

Commission Implementing Regulation (EU) 2019/2072 of 28 November 2019 establishing uniform conditions for the implementation of Regulation (EU) 2016/2031 of the European Parliament and the Council, as regards protective measures against pests of plants, and repealing Commission Regulation (EC) No 690/2008 and amending Commission Implementing Regulation (EU) 2018/2019

COMMISSION IMPLEMENTING REGULATION (EU) 2019/2072

of 28 November 2019

establishing uniform conditions for the implementation of Regulation (EU) 2016/2031 of the European Parliament and the Council, as regards protective measures against pests of plants, and repealing Commission Regulation (EC) No 690/2008 and amending Commission Implementing Regulation (EU) 2018/2019

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) 2016/2031 of the European Parliament and the Council of 26 October 2016 on protective measures against pests of plants, amending Regulations (EU) No 228/2013, (EU) No 652/2014 and (EU) No 1143/2014 of the European Parliament and of the Council and repealing Council Directives 69/464/EEC, 74/647/EEC, 93/85/EEC, 98/57/EC, 2000/29/EC, 2006/91/EC and 2007/33/EC⁽¹⁾, and in particular Article 5(2), Article 32(2), Article 37(2), Article 37(4), Article 40(2), Article 41(2), Article 53(2), Article 54(2), Article 72(1), Article 73, Article 79(2) and Article 80(2) thereof,

Whereas:

- (1) Regulation (EU) 2016/2031 is to apply from 14 December 2019. In order for its provisions to become fully effective, implementing rules are to be adopted regulating the pests, plants, plant products and other objects, as well as respective requirements needed to protect the Union territory from phytosanitary risks.
- (2) In view of this, specific rules should be set out in order to list the Union quarantine pests, the protected zone quarantine pests and the Union regulated non-quarantine pests, as well as measures to prevent their presence in the respective territories of the Union or on plants for planting.
- (3) The pests listed in Part A of Annex I to Council Directive 2000/29/EC⁽²⁾ and Section I of Part A of Annex II to that Directive have been reassessed by the European Food Safety Authority (EFSA) in order to set up the list of Union quarantine pests pursuant to Article 5 of Regulation (EU) 2016/2031. The reassessment was necessary to update the phytosanitary status of those pests in accordance with the most recent technical and scientific developments, and also to assess their compliance with the criteria of Article 3 of that Regulation in respect of the Union territory and Section 1 of Annex I thereto.
- (4) As a result of that reassessment, some pests listed in Annexes I and II to Directive 2000/29/EC should not be included in the list of Union quarantine pests because they

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- do not fulfil the conditions provided for in Article 3 of Regulation (EU) 2016/2031 in respect of the Union territory.
- (5) Certain other pests, some of which are listed in Annexes I and II to Directive 2000/29/EC, have been found to fulfil the conditions provided for in Article 3 of Regulation (EU) 2016/2031 in respect of the Union territory, therefore they should be included in the list of Union quarantine pests.
 - (6) As a result of the reassessment, some of the pests listed in Annexes I and II to Directive 2000/29/EC as pests not known to occur in the Union territory, should be included in the list of Union quarantine pests as pests known to occur in the Union territory, due to their established presence in certain parts of it.
 - (7) The names of certain pests should be updated to reflect the latest developments of the international nomenclature. Those pests are to be listed together with the respective codes assigned by the European and Mediterranean Plant Protection Organisation ('EPPO'). This is necessary to ensure the identification of those pests, even in case of potential change of their names in the future.
 - (8) The protected zones recognised in accordance with Commission Regulation (EC) No 690/2008⁽³⁾ and the respective pests listed in Part B of Annex I and Part B of Annex II to Directive 2000/29/EC have been reassessed by the Commission. The purpose of that reassessment was to conclude whether the respective pests correspond to the description of protected zone quarantine pest in Article 32(1) of Regulation (EU) 2016/2031.
 - (9) That reassessment has been based on the respective applications by Member States to recognise, amend or revoke protected zones, regular survey reports submitted by the Member States, Commission inspections and several other scientific and technical data.
 - (10) Certain pests, some of which are listed in Annexes I and II to Directive 2000/29/EC, have been found to fulfil the conditions provided for in Article 32(1) of Regulation (EU) 2016/2031, therefore they should be included in the list of protected zone quarantine pests. Those pests should be listed together with the respective codes assigned by EPPO, in order to ensure the identification of those pests, even in case of potential change of their names in the future.
 - (11) Regulation (EC) No 690/2008 should be repealed to avoid overlaps with the listing of protected zones in this Regulation.
 - (12) EPPO has made a reassessment of the pests listed in Section II of Part A of Annex II to Directive 2000/29/EC, the crops under point 3 and the pests under point 6 of Annex I to Directive 66/401/EEC⁽⁴⁾, as well as the pests under point 3 of Annex II to Council Directive 66/402/EEC⁽⁵⁾, Annex I to Council Directive 68/193/EEC⁽⁶⁾, as well as the pests listed in the acts adopted pursuant to Article 5(5) of Council Directive 98/56/EC⁽⁷⁾, Annex II to Council Directive 2002/55/EC⁽⁸⁾, Annex I and point B of Annex II to Council Directive 2002/56/EC⁽⁹⁾, and the acts adopted pursuant to point (c) of Article 18 of that Directive, point 4 of Annex I and point 5 of Part I of Annex II to Council Directive 2002/57/EC⁽¹⁰⁾, the acts adopted pursuant to Article 4 of Council Directive 2008/72/EC⁽¹¹⁾ and the acts adopted pursuant to Article 4 of Council Directive 2008/90/EC⁽¹²⁾.

- (13) That reassessment was necessary to update the phytosanitary status of those pests in accordance with the most recent technical and scientific developments, and also to assess their compliance with the respective criteria of Article 36 of Regulation (EU) 2016/2031, in respect of the Union territory, and Section 4 of Annex I thereto.
- (14) Certain pests, some of which are listed in those Directives, have been found to fulfil the conditions provided for in Article 36 of Regulation (EU) 2016/2031 in respect of the Union territory, and should therefore be included in the list of Union regulated non-quarantine pests ('RNQPs'). In accordance with Article 37(7) of that Regulation, that list is to provide for specific categories of relevant plants for planting referred to in Directives 66/401/EEC, 66/402/EEC, 68/193/EEC, 2002/55/EC, 2002/56/EC, 2002/57/EC, 2008/72/EC and 2008/90/EC.
- (15) In certain cases, the respective plants for planting should not be introduced into, or moved within, the Union territory if the presence of the RNQPs or symptoms caused by RNQPs on them is above a certain threshold, as set out in Article 37(8) of Regulation (EU) 2016/2031. As set out further by that Article, that threshold is only to be set where it is possible for professional operators to ensure that the incidence of that RNQP on those plants for planting does not exceed that threshold and it is possible to verify whether that threshold is not exceeded in lots of those plants for planting.
- (16) In accordance with Article 37(4) of Regulation (EU) 2016/2031, measures to prevent the presence of RNQPs on the plants for planting concerned, are to apply without prejudice to the measures adopted pursuant to Directives 66/401/EEC, 66/402/EEC, 98/56/EC, 1999/105/EC, 2002/54/EC, 2002/55/EC, 2002/56/EC, 2002/57/EC, 2008/72/EC and 2008/90/EC. Therefore, this Regulation should not affect the measures, adopted pursuant to those Directives, concerning inspections, sampling and testing of the plants for planting concerned, or the plants from which they originate, the origin of the plants for planting concerned from areas or sites free from, or with physical protection from, the RNQPs concerned, treatments of the plants for planting concerned, or the plants from which they originate, or the production of the plants for planting.
- (17) Moreover, the provisions of this Regulation concerning RNQPs should not affect the exceptions for plants for planting, adopted pursuant to those Directives, from marketing requirements set out by those Directives concerning the supply of seed to official testing and inspection bodies, the supply of plants to providers of certain services, the movement of plants intended for scientific purposes, selection work, other tests or trial purposes, seed not finally certified, seeds subject to the exceptions of the provisions of Implementing Decision (EU) 2017/478⁽¹³⁾ and plants shown to be intended for export.
- (18) The introduction into the Union of the plants, plant products and other objects, from all or certain third countries, as listed in Part A of Annex III to Directive 2000/29/EC is prohibited.
- (19) Those plants, plants products and other objects have been reviewed on the basis of any new evidence, their pest risk for the Union territory and the update of the list of Union quarantine pests.

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- (20) On the basis of that review, certain of those plants, plant products and other objects are therefore to be listed pursuant to Article 40(2) of Regulation (EU) 2016/2031, together with the third countries, groups of third countries or specific areas of third countries to which that prohibition applies. Such prohibition is necessary because the phytosanitary protection of the Union cannot be guaranteed by applying less stringent measures in this regard.
- (21) In view of the reassessment of Union quarantine pests, new provisions for the introduction into the Union of certain plants, plant products and other objects, and the respective special requirements, and provisions for the movement within the Union of certain plants, plant products and other objects, and the respective special requirements should be adopted pursuant to Article 41(2) of Regulation (EU) 2016/2031.
- (22) The indication of CN codes should not be obligatory for the listing of the plants, plant products and other objects subject to special requirements for movement within the Union territory. This would be a proportionate approach because the CN codes are only necessary for the identification of those plants, plant products or other objects when they are introduced into the Union from a third country. Such approach would be also be in line with Article 80 of Regulation (EU) 2016/2031 pursuant to which no such codes are provided for the listing of those plants, plant products and other objects, for which a plant passport is required.
- (23) The introduction of plants, plant products and other objects is prohibited in their respective protected zones and, where applicable, with regard to their third country of origin, as listed in Part B of Annex III to Directive 2000/29/EC. Moreover, the plants, plant products and other objects, as listed in Part B of Annex IV to Directive 2000/29/EC, may only be introduced into the respective protected zones if they fulfil the respective special requirements.
- (24) Those plants, plant products and other objects have been reviewed on the basis of any new evidence, their pest risk for the respective protected zones and the update of the list of the protected zones quarantine pests and the protected zones.
- (25) On the basis of that review, certain of those plants, plant products and other objects, and the respective protected zones, should be listed in this Regulation as provided for in Article 53(2) of Regulation (EU) 2016/2031, together with the third countries and groups of third countries of origin to which that prohibition applies.
- (26) Moreover, certain of those plants, plant products and other objects, and the respective protected zones and special requirements, should be listed in this Regulation as provided for in Article 54(2) of Regulation (EU) 2016/2031.
- (27) A list of plants, plant products and other objects for which a phytosanitary certificate is required for introduction into the Union territory, and the respective third countries of origin or dispatch, is to be established pursuant to Article 72(1) of Regulation (EU) 2016/2031.
- (28) Implementing Regulation (EU) 2018/2019 requires a phytosanitary certificate for the introduction into the Union territory of plants, other than the plants included in the

