

Status: Point in time view as at 22/06/2021.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072, ANNEX 7 is up to date with all changes known to be in force on or before 12 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

[^{F1}ANNEX 7

List of plants, plant products and other objects originating from third countries and the corresponding special requirements for their introduction into Great Britain

Textual Amendments

- F1** [Annex 7](#) substituted (31.12.2020 except so far as it relates to Annex 7 Pt. A Table, entries 3, 61, 135(a) and 1.1.2021 in so far as not already in force) by [The Plant Health \(Phytosanitary Conditions\) \(Amendment\) \(EU Exit\) Regulations 2020 \(S.I. 2020/1527\)](#), [Sch. 7](#) (as amended by [S.I. 2020/1631](#), regs. 1(2), 9(2)(4))

Modifications etc. (not altering text)

- C1** [Annex 7](#): power to amend conferred (31.12.2020) by Regulation (EU) No. 2016/2031, Art. 41(3)-(3B) (as substituted by [The Plant Health \(Amendment etc.\) \(EU Exit\) Regulations 2020 \(S.I. 2020/1482\)](#), regs. 2(2)(b), [29\(4\)\(c\)](#))

PART A

Plants, plant products and other objects originating in third countries which may only be introduced into Great Britain if special requirements are met

Modifications etc. (not altering text)

- C2** [Annex 7 Pt. A](#): power to amend conferred (31.12.2020) by Regulation (EU) No. 2016/2031, Art. 42(4) (4A) (as substituted by [The Plant Health \(Amendment etc.\) \(EU Exit\) Regulations 2020 \(S.I. 2020/1482\)](#), regs. 2(2)(b), [29\(5\)\(e\)](#))
- C3** [Annex 7 Pt. A](#): power to amend conferred (31.12.2020) by Regulation (EU) No. 2016/2031, Art. 44(1A) (as substituted by [The Plant Health \(Amendment etc.\) \(EU Exit\) Regulations 2020 \(S.I. 2020/1482\)](#), regs. 2(2)(b), [29\(7\)\(a\)](#))

Interpretation

In this Annex:

‘associated controlled dunnage’, in entry [^{F2}109, 111, 112, 113, 116, 117, 120, 122, 123, 125, 128, [^{F3}128A, 128C,] 130, 132, 135, 136, 138, 140 or 142] of Part A, means wood which supports a consignment of wood of a genus or species specified in that entry and which—

i is constructed from wood of the same type and quality as the wood in the consignment; and

ii meets the requirements specified in column (3) of that entry;
‘EPPO PM 9/2’ means the standard describing a national regulatory control system for *Clavibacter michiganensis* subsp. *sepedonicus* that provides guidance on surveillance for the pathogen and its containment and eradication if found, approved by the European and Mediterranean Plant Protection Organization ;

‘EPPO PM 9/5’ means the standard describing the procedures for official control of *Synchytrium endobioticum*, approved by the European and Mediterranean Plant Protection Organization ;

Status: Point in time view as at 22/06/2021.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072, ANNEX 7 is up to date with all changes known to be in force on or before 12 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

‘EPPO PM 9/26’ means the standard describing a national regulatory control system for *Globodera pallida* and *Globodera rostochiensis*, approved by the European and Mediterranean Plant Protection Organization ;

[^{F4}“ISPM41” means International Standard for Phytosanitary Measures No 41 of April 2017 on international movement of used vehicles, machinery and equipment, prepared by the Secretariat of the IPPC established by the Food and Agriculture Organisation of the United Nations];

‘list of *Xylella* host plants’ means the list, published by the national plant protection organisation of the United Kingdom from time to time, of plants that may host *Xylella fastidiosa* (Wells et al.).

	(1) Description of plants, plant products or other objects	(2) Origin	(3) Special requirements
1.	Growing medium, attached to or associated with plants, intended to sustain the vitality of the plants, with the exception of sterile medium of <i>in-vitro</i> plants	Any third country other than EU Member States, Liechtenstein and Switzerland	The plants must be accompanied by an official statement: <ul style="list-style-type: none"> a that the growing medium at the time of their planting: <ul style="list-style-type: none"> i was free from soil and organic matter and had not been previously used for growing plants or for any other agricultural purposes, ii was composed entirely of peat or fibre of <i>Cocos nucifera</i> L. and had not been previously used for growing plants or for any other agricultural purposes, iii was subjected to effective fumigation or heat treatment* to ensure freedom from pests, or iv was subjected to an effective systems approach* to ensure freedom from pests, and in all the cases mentioned in points (i) to (iv) was stored

