If no country exceeds a 20 % threshold based on the amount of assets/liabilities, then ‘OT’ (other) shall be reported.</p>
200	<p>ELGD (%) The exposure-weighted average loss-given-default (ELGD) shall only be reported by those institutions applying the Supervisory Formula Method (and, therefore, reporting ‘I’ in column 170). The ELGD is to be calculated as indicated in Article 262(1) of CRR. This column shall not be reported in case of securitisation of liabilities or when the own funds requirements are based on the securitised exposures (in case of securitisation of assets). 260-280	OFF-BALANCE SHEET ITEMS AND DERIVATIVES This block of columns gathers information on off-balance sheet items and derivatives broken down by tranches (senior/mezzanine/first loss). The same criteria of classification among tranches used for on-balance sheet items shall be applied here.
290	FIRST FORESEEABLE TERMINATION DATE The likely termination date of the whole securitisation in the light of its contractual clauses and the currently expected financial conditions. Generally, it would be the earliest of the following dates: (i) the date when a clean-up call (defined in Article 242(2) of CRR) might first be exercised taking into account the maturity of the underlying exposure(s) as well as their expected pre-payment rate or potential re-negotiation activities; (ii) the date on which the originator may first exercise any other call option embedded in the contractual clauses of the securitisation which would result in the total redemption of the securitisation. The day, month and year of the first foreseeable termination date shall be reported. The exact day shall be reported if this data is available, otherwise the first day of the month shall be reported.
300	LEGAL FINAL MATURITY DATE The date upon which all principal and interest of the securitisation must be legally repaid (based on the transaction documentation). The day, month and year of the legal final maturity date shall be reported. The exact day shall be reported if this data is available, otherwise the first day of the month shall be reported.

4. OPERATIONAL RISK TEMPLATES

4.1. C 16.00 – OPERATIONAL RISK (OPR)

4.1.1. General Remarks

114. This template provides information on the calculation of own funds requirements according to Articles 312 to 324 of CRR for Operational Risk under the Basic Indicator Approach (BIA), the Standardised Approach (TSA), the Alternative Standardised Approach (ASA) and the Advanced Measurement Approaches (AMA). An institution cannot apply TSA and ASA for the business lines retail banking and commercial banking at the same time at solo level
115. Institutions using the BIA, TSA and/or ASA shall calculate their own funds requirement, based on the information at financial year end. When audited figures are not available, institutions may use business estimates. If audited figures are used, institutions shall report the audited figures which should remain unchanged. Deviations from this ‘unchanged’ principle are possible, for instance if during that period the exceptional circumstances, such as recent acquisitions or disposals of entities or activities, are met.
116. If an institution can justify its competent authority that – due to exceptional circumstances such as a merger or a disposal of entities or activities – using a three year average to calculating the relevant indicator would lead to a biased estimation for the own funds requirement for operational risk, the competent authority may permit

the institution to modify the calculation in a way that would take into account such events. Also the competent authority may on its own initiative, require an institution to modify the calculation. Where an institution has been in operation for less than three years it may use forward looking business estimates in calculating the relevant indicator, provided that it starts using historical data as soon as they are available.

- 117. By columns, this template presents information, for the three most recent years, on the amount of the relevant indicator of the banking activities subject to operational risk and on the amount of loans and advances (the latter only applicable in the case of ASA). Next, information on the amount of own funds requirement for operational risk is reported. If applicable, it must be detailed which part of this amount is due to an allocation mechanism. Regarding AMA, memorandum items are added to present a detail of the effect of the expected loss, diversification and mitigation techniques on own funds requirement for operational risk.
 - 118. By rows, information is presented by method of calculation of the operational risk own funds requirement detailing business lines for TSA and ASA.
 - 119. This template shall be submitted by all institutions subject to operational risk own funds requirement.

Columns

010-030	<p>RELEVANT INDICATOR</p> <p>Institutions using the relevant indicator to calculate the own funds requirement for operational risk (BIA, TSA and ASA) report relevant indicator for the respective years in columns 010 to 030. Moreover, in the case of a combined use of different approaches as referred in Article 314 of CRR, institutions also report, for information purposes, relevant indicator for the activities subject to AMA. It is also the case for all other AMA banks.</p> <p>Hereafter, the term ‘relevant indicator’ refers to ‘the sum of the elements’ at the end of the financial year as defined in Article 316 point 1, Table1 of CRR.</p> <p>If the institution has less than 3 years of data on ‘relevant indicator’ available, the available historical data (audited figures) shall be assigned by priority to the corresponding columns in the table. If, for instance, historical data for only one year is available, it shall be reported in column 030. If it seems reasonable, the forward looking estimates shall then be included in column 020 (estimate of next year) and column 010 (estimate of year +2).</p>

	Furthermore if there are no historical data on 'relevant indicator' available the institution may use forward-looking business estimates.
040-060	<p>LOANS AND ADVANCES (IN THE CASE OF ASA APPLICATION)</p> <p>These columns shall be used to report the amounts of the loans and advances for business lines 'Commercial banking' and 'Retail banking', as referred to in Article 319(1) point (b) of CRR. These amounts shall be used to calculate the alternative relevant indicator that leads to the own funds requirements corresponding to the activities subject to ASA (Article 319(1) point (a) of CRR).</p> <p>For the 'commercial banking' business line, securities held in the non-trading book shall also be included.</p>
070	<p>OWN FUND REQUIREMENT</p> <p>The own fund requirement is calculated according to the approach used, following Articles 312 to 324 of CRR The resulting amount is reported in column 070.</p>
071	<p>TOTAL OPERATIONAL RISK EXPOSURE AMOUNT</p> <p>Article 92(4) of CRR. Own funds requirements in column 070 multiplied by 12.5.</p>
080	<p>OF WHICH: DUE TO AN ALLOCATION MECHANISM</p> <p>Article 18(1) of CRR (related to the inclusion, in the application referred to in Article 312(2) of CRR) of the methodology used for allocating operational risk capital between the different entities of the group and of whether and how diversification effects are intended to be factored in the risk measurement system used by a EU parent credit institution and its subsidiaries or jointly by the subsidiaries of an EU parent financial holding company or EU parent mixed financial holding company.</p>

	<p>The own funds requirement reported in column 090 is the one of column 070 but calculated before taking into account the alleviation effects due to expected loss, diversification and risk mitigation techniques (see below).</p>
<p>100</p>	<p>(-) ALLEVIATION OF OWN FUNDS REQUIREMENTS DUE TO THE EXPECTED LOSS CAPTURED IN BUSINESS PRACTICES</p> <p>In column 100 the alleviation of own funds requirements due to expected loss captured in internal business practices (as referred to in Article 322(2) point (a) of CRR) is reported.</p>
<p>110</p>	<p>(-) ALLEVIATION OF OWN FUNDS REQUIREMENTS DUE TO DIVERSIFICATION</p> <p>The diversification effect in column 110 is the difference between the sum of own funds requirements calculated separately for each operational risk class (i.e. a ‘perfect dependence’ situation) and the diversified own funds requirement calculated by taking into account correlations and dependencies (i.e. assuming less than ‘perfect dependence’ between the risk classes). The ‘perfect dependence’ situation occurs in the ‘default case’, that is when the institution does not use explicit correlations structure between the risk classes, hence the AMA capital is computed as the sum of the individual operational risk measures of the chosen risk classes. In this case the correlation between the risk classes is assumed of 100 % and the value in the column has to be set to zero. Conversely, when the institution computes an explicit correlations structure between risk classes, it has to include in this column the difference between the AMA capital as stemming from the ‘default case’ and that obtained after applying the correlations structure between the risk classes. The value reflects the ‘diversification capacity’ of the AMA model, that is the ability of the model to capture the not simultaneous occurrence of severe operational risk loss events. In the column 110 the amount by which the assumed correlation structure decreases the AMA capital relative to the assumption of 100 % correlation has to be reported.</p>