- list referred to in Article 72(1), pursuant to the first subparagraph of Article 73 of Regulation (EU) 2016/2031. However, certain fruits have been found to fulfil the criteria set out in Annex VI to Regulation (EU) 2016/2031 and identified as plants which do not require a phytosanitary certificate. A phytosanitary certificate should therefore not be required for the introduction into the Union of the fruits listed in Annex II of Implementing Regulation (EU) 2018/2019.
- (29) For reasons of clarity, Article 2 and Annex II of that Regulation should be deleted, in order to avoid overlaps with this Regulation.
- (30) A list of plants, plant products and other objects for which a phytosanitary certificate is required for introduction into the respective protected zones and the respective third countries of origin or dispatch, is to be established pursuant to Article 74(1) of Regulation (EU) 2016/2031. Such a list will help to ensure clarity for the professional operators, competent authorities and all of other users of those plants, plant products and other objects.
- (31) A list of plants, plant products and other objects for which a plant passport is required for movement within the Union territory is to be established pursuant to Article 79(1) of Regulation (EU) 2016/2031. Such a list will help to ensure clarity for the professional operators, competent authorities and all other users of those plants, plant products and other objects.
- (32) In order to refrain from imposing requirements on professional operators, those plant passports should not be required for the movement of seeds which are subject to derogations from the requirements of the respective Directives on the marketing of seeds. This is appropriate as this Regulation applies without prejudice to the measures adopted pursuant to those Directives and should not introduce for the professional operators additional certification burdens than the ones currently laid down in those Directives obligations.
- (33) A list of plants, plant products and other objects for which a plant passport is required for being introduced into, or moved within, certain protected zones is to be established pursuant to Article 80(1) of Regulation (EU) 2016/2031. Those plant passports should bear the designation 'PZ' to be distinguished from the plant passports required for the movement within the entire Union territory. Such a list will help to ensure clarity for the professional operators, competent authorities and all other users of those plants, plant products and other objects.
- (34) In order to avoid the disruption of trade by changes in the requirements regarding RNQPs, a limited transitional period should be granted for seeds and other plants for planting that have already been produced in the Union, introduced into the Union or moved within the Union in accordance with the requirements concerning the presence of RNQPs applicable before 14 December 2019, the date of application of this Regulation. Those seeds and other plants for planting may continue to be introduced into, or moved within, the Union in accordance with those requirements for a limited period of time. It would also be proportionate to require that plant passports would only attest the compliance of those seeds and other plants for planting with the applicable requirements on Union quarantine pests, protected zone quarantine pests and measures adopted

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

pursuant to Article 30 of Regulation (EU) 2016/2031. Such an approach would be necessary given the big amounts of seeds and other plants for planting which are in the course of production, or have been produced, before 14 December 2019, under the rules of the Directives on the marketing of seeds and other propagating material applicable before that date and when no plant passports were required concerning the presence of RNQPs. Those plants for planting have already been certified and it would be disproportionate to require their further certification under the new rules. A transitional period of one year would thus be necessary to ensure the smooth uptake of those plants for planting by the market and to facilitate the competent authorities and the professional operators to adapt to the new rules.

- (35) This Regulation should enter into force on the third day following that of its publication in the *Official Journal of the European Union*, to allow for the competent authorities and the professional operators the longest possible time to prepare for its application.
- (36) For reasons of legal certainty, this Regulation should apply from the same date as Regulation (EU) 2016/2031, which is 14 December 2019.
- (37) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

[^{F1}Article 1

Subject matter

- 1 This Regulation makes provision for the purposes of Regulation (EU) 2016/2031.
- 1A It makes provision about:
- a GB quarantine pests, provisional GB quarantine pests, PFA quarantine pests and GB regulated non-quarantine pests; and
 - b measures in relation to the introduction of plants, plant products and other objects into Great Britain and the movement of plants, plant products and other objects within Great Britain to reduce the risks in connection with those pests to an acceptable level.]

Textual Amendments

- F1** Art. 1(1)(1A) substituted for words (31.12.2020) by [The Plant Health \(Phytosanitary Conditions\) \(Amendment\) \(EU Exit\) Regulations 2020 \(S.I. 2020/1527\)](#), regs. 1(2), **2(2)** (as amended by [S.I. 2020/1631](#), regs. 1(2), **9(2)(a)**)

Article 2

Definitions

- 1 For the purposes of this Regulation, the definitions provided for in Annex I shall apply.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

[^{F2}1A Unless the context otherwise requires, words and expressions which are not defined in this Regulation and appear in Regulation (EU) 2016/2031 of the European Parliament and of the Council have the same meaning in this Regulation as they have in Regulation (EU) 2016/2031.]

2 In addition, the following definitions shall apply:

- a ‘practically free from pests’ means the extent of presence of pests, other than [^{F3}GB] quarantine pests or [^{F4}PFA] quarantine pests, on the plants for planting or fruit plants, which is sufficiently low to ensure acceptable quality and usefulness of those plants;
- b ‘official statement’ means a phytosanitary certificate, as provided for in Article 71 of Regulation (EU) 2016/2031, a [^{F5}UK] plant passport, as provided for in Article 78 of that Regulation, the mark on wood packaging material, wood or other objects, as referred to in Article 96 of that Regulation, or the official attestations as referred to in Article 99 of that Regulation;
- c ‘systems approach’ means the integration of different risk management measures, at least two of which act independently, and which, when applied together, achieve the appropriate level of protection against [^{F6}GB quarantine pests, provisional GB quarantine pests and PFA quarantine pests];
- [^{F7}d ‘EPPO code’, in relation to a pest, means the code for that pest in the EPPO code database maintained by the European and Mediterranean Plant Protection Organization;
- e ‘wood packaging material’ means wood in the form of packing cases, boxes, crates, drums or similar packings, pallets, box pallets or other load boards, pallet collars or dunnage, whether or not actually in use in the transport of objects of any kind.]

Article 6

Measures to prevent the presence of RNQPs on specific plants for planting

[^{F17} Annex 5 makes provision about the measures to prevent the presence of RNQPs on specific plants for planting which are moved within, or introduced into, Great Britain.]

2 [^{F18}Nothing in Annex 4 or 5 shall affect the application of the requirements specified in retained EU law which transposed the provisions in] Directives 66/401/EEC, 66/402/EEC, 68/193/EEC, 98/56/EC, 1999/105/EC, 2002/54/EC, 2002/55/EC, 2002/56/EC, 2002/57/EC, 2008/72/EC and 2008/90/EC concerning:

- a inspections, sampling and testing of the plants for planting concerned or the plants from which they originate;
- b the origin of the respective plants for planting from the areas or sites, which are free from, or with physical protection from, the RNQPs concerned;
- c treatments of the plants for planting concerned, or the plants from which they originate;
- d the production of the plants for planting.

3 In addition, [^{F19}nothing in Annex 4 or 5 shall affect the application of the exceptions from the requirements on marketing, specified in retained EU law which transposed the provisions in] Directives 66/401/EEC, 66/402/EEC, 68/193/EEC, 98/56/EC, 1999/105/EC, 2002/54/EC, 2002/55/EC, 2002/56/EC, 2002/57/EC, 2008/72/EC and 2008/90/EC ^{F20}... , including:

- a exceptions concerning the supply of plants for planting to official testing and inspection bodies;
- b exceptions concerning the supply of plants for planting as grown to providers of services for processing or packaging, under the condition that the provider of services does not acquire title to the plants thus supplied and the identity of the plants is ensured;
- c exceptions concerning the supply of plants for planting under certain conditions to providers of services for the production of certain agricultural raw materials, intended for industrial purposes, or seed propagation for that purpose;
- d exceptions for plants for planting intended for scientific purposes, selection work, other test or trial purposes;
- e exceptions from marketing requirements concerning plants for planting not finally certified;

^{F21}f

- g exceptions from marketing requirements for plants for planting shown to be intended for export to third countries.

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

Article 15

Repeal of Regulation (EC) No 690/2008

Regulation (EC) No 690/2008 is repealed.

Article 16

Amendment of Implementing Regulation (EU) 2018/2019

Implementing Regulation (EU) 2018/2019 is amended as follows:

- (1) Article 2 is deleted;
- (2) Annex II is deleted.

Article 17

Transitional measures

Seeds and other plants for planting introduced into the Union territory, moved within the Union territory or produced, before 14 December 2019, pursuant to the applicable requirements of Directives 66/401/EEC, 66/402/EEC, 68/193/EEC, 98/56/EC, 2002/55/EC, 2002/56/EC, 2002/57/EC, 2008/72/EC, 2008/90/EC concerning the presence of RNQPs before that date, may, until 14 December 2020, be introduced into, or moved within, the Union territory if they comply with those requirements. As of 14 December 2020. Articles 5 and 6 shall apply to all plants for planting covered by this Regulation.

Plant passports, required by this Regulation for the movement of seeds and other plants for planting within the Union territory benefitting from the transitional period laid down in paragraph 1 of this Article, shall until 14 December 2020 only be required to attest their compliance with the rules concerning Union quarantine pests, protected zone quarantine pests or measures adopted pursuant to Article 30 of Regulation (EU) 2016/2031.

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

Article 18

Entry into force and application

This Regulation shall enter into force on the third day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 14 December 2019.

F46 ...

ANNEX I

Definitions as referred to in Article 2(1)

For the purposes of this Regulation, the terms listed in Part A [^{F47} have the same meaning in the Annexes listed in the first column of the table in Part B as they have in the retained EU law transposing the Directives listed in the corresponding entries in the second column of that table].