Status: Point in time view as at 22/06/2021.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072, ANNEX 7 is up to date with all changes known to be in force on or before 12 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

			<p>the measures described in point (b)(i) were taken to ensure that it remains free from GB quarantine pests.</p> <p>* Details of the treatment or the use of a systems approach must also be included on the phytosanitary certificate under the heading “Additional declaration”.</p>
2.	Machinery and vehicles which have been operated for agricultural or forestry purposes	Any third country other than EU Member States, Liechtenstein and Switzerland	The machinery or vehicles must be accompanied by an official statement that the machinery or vehicles have been cleaned and are free from soil and plant debris [^{F5} in accordance with ISPM41].
3.	Machinery and vehicles which have been operated for agricultural or forestry purposes	EU Member States, Liechtenstein and Switzerland	<p>The machinery or vehicles must be accompanied by an official statement that the machinery or vehicles have been:</p> <p>a moved from an area established by the national plant protection organisation of the country of export in accordance with ISPM4 as an area that is free from <i>Ceratocystis platani</i> (Walter) Engelbrecht & Harrington, or</p> <p>b in the case of machinery or vehicles moved from an area infected with <i>Ceratocystis platani</i> (Walter) Engelbrecht & Harrington, they have been cleaned and made free from soil and plant debris prior to their movement out of the infected area [^{F6}in accordance with ISPM41].</p>
4.	Plants for planting with roots, grown in open air	Any third country	The plants must be accompanied by an official statement that the place of production has been established by the national plant protection organisation in accordance with ISPM10 as a place of production that is free from <i>Clavibacter sepedonicus</i> (Spieckermann & Kotthoff) Li <i>et</i>

Status: Point in time view as at 22/06/2021.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072, ANNEX 7 is up to date with all changes known to be in force on or before 12 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

			<i>al.</i> and <i>Synchytrium endobioticum</i> (Schilbersky) Percival.
5.	Plants for planting with roots, grown in open air	Any third country other than EU Member States, Liechtenstein and Switzerland	The plants must be accompanied by an official statement that the plants originate from a field known to be free from <i>Globodera pallida</i> (Stone) Behrens and <i>Globodera rostochiensis</i> (Wollenweber) Behrens.
6.	Plants for planting, other than bulbs, corms, rhizomes, seeds, tubers, and plants in tissue culture	Any third country other than EU Member States, Liechtenstein and Switzerland	The plants must be accompanied by an official statement that they have been grown in a nursery and: <ul style="list-style-type: none"> a that they originate in: <ul style="list-style-type: none"> i an area* established by the national plant protection organisation in accordance with ISPM4 as an area that is free from <i>Thrips palmi</i> Karny, or ii a place of production** established by the national plant protection organisation in accordance with ISPM10 as an area that is free from <i>Thrips palmi</i> Karny, on the basis of official inspections carried out at least monthly during the three months prior to export, or b that immediately prior to export, they have been subjected to an appropriate treatment† against <i>Thrips palmi</i> Karny and have been officially inspected and found free from <i>Thrips palmi</i> Karny. <p>* The name of the area(s) must be included in the phytosanitary certificate under the heading “Additional declaration”.</p> <p>** The name of the place of production(s) must be included in the</p>

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072, ANNEX 7 is up to date with all changes known to be in force on or before 12 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

Golden *et al.* (all populations) is known to occur and:

- i they originate from a place of production which has been found free from *Meloidogyne chitwoodi* Golden *et al.* (all populations) based on an annual survey of host crops by visual inspection of host plants at appropriate times and by visual inspection both externally and by cutting of tubers after harvest from potato crops grown at the place of production, or
- ii after harvest, they have been randomly sampled and checked for the presence of symptoms after an appropriate method to induce symptoms has been applied or laboratory tested, as well as inspected visually both externally and by cutting tubers at appropriate times to detect the presence of *Meloidogyne chitwoodi* Golden *et al.*, and in all cases at the time of closing of the packages or containers before movement, and found to be free from symptoms of that pest, and

^{F8} they originate in a site of production where the procedures to combat *Globodera pallida* (Stone) Behrens and *Globodera rostochiensis* (Wollenweber)

Status: Point in time view as at 22/06/2021.

of the species *Pinus parviflora* Sieb. & Zucc. (*Pinus pentaphylla* Mayr), or of *Pinus parviflora* Sieb. & Zucc. grafted on a rootstock of a *Pinus* species other than *Pinus parviflora* Sieb. & Zucc.