4.2. OPERATIONAL RISK: DETAILED INFORMATION ON LOSSES IN THE LAST YEAR (OPR DETAILS)

4.2.1. General Remarks

- 120. Template C 17.01 (OPR DETAILS 1) summarises the information on the gross losses and loss recoveries registered by an institution in the last year according to event types and business lines. Template C 17.02 (OPR DETAILS 2) provides detailed information on the largest loss events in the last year.
- 121. Operational risk losses that are related to credit risk and are subject to own funds requirements for credit risk (boundary credit-related operational risk events) are neither considered in template C 17.01 nor template C 17.02.
- 122. In case of a combined use of different approaches for the calculation of own funds requirements for operational risk according to Article 314 CRR, losses and recoveries registered by an institution shall be reported in C 17.01 and C 17.02 irrespective of the approach applied to calculate own funds requirements.
- 123. ‘Gross loss’ means a loss stemming from an operational risk event or event type — as referred to in Article 322(3)(b) of Regulation (EU) No 575/2013 — before recoveries of any type, without prejudice to ‘rapidly recovered loss events’ as defined below.
- 124. ‘Recovery’ means an independent occurrence related to the original operational risk loss that is separate in time, in which funds or inflows of economic benefits are received from first or third parties, such as insurers or other parties. Recoveries are broken down into recoveries from insurance and other risk transfer mechanisms and direct recoveries.
- 125. ‘Rapidly recovered loss events’ means operational risk events that lead to losses that are partly or fully recovered within five working days. In case of a rapidly recovered loss event, only the part of the loss that is not fully recovered (i.e. the loss net of the partial rapid recovery) shall be included into the gross loss definition. As a consequence, loss events that lead to losses that are fully recovered within five working days shall not be included into the gross loss definition, as well as into the OPR DETAILS reporting at all.
- 126. ‘Date of accounting’ means the date when a loss or reserve/provision was first recognized in the Profit and Loss statement, against an operational risk loss. This date logically follows the ‘Date of occurrence’ (i.e. the date when the operational risk

- event happened or first began) and the ‘Date of discovery’ (i.e. the date on which the institution became aware of the operational risk event).
127. Losses caused by a common operational risk event or by multiple events linked to an initial operational risk event generating events or losses (‘root-event’) are grouped. The grouped events shall be considered and reported as one event, and thus the related gross loss amounts respectively amounts of loss adjustments shall be summed up.
128. The figures reported in June of the respective year are interim figures, while the final figures are reported in December. Therefore the figures in June have a six-month reference period (i.e. from 1 January to 30 June of the calendar year) while the figures in December have a twelve-month reference period (i.e. from 1 January to 31 December of the calendar year). Both for data reported as of June and December, ‘previous reporting reference periods’ means all reporting reference periods until and including the one ending at the preceding calendar year end.
129. In order to verify the conditions envisaged by Article 5 (b) (2) (b) (i) of this Regulation, the institutions shall use the latest statistics as available in the Supervisory Disclosure webpage of the EBA to get ‘the sum of individual balance sheet totals of all institutions within the same Member State’. In order to verify the conditions envisaged by Article 5 (b) 2 (b) (iii), the gross domestic product at market prices as defined in point 8.89 of Annex A to Regulation (EU) No 549/2013 of the European Parliament and of the Council (ESA 2010) and published by Eurostat for the previous calendar year shall be used.
- 4.2.2. C 17.01: Operational risk losses and recoveries by business lines and event types in the last year (OPR DETAILS 1)
- 4.2.2.1. General Remarks
130. In template C 17.01, the information is presented by distributing the losses and recoveries above internal thresholds amongst business lines (as defined in Article 317, Table 2 of CRR including the additional business line ‘Corporate items’ as referred to in Article 322(3) point (b) CRR) and event types (as defined in Article 324 CRR), being possible that the losses corresponding to one event are distributed amongst several business lines.
131. Columns present the different event types and the totals for each business line, together with a memorandum item that shows the lowest internal threshold applied in the data collection of losses, revealing within each business line the lowest and the highest threshold if there is more than one threshold.
132. Rows present the business lines, and within each business line, information on the number of events (new events), the gross loss amount (new events), the number of events subject to loss adjustments, the loss adjustments relating to previous reporting periods, the maximum single loss, the sum of the five largest losses and the total loss recoveries (direct loss recoveries as well as recoveries from insurance and other risk transfer mechanisms).
133. For the total business lines, data on the number of events and the gross loss amount is also requested for certain ranges based on set thresholds, 10 000, 20 000, 100 000, and 1 000 000. The thresholds are set in Euro amounts and are included for comparability purposes of the reported losses among institutions; therefore they do not necessarily relate with the minimum loss thresholds used for the internal loss data collection, to be reported in another section of the template.

010-070	<p>EVENT TYPES</p> <p>Institutions report the losses in the respective columns 010 to 070 according to the event types as defined in Article 324 CRR. Institutions that calculate their own funds requirement according to BIA may report those losses for which the event type is not identified in column 080 only.</p>
080	<p>TOTAL EVENT TYPES</p> <p>In column 080, for each business line, institutions report the total ‘number of events (new events)’, the total of ‘gross loss amount (new events)’, the total ‘number of events subject to loss adjustments’, the total of ‘loss adjustments relating to previous reporting periods’, the ‘maximum single loss’, the ‘sum of the five largest losses’, the total of ‘total direct loss recovery’ and the total of ‘total recovery from insurance and other risk transfer mechanisms’.</p> <p>Provided that the institution has identified the event types for all losses, column 080 shows the simple aggregation of the number of loss events, the total gross loss amounts, the total loss recovery amounts and the ‘loss adjustments relating to previous reporting periods’ reported in columns 010 to 070. The ‘maximum single loss’ reported in column 080 is the maximum single loss within a business line and identical to the maximum of the ‘maximum single losses’ reported in columns 010 to 070, provided that the institution has identified the event types for all losses.</p> <p>For the sum of the five largest losses, in column 080 the sum of the five largest losses within one business line is reported.</p>
090-100	<p>MEMORANDUM ITEM: THRESHOLD APPLIED IN DATA COLLECTION</p> <p>Institutions report in the columns 090 and 100 the minimum loss thresholds they are using for the internal loss data collection in accordance with Article 322(3) point (c), last sentence CRR.</p> <p>If the institution applies only one threshold for in each business line, only the column 090 shall be filled in.</p>

	<p>is the simple aggregation of the gross loss amounts of new events for each business line.</p> <p>In rows 921 – 924, the gross loss amount for events with a gross loss amount within the ranges defined in the pertinent rows shall be reported.</p>
<p>930, 935, 936</p>	<p>Number of loss events subject to loss adjustments</p> <p>In row 930, the total of the numbers of events subject to loss adjustments as defined for rows 030, 130, ..., 830 shall be reported. This figure may be lower than the aggregation of the number of events subject to loss adjustments by business lines since events with multiple impacts (impacts in different business lines) shall be considered as one. It may be higher, if an institution calculating its own funds requirements according to BIA cannot identify the business line(s) affected by the loss in every case.</p> <p>The number of loss events subject to loss adjustments shall be broken down into the number of events for which a positive loss adjustment was made within the reporting reference period and the number of events for which a negative loss adjustment was made within the reporting period (all reported with a positive sign).</p>

If, due to a negative loss adjustment, the adjusted loss amount attributable to an event falls below the internal data collection threshold of the institution, the institution shall report the total loss amount for that event accumulated until the last time when the event was reported for a December reference date (i.e. the original loss plus/minus all loss adjustments made in previous reporting reference periods) with a negative sign in row 946 instead of the amount of the negative loss adjustment itself.</p>
950	<p>Maximum single loss Provided that the institution has assigned all its losses either to a business line listed in Article 317(4) table 2 CRR or the business line ‘Corporate items’ as referred to in Article 322(3) point (b) CRR, the maximum single loss is the maximum loss over the internal threshold for each event type and amongst all business lines. These figures may be higher than the highest single loss recorded in each business line if an event impacts different business lines. Provided that the institution has assigned all its losses either to a business line listed in Article 317(4) table 2 CRR or the business line ‘Corporate items’ as referred to in Article 322(3) point (b) CRR respectively that it has identified the event types for all losses, the following shall apply for column 080:</p> <ul style="list-style-type: none"> — The maximum single loss reported shall be equal to the highest of the values reported in columns 010 – 070 of this row. — If there are events having an impact in different business lines, the amount reported in {r950, c080} may be higher than the amounts of ‘Maximum single loss’ per business line reported in other rows of column 080.

4.2.3. C 17.02: Operational risk: Detailed information on the largest loss events in the last year (OPR DETAILS 2)

4.2.3.1. General Remarks

134. In template C 17.02, information on individual loss events shall be provided (one row per event).

135. The information reported in this template shall refer to ‘new events’, i.e. operational risk events

(a) ‘accounted for the first time’ within the reporting reference period or

- (b) ‘accounted for the first time’ within a previous reporting reference period, if the event had not been included in any previous supervisory report, e.g. because it was identified as operational risk event only in the current reporting reference period or because the accumulated loss attributable to that event (i.e. the original loss plus/minus all loss adjustments made in previous reporting reference periods) exceeded the internal data collection threshold only in the current reporting reference period.

136. Only events entailing a gross loss amount of 100 000 EUR or more shall be reported.

Subject to that threshold,

- (a) the largest event for each event type, provided that the institution has identified the event types for losses and
- (b) at least the ten largest of the remaining events with or without identified event type by gross loss amount shall be included in the template.
- (c) Events are ranked based on the gross loss attributed to them.
- (d) An event shall only be considered once.

5. MARKET RISK TEMPLATES

137. These instructions refer to the templates reporting of the calculation of own funds requirements according to the standardised approach for foreign exchange risk (MKR SA FX), commodities risk (MKR SA COM) interest rate risk (MKR SA TDI, MKR SA SEC, MKR SA CTP) and equity risk (MKR SA EQU). Additionally, instructions for the template reporting of the calculation of own funds requirements according to the internal models approach (MKR IM) are included in this part.
138. The position risk on a traded debt instrument or equity (or debt or equity derivative) shall be divided into two components in order to calculate the capital required against it. The first shall be its specific-risk component — this is the risk of a price change in the instrument concerned due to factors related to its issuer or, in the case of a derivative, the issuer of the underlying instrument. The second component shall cover its general risk — this is the risk of a price change in the instrument due (in the case of a traded debt instrument or debt derivative) to a change in the level of interest rates or (in the case of an equity or equity derivative) to a broad equity- market movement unrelated to any specific attributes of individual securities. The general treatment of specific instruments and netting procedures can be found in Articles 326 to 333 of CRR.

5.1. C 18.00 – MARKET RISK: STANDARDISED APPROACH FOR POSITION RISKS IN TRADED DEBT INSTRUMENTS (MKR SA TDI)

5.1.1. General Remarks

139. This template captures the positions and the related own funds requirements for position risks on traded debt instruments under the standardised approach (Articles 102 and 105 (1) of CRR). The different risks and methods available under the CRR are considered by rows. The specific risk associated with exposures included in MKR SA SEC and MKR SA CTP only has to be reported in the Total template of the MKR SA TDI. The own funds requirements reported in those templates shall be transferred to cell {325;060} (securitisations) and {330;060} (CTP) respectively.

140. The template has to be filled out separately for the ‘Total’, plus a pre-defined list of following currencies: EUR, ALL, BGN, CZK, DKK, EGP, GBP, HRK, HUF, ISK, JPY, MKD, NOK, PLN, RON, RUB, RSD, SEK, CHF, TRY, UAH, USD and one residual template for all other currencies.

5.2. C 19.00 — MARKET RISK: STANDARDISED APPROACH FOR SPECIFIC RISK IN SECURITISATIONS (MKR SA SEC)

5.2.1. General Remarks

141. This template requests information on positions (all/net and long/short) and the related own funds requirements for the specific risk component of position risk in securitisations/re-securitisations held in the trading book (not eligible for correlation trading portfolio) under the standardised approach.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

142. The MKR SA SEC template determines the own funds requirement only for the specific risk of securitisation positions according to Articles 335 in connection with 337 CRR. If securitisation positions of the trading book are hedged by credit derivatives, Articles 346 and 347 CRR apply. There is only one template for all positions of the trading book, irrespective of the fact whether the institution uses the Standardised Approach or the Internal Ratings Based Approach to determine the risk weight for each of the positions according to Part Three Title II Chapter 5 of CRR. The reporting of the own funds requirements of the general risk of these positions is conducted in the MKR SA TDI or the MKR IM template.
143. Positions which receive a risk weight of 1 250 % can alternatively be deducted from CET1 (see 243(1) point (b), 244(1) point (b) and 258 of CRR). If this is the case, those positions have to be reported in row 460 of CA1.

For each securitisation, in case the pool consists of different types of assets, the institution shall consider the most important type.

5.3. C 20.00 — MARKET RISK: STANDARDISED APPROACH FOR SPECIFIC RISK FOR POSITIONS ASSIGNED TO THE CORRELATION TRADING PORTFOLIO (MKR SA CTP)

5.3.1. General Remarks

144. This template requests information on positions of the CTP (comprising securitisations, nth-to-default credit derivatives and other CTP positions included according to Article 338(3)) and the corresponding own funds requirements under the standardised approach.

145. The MKR SA CTP template determines the own funds requirement only for the specific risk of positions assigned to the Correlation Trading Portfolio according to Articles 335 in connection with 338 (2) and (3) of CRR. If CTP- positions of the trading book are hedged by credit derivatives, Articles 346 and 347 CRR apply. There is only one template for all CTP-positions of the trading book, irrespective of the fact whether the institution uses the Standardised Approach or the Internal Ratings Based Approach to determine the risk weight for each of the positions according to Part Three Title II Chapter 5 of CRR. The reporting of the own funds requirements of the general risk of these positions is conducted in the MKR SA TDI or the MKR IM template.

146. This structure of the template separates securitisation positions, n-th to default credit derivatives and other CTP-positions. As a result, securitisation positions shall always be reported in rows 030, 060 or 090 (depending on the role of the institution in the securitisation). N-th to default credit derivatives shall always be reported in line 110. The 'other CTP-positions' are neither securitisation positions nor n-th to default credit derivatives (see definition in Article 338(3) CRR), but they are explicitly 'linked' (because of the hedging intent) to one of these two positions. That is why they are assigned either under the sub-heading 'securitisation' or 'n-th to default credit derivative'.

147. Positions which receive a risk weight of 1 250 % can alternatively be deducted from CET1 (see 243(1) point (b), 244(1) point (b) and 258 of CRR). If this is the case, those positions have to be reported in row 460 of CA1.

5.5. C 22.00 — MARKET RISK: STANDARDISED APPROACHES FOR FOREIGN EXCHANGE RISK (MKR SA FX)

5.5.1. General Remarks

150. Institutions shall report information on the positions in each currency (reporting currency included) and the corresponding own funds requirements for foreign exchange treated under the standardised approach. The position is calculated for each currency (including euro), gold, and positions to CIUs.

151. Rows 100 to 480 of this template shall be reported even if institutions are not required to calculate own funds requirements for foreign exchange risk according to Article 351 of CRR. In those memorandum items, all the positions in the reporting currency are included, irrespective of the extent to which they are considered for the purposes of Article 354 CRR. Rows 130 to 480 of the memorandum items of the template shall be filled out separately for all currencies of the Member States of the European Union and the following currencies: USD, CHF, JPY, RUB, TRY, AUD, CAD, RSD, ALL, UAH, MKD, EGP, ARS, BRL, MXN, HKD, ICK, TWD, NZD, NOK, SGD, KRW, CNY and all other currencies.

5.7. C 24.00 — MARKET RISK INTERNAL MODEL (MKR IM)

5.7.1. General Remarks

153. This template provides a breakdown of VaR and stressed VaR (sVaR) figures according to the different market risks (debt, equity, FX, commodities) and other information relevant for the calculation of the own funds requirements.

154. Generally the reporting depends on the structure of the model of the institutions whether they report the figures for general and specific risk separately or together. The same holds true for the decomposition of the VAR/Stress-Var into the risk categories (interest rate risk, equity risk, commodities risk and foreign exchange risk). An institution can resign to report the decompositions mentioned above if it proves that a reporting of these figures would be unduly burdensome.

6. C 33.00 — EXPOSURES TO GENERAL GOVERNMENTS (GOV)

6.1. GENERAL REMARKS

155. The information for the purpose of template C 33.00 shall cover all exposures to ‘General governments’ as defined in paragraph 42 (b) of Annex V.
156. Exposures to ‘General governments’ are included in different exposure classes in accordance with Article 112 and Article 147 of CRR, as specified by the instructions for the completion of template C 07.00, C 08.01 and C 08.02.
157. Table 2 (Standardised approach) and Table 3 (IRB approach), included in Part 3 of Annex 5, shall be observed for the mapping of exposure classes used to calculate capital requirements under the CRR to counterparty sector ‘General governments’.
158. Information shall be reported for the total aggregate exposures (meaning the sum of all countries in which the bank has sovereign exposures) and for each country on the basis of the residence of the counterparty on an immediate borrower basis.
159. The allocation of exposures to exposure classes or jurisdictions shall be made without considering credit mitigation techniques and in particular without considering substitution effects. However the calculation of exposure values and risk weighted exposure amounts for each exposure class and each jurisdiction includes the incidence of credit risk mitigation techniques, including substitution effects.
160. The reporting of information on exposures to ‘General governments’ by jurisdiction of residence of the immediate counterparty other than the domestic jurisdiction of the reporting institution is subject to the thresholds in Article 5 (b) point 3 of this Regulation.

6.2. SCOPE OF THE TEMPLATE ON EXPOSURES TO ‘GENERAL GOVERNMENTS’

161. The scope of the GOV template covers on, off-balance sheet and derivatives direct exposures to ‘General governments’ in the banking and trading book. In addition a memorandum item on indirect exposures in the form of credit derivatives sold on general government exposures is also requested.
162. An exposure is a direct exposure when the immediate counterparty is an entity covered by the definition of ‘General governments’.
163. The template is divided in two sections. The first one is based on a breakdown of exposures by risk, regulatory approach and exposure classes whereas a second one is based on a breakdown by residual maturity

010	<p>Total gross carrying amount of non-derivative financial assets</p> <p>Aggregate of gross carrying amount, as determined in accordance with paragraph 34 in Annex V, Part 1, of non-derivative financial assets to General governments, for all accounting portfolios under IFRS or national GAAP based on Directive 86/635/EEC (Bank Accounting Directive, 'BAD') defined in paragraphs 15 to 22 in Annex V, Part 1 and listed in columns 030 to 120. Prudent valuation adjustments shall not reduce the gross carrying amount of trading and non-trading exposures measured at fair value.</p>
020	<p>Total carrying amount of non-derivative financial assets (net of short positions)</p> <p>Aggregate of the carrying amount, in accordance with paragraph 27 in Annex V, Part 1, of non-derivative financial assets to General governments for all accounting portfolios under IFRS or national GAAP based on BAD defined in paragraphs 15 to 22 in Annex V, Part 1 and listed in columns 030 to 120, net of short positions. When the institution has a short position, for the same residual maturity and for the same immediate counterparty, the carrying amount of the short position shall be netted against the carrying amount of the direct position. This net amount shall be considered as zero when it is a negative amount. The sum of the columns 030 to 120 minus column 130 must be reported. If this amount is lower than zero, the amount to be reported shall be zero.</p>
030-120	<p>NON-DERIVATIVE FINANCIAL ASSETS BY ACCOUNTING PORTFOLIOS</p> <p>Aggregate carrying amount of non-derivative financial assets, as defined above, to General governments by accounting portfolio under the applicable accounting framework.</p>

ANNEX III

ANNEX VII

INSTRUCTIONS FOR THE REPORTING ON LOSSES STEMMING FROM LENDING COLLATERALISED BY IMMOVABLE PROPERTY

1. This Annex contains additional instructions in relation to the tables included in Annex VI of this Regulation. This Annex complements the instructions in format of references included in the tables in Annex VI.
2. All the general instructions included in Part I of Annex II of this regulation shall also apply.
 1. **Reporting scope**
 3. Data specified in Article 101(1) of CRR is subject to reporting by all institutions using immovable property for the purposes of Part Three, Title II of CRR.
 4. The template covers all national markets an institution/group of institution is exposed to (see Article 101(1) CRR). According to Article 101(2) sentence 3 the data shall be reported for each property market within the Union separately.
 2. **Definitions**
 5. Definition of loss: “Loss” means “economic loss” as defined in Article 5(2) CRR, including losses stemming from leased property. The recovery flows stemming from other sources (e.g. bank guarantees, life insurance, etc.) shall not be recognised when calculating losses stemming from immovable property. Losses of one position shall not be netted with the profit of a successful recovery of another position.
 6. According to the definition of Article 5(2) CRR, for exposures secured by residential and commercial property the calculation of economic loss should start from outstanding exposure value at reporting date and should include at least: (i) proceeds from collateral realisation; (ii) direct costs (including interest rates payments and workouts costs linked to the liquidation of the collateral); and (iii) indirect costs (including operating costs of the workout unit). All components need to be discounted to the reporting reference date.
 7. Exposure value: The exposure value follows the rules stipulated in Part Three, Title II of CRR (see Chapter 2 for institutions using the standardised approach, and Chapter 3 for institutions using the IRB approach).

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

8. Property value: The property value follows the rules stipulated in Part Three, Title II of CRR
9. F/X effect: The reporting currency shall be used with the exchange rate at the reporting date. Moreover, the estimates of the economic losses should consider the F/X effect if the exposure or collateral is denominated in different currency.
3. **Geographical breakdown**
10. Following the reporting scope, the CR IP Losses reporting shall consist of the following templates:
 - a) one total template
 - b) one template for each national market in the Union where the institution is exposed to, and
 - c) one template aggregating the data for all national markets outside the Union where the institution is exposed to.
4. **Reporting of exposures and losses**
11. Exposures: All exposures that are treated according to Part Three, Title II of CRR and where the collateral is used to reduce the risk-weighted exposure amount are reported in CR IP Losses. This also means that in case the risk mitigation effect of immovable property is only used for internal purposes (i.e. under Pillar 2) or for large exposures (see Part Four CRR), the exposures and losses concerned must not be reported.
12. Losses: The institution which has the exposure by the end of the reporting period shall report the losses. Losses shall be reported as soon as provisions are to be booked according to accounting rules. Also estimated losses should be reported. Loss data shall be collected on a loan-by-loan basis, i.e. aggregation of individual loss data stemming from exposures collateralised by immovable property.
13. Reference date: The exposure value at default should be used for reporting of losses.
 - a) Losses should be reported for all defaults on loans secured by real estate property that occur during the respective reporting period and irrespective of whether the work out is completed during the period or not. Loss data reported as of 30 June shall refer to the period 1 January until 30 June and loss data reported as of 31 December shall refer to the whole calendar year. Since there may be a long time lag between default and loss realisation, loss estimates (which includes incomplete workout process) shall be reported in cases where the workout has not been completed within the reporting period.
 - b) For all defaults observed within the reporting period, there are three scenarios: (i.) defaulted loan can be restructured so that it is no longer treated as in default (no loss observed); (ii.) realization of all collateral is completed (completed workout, actual loss known); or (iii.) incomplete workout (loss estimates to be used). Loss reporting shall include only losses stemming from scenario (ii.) realisation of collateral (observed losses) and scenario (iii.) incomplete workout (estimates of losses).
 - c) As losses shall be reported only for exposures having defaulted during the reporting period, changes to losses of exposures having defaulted during previous reporting periods will not be reflected in the reported data. I.e. proceeds from the realisation

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. of the collateral at a later reporting period or lower realised costs than previously estimated shall not be reported.

14. Role of the valuation of the property: The latest valuation of the property before the default date of the exposure is needed as reference date for reporting the part of exposure secured by mortgages on immovable property. After default, the property might be re-valued. This new value should however not be relevant for identifying the part of the exposure which was originally fully (and completely) secured by the mortgages on immovable property. However the new value of the property shall be considered in economic loss reporting (a reduced property value is part of economic costs). In other words, the latest valuation of the property before the default date shall be used to determine which part of the loss shall be reported in cell 010 (identification of exposure values which is fully and completely secured) and the re-valued property value for the amount to be reported (estimation a possible workout from collateral) in cells 010 and 030.
15. Treatment of loan sales during the reporting period: The institution which has the exposure by the end of the reporting period shall report losses, but only if a default for that exposure was identified.

ANNEX IV

ANNEX XI

REPORTING ON LEVERAGE

PART I: GENERAL INSTRUCTIONS

1. **Template labelling and other conventions**
 - 1.1. **Template labelling**
 1. This Annex contains additional instructions for the templates (hereinafter 'LR') included in Annex X of this Regulation.
 2. Overall, the framework consists of six templates:
 - C 47.00: Leverage Ratio Calculation (LRCalc): Leverage ratio calculation;
 - C 40.00: Leverage Ratio Template 1 (LR1): Alternative treatment of the exposure measure;
 - C 41.00: Leverage Ratio Template 2 (LR2): On and off-balance sheet items – additional breakdown of exposures;
 - C 42.00: Leverage Ratio Template 3 (LR3): Alternative definition of capital;
 - C 43.00: Leverage Ratio Template 4 (LR4): Breakdown of leverage ratio exposure measure components; and

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- C 44.00: Leverage Ratio Template 5 (LR5): General information.
- 3. For each template legal references are provided as well as further detailed information regarding more general aspects of the reporting.
- 1.2. **Numbering convention**
 - 4. The document will follow the labelling convention set in the following paragraphs, when referring to the columns, rows and cells of the templates. These numerical codes are extensively used in the validation rules.
 - 5. The following general notation is followed in the instructions: {Template;Row;Column}. An asterisk sign will be used to refer to the whole row or column.
 - 6. In the case of validations within a template, where only data points from that template are used, notations will not refer to a template: {Row;Column}.
 - 7. For the purpose of the reporting on leverage, ‘of which’ refers to an item that is a subset of a higher level exposure category whereas ‘memo item’ refers to a separate item that is not a subset of an exposure class. Reporting of both types of cells is mandatory unless otherwise specified.
- 1.3. **Abbreviations**
 - 8. For the purposes of this annex and related templates the following abbreviations are used:
 - a. CRR, which is an abbreviation of Capital Requirements Regulation and shall mean Regulation (EU) No 575/2013;
 - b. SFT, which is an abbreviation of Securities Financing Transaction and shall mean ‘repurchase transaction, securities or commodities lending or borrowing transaction, long settlement transaction and margin lending transaction’ as referred to in Regulation (EU) No 575/2013;
 - c. CRM, which is an abbreviation for Credit Risk Mitigation.
- 1.4. **Sign convention**
 - 9. All amounts shall be reported as positive figures. An exception are the amounts reported in {LRCalc;050;010}, {LRCalc;070;010}, {LRCalc;080;010}, {LRCalc;100;010}, {LRCalc;120;010}, {LRCalc;140;010}, {LRCalc;210;010}, {LRCalc;220;010}, {LRCalc;240;010}, {LRCalc;250;010}, {LRCalc;260;010}, {LRCalc;310;010}, {LRCalc;320;010}, {LRCalc;270;010}, {LRCalc;280;010}, {LRCalc;330;010}, {LRCalc;340;010}, {LR3;010;010}, {LR3;020;010}, {LR3;030;010}, {LR3;040;010}, {LR3;055;010}, {LR3;065;010}, {LR3;075;010} and {LR3;085;010}. Thereby note that {LRCalc;050;010}, {LRCalc;070;010}, {LRCalc;080;010}, {LRCalc;100;010}, {LRCalc;120;010}, {LRCalc;140;010}, {LRCalc;210;010}, {LRCalc;220;010}, {LRCalc;240;010}, {LRCalc;250;010}, {LRCalc;260;010}, {LRCalc;270;010}, {LRCalc;280;010}, {LR3;055;010}, {LR3;065;010}, {LR3;075;010} and {LR3;085;010} only take negative values. Also note that, apart from extreme cases, {LRCalc;310;010}, {LRCalc;320;010}, {LRCalc;330;010}, {LRCalc;340;010}, {LR3;010;010}, {LR3;020;010}, {LR3;030;010} and {LR3;040;010} only take positive values.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

PART II: TEMPLATE RELATED INSTRUCTIONS

1. Structure and frequency

1. The leverage ratio template is divided into two parts. Part A comprises all the data items that enter into the calculation of the leverage ratio that institutions shall submit to competent authorities in accordance with the first subparagraph of Article 430(1) of the CRR, while Part B comprises all the data items that institutions shall submit in accordance with the second subparagraph of Article 430(1) of the CRR (i.e. for the purposes of the report referred to in Article 511 of the CRR).

2. When compiling the data for this ITS, institutions shall consider the treatment of fiduciary assets in accordance with Article 429(13) of the CRR.

2. Formulas for leverage ratio calculation

3. The leverage ratio is based on a capital measure and a total exposure measure, which can be calculated with cells from Part A.

4. Leverage Ratio – fully phased-in definition = $\{\text{LRCalc};310;010\}/\{\text{LRCalc};290;010\}$.

5. Leverage Ratio – transitional definition = $\{\text{LRCalc};320;010\}/\{\text{LRCalc};300;010\}$.

3. Materiality thresholds for derivatives

6. In order to reduce the reporting burden for institutions with limited exposures in derivatives, the following measures are used to gauge the relative importance of derivatives exposures to the total exposure of the leverage ratio. Institutions shall calculate these measures as follows:

7.
$$\text{Derivatives share} = \frac{\{\text{LRCalc};060;010\} + \{\text{LRCalc};070;010\} + \{\text{LRCalc};080;010\} + \{\text{LRCalc};090;010\} + \{\text{LRCalc};100;010\} + \{\text{LRCalc};110;010\} + \{\text{LRCalc};120;010\} + \{\text{LRCalc};130;010\} + \{\text{LRCalc};140;010\}}{\text{Total exposure measure}}$$

8. Where total exposure measure is equal to: $\{\text{LRCalc};290;010\}$.

9. Total notional value referenced by derivatives = $\{\text{LR1}; 010;070\}$. This is a cell that institutions shall always report.

10. Credit derivatives volume = $\{\text{LR1};020;070\} + \{\text{LR1};050;070\}$. These are cells that institutions shall always report.

11. Institutions are required to report the cells referred to in paragraph 14 in the next reporting period, if any of the following conditions is met:

— the derivatives share referred to in paragraph 7 is more than 1,5 % on two consecutive reporting reference dates;

— the derivatives share referred to in paragraph 7 exceeds 2,0 %.

12. Institutions for which the total notional value referenced by derivatives as defined in paragraph 9 exceeds 10 billion EUR shall report the cells referred to in paragraph 14, even though their derivatives share does not fulfil the conditions described in paragraph 11.

13. Institutions are required to report the cells referred to in paragraph 15 if any of the following conditions is met:

— the credit derivatives volume referred to in paragraph 10 is more than 300 million EUR on two consecutive reporting reference dates;

— the credit derivatives volume referred to in paragraph 10 exceeds 500 million EUR.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

14. The cells which are required to be reported by institutions in accordance with paragraph 11 are the following: {LR1;010;010}, {LR1;010;020}, {LR1;010;050}, {LR1;020;010}, {LR1;020;020}, {LR1;020;050}, {LR1;030;050}, {LR1;030;070}, {LR1;040;050}, {LR1;040;070}, {LR1;050;010}, {LR1;050;020}, {LR1;050;050}, {LR1;060;010}, {LR1;060;020}, {LR1;060;050} and {LR1;060;070}.
15. The cells which are required to be reported by institutions in accordance with paragraph 13 are the following: {LR1;020;075}, {LR1;050;075} and {LR1;050;085}.
4. **C 47.00 – Leverage ratio calculation (LRCalc)**
16. This part of the reporting template collects the data that are needed to calculate the leverage ratio as defined in Articles 429, 429a and 429b of the CRR.
17. Institutions shall perform the reporting of the leverage ratio quarterly. In each quarter, the value ‘at reporting reference date’ shall be the value at the last calendar day of the third month of the respective quarter.
18. Institutions shall report {010;010} to {030;010}, {060;010}, {090;010}, {110;010}, and {150;010} to {190;010} as if the exemptions referred to in {050;010}, {080;010}, {100;010}, {120;010}, and {220;010} did not apply.
19. Institutions shall report {010;010} to {240;010} as if the exemptions referred to in {250;010} and {260;010} did not apply.
20. Any amount that increases the own funds or the leverage ratio exposure shall be reported as a positive figure. On the contrary, any amount that reduces the total own funds or the leverage ratio exposure shall be reported as a negative figure. Where there is a negative sign (-) preceding the label of an item no positive figure is expected to be reported for that item.

5. **C 40.00 – Alternative treatment of the Exposure Measure (LR1)**
21. This part of the reporting collects data on an alternative treatment of derivatives, SFTs and off-balance sheet items.
22. Institutions shall determine the ‘accounting balance sheet values’ in LR1 based on the applicable accounting framework in accordance with Article 4(1)(77) of the CRR. ‘Accounting value assuming no netting or other CRM’ refers to the accounting balance sheet value not taking into account any effects of netting or other credit risk mitigation.
23. Apart from {250;120} and {260;120}, institutions shall report LR1 as if the exemptions referred to in LRCalc cells {050;010}, {080;010}, {100;010}, {120;010}, {220;010}, {250;010} and {260;010} did not apply.

6. **C 41.00 – On- and off-balance sheet items – additional breakdown of exposures (LR2)**

24. Template LR2 provides information on additional breakdown items of all on- and off-balance sheet exposures⁽⁷⁾ belonging to the non-trading book and of all exposures of the trading book subject to counterparty credit risk. The breakdown is in accordance with the risk weights applied under the credit risk section of the CRR. The information is derived differently for exposures under respectively the Standardised and the IRB Approach.

25. For exposures supported by CRM techniques implying the substitution of the risk weighting of the counterparty with the risk weighting of the guarantee, institutions shall refer to the risk weight after the substitution effect. Under the IRB Approach, institutions shall proceed with the following calculation: for exposures (other than those for which specific regulatory risk weights are provided for) belonging to each obligor grade, the risk weight shall be derived by dividing the risk weighted exposure obtained from the risk weight formula or the supervisory formula (for credit risk and securitisations exposures, respectively) by the exposure value after taking into account inflows and outflows due to CRM techniques with substitution effect on the exposure. Under the IRB Approach, exposures classified as in default shall

To avoid double counting, institutions shall not report adjustments already applied pursuant to Article 111 of the CRR when calculating the exposure value in {LRCalc;10;10} to {LRCalc;260;10}, nor shall they report any adjustment that does not deduct the value of a specific asset.</p> <p>As these adjustments reduce the total own funds, they shall be reported as a negative figure.</p>
<p>8. C 43.00 – Alternative breakdown of leverage ratio exposure measure components (LR4)</p>	
<p>28. Institutions shall report the leverage ratio exposure values in LR4 after the application of exemptions, as applicable, referred to in the following LRCalc cells: {050;010}, {080;010}, {100;010}, {120;010}, {220;010}, {250;010} and {260;010}.</p>	
<p>29. In order to avoid double-counting, institutions shall uphold the equation referred to in the following paragraph:</p>	
<p>30. The equation that institutions shall uphold according to paragraph 29 is: $[\{LRCalc;010;010\} + \{LRCalc;020;010\} + \{LRCalc;030;010\} + \{LRCalc;040;010\} + \{LRCalc;050;010\} + \{LRCalc;060;010\} + \{LRCalc;070;010\} + \{LRCalc;080;010\} + \{LRCalc;090;010\} + \{LRCalc;100;010\} + \{LRCalc;110;010\} + \{LRCalc;120;010\} + \{LRCalc;130;010\} + \{LRCalc;140;010\} + \{LRCalc;150;010\} + \{LRCalc;160;010\} + \{LRCalc;170;010\} + \{LRCalc;180;010\} + \{LRCalc;190;010\} + \{LRCalc;200;010\} + \{LRCalc;210;010\} + \{LRCalc;220;010\} + \{LRCalc;230;010\} + \{LRCalc;240;010\} + \{LRCalc;250;010\} + \{LRCalc;260;010\}] = [\{LR4;010;010\} + \{LR4;040;010\} + \{LR4;050;010\} + \{LR4;060;010\} + \{LR4;065;010\} + \{LR4;070;010\} + \{LR4;080;010\} + \{LR4;080;020\} + \{LR4;090;010\} + \{LR4;090;020\} + \{LR4;140;010\} + \{LR4;140;020\} + \{LR4;180;010\} + \{LR4;180;020\} + \{LR4;190;010\} + \{LR4;190;020\} + \{LR4;210;010\} + \{LR4;210;020\} + \{LR4;230;010\} + \{LR4;230;020\} + \{LR4;280;010\} + \{LR4;280;020\} + \{LR4;290;010\} + \{LR4;290;020\}].$</p>

ANNEX XIV

Single Data Point Model

All data items set out in the Annexes to this Regulation shall be transformed into a single data point model which is the basis for uniform IT systems of institutions and competent authorities.

The single data point model shall meet the following criteria:

- (a) provide a structured representation of all data items set out in Annexes I, III, IV, VI, VIII, X, XII and XVI;
- (b) identify all the business concepts set out in Annexes I to XIII, XVI and XVII;
- (c) provide a data dictionary identifying table labels, ordinate labels, axis labels, domain labels, dimension labels and member labels;
- (d) provide metrics which define the property or amount of data points;
- (e) provide data point definitions that are expressed as a composition of characteristics that univocally identify the financial concept;
- (f) contain all the relevant technical specifications necessary for developing IT reporting solutions producing uniform supervisory data.

ANNEX VI

ANNEX XV

Validation Rules

The data items set out in the Annexes to this Regulation shall be subject to validation rules ensuring data quality and consistency.

The validation rules shall meet the following criteria:

- (a) define the logical relationships between relevant data points;
- (b) include filters and preconditions that define a set of data to which a validation rule applies;
- (c) check the consistency of the reported data;
- (d) check the accuracy of the reported data;
- (e) set default values which shall be applied where the relevant information has not been reported.