Textual Amendments

F47 Words in Annex 1 substituted (31.12.2020) by [The Plant Health \(Phytosanitary Conditions\) \(Amendment\) \(EU Exit\) Regulations 2020 \(S.I. 2020/1527\)](#), regs. 1(2), 3 (as amended by [S.I. 2020/1631](#), regs. 1(2), **9(2)(a)**)

PART A

List of terms

- Pre-basic seed,
- Basic seed,
- Certified seed,
- Standard seed,
- Vine,
- Initial propagating material,
- Basic propagating material,
- Pre-basic material,
- Basic material,
- Certified material,
- Standard material,
- Propagating material of ornamental plants,
- Forest reproductive material,
- Vegetable propagating and planting material,
- Fruit plant propagating material and fruit plants intended for fruit production,
- Candidate pre-basic mother plant,
- Pre-basic mother plant,
- Basic mother plant,
- Certified mother plant,
- *Conformitas Agraria Communitatis* (CAC) material,
- Fodder plant seed,
- Cereal seed,
- Vegetable seed,
- Seed potatoes,
- Oil and fibre plants seed.

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

3.	<i>Pantoea stewartii</i> subsp. <i>stewartii</i> (Smith) Mergaert, Verdonck & Kersters [ERWIST]
4.	<i>Pseudomonas syringae</i> pv. <i>actinidiae</i> Takikawa, Serizawa, Ichikawa, Tsuyumu & Goto [PSDMAK]
5.	<i>Pseudomonas syringae</i> pv. <i>persicae</i> (Prunier, Luisetti & Gardan) Young, Dye & Wilkie [PSDMPE]
6.	<i>Ralstonia pseudosolanacearum</i> Safni <i>et al.</i> [RALSPS]
7.	<i>Ralstonia syzygii</i> subsp. <i>celebesensis</i> Safni <i>et al.</i> [RALSSC]
8.	<i>Ralstonia syzygii</i> subsp. <i>indonesiensis</i> Safni <i>et al.</i> [RALSSI]
9.	<i>Xanthomonas arboricola</i> pv. <i>pruni</i> (Smith) Vauterin <i>et al.</i> [XANTPR]
10.	<i>Xylella fastidiosa</i> (Wells <i>et al.</i>) [XYLEFA]
11.	<i>Xylophilus ampelinus</i> (Panagopoulos) Willems, Gillis, Kersters, van den Broeke & De Ley [XANTAM]
B. Fungi and oomycetes	
1.	<i>Anisogramma anomala</i> (Peck) E. Müller [CRSPAN]
2.	<i>Apiosporina morbosa</i> (Schweinitz) von Arx [DIBOMO]
3.	<i>Atropellis apiculata</i> M.L. Lohman, E.K. Cash & R.W. Davidson [ATRPAP]
4.	<i>Atropellis pinicola</i> Zeller & Goodding [ATRPPC]
5.	<i>Atropellis piniphila</i> (Weir) Lohmann & Cash [ATRPPI]
6.	<i>Atropellis tingens</i> Lohman & Cash [ATRPTI]
7.	<i>Botryosphaeria laricina</i> (Sawada) Shang [GUIGLA]
8.	<i>Botryosphaeria kuwatsukai</i> (Hara) G.Y. Sun and E. Tanaka [PHYOPI]
9.	<i>Bretziella fagacearum</i> Z.W. de Beer, Marincowitz, T.A. Duong & M.J. Wingfield [CERAFA]
10.	<i>Ceratocystis platani</i> (J. M. Walter) Engelbr. & T. C. Harr [CERAFF]
11.	<i>Chrysomyxa arctostaphyli</i> Dietel [CHMYAR]
12.	<i>Coniferiporia sulphurascens</i> (Pilát) L.W. Zhou & Y.C. Dai [PHELSU]
13.	<i>Coniferiporia weirii</i> (Murrill) L.W. Zhou & Y.C. Dai [INONWE]

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

14.	<i>Cronartium</i> spp. Fries [1CRONG], except <i>Cronartium gentianeum</i> Thümen [CRONGE], <i>Cronartium pini</i> (Willdenow) Jørstad [ENDCPI] and <i>Cronartium ribicola</i> Fischer [CRONRI].
15.	<i>Cryphonectria parasitica</i> (Murrill) Barr [ENDOPA]
16.	<i>Davidsoniella virescens</i> (R.W. Davidson) Z.W. de Beer, T.A. Duong & M.J. Wingfield [CERAVI]
17.	<i>Diaporthe vaccinii</i> Shear [DIAPVA]
18.	<i>Dothistroma pini</i> Hulbary [DOTSPI]
19.	<i>Fusarium circinatum</i> Nirenberg & O'Donnell [GIBBCI]
20.	<i>Geosmithia morbida</i> Kolarík, Freeland, Utley & Tisserat [GEOHMO]
21.	<i>Gymnosporangium</i> spp. [1GYMNG], except: <i>Gymnosporangium amelanchieris</i> E. Fisch. ex F. Kern [GYMNAM], <i>Gymnosporangium atlanticum</i> Guyot & Malençon [GYMNAT], <i>Gymnosporangium clavariiforme</i> (Wulfen) DC [GYMNCF], <i>Gymnosporangium confusum</i> Plowright [GYMNCO], <i>Gymnosporangium cornutum</i> Arthur ex F. Kern [GYMNCR], <i>Gymnosporangium fusisporum</i> E. Fisch. [GYMNFS], <i>Gymnosporangium gaeumannii</i> H. Zogg [GYMNGA], <i>Gymnosporangium gracile</i> Pat. [GYMNGR], <i>Gymnosporangium minus</i> Crowell [GYMNMI], <i>Gymnosporangium orientale</i> P. Syd. & Syd. [GYMNOR], <i>Gymnosporangium sabiniae</i> (Dickson) G. Winter [GYMNFU], <i>Gymnosporangium torminali-juniperini</i> E. Fisch. [GYMNTJ], <i>Gymnosporangium tremelloides</i> R. Hartig [GYMNTR]
22.	<i>Lecanosticta acicola</i> (von Thümen) Sydow [SCIRAC]
23.	<i>Melampsora farlowii</i> (Arthur) Davis [MELMFA]
24.	<i>Melampsora medusae</i> f. sp. <i>tremuloidis</i> Shain [MELMMT]
25.	<i>Mycodiella laricis-leptolepidis</i> (Kaz. Itô, K. Satô & M. Ota) Crous [MYCOLL]
26.	<i>Phoma andina</i> Turkensteen [PHOMAN]
27.	<i>Phyllosticta solitaria</i> Ellis & Everhart [PHYSSL]
28.	<i>Phymatotrichopsis omnivora</i> (Duggar) Hennebert [PHMPOM]
29.	<i>Phytophthora ramorum</i> (non-European isolates) Werres, De Cock & Man in 't Veld [PHYTRA]
30.	<i>Pseudocercospora pini-densiflorae</i> (Hori & Nambu) Deighton [CERSPD]
31.	<i>Puccinia pittieriana</i> Hennings [PUCCPT]
32.	<i>Septoria malagutii</i> E.T. Cline [SEPTLM]
33.	<i>Sphaerulina musiva</i> (Peck) Quaedvl, Verkley & Crous. [MYCOPP]
34.	<i>Stegophora ulmea</i> (Fr.) Syd. & P. Syd [GNOMUL]
35.	<i>Thecaphora solani</i> (Thirumulachar & O'Brien) Mordue [THPHSO]
[^{F49} 35A]	<i>Thekopsora minima</i> (Arthur) Sydow & P. Sydow [THEKMI]
36.	<i>Tilletia indica</i> Mitra [NEOVIN]

C. Insects and mites

Status: Point in time view as at 02/03/2022.

122.	<i>Thaumatotibia leucotreta</i> (Meyrick) [ARGPLE]
123.	<i>Thaumatopoea pityocampa</i> Denis & Schiffermüller [THAUPI]
124.	<i>Thrips palmi</i> Karny [THRIPL]
125.	<i>Zeugodacus cucumis</i> (French) [DACUCM]
126.	<i>Zeugodacus cucurbitae</i> (Coquillett) [DACUCU]

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

D. Nematodes

1.	<i>Aphelenchoides besseyi</i> Christie [APLOBE]
2.	<i>Bursaphelenchus xylophilus</i> (Steiner and Bühner) Nickle [BURSXY]
3.	<i>Globodera pallida</i> (Stone) Behrens [HETDPA] (Non-European Strains)
4.	<i>Globodera rostochiensis</i> (Wollenweber) Behrens [HETDRO] (Non-European Strains)
5.	<i>Hirschmanniella</i> spp., Luc & Goodey [HIRSG], except: — <i>Hirschmanniella behningi</i> Micoletzky [HIRSBE], — <i>Hirschmanniella gracilis</i> (de Man) Luc & Goodey [HIRSGR], — <i>Hirschmanniella halophila</i> Sturhan & Hallman [HIRSHA], — <i>Hirschmanniella loofi</i> Sher [HIRSLO] and — <i>Hirschmanniella zostericola</i> Allgén [HIRSZO]
6.	<i>Longidorus diadecturus</i> Eveleigh and Allen [LONGDI]
7.	<i>Meloidogyne chitwoodi</i> Golden <i>et al.</i> [MELGCH]
8.	<i>Nacobbus aberrans</i> (Thorne) Thorne and Allen [NACOBA]
9.	<i>Xiphinema americanum sensu stricto</i> Cobb [XIPHAA]
10.	<i>Xiphinema bricolense</i> Ebsary, Vrain & Graham [XIPHBC]
11.	<i>Xiphinema californicum</i> Lamberti & Bleve-Zacheo [XIPHCA]
12.	<i>Xiphinema neoamericanum</i> Saxena, Chhabra & Joshi [XIPHNA]
13.	<i>Xiphinema intermedium</i> Lamberti & Bleve-Zacheo [XIPHIM]
14.	<i>Xiphinema rivesi</i> (non-European populations) Dalmasso [XIPHRI]
15.	<i>Xiphinema tarjanense</i> Lamberti & Bleve-Zacheo [XIPHTA]