(aa) entirely of the species *Pinus parviflora* Sieb. & Zucc. (*Pinus pentaphylla* Mayr), or (bb) of *Pinus parviflora* Sieb. & Zucc., grafted on a rootstock of a *Pinus* L. species other than *Pinus parviflora* Sieb. & Zucc. which has borne no shoots,

(b) prior to export they have been grown, held and trained for at least two consecutive years in officially registered nurseries* which are subject to an officially supervised control regime,

(c) in the case of *Juniperus* L. plants,

(i) the plants of *Juniperus* L. and the plants of *Chaenomeles* Lindl., *Crataegus* L., *Cydonia* Mill., *Malus* Mill., *Photinia* Ldl. and *Pyrus* L. grown in the two years prior to export in the abovementioned naturally or artificially dwarfed plant nurseries, and

(ii) the immediate vicinity of the plants referred to in sub-paragraph (i), have been officially inspected at least six times a year at appropriate intervals and found free** from the following: *Aschistonyx eppoi* Inouye, *Gymnosporangium asiaticum* Miyabe ex Yamada and *G. yamadae* Miyabe ex Yamada, *Oligonychus perditus* Pritchard et Baker, *Popillia japonica* Newman, and any other harmful organism which is not known to occur in GB,

(d) in the case of *Chamaecyparis* Spach plants, (i) the plants of *Chamaecyparis* Spach, and of *Pinus* L. grown in the abovementioned naturally or artificially dwarfed plant nurseries, and

(ii) the immediate vicinity of the plants referred to in sub-paragraph (i), have been officially inspected, at least six times a year at appropriate intervals and found free** from the following: *Popillia japonica* Newman, and any other harmful organism which is not known to occur in GB,

(e) in the case of *Pinus* L. plants,

(i) the plants of *Pinus* L. and of *Chamaecyparis* Spach grown in

Status: Point in time view as at 22/06/2021.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072, ANNEX 7 is up to date with all changes known to be in force on or before 12 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

the abovementioned naturally or artificially dwarfed plant nurseries, and

(ii) the immediate vicinity of the plants referred to in sub-paragraph (i), have been officially inspected, at least six times a year at appropriate intervals and found free** from the following: *Bursaphelenchus xylophilus* (Steiner & Buehrer) Nickle et al., *Pseudocercospora pini-densiflorae* (Hori & Nambu) Deighton, *Coleosporium phellodendri* Komarov, *Coleosporium asterum* (Dietel) Sydow & P.Sydow, *Coleosporium eupatorii* Arthur, *Cronartium quercuum* (Berk.) Miyabe ex Shirai, *Dendrolimus spectabilis* (Butler), *Monochamus* spp., *Popillia japonica* Newman, *Thecodiplosis japonensis* Uchida & Inouye, and any other harmful organism which is not known to occur in GB,

(f) the plants intended for GB have at least during the period referred to in paragraph (b), (i) been potted, in pots which are placed either on shelves at least 50 cm above ground or onto flooring which is impenetrable for nematodes and which is well maintained and free from debris,

(ii) been found free, in the inspections referred to in paragraph (c) to (e), from the harmful organisms of concern specified in paragraph (c) to (e),

(iii) in the case of plants of *Pinus parviflora* Sieb & Zucc. that have been grafted on to a rootstock of a *Pinus* L. species other than *Pinus parviflora* Sieb. & Zucc., have been grafted onto a rootstock which is derived from sources officially approved as healthy material, and

(iv) been made recognisable with a marking, exclusive for each individual plant and notified to the NPPO of the Republic of Korea, enabling the identification of the registered nursery and the year of potting, and

(g) the NPPO of the Republic of Korea has ensured the identifiability

Status: Point in time view as at 22/06/2021.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072, ANNEX 7 is up to date with all changes known to be in force on or before 12 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

of the plants from the time of their removal from the nursery until the time of loading for export, through sealing of transport vehicles or appropriate alternatives.

*The name of the nursery must be included in the phytosanitary certificate under the heading “Additional declaration”.

**Any infested plants must have been removed and the remaining plants effectively treated.

The annual lists of the registered nurseries must be made available to the NPPO of the UK at the latest by 1st March each year. They must include the number of plants grown in each of these nurseries, which are deemed suitable for dispatch to GB, under the conditions laid down. The total number of plants dispatched to GB must not exceed quantities which have been approved by the UK NPPO in advance, having regard to available of quarantine facilities.