9. For calculating the threshold according to reporting templates C 67.00 and C 68.00 by significant currency, institutions shall use a threshold of 1 % of total liabilities in all currencies.
- 1.2. *Concentration of funding by counterparty (C 67.00)*
 1. In order to collect information about the reporting institutions' concentration of funding by counterparty in template C 67.00, institutions shall apply the instructions contained in this section.
 2. Institutions shall report the top ten largest counterparties or a group of connected clients according to Article 4(39) of Regulation (EU) No 575/2013, where the funding obtained from each counterparty or group of connected clients exceeds a threshold of 1 % of total liabilities in the sublines of section 1 of the template. The counterparty reported in item 1.01 shall be the largest amount of funding received from one counterparty or group of connected clients which is above the 1 % threshold as at the reporting date; item 1.02 shall be the second largest above the 1 % threshold; and similarly with the remaining items.
 3. Where a counterparty belongs to several groups of connected clients, it shall be reported only once in the group with the highest amount of funding.
 4. Institutions shall report the total of all other remaining funding in section 2.
 5. The totals of section 1 and section 2 shall equal an institution's total funding as per its balance sheet reported under the financial reporting framework (FINREP).
 6. For each counterparty, institutions shall report all of the columns 010 to 080.
 7. Where funding is obtained in more than one product type, the type reported shall be the product in which the largest proportion of funding was obtained. Identification of the underlying holder of securities may be undertaken on a best efforts basis. Where an institution has information concerning the holder of securities by virtue of its role as the custodian bank, it shall consider that amount for reporting the concentration of counterparties. Where there is no information available on the holder of the securities, the corresponding amount does not have to be reported.
 8. Instructions concerning specific columns:

Column	Legal references and instructions
010	<p>Counterparty Name The name of each counterparty from which funding obtained exceeds 1 % of total liabilities shall be recorded in column 010 in descending order, that is, in the order of the size of funding obtained. The counterparty name recorded shall be the full name of the legal entity from which the funding is derived including any references to the company type in accordance with the national company law.</p>
020	<p>LEI Code The legal entity identifier code of the counterparty.</p>

2. For the purpose of completing this template institutions shall report the total amount of funding received from each product category, which exceeds a threshold of 1 % of total liabilities.
3. For each product type, institutions shall report all of the columns 010 to 050.
4. The 1 % of total liabilities threshold shall be used to determine those product types from which funding has been obtained in accordance with the following:
 - (a) the 1 % of total liabilities threshold shall be applied for the product types referred to in all of the following rows: 1.1 'Sight deposit'; 1.2 'Term deposits not withdrawable within the following 30 days'; 1.3 'Term deposits within the following 30 days'; 1.4 'Saving accounts'; 2.1 'Unsecured wholesale funding'; 2.2 'Secured wholesale funding';
 - (b) with regard to the calculation of the 1 % of total liabilities threshold for row 1.4 'Saving accounts' the threshold shall apply on the sum of 1.4.1 and 1.4.2;
 - (c) for rows 1. 'Retail Funding' and 2. 'Wholesale Funding' the 1 % of total liabilities threshold applies on aggregated level only.
5. The figures reported in rows 1. 'Retail', 2.1 'Unsecured wholesale funding', 2.2 'Secured wholesale funding' can include broader product types than the underlying 'of which' items.

1.4. *Prices for Various Lengths of Funding (C 69.00)*

1. Institutions shall report the information in template C 69.00, about the transaction volume and prices paid by institutions for funding obtained during the reporting period and still present at the end of the reporting period, in accordance with the following original maturities:
 - (a) overnight in columns 010 and 020;
 - (b) greater than overnight and less than or equal to 1 week (columns 030 and 040)
 - (c) greater than 1 week and less than or equal to 1 month in columns 050 and 060;
 - (d) greater than 1 month and less than or equal to 3 months in columns 070 and 080;
 - (e) greater than 3 months and less than or equal to 6 months in columns 090 and 100;
 - (f) greater than 6 months and less than or equal to 1 year in columns 110 and 120;
 - (g) greater than 1 year and less than or equal to 2 years in columns 130 and 140;
 - (h) greater than 2 years and less than or equal to 5 years in columns 150 and 160;
 - (i) greater than 5 years and less than or equal to 10 years in columns 170 and 180.
2. For the purpose of determining the maturity of the funding obtained, institutions shall ignore the period between trade date and settlement date, e.g. a three month liability settling in two weeks' time shall be reported in the 3 months maturity (columns 070 and 080).
3. The spread reported in the left hand column of each time bucket shall be one of the following:
 - (a) the spread payable by the institution for liabilities less than or equal to one year, if they were to have been swapped to the benchmark overnight index for the appropriate currency no later than close of business on the day of the transaction;

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- (b) the spread payable by the firm at issuance for liabilities with an original maturity greater than one year, were they to be swapped to the relevant benchmark index for the appropriate currency which is three month EURIBOR for EUR or LIBOR for GBP and USD, no later than close of business on the day of the transaction.
- Solely for the purposes of spread calculation under points a) and b) above, on the basis of historical experience, the institution may determine the original maturity with or without taking into account optionality, as appropriate.
4. Spreads shall be reported in basis points with a negative sign in case the new funding is cheaper than under the relevant benchmark rate. They shall be calculated on a weighted average basis.
 5. For the purposes of calculating the average spread payable across multiple issuances/deposits/loans, institutions shall calculate the total cost in the currency of issue ignoring any FX swap, but they shall include any premium or discount and fees payable or receivable, taking as a basis the term of any theoretical or actual interest rate swap matching the term of the liability. The spread shall be the liability rate minus the swap rate.
 6. The amount of funding obtained for the funding categories listed in the 'Item' column shall be reported in the 'volume' column of the applicable time bucket.
 7. In the column 'volume' institutions shall provide the amounts representing the carrying amount of the new funding obtained in the applicable time bucket according to original maturity.
 8. As for all items, also for off-balance sheet commitments, institutions shall only report on-balance sheet items. An off-balance sheet commitment provided to the institution shall only be reported in C69.00 after a drawdown. In the case of a drawdown, the volume and spread to be reported shall be the amount drawn and applicable spread at the end of the reporting period. Where the drawdown cannot be rolled-over at the discretion of the institution, the actual maturity of the drawdown shall be reported. Where the institution has already drawn on the facility at the end of the previous reporting period, and where the institution subsequently increases the usage of the facility, only the additional amount drawn shall be reported.
 9. Deposits placed by retail customers shall consist of the deposits as defined by Article 3(8) Delegated Regulation (EC) No 2015/61.
 10. For funding that has rolled-over during the reporting period that is still outstanding at the end of the reporting period the average of spreads applying at that time (i.e. end of reporting period) shall be reported. For the purposes of C69.00, funding that rolled-over and is still there at the end of the reporting period shall be considered to represent new funding.
 11. By way of deviation from the rest of Section 1.4, the volume and spread of sight deposits shall only be reported where the depositor did not have a sight deposit in the preceding reporting period or where there is an increase in the deposit amount compared to the previous reference date, in which case the increment shall be treated as new funding. The spread shall be that of the end of the period.
 12. Where there is nothing to report, cells relating to spreads shall be left empty.

7. The average term of funding, in days, for new term funds shall be reported in column 320.
8. The ‘Maturing’ amount shall comprise all liabilities that were contractually withdrawable by the provider of the funding or due on the relevant day in the reporting period. It shall always be reported with a positive sign.
9. The ‘Roll-over’ amount shall comprise the maturing amount as defined in paragraphs 2 and 3 that remains with the institution on the relevant day of the reporting period. It shall always be reported with a positive sign. Where the maturity of the funding has changed due to the roll-over event, the ‘roll-over’ amount shall be reported in a time bucket according to the new maturity.
10. The ‘New funds’ amount shall comprise actual inflows of funding on the relevant day in the reporting period. It shall always be reported with a positive sign.
11. The ‘Net’ amount shall be considered as a change of funding within a particular original maturity time band on the relevant day of the reporting period, and shall be calculated by adding in the ‘net’ column the new funds plus the roll over funds minus the maturing funds.
12. Instructions concerning specific columns:

ANNEX X

ANNEX XXI

**Instructions for completing the Concentration of Counterbalancing Capacity Template (C 71.00) of Annex XX
Concentration of Counterbalancing Capacity by issuer/counterparty (CCC) (C 71.00)**

1. In order to collect information about the reporting institutions' concentration of counterbalancing capacity by the ten largest holdings of assets or liquidity lines granted to the institution for this purpose under template C 71.00, institutions shall apply the instructions contained in this Annex.
2. Wherean issuer or counterparty is assigned to more than one product type, currency or credit quality step, the total amount shall be reported. The product type, currency or credit quality step to be reported shall be the ones that are relevant to the largest proportion of the counterbalancing capacity concentration.
3. The counterbalancing capacity in C71.00 shall be the same as that in C66.00 with the qualification that the assets reported as counterbalancing capacity for the purposes of C71.00 shall be unencumbered to be available for the institution to convert into cash on the reporting reference date.
4. For calculating the concentrations for the purpose of reporting template C 71.00 by significant currency, institutions shall use the concentrations in all currencies.
5. When an issuer or counterparty belongs to several groups of connected clients, it shall be reported only once in the group with the higher counterbalancing capacity concentration.
6. Except for row 120, concentrations of counterbalancing capacity with a central bank as issuer or counterparty shall not be reported in this template.

Column	Legal references and instructions
010	<p>Issuer Name The name of the top ten issuers of unencumbered assets or counterparties of undrawn committed liquidity lines granted to the institution shall be recorded in column 010 in a descending fashion. The largest item will be recorded in 1.01, the second in line item 1.02, and so on. Issuers and counterparties forming a group of connected clients shall be reported as one single concentration</p> <p>The issuer or counterparty name recorded shall be the full name of the legal entity which issued the assets or granted the liquidity lines, including any references to the company type in accordance with the national company law.</p>

REPORTING ON AMM MATURITY LADDER

AMM TEMPLATES		
Template number	Template code	Name of the template/group of templates
		MATURITY LADDER TEMPLATE
66	C 66.00	MATURITY LADDER TEMPLATE

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

4. In the column “initial stock”, the stock of items at the reporting date shall be reported.
5. Only the blank white cells of the template in Annex XXII shall be completed.
6. The section of the maturity ladder template entitled “Outflows and inflows” shall cover future contractual cash flows from all on- and off- balance sheet items. Only outflows and inflows pursuant to contracts valid at the reporting date shall be reported.
7. The section of the maturity ladder template entitled “Counterbalancing capacity” shall represent the stock of unencumbered assets or other funding sources which are legally and practically available to the institution at the reporting date to cover potential contractual gaps. Only outflows and inflows pursuant to contracts existing at the reporting date shall be reported.
8. Cash outflows and inflows in the respective sections “outflows” and “inflows” shall be reported on a gross basis with a positive sign. Amounts due to be paid and received shall be reported respectively in the outflow and inflow sections.
9. For the section of the maturity ladder template entitled “counterbalancing capacity” outflows and inflows shall be reported on a net basis with a positive sign if they represent inflows and with a negative sign if they represent outflows. For cash flows, amounts due shall be reported. Securities flows shall be reported at current market value. Flows arising on credit and liquidity lines shall be reported at the contractual available amounts.
10. Contractual flows shall be allocated across the twenty-two time buckets according to their residual maturity, with days referring to calendar days.
11. All contractual flows shall be reported, including all material cash-flows from non-financial activities such as taxes, bonuses, dividends and rents.
12. In order for institutions to apply a conservative approach in determining contractual maturities of flows, they shall ensure all of the following:
 - (a) where an option to defer payment or receive an advance payment exists, the option shall be presumed to be exercised where it would advance outflows from the institution or defer inflows to the institution;
 - (b) where the option to advance outflows from the institution is solely at the discretion of the institution, the option shall be presumed to be exercised only where there is a market expectation that the institution will do so. The option shall be presumed not to be exercised where it would advance inflows to the institution or defer outflows from the institution. Any cash outflow that would be contractually triggered by this inflow – as in pass-through financing – shall be reported at the same date as this inflow;
 - (c) all sight and non-maturing deposits shall be reported as overnight in column 020;
 - (d) open repos or reverse repos and similar transactions which can be terminated by either party on any day shall be considered to mature overnight unless the notice period is longer than one day in which case they shall be reported in the relevant time bucket according to the notice period;
 - (e) retail term deposits with an early withdrawal option shall be considered to mature in the time period during which the early withdrawal of the deposit would not incur a penalty according to Article 25 (4) (b) of Regulation (EU) 2015/61.

Status: Point in time view as at 31/12/2020.

Changes to legislation: Commission Implementing Regulation (EU) 2017/2114 is up to date with all changes known to be in force on or before 07 July 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- (f) where the institution is not able to establish a minimum contractual payment schedule for a particular item or part thereof following the rules set out in this paragraph, it shall report the item or part thereof as greater than 5 years in column 220.
13. Interest outflows and inflows from all on and off balance sheet instruments shall be included in all relevant items of the “outflows” and “inflows” sections.
14. Foreign Exchange (“FX”) swaps maturing shall reflect the maturing notional value of cross-currency swaps, FX forward transactions and unsettled FX spot agreements in the applicable time buckets of the template.
15. Cash flows from unsettled transactions shall be reported, in the short period before settlement, in the appropriate rows and buckets.
16. Items where the institution has no underlying business, such as where it has no deposits of a certain category, shall be left blank.
17. Past due items and items for which the institution has a reason to expect non-performance shall not be reported.
18. Where the collateral received is re-hypothecated in a transaction that matures beyond the transaction in which the institution received the collateral, a securities outflow in the amount of the fair value of the collateral received shall be reported in the counterbalancing capacity section in the relevant bucket according to the maturity of the transaction that generated the reception of the collateral.
19. Intragroup items shall not affect the reporting on a consolidated basis

institution to convert into cash at any time to fill contractual gaps between cash inflows and outflows during the time horizon. For those purposes, the definition of encumbered assets in accordance with Commission Delegated Regulation (EU) 2015/61 shall apply. The assets shall not be used to provide credit enhancements in structured transactions or to cover operational costs, such as rents and salaries, and shall be managed with the clear and sole intent for use as a source of contingent funds.

Assets that the institution received as collateral in reverse repo and Secured Financing Transactions (SFT) can be considered as part of the counterbalancing capacity if they are held at the institution, have not been rehypothecated, and are legally and contractually available for the institution's use.

In order to avoid double counting, where the institution reports prepositioned assets in item 3.1 to 3.7, it shall not report the related capacity of those facilities in item 3.8.

Institutions shall report assets, where they meet the description of a row and are available at the reporting date, as an initial stock in column 010.

Columns 020 to 220 shall contain contractual flows in the counterbalancing capacity.

Where an institution has entered into a repo transaction, the asset which has been repoed out shall be re-entered as a security inflow in the maturity bucket where the repo transaction matures. Correspondingly, the cash outflow following from the maturing repo shall be reported in the relevant cash outflow bucket in item 1.2. Where an institution has entered into a reverse repo transaction, the asset which has been repoed in shall be re-entered as a security outflow in the maturity bucket where the repo transaction matures. Correspondingly, the cash inflow following from the maturing repo shall be reported in the relevant cash inflow bucket in item 2.1. Collateral swaps shall be reported as contractual inflows and outflows of securities in the counterbalancing capacity section in accordance with the relevant maturity bucket in which these swaps mature.