E. Parasitic plants

1.	<i>Arceuthobium</i> spp. [1AREG], except: — <i>Arceuthobium azoricum</i> Wiens & Hawksworth [AREAZ], — <i>Arceuthobium gambyi</i> Fridl [AREGA] and — <i>Arceuthobium oxycedri</i> (de Candolle) Marschall von Bieberstein [AREOX]
----	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

F. Viruses, viroids and phytoplasmas

1.	Beet curly top virus [BCTV00]
2.	Begomoviruses [1BEGOG]
3.	Blueberry scorch virus [BLSCV0]
4.	Blueberry shoestring virus [BSSV00]
5.	<i>Candidatus</i> Phytoplasma ‘aurantifolia’ Zreik, Bové & Garnier [PHYPAF]
6.	<i>Candidatus</i> Phytoplasma ‘mali’ Seemüller & Schneider [PHYPMA]
7.	<i>Candidatus</i> Phytoplasma ‘pruni’ Davis, Zhao, Dally, Lee, Jomantiene & Douglas [PHYPPN]
8.	<i>Candidatus</i> Phytoplasma ‘solani’ Quaglino, Zhao, Casati, Bulgari, Bianco, Wei & Davis [PHYPSO]
9.	<i>Candidatus</i> Phytoplasma ‘ulmi’ Lee, Martini, Marcone & Zhu [PHYFUL]

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

10.	Chrysanthemum stem necrosis virus [CSNV00]
11.	Coconut lethal yellowing phytoplasma [PHYP56]
12.	Cowpea mild mottle virus [CPMMV0]
13.	Cucumber vein yellowing virus [CVYV00]
14.	Cucurbit yellow stunting disorder virus [CYSDV0]
15.	Grapevine flavescence dorée phytoplasma [PHYP64]
16.	Lettuce infectious yellows virus [LIYV00]
17.	Melon yellowing-associated virus [MYAV00]
18.	Potato viruses, viroids and phytoplasmas, such as: <ul style="list-style-type: none"> — Andean potato latent virus [APLV00], — Andean potato mild mosaic virus [APMMV0], — Andean potato mottle virus [APMOV0], — Arracacha virus B, oca strain [AVBO00], — Potato black ringspot virus [PBRV00], — Potato yellowing virus [PYV000], — Potato yellow vein virus [PYVV00], — Potato virus T [PVT000], — Non-European isolates of potato viruses A, M, S, V, X and Y (including Yo, Yn and Yc) and Potato leafroll virus [PVA000, PVM000, PVS000, PVV000, PVX000 and PVY000 (including PVYO00, PVYN00, PVYC00)] and [PLRV00]
19.	Rose Rosette virus [RRV000]
20.	Strawberry vein banding virus [SVBV00]
21.	Squash vein yellowing virus [SQVYVX]
22.	Sweet potato chlorotic stunt virus [SPCSV0]
23.	Sweet potato mild mottle virus [SPMMV0]
24.	Tobacco ringspot virus [TRSV00]
25.	Tobacco streak virus black raspberry latent strain [TSVBL0]
26.	Tomato brown rugose fruit virus [TOBRFV]
27.	Tomato chocolate virus [TOCHV0]
28.	Tomato leaf curl New Delhi virus [TOLCND]
29.	Tomato marchitez virus [TOANV0]
30.	Tomato mild mottle virus [TOMMOV]
31.	Viruses, viroids and phytoplasmas of <i>Cydonia</i> Mill., <i>Fragaria</i> L., <i>Malus</i> Mill., <i>Prunus</i> L., <i>Pyrus</i> L., <i>Ribes</i> L., <i>Rubus</i> L. and <i>Vitis</i> L., such as: <ul style="list-style-type: none"> — Blueberry leaf mottle virus [BLMOV0], — <i>Candidatus</i> Phytoplasma <i>australiense</i> Davis, Gillaspie, Vidaver & Harris [PHYPAU], — <i>Candidatus</i> Phytoplasma <i>phoenicium</i> Verdin, Salar, Danet, Choueiri, Jreijiri, El Zamar, Gélie, Bové & Garnier [PHYPPH], — Cherry rasp leaf virus [CRLV00],

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- Grapevine ajinashika virus [GAV000],
- Peach mosaic virus [PCMV00],
- Peach rosette mosaic virus [PRMV00],
- American plum line pattern virus [APLPV0],
- Raspberry leaf curl virus [RLCV00],
- Strawberry witches' broom phytoplasma [SYWB00],
- Non-European viruses, viroids and phytoplasmas of *Cydonia* Mill., *Fragaria* L., *Malus* Mill., *Prunus* L., *Pyrus* L., *Ribes* L., *Rubus* L. and *Vitis* L.

ANNEX 4

List of GB regulated non-quarantine pests and their respective plants for planting

Textual Amendments

F70 Annex 4 substituted (31.12.2020) by [The Plant Health \(Phytosanitary Conditions\) \(Amendment\) \(EU Exit\) Regulations 2020 \(S.I. 2020/1527\)](#), reg. 1(2), **Sch. 4** (as amended by S.I. 2020/1631, regs. 1(2), **9(2)(a)**)

Modifications etc. (not altering text)

C4 [Annex 4](#): power to modify conferred (31.12.2020) by Regulation (EU) No. 2016/2031, Art. 37(5) (as substituted by [The Plant Health \(Amendment etc.\) \(EU Exit\) Regulations 2020 \(S.I. 2020/1482\)](#), regs. 2(2)(b), **28(4)(e)**)

In this Annex, ‘RNQPs’ means GB regulated non-quarantine pests.

Table of Contents

Part A: RNQPs concerning fodder plant seed

Part B: RNQPs concerning vine propagating material

Part C: RNQPs concerning propagating material of ornamental plants and other plants for planting intended for ornamental purposes

Part D: RNQPs concerning forest reproductive material, other than seeds

Part E: RNQPs concerning vegetable seed

Part F: RNQPs concerning seed potatoes

Part G: RNQPs concerning seed of oil and fibre plants

Part H: RNQPs concerning vegetable propagating and planting material, other than seeds

Part I: RNQPs concerning fruit propagating material and fruit plants intended for fruit production

Part J: RNQPs concerning seeds of *Solanum tuberosum*

Part K: RNQPs concerning plants for planting of *Humulus lupulus*, other than seeds

PART A

RNQPs concerning fodder plant seed

(1) RNQPs or symptoms caused by RNQPs	(2) Plants for planting (genus or species)	(3) Thresholds for pre-basic seed	(4) Thresholds for basic seed	(5) Thresholds certified seed
<i>Clavibacter michiganensis</i>	<i>Medicago sativa</i> L.	0%	0%	0%

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

ssp. <i>insidiosus</i> (McCulloch 1925) Davis et al. [CORBIN]				
<i>Ditylenchus dipsaci</i> (Kuehn) Filipjev [DITYDI]	<i>Medicago sativa</i> L.	0%	0%	0%

PART B

RNQPs concerning vine propagating material

Insects and mites				
(1) RNQPs or symptoms caused by RNQPs	(2) Plants for planting other than seeds (genus or species)	(3) Thresholds for initial propagating material, basic propagating material and certified material	(4) Thresholds for standard material	
<i>Daktulosphaira vitifoliae</i> Fitch [VITEVI]	Non-grafted <i>Vitis vinifera</i> L.	0%	0%	
<i>Daktulosphaira vitifoliae</i> Fitch [VITEVI]	<i>Vitis</i> L. other than non-grafted <i>Vitis vinifera</i> L.	Practically free	Practically free	
Viruses, viroids, virus-like diseases and phytoplasmas				
(1) RNQPs or symptoms caused by RNQPs	(2) Plants for planting other than seeds (genus or species)	(3) Thresholds for initial propagating material, basic propagating material and certified material	(4) Thresholds for standard material	
<i>Arabis</i> mosaic virus [ARMV00]	<i>Vitis</i> L.	0%	0%	
Grapevine fanleaf virus [GFLV00]	<i>Vitis</i> L.	0%	0%	
Grapevine fleck virus [GFKV00]	Rootstocks of <i>Vitis</i> spp. and their hybrids, except <i>Vitis vinifera</i> L.	0% for initial propagating material. Not applicable for basic propagating material and certified material.	Not applicable	
Grapevine leafroll associated virus 1 [GLRAV1]	<i>Vitis</i> L.	0%	0%	

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

Part J:	Measures to prevent the presence of the RNQPs on plants for planting of <i>Humulus lupulus</i> , other than seeds
---------	-------------------------------------------------------------------------------------------------------------------

Interpretation

In this Annex:

‘competent authority’, in relation to plants for planting originating in a third country, means the national plant protection organisation of the country of origin or any official authority or body acting under the supervision of the national plant protection organisation;

‘RNQPs’ means GB regulated non-quarantine pests.

PART A

Measures to prevent the presence of RNQPs on fodder plant seed

1. Inspection of the crop

1 The competent authority, or the professional operator under the official supervision of the competent authority, must carry out field inspections on the crop from which the fodder plant seed is produced concerning the presence of RNQPs in the crop to ensure that the presence of RNQPs does not exceed the thresholds set out in the table in Part A of Annex 4.

2 For the purposes of point (1), the competent authority may authorise inspectors, other than the professional operators, to carry out the field inspections on its behalf and under its official supervision.

3 Field inspections may only be carried out when the condition and the stage of development of the crop allow for an adequate inspection. At least one field inspection must be carried out each year, at the most appropriate time for the detection of the respective RNQPs.

4 The competent authority must determine the size, the number and the distribution of the portions of the field to be inspected in accordance with appropriate methods.

5 The proportion of the crops for the production of seed to be officially inspected by the competent authority must be at least 5%.

2. Sampling and testing of fodder plant seed

1 The competent authority must:

2 The competent authority or the professional operator under official supervision must sample and test the fodder plant seed in accordance with up-to-date international methods.

3 Except for automatic sampling, the competent authority must check a proportion of at least 5 % of the seed lots entered for official certification.

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

4 That proportion must be as spread as evenly possible over natural and legal persons entering seed for certification, and the species entered, but may also be aimed at eliminating specific doubts.

5 In the case of automatic sampling, appropriate procedures must be applied and the sampling must be officially supervised.

6 For the examination of seed for certification, samples must be drawn from homogeneous lots and, as regards the lot and sample weights, in accordance with the table in Annex 3 to Directive 66/401/EEC.

Textual Amendments

F79 Annex 5 Pt. A para. 2(1)(d): Annex 5 Pt. A para. 2(1)(c) renumbered (26.11.2021) by The Animal Health, Plant Health, Seeds and Seed Potatoes (Miscellaneous Amendments) Regulations 2021 (S.I. 2021/1229), regs. 1, 8(2)

3.

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting are satisfied:

<i>RNQPs or symptoms caused by RNQPs</i>	<i>Plants for planting (genus or species)</i>	<i>Requirements</i>
<i>Clavibacter michiganensis</i> ssp. <i>insidiosus</i>	Pre-basic, basic and certified seeds of <i>Medicago sativa</i> L.	<ul style="list-style-type: none"> a the seeds originate in areas known to be free from <i>Clavibacter michiganensis</i> spp. <i>insidiosus</i>, b the crop has been grown on land on which no previous <i>Medicago sativa</i> L. crop was present during the last three years prior to sowing, and no symptoms of <i>Clavibacter michiganensis</i> ssp. <i>insidiosus</i> have been observed during any field inspection at the site of production or no symptoms of <i>Clavibacter michiganensis</i> ssp. <i>insidiosus</i> have been observed on any <i>Medicago sativa</i> L. crop adjacent to it, during the previous cropping, or c the crop belongs to a variety recognised as being highly resistant to <i>Clavibacter michiganensis</i> ssp. <i>insidiosus</i>

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

		and the content of inert matter does not exceed 0.1% by weight
<i>Ditylenchus dipsaci</i>	Pre-basic, basic and certified seeds of <i>Medicago sativa</i> L.	<p>a no symptoms of <i>Ditylenchus dipsaci</i> have been observed at the site of production during the previous cropping, no main host crops have been grown during the two preceding years on the site of production and appropriate hygiene measures have been taken to prevent infestation of the place of production,</p> <p>b no symptoms of <i>Ditylenchus dipsaci</i> have been observed at the site of production during the previous cropping and no <i>Ditylenchus dipsaci</i> has been found by laboratory tests on a representative sample, or</p> <p>c the seeds have been subjected to an appropriate physical or chemical treatment against <i>Ditylenchus dipsaci</i> and have been found to be free of this pest after laboratory tests on a representative sample.</p>

PART B

Measures to prevent the presence of RNQPs on propagating material of *Vitis* sp.

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting are satisfied:

Insects and mites		
<i>RNQPs or symptoms caused by RNQPs</i>	<i>Plants for planting (genus or species)</i>	<i>Requirements</i>
<i>Daktulosphaira vitifoliae</i> Fitch [VITEVI]	<i>Vitis vinifera</i> L.	<p>a the plants have been produced in areas known to be free from <i>Daktulosphaira vitifoliae</i> Fitch,</p> <p>b the plants have been grafted on rootstocks resistant to</p>

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

		<p><i>Daktulosphaira vitifoliae</i> Fitch, or</p> <p>c in the case where propagating material which is intended for marketing showed signs or symptoms of <i>Daktulosphaira vitifoliae</i> Fitch, the entire lot of that material has been subjected to fumigation, hot water treatment or another appropriate treatment in accordance with protocols of the European and Mediterranean Plant Protection Organization, or other protocols which are internationally recognised to ensure freedom from <i>Daktulosphaira vitifoliae</i> Fitch.</p>
Viruses, viroids, virus-like diseases and phytoplasmas		
<i>(1)</i> <i>RNQP</i> s or symptoms caused by <i>RNQP</i> s	<i>(2)</i> <i>Plants for planting</i> (genus or species)	<i>(3)</i> <i>Requirements</i>
<i>Arabis</i> mosaic virus [ARMV00], Grapevine fanleaf virus [GFLV00], Grapevine fleck virus [GFKV00], Grapevine leafroll associated virus 1 [GLRAV1] and Grapevine leafroll associated virus 3 [GLRAV3]	<i>Vitis vinifera</i> L.	Symptoms of all viruses listed in column 1 have been observed on no more than 10% of vines in the stock nurseries and those vines have been eliminated from propagation.

PART C

Measures to prevent the presence of RNQPs on propagating material of ornamental plants and other plants for planting intended for ornamental purposes

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting are satisfied:

Bacteria		
<i>(1)</i> <i>RNQP</i> s or symptoms caused by <i>RNQP</i> s	<i>(2)</i> <i>Plants for planting</i> (genus or species)	<i>(3)</i> <i>Requirements</i>

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

PART D

Measures to prevent the presence of RNQPs on forest reproductive material, other than seeds

1. Visual inspections

1 The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements in point (2) are satisfied in respect of forest reproductive material, other than seeds, of *Pinus* spp.

2 The requirements are that the forest reproductive material is found free from *Dothistroma septosporum* upon visual inspection at the production site or place.

3 The visual inspections must take place once a year, in the most appropriate period to detect those pests, taking into account the climatic conditions and the growing conditions of the plant, and the biology of the pest.

2. Other requirements

1 The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that, the requirements in point (2) are satisfied in respect of forest reproductive material of *Pinus* spp.

2 The requirements are that:

PART F

Measures to prevent the presence of RNQPs on seed potatoes

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting are satisfied:

<i>(1) RNQPs or symptoms caused by RNQPs</i>	<i>(2) Plants for planting (genus or species)</i>	<i>(3) Requirements</i>
Blackleg (<i>Dickeya</i> Samson <i>et al.</i> spp. [1DICKG]; <i>Pectobacterium</i> Waldee	<i>Solanum tuberosum</i> L.	In the case of pre-basic seed potatoes, official inspections show that they derive from mother plants which are

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

emend. Hauben <i>et al.</i> spp. [1PECBG])		free from <i>Dickeya</i> Samson <i>et al.</i> spp. and <i>Pectobacterium</i> Waldee emend. Hauben <i>et al.</i> spp. In the case of all categories, the growing plants have been subjected to official field inspections by the competent authority.
<i>Candidatus</i> Liberibacter ‘solanacearum’ Liefting <i>et al.</i> [LIBEPS]	<i>Solanum tuberosum</i> L.	In the case of pre-basic seed potatoes, official inspections show that they derive from mother plants which are free from <i>Candidatus</i> Liberibacter ‘solanacearum’ Liefting <i>et al.</i> In the case of all categories: a the plants have been produced in areas known to be free from <i>Candidatus</i> Liberibacter ‘solanacearum’ Liefting <i>et al.</i> , taking into account the possible presence of the vectors, or b no symptoms of <i>Candidatus</i> Liberibacter ‘solanacearum’ Liefting <i>et al.</i> , have been seen during official inspections by the competent authority of growing plants at the site of production since the start of the last complete cycle of vegetation.
Mosaic symptoms caused by viruses and symptoms caused by Potato leaf roll virus	<i>Solanum tuberosum</i> L.	In the case of pre-basic seed potatoes, they derive from mother plants which are free from Potato virus A, Potato virus M, Potato virus S, Potato virus X, Potato virus Y and Potato leaf roll virus. Where methods of micro-propagation are used, compliance with this requirement must be established by official testing, or testing under official supervision, of the mother plant. Where methods of clonal selection are used, compliance with this requirement must be established by official testing, or testing under official supervision, of the clonal stock. In the case of all categories, the growing plants have been subjected to official inspection by the competent authority.
<i>Meloidogyne fallax</i> Karssen [MELGFA]	<i>Solanum tuberosum</i> L.	a the tubers originate in an area in which <i>Meloidogyne fallax</i>

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

		<p>Karssen is known not to occur, or</p> <p>b where they originate in an area in which <i>Meloidogyne fallax</i> Karssen is known to occur:</p> <p>i that the tubers originate from a place of production which has been found free from <i>Meloidogyne fallax</i> Karssen based on an annual survey of host crops, by visual inspection of host plants at appropriate times and by visual inspection both externally and by cutting of tubers after harvest from potato crops grown at the place of production, or</p> <p>ii that after harvest the tubers have been randomly sampled and checked for the presence of symptoms after an appropriate method to induce symptoms or laboratory tested, as well as inspected visually, both externally and by cutting the tubers, at appropriate times, and no symptoms of <i>Meloidogyne fallax</i> Karssen have been found.</p>
<p>Potato spindle tuber viroid [PSTVD0]</p>	<p><i>Solanum tuberosum</i> L.</p>	<p>In the case of clonal stock, official testing, or testing under official supervision, has shown that they derive from mother plants which are free from Potato spindle tuber viroid. In the case of pre-basic and basic seed potatoes, no symptoms of Potato spindle tuber viroid have been found, or for each lot, official post-harvest testing of tubers have been performed and those tubers have been found free from Potato spindle tuber viroid.</p>

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

		In the case of certified seed potatoes, official visual inspection has shown that they are free from Potato spindle tuber viroid, and if any symptoms of the pest were seen, testing was carried out.
Symptoms of virus infection	<i>Solanum tuberosum</i> L.	During official inspection of the direct progeny, the number of symptomatic plants did not exceed the threshold specified in Part F of Annex 4.
<i>Candidatus</i> Liberibacter 'solanacearum' Liefting <i>et al.</i> [LIBEPS]	<i>Solanum tuberosum</i> L.	The competent authority has subjected the lots to official inspection and confirms that they do not exceed the threshold specified in Part F of Annex 4.
<i>Ditylenchus destructor</i> Thorne [DITYDE]	<i>Solanum tuberosum</i> L.	The competent authority has subjected the lots to official inspection and confirms that they do not exceed the threshold specified in Part F of Annex 4.
Black scurf affecting tubers over more than 10% of their surface, as caused by <i>Thanatephorus cucumeris</i> (A.B. Frank) Donk [RHIZSO]	<i>Solanum tuberosum</i> L.	The competent authority has subjected the lots to official inspection and confirms that they do not exceed the threshold specified in Part F of Annex 4.
Powdery scab affecting tubers over more than 10% of their surface as caused by <i>Spongospora subterranea</i> (Wallr.) Lagerh. [SPONSU].	<i>Solanum tuberosum</i> L.	The competent authority has subjected the lots to official inspection and confirms that they do not exceed the threshold specified in Part F of Annex 4.

In addition, the competent authority must carry out official inspections to ensure that the presence of the RNQPS on the growing plants specified in any entry of the table below do not exceed the thresholds in the corresponding entries of the table:

(1) RNQPs or symptoms caused by RNQPs	(2) Plants for planting (genus or species)	(3) Thresholds for the direct progeny of pre-basic seed potatoes		(4) Thresholds for the direct progeny of basic seed potatoes	(5) Thresholds for the direct progeny of certified seed potatoes

PART G

Measures to prevent the presence of RNQPS on seed of oil and fibre plants

1. Inspection of the crop

1 The competent authority, or the professional operator under the official supervision of the competent authority, must carry out field inspections on the crop from which the seed of *Helianthus annuus* L. is produced concerning the presence of *Plasmopara halstedii* (Farlow)

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

Berlese & de Toni in the crop to ensure that the presence of that pest does not exceed the thresholds set out in the table in Part G of Annex 4.

2 For the purposes of point (1), the competent authority may authorise inspectors, other than the professional operators, to carry out the field inspections on its behalf and under its official supervision.

3 Those field inspections must be carried out when the condition and the stage of development of the crop allow for an adequate inspection. At least one field inspection must be carried out each year, at the most appropriate time for the detection of the respective RNQPs.

4 The competent authority must determine the size, the number and the distribution of the portions of the field to be inspected in accordance with appropriate methods.

5 The proportion of the crops for the production of seed to be officially inspected by the competent authority must be at least 5%.

2. Sampling and testing of oil and fibre plants

1 The competent authority must:

2 The competent authority or the professional operator under official supervision must sample and test oil and fibre plants in accordance with up-to-date international methods.

3 Except for automatic sampling, the competent authority must check a proportion of at least 5 % of the seed lots entered for official certification.

4 That proportion must be spread as evenly as possible over natural and legal persons entering seed for certification and the species entered, but may also be aimed at eliminating specific doubts.

5 In the case of automatic sampling, appropriate procedures must be applied and the sampling must be officially supervised.

6 For the examination of seed for certification, samples must be drawn from homogeneous lots and, as regards the lot and sample weights, in accordance with the table in Annex 3 to Directive [66/401/EEC](#).

Textual Amendments

Textual Amendments

F100 Words in Annex 5 Pt. G para. 3 Table omitted (2.3.2022) by virtue of [The Phytosanitary Conditions \(Amendment\) Regulations 2022 \(S.I. 2022/114\)](#), regs. 1(1)(a), **3(5)**

PART H

Measures to prevent the presence of RNQPs on vegetable propagating and planting material, other than seeds

I

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that:

- a the plants appear at least, on visual inspection, to be practically free from pests listed in the table below, in respect of the genera or species concerned;
- b any plants showing visible signs or symptoms of the pests listed in the table below, at the stage of the growing crop, have been treated properly immediately upon their appearance or, where appropriate, have been eliminated;

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- c in the case of bulbs of shallots and garlic, the plants derive directly from material which, at the stage of the growing crop, has been checked and found to be practically free from any pest listed in the table below.

2

In addition, the competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting, are satisfied:

Bacteria		
(1) RNQPs or symptoms caused by RNQPs	(2) Plants for planting (genus or species)	(3) Requirements
<i>Candidatus</i> Liberibacter 'solanacearum' Lieferting <i>et al.</i> [LIBEPS]	<i>Solanum lycopersicum</i> L.	<p>a) the plants have been produced in areas known to be free from <i>Candidatus</i> Liberibacter 'solanacearum' Lieferting <i>et al.</i>, taking into account the possible presence of the vectors, or</p> <p>b) no symptoms of <i>Candidatus</i> Liberibacter 'solanacearum' Lieferting <i>et al.</i>, have been seen during official inspections by the competent authority of growing plants at the site of production since the start of the last complete cycle of vegetation.</p>
<i>Clavibacter michiganensis</i> subsp. <i>michiganensis</i> (Smith) Davis <i>et al.</i> [CORBMI]	<i>Solanum lycopersicum</i> L.	The plants have been grown from seeds which comply with the requirements specified in Part E of Annex 5 and have been maintained free from infection by appropriate hygiene measures.
<i>Xanthomonas euvesicatoria</i> Jones <i>et al.</i> [XANTEU]	<i>Capsicum annuum</i> L. and <i>Solanum lycopersicum</i> L.	The seedlings have been grown from seeds which comply with the requirements specified in Part E of Annex 5 and the plants have been maintained free from infection by appropriate hygiene measures.
<i>Xanthomonas gardneri</i> (ex Šutič) Jones <i>et al.</i> [XANTGA]	<i>Capsicum annuum</i> L. and <i>Solanum lycopersicum</i> L.	The seedlings have been grown from seeds which comply with the requirements specified in Part E of Annex 5 and the plants have been maintained free from infection by appropriate hygiene measures.

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. PART I

Measures to prevent the presence of RNQPs on seed of *Solanum tuberosum* L.

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the following requirements are satisfied in relation to seed of *Solanum tuberosum*:

- a) the seeds originate in areas where Potato spindle tuber viroid is not known to occur;
- b) no symptoms of diseases caused by Potato spindle tuber viroid have been observed on the plants at the place of production during their complete cycle of vegetation; or
- c) the plants have been subjected to official testing for Potato spindle tuber viroid, on a representative sample using appropriate methods and have been found in those tests to be free from that pest.

PART J

Measures to prevent the presence of RNQPs on plants for planting of *Humulus lupulus* L., other than seeds

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting are satisfied:

Fungi

There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

Interpretation

In this Annex:

‘associated controlled dunnage’, in entry [^{F114}109, 111, 112, 113, [^{F115}115A, 115B,] 116, 117, 120, 122, 123, 125, 128, [^{F116}128A, 128C,] 130, 132, 135, 136, [^{F117}136A,] 138, 140 or 142] of Part A, means wood which supports a consignment of wood of a genus or species specified in that entry and which—

i is constructed from wood of the same type and quality as the wood in the consignment; and

ii meets the requirements specified in column (3) of that entry;

‘EPPO PM 9/2’ means the standard describing a national regulatory control system for *Clavibacter michiganensis* subsp. *sepedonicus* that provides guidance on surveillance for the pathogen and its containment and eradication if found, approved by the European and Mediterranean Plant Protection Organization ;

‘EPPO PM 9/5’ means the standard describing the procedures for official control of *Synchytrium endobioticum*, approved by the European and Mediterranean Plant Protection Organization ;

‘EPPO PM 9/26’ means the standard describing a national regulatory control system for *Globodera pallida* and *Globodera rostochiensis*, approved by the European and Mediterranean Plant Protection Organization ;

[^{F118}‘ISPM4’ means International Standard for Phytosanitary Measures No 4 of April 2017 on requirements for the establishment of pest free areas, prepared by the Secretariat of the IPPC established by the Food and Agriculture Organisation of the United Nations;]

[^{F119}‘ISPM41’ means International Standard for Phytosanitary Measures No 41 of April 2017 on international movement of used vehicles, machinery and equipment, prepared by the Secretariat of the IPPC established by the Food and Agriculture Organisation of the United Nations];

‘list of *Xylella* host plants’ means the list, published by the national plant protection organisation of the United Kingdom from time to time, of plants that may host *Xylella fastidiosa* (Wells et al.).

	(1) Description of plants, plant products or other objects	(2) Origin	(3) Special requirements
1.	Growing medium, attached to or associated with plants, intended to sustain the vitality of the plants, with the exception of sterile medium of <i>in-vitro</i> plants	Any third country other than EU Member States, Liechtenstein and Switzerland	The plants must be accompanied by an official statement: <ul style="list-style-type: none"> a that the growing medium at the time of their planting: <ul style="list-style-type: none"> i was free from soil and organic matter and had not been previously used for growing plants or for any other agricultural purposes,

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

			<ul style="list-style-type: none"> ii was composed entirely of peat or fibre of <i>Cocos nucifera</i> L. and had not been previously used for growing plants or for any other agricultural purposes, iii was subjected to effective fumigation or heat treatment* to ensure freedom from pests, or iv was subjected to an effective systems approach* to ensure freedom from pests, and in all the cases mentioned in points (i) to (iv) was stored and maintained under appropriate conditions to keep it free from GB quarantine pests, and
			<ul style="list-style-type: none"> b that since planting: <ul style="list-style-type: none"> i appropriate measures have been taken to ensure that the growing medium has been kept free from GB quarantine pests, including at least: <ul style="list-style-type: none"> aa physical isolation of the growing medium from soil and other possible sources of contamination,

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

			<p>bb hygiene measures,</p> <p>cc using water free from GB quarantine pests, or</p> <p>ii in the two weeks prior to export, the growing medium including, where appropriate, soil was completely removed by washing using water free from GB quarantine pests, and where replanting occurred, [^{F120}the] growing medium used met the requirements specified in point (a) and the measures described in point (b)(i) were taken to ensure that it remains free from GB quarantine pests.</p> <p>* Details of the treatment or the use of a systems approach must also be included on the phytosanitary certificate under the heading “Additional declaration”.</p>
2.	Machinery and vehicles which have been operated for agricultural or forestry purposes	Any third country other than EU Member States, Liechtenstein and Switzerland	The machinery or vehicles must be accompanied by an official statement that the machinery or vehicles have been cleaned and are free from soil and plant debris [^{F121} in accordance with ISPM41].
3.	Machinery and vehicles which have been operated for agricultural or forestry purposes	EU Member States, Liechtenstein and Switzerland	The machinery or vehicles must be accompanied by an official statement that the machinery or vehicles have been: <p>a moved from an area established by the national</p>

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

			<p>plant protection organisation of the country of export in accordance with ISPM4 as an area that is free from <i>Ceratocystis platani</i> (Walter) Engelbrecht & Harrington, or</p> <p>b in the case of machinery or vehicles moved from an area infected with <i>Ceratocystis platani</i> (Walter) Engelbrecht & Harrington, they have been cleaned and made free from soil and plant debris prior to their movement out of the infected area [^{F122}in accordance with ISPM41].</p>
4.	Plants for planting with roots, grown in open air	Any third country	The plants must be accompanied by an official statement that the place of production has been established by the national plant protection organisation in accordance with ISPM10 as a place of production that is free from <i>Clavibacter sepedonicus</i> (Spieckermann & Kotthoff) Li <i>et al.</i> and <i>Synchytrium endobioticum</i> (Schilbersky) Percival.
5.	Plants for planting with roots, grown in open air	Any third country other than EU Member States, Liechtenstein and Switzerland	The plants must be accompanied by an official statement that the plants originate from a field known to be free from <i>Globodera pallida</i> (Stone) Behrens and <i>Globodera rostochiensis</i> (Wollenweber) Behrens.
6.	Plants for planting, other than bulbs, corms, rhizomes, seeds, tubers, and plants in tissue culture	Any third country other than EU Member States, Liechtenstein and Switzerland	<p>The plants must be accompanied by an official statement that they have been grown in a nursery and:</p> <p>a that they originate in:</p> <p>i an area* established by the national plant protection organisation in accordance with ISPM4 as an area that is free from <i>Thrips palmi</i> Karny, or</p> <p>ii a place of production** established by the national plant protection</p>

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. (iv) been made recognisable with a marking, exclusive for each individual plant and notified to the NPPO of the Republic of Korea, enabling the identification of the registered nursery and the year of potting, and

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

(g) the NPPO of the Republic of Korea has ensured the identifiability of the plants from the time of their removal from the nursery until the time of loading for export, through sealing of transport vehicles or appropriate alternatives.

*The name of the nursery must be included in the phytosanitary certificate under the heading “Additional declaration”.

**Any infested plants must have been removed and the remaining plants effectively treated.

The annual lists of the registered nurseries must be made available to the NPPO of the UK at the latest by 1st March each year. They must include the number of plants grown in each of these nurseries, which are deemed suitable for dispatch to GB, under the conditions laid down. [F136The total number of plants dispatched to Great Britain must not exceed quantities which have been approved by the UK NPPO in advance, having regard to the availability of quarantine facilities. In the case of plants of *Juniperus* L., the plants may only be imported into Great Britain during the period beginning on 1st November each year and ending on 31st March the following year.]

Any detection of harmful organisms of concern specified in paragraphs (c) to (e) in the inspections carried out pursuant to those paragraphs must be officially recorded, and the records must be kept available to the NPPO of the UK, upon its request.

The detection of any of the harmful organisms which are specified in paragraphs (c) to (e) disqualifies the nursery from exporting the plants specified in column 1 to GB. The NPPO of the UK must be informed immediately thereof. In such case, the registration can be renewed only in the following year.

Following their import into GB, the plants must be subject, before their release, to official post-entry

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. 			* The name of the area(s) must be included in the phytosanitary certificate under the heading “Additional declaration”.
[^{F217} 2.	Plants for planting, other than seeds, that belong to the genera and species listed in the list of <i>Xylella</i> host plants, other than those referred to in entries 3, 4 and 5 of this Table	Any third country	<p>The plants must be accompanied by an official statement:</p> <p>(a) that they have been grown during a period of at least three years before export, or in the case of plants which are younger than three years, have been grown throughout their life, in a country which, in accordance with the measures specified in ISPM4, is known to be free from <i>Xylella fastidiosa</i> (Wells et al.), or</p> <p>(b) that they have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in an area which has been established by the national plant protection organisation in accordance with ISPM4 as an area that is free from <i>Xylella fastidiosa</i> (Wells et al.), or</p> <p>(c) in the case of plants which originate in an area* where <i>Xylella fastidiosa</i> (Wells et al.) is not known to be absent, an official statement:</p> <p>(i) that the plants have been produced in a site **: </p> <p>(aa) that is authorised by the national plant protection organisation in accordance with ISPM10 as a site that is free from <i>Xylella fastidiosa</i> (Wells et al.) and its vectors,</p> <p>(bb) that is physically protected against the introduction of <i>Xylella fastidiosa</i> (Wells et al.) by its vectors,</p> <p>(cc) that is surrounded by a zone with a width of 100 m which has been subject to official inspections twice a year, and where all of the plants found to be infected with, or to have symptoms of, <i>Xylella fastidiosa</i> (Wells et al.) have been immediately removed, and appropriate phytosanitary treatments against the vectors of <i>Xylella fastidiosa</i> (Wells et al.) have been applied before that removal,</p>

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

(dd) that at appropriate times throughout the year, is subject to phytosanitary treatments to maintain freedom from the vectors of *Xylella fastidiosa* (Wells et al.), including the removal of plants,

(ee) that is subject annually, together with the zone referred to in point (cc), to at least two official inspections during the flight season of the vectors of *Xylella fastidiosa* (Wells et al.),

(ff) where throughout the production time of the plants, neither symptoms of *Xylella fastidiosa* (Wells et al.) nor its vectors were found in the site or, if suspect symptoms were observed, testing was carried out and the absence of *Xylella fastidiosa* (Wells et al.) confirmed, and

(gg) where throughout the production time of the plants, no symptoms of *Xylella fastidiosa* (Wells et al.) were found in the zone referred to in point (cc) or, if suspect symptoms were observed, testing was carried out and the absence of *Xylella fastidiosa* (Wells et al.) confirmed,

(ii) that representative samples of each species of the plants from the site have been subject to annual testing, at the most appropriate time, and the absence of *Xylella fastidiosa* (Wells et al.) has been confirmed on the basis of tests carried out in accordance with internationally validated testing methods,

(iii) that the plants have been transported in closed containers or packaging, to prevent infection with *Xylella fastidiosa* (Wells et al.) or any of its known vectors,

(iv) that as close to the time of export as is practically possible, the lots of the plants were subject to official visual inspection, sampling and molecular testing, carried out in accordance with internationally validated testing methods, using a sampling scheme able to identify with 99% reliability the level of presence of infected plants of 1%, that targets in particular plants displaying symptoms of *Xylella fastidiosa* (Wells et al.), and

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

that confirmed the absence of *Xylella fastidiosa* (Wells et al.), and

(v) that immediately before export, the lots of the plants were subject to phytosanitary treatments against any known vectors of *Xylella fastidiosa* (Wells et al.), or

(d) in the case of plants which originate in an area where *Xylella fastidiosa* (Wells et al.) is not known to be absent, and which have been grown for their entire production cycle in vitro, an official statement:

(i) that the plants have been grown in a site** of production

(aa) that is authorised by the national plant protection organisation in the country of origin in accordance with ISPM10 as a site of production that is free from *Xylella fastidiosa* (Wells et al.) and its vectors,

(bb) that is physically protected against the introduction of *Xylella fastidiosa* (Wells et al.) by its vectors,

(cc) that is subjected annually to at least two official inspections carried out at appropriate times, and

(dd) where throughout the production time of the plants, neither symptoms of *Xylella fastidiosa* (Wells et al.) nor its vectors were found in the site or, if suspect symptoms were observed, testing was carried out, and the absence of *Xylella fastidiosa* (Wells et al.) confirmed,

(ii) that the plants have been transported under sterile conditions in a transparent container that precludes the possibility of infection by *Xylella fastidiosa* (Wells et al.) through its vectors, and

(iii) that the plants have been grown from seeds, propagated under sterile conditions from mother plants which have spent their entire lives in an area free from *Xylella fastidiosa* (Wells et al.) and have been tested and found free from *Xylella fastidiosa* (Wells et al.), or have been propagated under sterile conditions from mother plants which meet the requirements in point (c)(i) and have been tested and found

			A phytosanitary certificate may not include the official statement referred to in (d) unless the national plant protection organisation of the country of origin has previously provided the national plant protection organisation of the United Kingdom with written details of the site(s) of production.
5.	Plants intended for planting other than seeds F218 ... of <i>Olea europaea</i> L. and <i>Prunus dulcis</i> (Mill.) D.A. Webb	Any third country	The plants must be accompanied by an official statement: (a) that they have been grown: (i) during a period of at least three years before export, or in the case of plants which are younger than three years, throughout their life, in a country which, in accordance with the measures specified in ISPM4, is known to be free from <i>Xylella fastidiosa</i> (Wells et al.), and (ii) in a site that is subject to annual official inspection, with sampling and testing carried out at the appropriate times for the presence of <i>Xylella fastidiosa</i> (Wells et al.) and in accordance with international standards, using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 5%, in which the absence of <i>Xylella fastidiosa</i> (Wells et al.) was confirmed, or (b) that: (i) the plants have been grown in a place of production which has been registered and supervised by the national plant protection organisation for a period of at least one year before the export of the plants, (ii) the place of production, together with a 200m zone surrounding the place of production, is known to be free from <i>Xylella fastidiosa</i> (Wells et al.) on the basis of official inspections, which included testing where appropriate, carried out at appropriate times during the 12 months before the export of the plants, (iii) the plants have been subjected to an annual official inspection at an appropriate time, which included sampling and testing, that confirmed the absence of <i>Xylella fastidiosa</i>

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

(Wells et al.) and was carried out in accordance with international standards using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 1%,

(iv) immediately before their export, the plants were subjected to an official visual inspection for the presence of *Xylella fastidiosa* (Wells et al.) and, where any symptoms giving rise to a suspicion of its presence were observed, were tested in line with international standards for its presence, confirming its absence, and

(v) where the place of production of the plants is located in an area where *Xylella fastidiosa* (Wells et al.) is known to occur, the plants have been grown under complete physical protection for a period of at least four years before their export or, in the case of plants which are younger than four years, throughout their life,

or

(c) in the case of plants which originate in an area where *Xylella fastidiosa* (Wells et al.) is not known to be absent and have been grown for their entire production cycle in vitro, an official statement:

(i) that the plants have been grown in a site** of production:

(aa) that is authorised by the national plant protection organisation in the country of origin in accordance with ISPM10 as a site of production that is free from *Xylella fastidiosa* (Wells et al.) and its vectors,

(bb) that is physically protected against the introduction of *Xylella fastidiosa* (Wells et al.) by its vectors,

(cc) that is subjected annually to at least two official inspections carried out at appropriate times, and

(dd) where, throughout the production time of the plants, no symptoms of *Xylella fastidiosa* (Wells et al.) or its vectors were found in the site or, if suspect symptoms were observed, testing was carried out, and the absence of *Xylella fastidiosa* (Wells et al.) confirmed,

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. 			<p>(ii) that the plants have been transported under sterile conditions in a transparent container that precludes the possibility of infection by <i>Xylella fastidiosa</i> (Wells et al.) through its vectors, and</p> <p>(iii) that the plants have been grown under sterile conditions:</p> <p>(aa) from seeds, or</p> <p>(bb) from mother plants which meet the requirements set out in (a), or</p> <p>(cc) from mother plants which meet the requirements set out in (b).</p> <p>A phytosanitary certificate may not include the official statement referred to in (a) unless the national plant protection organisation of the country of origin has previously notified the national plant protection organisation of the United Kingdom of this information in writing.</p> <p>A phytosanitary certificate may not include the official statement referred to in (b) unless the national plant protection organisation of the country of origin has previously provided the national plant protection organisation of the United Kingdom with written details of the place(s) of production. Plants meeting the requirements of the official statement referred to in (b) should be individually labelled with a tamper proof label or other secure seal that cannot be re-used, is readable and undamaged, and gives the detail of the place of production, and the place of production should also be indicated on the phytosanitary certificate.</p> <p>A phytosanitary certificate may not include the official statement referred to in (c) unless the national plant protection organisation of the country of origin has previously provided the national plant protection organisation of the United Kingdom with written details of the site(s) of production.]</p>
6.	Seeds of <i>Solanum lycopersicum</i> L. and <i>Capsicum</i> spp., intended for planting	Any third country	<p>The seeds must be accompanied by:</p> <p>a an official statement that they are of <i>Capsicum</i> spp. varieties which are known to be resistant to Tomato brown rugose fruit virus, or</p>

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

b an official statement:

- i that the mother plants of seeds have been produced in a production site* where Tomato brown rugose fruit virus is known not to occur on the basis of official inspections carried out at the appropriate time to detect that pest, and
- ii that the seeds or their mother plants have undergone official sampling and testing for Tomato brown rugose fruit virus and have been found, according to those tests, to be free from that pest.

*The name of the site(s) of production must be included in the phytosanitary certificate under the heading “Additional declaration”.

For the purposes of point (b)(ii), the official sampling and testing of the seeds must be carried out in accordance with the paragraphs below.

The official sampling of seeds for testing must be carried out in accordance with the following sampling schemes referred to in the relevant table of ISPM31:

—in the case of seed lots which include 3000 or fewer seeds, a hypergeometric sampling scheme that is able to identify with 95% reliability a level of presence of infected plants of 10% or above,

—in the case of seed lots which include 30000 or fewer seeds, but more than 3000 seeds, a sampling scheme that is able to identify with 95% reliability a level of presence of infected plants of 1% or above,

—in the case of seed lots which include more than 30000 seeds, a sampling scheme that is able to identify with 95% reliability a level of

PART A

List of plants, plant products and other objects originating in a CD territory or Great Britain and the special requirements for their introduction into Great Britain from a CD territory or their movement within Great Britain

Interpretation

In this Part—

‘relevant PCN provisions’ means—

- i in relation to potatoes produced in England, Part 4 of Schedule 2 to the Official Controls (Plant Health and Genetically Modified Organisms) (England) Regulations 2019 ;
- ii in relation to potatoes produced in Wales, Part 4 of Schedule 2 to the Official Controls (Plant Health and Genetically Modified Organisms) (Wales) Regulations 2020 ;
- iii in relation to potatoes produced in Scotland, paragraphs 4 and 5 of Part 2, and Part 4, of Schedule 2 to the Plant Health (Official Controls and Miscellaneous Provisions) (Scotland) Regulations 2019 ;

‘relevant Potato Wart Disease provisions’ means—

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. - i in relation to potatoes produced in England, Part 3 of Schedule 2 to the Official Controls (Plant Health and Genetically Modified Organisms) Regulations 2019;
- ii in relation to potatoes produced in Wales, Part 3 of Schedule 2 to the Official Controls (Plant Health and Genetically Modified Organisms) (Wales) Regulations 2020;
- iii in relation to potatoes produced in Scotland, Part 3 of Schedule 2 to the Plant Health (Official Controls and Miscellaneous Provisions) (Scotland) Regulations 2019.

	(1) Description of plants, plant products or other objects	(2) Special requirements
1.	Plants for planting with roots, grown in the open air	There must be evidence that the place of production is known to be free from <i>Synchytrium endobioticum</i> (Schilbersky) Percival.
2.	Plants for planting of stolon, or tuber-forming species of <i>Solanum</i> L., or their hybrids, being stored in gene banks or genetic stock collections	The plants must be accompanied by an official statement that the plants have been held under quarantine conditions and have been found free from any GB quarantine pests by laboratory testing, as described in entry 3, before release from quarantine. Each organisation or research body holding such material must inform the competent authority of the material held.
3.	Plants for planting of stolon or tuber-forming species of <i>Solanum</i> L., or their hybrids, other than: — those tubers of <i>Solanum tuberosum</i> L. specified in entries 4, 5 and 6; and — seeds of <i>Solanum tuberosum</i> L. specified in entry 18	The plants must be accompanied by an official statement that they have been held under quarantine conditions and: a have been found free from GB quarantine pests by laboratory testing before release from quarantine, using methods described in EPPO PM 3/21, which was: i supervised by the competent authority and executed by scientifically trained staff of that authority or of any officially approved body, ii executed at a site provided with appropriate facilities sufficient to contain GB quarantine pests and

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

- maintain the material, including indicator plants, in such a way as to eliminate any risk of spreading GB quarantine pests;
- iii executed on each unit of the material:
- aa by visual examination at regular intervals during the full length of at least one vegetative cycle, having regard to the type of material and its stage of development during the testing programme, for symptoms caused by any GB quarantine pests, and
- bb by laboratory testing:
- in the case of all potato material at least for:
 - Andean potato latent virus,
 - Andean potato mild mottle virus,
 - Andean potato mottle virus,
 - Arracacha virus B. oca strain,
 - Potato black ringspot virus,
 - Potato virus T,
 - Potato yellowing virus,
 - Potato yellow vein virus,
 - non-European isolates of potato viruses A, M, S, V, X and Y (including Yo, Yn and Yc) and Potato leafroll virus (including Yo),
 - *Clavibacter sepedonicus* (Spieckermann & Kotthoff) Li *et al.*,
 - *Ralstonia solanacearum* (Smith) Yabuuchi *et al.* emend. Safni *et al.*, *Ralstonia pseudosolanacearum* Safni *et al.*, *Ralstonia syzygii* subsp. *celebensis* Safni *et al.* and *Ralstonia syzygii* subsp. *indonesiensis* Safni *et al.*,

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

		<p>— in the case of seeds of <i>Solanum tuberosum</i> L., other than those specified in entry 18, at least for the viruses and viroids listed above, with the exception of Andean potato mottle virus, and non-European isolates of potato viruses A, M, S, V, X and Y (including Yo, Yn and Yc) and Potato leafroll virus, and</p> <p>iv included appropriate testing on any other symptoms observed in the visual examination in order to identify the GB quarantine pests having caused such symptoms.</p> <p>In point (a), ‘EPPO PM 3/21’ means the standard describing inspection and tests for detection of pests infecting <i>Solanum</i> species or hybrids imported for germplasm, conservation, breeding or research purposes in post-entry quarantine, approved by the European and Mediterranean Plant Protection Organization .</p>
4.	Tubers of <i>Solanum tuberosum</i> L., for planting, originating in Great Britain	The tubers must be accompanied by an official statement that the relevant Potato Wart provisions to combat <i>Synchytrium endobioticum</i> (Schilbersky) Percival have been complied with.
5.	Tubers of <i>Solanum tuberosum</i> L., for planting, originating in Great Britain	<p>The tubers must be accompanied by an official statement that they originate in an area in which <i>Ralstonia solanacearum</i> (Smith) Yabuuchi <i>et al.</i> emend. Safni <i>et al.</i>:</p> <p>a is known not to occur; or</p> <p>b is known to occur, and the tubers originate from a place of production found free from <i>Ralstonia solanacearum</i> (Smith) Yabuuchi <i>et al.</i> emend. Safni <i>et al.</i> or considered to be free of <i>Ralstonia solanacearum</i> (Smith) Yabuuchi <i>et al.</i></p>

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

		emend. Safni <i>et al.</i> as a consequence of the implementation of an appropriate procedure aimed at eradicating <i>Ralstonia solanacearum</i> (Smith) Yabuuchi <i>et al.</i> emend. Safni <i>et al.</i>
6.	Tubers of <i>Solanum tuberosum</i> L., for planting, other than those which are authorised to be planted for the purposes of this entry by the competent authority, originating in Great Britain	The tubers must be accompanied by an official statement that the relevant PCN provisions to combat <i>Globodera pallida</i> (Stone) Behrens and <i>Globodera rostochiensis</i> (Wollenweber) Behrens have been complied with.
7.	Tubers of <i>Solanum tuberosum</i> L., for planting, originating in a CD territory	The tubers must be accompanied by an official statement that they originate in an area in which <i>Synchytrium endobioticum</i> (Schilbersky) Percival, <i>Ralstonia solanacearum</i> (Smith) Yabuuchi <i>et al.</i> emend. Safni <i>et al.</i> , <i>Globodera pallida</i> (Stone) Behrens and <i>Globodera rostochiensis</i> (Wollenweber) Behrens are known not to occur.
8.	Tubers of <i>Solanum tuberosum</i> L., for planting, other than tubers of those varieties accepted on to the GB Variety List pursuant to the Seeds (National Lists of Varieties) Regulations 2001	The tubers must be accompanied by an official statement: <ul style="list-style-type: none"> a that they belong to advanced selections, b that they have been produced within Great Britain, and c that they have been derived in direct line from material which has been maintained under appropriate conditions and has been subjected within Great Britain to official quarantine testing in accordance with appropriate methods and has been found free from pests.
9.	Tubers of <i>Solanum tuberosum</i> L., other than those mentioned in entries 2 to 6 or 8, originating in Great Britain	There must be evidence by a registration number put on the packaging, or in the case of loose-loaded potatoes transported in bulk, on the accompanying documents,

Status: Point in time view as at 02/03/2022.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072 is up to date with all changes known to be in force on or before 18 June 2024.