Any detection of harmful organisms of concern specified in paragraphs (c) to (e) in the inspections carried out pursuant to those paragraphs must be officially recorded, and the records must be kept available to the NPPO of the UK, upon its request. The detection of any of the harmful organisms which are specified in paragraphs (c) to (e) disqualifies the nursery from exporting the plants specified in column 1 to GB. The NPPO of the UK must be informed immediately thereof. In such case, the registration can be renewed only in the following year.

Following their import into GB, the plants must be subject, before their release, to official post-entry quarantine for a period of not less than three months of active growth in the case of *Pinus* L. and *Chamaecyparis* Spach plants, and for a period including the active growth season from 1st April until 30th June in the case of *Juniperus* L. plants, and must have been found free, during this quarantine period, from

host plants, other than those referred to in entries 3, 4 and 5 of this Table

are younger than three years, have been grown throughout their life, in a country which, in accordance with the measures specified in ISPM4, is known to be free from *Xylella fastidiosa* (Wells et al.), or

(b) that they have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in an area which has been established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Xylella fastidiosa* (Wells et al.), or

(c) in the case of plants which originate in an area* where *Xylella fastidiosa* (Wells et al.) is not known to be absent, an official statement:

(i) that the plants have been produced in a site **:

(aa) that is authorised by the national plant protection organisation in accordance with ISPM10 as a site that is free from *Xylella fastidiosa* (Wells et al.) and its vectors,

(bb) that is physically protected against the introduction of *Xylella fastidiosa* (Wells et al.) by its vectors,

(cc) that is surrounded by a zone with a width of 100 m which has been subject to official inspections twice a year, and where all of the plants found to be infected with, or to have symptoms of, *Xylella fastidiosa* (Wells et al.) have been immediately removed, and appropriate phytosanitary treatments against the vectors of *Xylella fastidiosa* (Wells et al.) have been applied before that removal,

(dd) that at appropriate times throughout the year, is subject to phytosanitary treatments to maintain freedom from the vectors of *Xylella fastidiosa* (Wells et al.), including the removal of plants,

(ee) that is subject annually, together with the zone referred to in point (cc), to at least two official inspections during the flight season of the vectors of *Xylella fastidiosa* (Wells et al.),

Status: Point in time view as at 22/06/2021.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072, ANNEX 7 is up to date with all changes known to be in force on or before 12 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

(ff) where throughout the production time of the plants, neither symptoms of *Xylella fastidiosa* (Wells et al.) nor its vectors were found in the site or, if suspect symptoms were observed, testing was carried out and the absence of *Xylella fastidiosa* (Wells et al.) confirmed, and

(gg) where throughout the production time of the plants, no symptoms of *Xylella fastidiosa* (Wells et al.) were found in the zone referred to in point (cc) or, if suspect symptoms were observed, testing was carried out and the absence of *Xylella fastidiosa* (Wells et al.) confirmed,

(ii) that representative samples of each species of the plants from the site have been subject to annual testing, at the most appropriate time, and the absence of *Xylella fastidiosa* (Wells et al.) has been confirmed on the basis of tests carried out in accordance with internationally validated testing methods,

(iii) that the plants have been transported in closed containers or packaging, to prevent infection with *Xylella fastidiosa* (Wells et al.) or any of its known vectors,

(iv) that as close to the time of export as is practically possible, the lots of the plants were subject to official visual inspection, sampling and molecular testing, carried out in accordance with internationally validated testing methods, using a sampling scheme able to identify with 99% reliability the level of presence of infected plants of 1%, that targets in particular plants displaying symptoms of *Xylella fastidiosa* (Wells et al.), and that confirmed the absence of *Xylella fastidiosa* (Wells et al.), and

(v) that immediately before export, the lots of the plants were subject to phytosanitary treatments against any known vectors of *Xylella fastidiosa* (Wells et al.), or

(d) in the case of plants which originate in an area where *Xylella fastidiosa* (Wells et al.) is not known to be absent, and which have been

Status: Point in time view as at 22/06/2021.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072, ANNEX 7 is up to date with all changes known to be in force on or before 12 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

grown for their entire production cycle in vitro, an official statement:

(i) that the plants have been grown in a site** of production

(aa) that is authorised by the national plant protection organisation in the country of origin in accordance with ISPM10 as a site of production that is free from *Xylella fastidiosa* (Wells et al.) and its vectors,

(bb) that is physically protected against the introduction of *Xylella fastidiosa* (Wells et al.) by its vectors,

(cc) that is subjected annually to at least two official inspections carried out at appropriate times, and

(dd) where throughout the production time of the plants, neither symptoms of *Xylella fastidiosa* (Wells et al.)

nor its vectors were found in the site or, if suspect symptoms were observed, testing was carried out, and the absence of *Xylella fastidiosa* (Wells et al.) confirmed,

(ii) that the plants have been transported under sterile conditions in a transparent container that precludes the possibility of infection by *Xylella fastidiosa* (Wells et al.) through its vectors, and

(iii) that the plants have been grown from seeds, propagated under sterile conditions from mother plants which have spent their entire lives in an area free from *Xylella fastidiosa* (Wells et al.) and have been tested and found free from *Xylella fastidiosa* (Wells et al.), or have been propagated under sterile conditions from mother plants which meet the requirements in point (c)(i) and have been tested and found free from *Xylella fastidiosa* (Wells et al.).

A phytosanitary certificate may not include the official statement referred to in (a) unless the national plant protection organisation of the country of origin has previously notified the national plant protection organisation of the United Kingdom of this information in writing.

* The name of the area(s) must be included in the phytosanitary

			<p>(bb) from mother plants which meet the requirements set out in (a), or (cc) from mother plants which meet the requirements set out in (b). A phytosanitary certificate may not include the official statement referred to in (a) unless the national plant protection organisation of the country of origin has previously notified the national plant protection organisation of the United Kingdom of this information in writing. A phytosanitary certificate may not include the official statement referred to in (b) unless the national plant protection organisation of the country of origin has previously provided the national plant protection organisation of the United Kingdom with written details of the place(s) of production. Plants meeting the requirements of the official statement referred to in (b) should be individually labelled with a tamper proof label or other secure seal that cannot be re-used, is readable and undamaged, and gives the detail of the place of production, and the place of production should also be indicated on the phytosanitary certificate. A phytosanitary certificate may not include the official statement referred to in (c) unless the national plant protection organisation of the country of origin has previously provided the national plant protection organisation of the United Kingdom with written details of the site(s) of production.]</p>
6.	Seeds of <i>Solanum lycopersicum</i> L. and <i>Capsicum</i> spp., intended for planting	Any third country	<p>The seeds must be accompanied by:</p> <ul style="list-style-type: none"> a an official statement that they are of <i>Capsicum</i> spp. varieties which are known to be resistant to Tomato brown rugose fruit virus, or b an official statement: <ul style="list-style-type: none"> i that the mother plants of seeds have been produced in a production site* where Tomato brown rugose fruit virus is known not to occur on the basis of official

Status: Point in time view as at 22/06/2021.

Changes to legislation: Commission Implementing Regulation (EU) 2019/2072, ANNEX 7 is up to date with all changes known to be in force on or before 12 June 2024. There are changes that may be brought into force at a future date. Changes that have been made appear in the content and are referenced with annotations. (See end of Document for details)

inspections carried out at the appropriate time to detect that pest, and
ii that the seeds or their mother plants have undergone official sampling and testing for Tomato brown rugose fruit virus and have been found, according to those tests, to be free from that pest.

*The name of the site(s) of production must be included in the phytosanitary certificate under the heading “Additional declaration”.

For the purposes of point (b)(ii), the official sampling and testing of the seeds must be carried out in accordance with the paragraphs below. The official sampling of seeds for testing must be carried out in accordance with the following sampling schemes referred to in the relevant table of ISPM31:

—in the case of seed lots which include 3000 or fewer seeds, a hypergeometric sampling scheme that is able to identify with 95% reliability a level of presence of infected plants of 10% or above,

—in the case of seed lots which include 30000 or fewer seeds, but more than 3000 seeds, a sampling scheme that is able to identify with 95% reliability a level of presence of infected plants of 1% or above,

—in the case of seed lots which include more than 30000 seeds, a sampling scheme that is able to identify with 95% reliability a level of presence of infected plants of 0.1% or above.

Sub samples must consist of not more than 1000 seeds for Polymerase Chain Reaction (PCR) methods.

The testing of seeds must be carried out using one of the following methods and the method used must be included in the phytosanitary certificate under the heading “Additional declaration”:
