## REGULATIONS

## COMMISSION REGULATION (EU) 2019/1559

of 16 September 2019

**amending Annexes II and III to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for cyflufenamid, fenbuconazole, fluquinconazole and tembotrione in or on certain products**

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC <sup>(1)</sup>, and in particular Article 14(1)(a) and Article 49(2) thereof,

Whereas:

- (1) For cyflufenamid, fenbuconazole, fluquinconazole and tembotrione maximum residue levels (MRLs) were set in Part A of Annex III to Regulation (EC) No 396/2005.
- (2) For cyflufenamid the European Food Safety Authority ('the Authority') submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 <sup>(2)</sup>. It proposed to change the residue definition for commodities of animal origin. It recommended lowering the MRLs for gherkins and rye. For other products, it recommended raising or keeping the existing MRLs. It concluded that concerning the MRLs for maize/corn, common millet/proso millet, rice, sorghum, wheat, poultry (muscle, fat, liver) and birds' eggs some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation.
- (3) For fenbuconazole the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 <sup>(3)</sup>. It proposed to change the residue definition. It recommended lowering the MRLs for grapefruit, oranges, almonds, Brazil nuts, cashew nuts, chestnuts, coconuts, hazelnuts/cobnuts, macadamias, pecans, pine nut kernels, pistachios, walnuts and blueberries. For other products, the Authority recommended raising or keeping the existing MRLs. It concluded that concerning the MRLs for apricots, peaches, plums, cucumbers, gherkins, courgettes, melons, pumpkins and watermelons some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the

<sup>(1)</sup> OJ L 70, 16.3.2005, p. 1.

<sup>(2)</sup> European Food Safety Authority; Reasoned opinion on the review of the existing maximum residue levels for cyflufenamid according to Article 12 of Regulation (EC) No 396/2005. EFSA Journal 2018;16(10):5416.

<sup>(3)</sup> European Food Safety Authority; Reasoned opinion on the review of the existing maximum residue levels for fenbuconazole according to Article 12 of Regulation (EC) No 396/2005. EFSA Journal 2018;16(8):5399.

existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation.

- (4) For fluquinconazole the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 <sup>(4)</sup>. The Authority concluded that no uses or import tolerances are currently authorised for fluquinconazole in the Union and no codex maximum residue limits (CXLs) are available for that active substance. Residues of fluquinconazole are therefore not expected to occur in any plant commodity or in any animal product. As there is no risk for consumers, the MRLs for fluquinconazole should be set in Annex II to Regulation (EC) No 396/2005 at the specific limit of determination (LOD).
- (5) For tembotrione the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 <sup>(5)</sup>. It recommended lowering the MRLs for swine (liver, kidney), bovine (liver, kidney) and equine (liver, kidney). For other products, the Authority recommended raising or keeping the existing MRLs. It concluded that concerning the MRLs for sweet corn and fruit spices some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation.
- (6) As regards products on which the use of the plant protection product concerned is not authorised, and for which no import tolerances or CXLs exist, MRLs should be set at the specific LOD or the default MRL should apply, as provided for in Article 18(1)(b) of Regulation (EC) No 396/2005.
- (7) The Commission consulted the European Union reference laboratories for residues of pesticides as regards the need to adapt certain limits of determination. As regards several substances, those laboratories concluded that for certain commodities technical development requires the setting of specific limits of determination.
- (8) Based on the reasoned opinions of the Authority and taking into account the factors relevant to the matter under consideration, the appropriate modifications to the MRLs fulfil the requirements of Article 14(2) of Regulation (EC) No 396/2005.
- (9) Through the World Trade Organisation, the trading partners of the Union were consulted on the new MRLs and their comments have been taken into account.
- (10) Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (11) In order to allow for the normal marketing, processing and consumption of products, this Regulation should provide for a transitional arrangement for products which have been produced before the modification of the MRLs and for which information shows that a high level of consumer protection is maintained.
- (12) A reasonable period should be allowed to elapse before the modified MRLs become applicable in order to permit Member States, third countries and food business operators to prepare themselves to meet the new requirements which will result from the modification of the MRLs.
- (13) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

#### Article 1

Annexes II and III to Regulation (EC) No 396/2005 are amended in accordance with the Annex to this Regulation.

<sup>(4)</sup> European Food Safety Authority; Reasoned opinion on the review of the existing maximum residue levels for fluquinconazole according to Article 12 of Regulation (EC) No 396/2005. EFSA Journal 2018;16(9):5409.

<sup>(5)</sup> European Food Safety Authority; Reasoned opinion on the review of the existing maximum residue levels for tembotrione according to Article 12 of Regulation (EC) No 396/2005. EFSA Journal 2018;16(9):5417.

*Article 2*

Regulation (EC) No 396/2005 as it stood before being amended by this Regulation shall continue to apply to products which were produced in the Union or imported into the Union before 7 April 2020,

*Article 3*

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 7 April 2020,

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 16 September 2019.

*For the Commission*  
*The President*  
Jean-Claude JUNCKER

---

## ANNEX

Annexes II and III to Regulation (EC) No 396/2005 are amended as follows:

(1) In Annex II the following columns for cyflufenamid, fenbuconazole, fluquinconazole and tembotrione are added:

**Pesticide residues and maximum residue levels (mg/kg)**

Code number	Groups and examples of individual products to which the MRLs apply <sup>(*)</sup>	Cyflufenamid (sum of cyflufenamid (Z-isomer) and its E-isomer, expressed as cyflufenamid) (A) (R)	Fenbuconazole (sum of constituent enantiomers)	Fluquinconazole (F)	Tembotrione (Sum of parent tembotrione (AE 0172747) and its metabolite M5 (4,6-dihydroxy tembotrione), expressed as tembotrione) (R)

(\*) Limit of analytical determination

(e) For the complete list of products of plant and animal origin to which MRLs apply, reference should be made to Annex I.

(F) = Fat soluble

#### **Cyflufenamid (sum of cyflufenamid (Z-isomer) and its E-isomer, expressed as cyflufenamid) (A) (R)**

(A) The EU reference labs identified the reference standards for the E-isomer and for metabolite 149-F1 as commercially not available. When re-viewing the MRL, the Commission will take into account the commercial availability of the reference standards referred to in the first sentence by 17 September 2020, or, if that reference standard is not commercially available by that date, the unavailability of it.

(R) = The residue definition differs for the following combinations pesticide-code number:

Cyflufenamid - code 1000000 except 1040000: sum of cyflufenamid (Z-isomer), its E-isomer and metabolite 149-F1, expressed as cyflufenamid

(+) The European Food Safety Authority identified some information on feeding studies for poultry as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 17 September 2021, or, if that information is not submitted by that date, the lack of it.

#### **0500090 Wheat**

#### **Fenbuconazole (sum of constituent enantiomers)**

(+) The European Food Safety Authority identified some information relating to triazole derivative metabolites (TDMs) as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 17 September 2021, or, if that information is not submitted by that date, the lack of it.

#### **0110010 Grapefruits**

#### **0110020 Oranges**

#### **0110030 Lemons**

#### **0110040 Limes**

#### **0110050 Mandarins**

#### **0120010 Almonds**

#### **0120020 Brazil nuts**

#### **0120030 Cashew nuts**

#### **0120040 Chestnuts**

#### **0120050 Coconuts**

#### **0120060 Hazelnuts/cobnuts**

#### **0120070 Macadamias**

#### **0120080 Pecans**

#### **0120090 Pine nut kernels**

#### **0120100 Pistachios**

#### **0120110 Walnuts**

#### **0130010 Apples**

**0130020 Pears****0130030 Quinces****0130040 Medlars****0130050 Loquats/Japanese medlars**

- (+) The European Food Safety Authority identified some information on residue trials, including data relating to triazole derivative metabolites (TDMs), as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 17 September 2021, or, if that information is not submitted by that date, the lack of it.

**0140010 Apricots**

- (+) The European Food Safety Authority identified some information relating to triazole derivative metabolites (TDMs) as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 17 September 2021, or, if that information is not submitted by that date, the lack of it.

**0140020 Cherries (sweet)**

- (+) The European Food Safety Authority identified some information on residue trials, including data relating to triazole derivative metabolites (TDMs), as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 17 September 2021, or, if that information is not submitted by that date, the lack of it.

**0140030 Peaches****0140040 Plums**

- (+) The European Food Safety Authority identified some information relating to triazole derivative metabolites (TDMs) as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 17 September 2021, or, if that information is not submitted by that date, the lack of it.

**0151010 Table grapes****0151020 Wine grapes****0154010 Blueberries****0154020 Cranberries****0163020 Bananas****0231020 Sweet peppers/bell peppers**

- (+) The European Food Safety Authority identified some information on residue trials, including data relating to triazole derivative metabolites (TDMs), as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 17 September 2021, or, if that information is not submitted by that date, the lack of it.

**0232010 Cucumbers****0232020 Gherkins****0232030 Courgettes****0233010 Melons****0233020 Pumpkins****0233030 Watermelons**

- (+) The European Food Safety Authority identified some information relating to triazole derivative metabolites (TDMs) as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 17 September 2021, or, if that information is not submitted by that date, the lack of it.

**0401020 Peanuts/groundnuts****0401050 Sunflower seeds****0401060 Rapeseeds/canola seeds****0500010 Barley****0500070 Rye****0500090 Wheat****1011030 Liver****1011040 Kidney****1011050 Edible offals (other than liver and kidney)****1012030 Liver**

1012040	Kidney
1012050	Edible offals (other than liver and kidney)
1013030	Liver
1013040	Kidney
1013050	Edible offals (other than liver and kidney)
1014030	Liver
1014040	Kidney
1014050	Edible offals (other than liver and kidney)

1017030	Liver
1017040	Kidney
1017050	Edible offals (other than liver and kidney)

**Tembotrione (Sum of parent tembotrione (AE 0172747) and its metabolite M5 (4,6-dihydroxy tembotrione), expressed as tembotrione) (R)**

(R) = The residue definition differs for the following combinations pesticide-code number:

Tembotrione - code 1000000 except 1040000: Metabolite M5 (Dihydroxy-tembotrione)

(+) The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 17 September 2021, or, if that information is not submitted by that date, the lack of it.

**0234000 (d) sweet corn'**

---

(2) In Part A of Annex III the columns for cyflufenamid, fenbuconazole, fluquinconazole and tembotrione are deleted.

---
