Commission Implementing Regulation (EU) 2019/2103 of 27 November 2019 amending and correcting Implementing Regulation (EU) 2015/2450 laying down implementing technical standards with regard to the templates for the submission of information to the supervisory authorities in accordance with Directive 2009/138/ EC of the European Parliament and of the Council (Text with EEA relevance)

## COMMISSION IMPLEMENTING REGULATION (EU) 2019/2103

#### of 27 November 2019

amending and correcting Implementing Regulation (EU) 2015/2450 laying down implementing technical standards with regard to the templates for the submission of information to the supervisory authorities in accordance with Directive 2009/138/EC of the European Parliament and of the Council

(Text with EEA relevance)

### THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Directive 2009/138/EC of 25 November 2009 of the European Parliament and of the Council on the taking up and pursuit of the business of Insurance and Reinsurance (Solvency II)<sup>(1)</sup>, and in particular Article 35(10), the third subparagraph of Article 244(6) and the second subparagraph of Article 245(6) thereof,

## Whereas:

- (1) Commission Implementing Regulation (EU) 2015/2450<sup>(2)</sup> lays down the reporting templates that insurance and reinsurance undertakings as well as groups need to use for reporting to the supervisory authorities information that is necessary for the purposes of supervision.
- (2) Commission Delegated Regulation (EU) 2018/1221<sup>(3)</sup> amended Delegated Regulation (EU) 2015/35<sup>(4)</sup> to adapt the prudential framework applicable to insurance and reinsurance undertakings to the introduction of simple, transparent and standardised securitisations. In order to ensure that supervisory authorities receive the necessary information on those and other securitisations, the relevant reporting templates laid down in Implementing Regulation (EU) 2015/2450 should be adapted to take into account those amendments.
- (3) Commission Delegated Regulation (EU) 2019/981<sup>(5)</sup> amended Delegated Regulation (EU) 2015/35 to introduce a number of simplifications in the calculation of the Solvency Capital Requirement. Those simplifications concern, amongst others, the look-through approach of collective investment undertakings. The supervision of the use of simplifications requires specific information in different reporting templates. The relevant reporting templates and the related instructions laid down in Implementing Regulation (EU) 2015/2450 should therefore be adapted to take into account those amendments.

- (4) Delegated Regulation (EU) 2019/981 introduced, amongst others, new requirements for the information to be provided to the supervisory authorities in the regular supervisory report and the solvency and financial condition report on the recognition of the capacity of deferred taxes to absorb present losses. To ensure a proper supervision by supervisory authorities, that information should be supplemented by quantitative, structured and comparable information in the reporting templates. The relevant reporting templates laid down in Implementing Regulation (EU) 2015/2450 should therefore be adapted to take into account those amendments.
- (5) Implementing Regulation (EU) 2015/2450 should therefore be amended accordingly.
- (6) The instructions set out in the template 'S.25.02 Solvency Capital Requirement for groups using the standard formula and partial internal model', included in Annex III to Implementing Regulation (EU) 2015/2450, contain an error which may lead to the provision of inconsistent or misleading information. In order to ensure that the instructions regarding the information to be reported with respect to groups and individual insurance and re-insurance undertakings are aligned, those instructions should be corrected.
- (7) The amendments provided for in Delegated Regulation (EU) 2019/981 require the submission of information concerning the calculation of the loss-absorbing capacity of deferred taxes. Those amendments are to apply from 1 January 2020. The amendments to the templates set out in Annexes I and II to Implementing Regulation (EU) 2015/2450 that are made to reflect those information requirements should therefore not be binding before 1 January 2020. However, it is important that information concerning the calculation of the loss absorbing capacity of deferred taxes can be submitted, on a voluntary basis, from the entry into force of this Regulation.
- (8) This Regulation is based on the draft implementing technical standards submitted by the European Insurance and Occupational Pensions Authority to the Commission.
- (9) The European Insurance and Occupational Pensions Authority has conducted open public consultations on the draft implementing technical standards on which this Regulation is based, analysed the potential related costs and benefits and requested the opinion of the Insurance and Reinsurance Stakeholder Group established by Article 37 of Regulation (EU) No 1094/2010 of the European Parliament and of the Council<sup>(6)</sup>,

## HAS ADOPTED THIS REGULATION:

#### Article 1

Implementing Regulation (EU) 2015/2450 is amended as follows:

- (1) Annex I is amended in accordance with Annex I to this Regulation;
- (2) Annex II is amended in accordance with Annex II to this Regulation;
- (3) Annex III is amended in accordance with Annex III to this Regulation.

**Status:** This is the original version as it was originally adopted in the EU. This legislation may since have been updated - see the latest available (revised) version

### Article 2

Annex III to Implementing Regulation (EU) 2015/2450 is corrected in accordance with Annex IV to this Regulation.

## Article 3

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 27 November 2019.

For the Commission

The President

Jean-Claude JUNCKER

### ANNEX I

Annex I to Implementing Regulation (EU) 2015/2450 is amended as follows:

in template S.06.02.01, the following column is inserted between columns C0290 and C0300:
SCR calculation approach for CIU
C0292

(2) in template S.25.01.01, the following tables are added:

Approach to tax rate

		Yes/No
		C0109
Approach based on average tax rate	R0590	

Calculation of the adjustment for the loss-absorbing capacity of deferred taxes (voluntary information until 31 December 2019, compulsory as from 1 January 2020)

## ANNEX II

Annex II to Implementing Regulation (EU) 2015/2450 is amended as follows:

- (1) in Section S.06.02 — List of assets, the table is amended as follows:
  - the following row is inserted between rows C0290 and C0300: (a)

C0292	SCR calculation approach for CIU	One of the options in the following closed
		list shall be used:
		1- CIUs for
		which a
		full look-
		through was

applied for the purposes of SCR calculation in accordance with Article 84(1) of Delegated Regulation (EC) No 2015/35; 2-CIUs for which the "simplified" look-through was applied on the basis of the target underlying asset allocation or last reported asset allocation and for which the data groupings is used in accordance with Article 84(3) of Delegated Regulation (EC) No 2015/35; 3-CIUs for which the "simplified" look-through was applied on the basis of the target underlying asset allocation or last reported asset allocation and for which no data groupings is used in accordance

with Article 84(3) of Delegated Regulation (EC) No 2015/35; 4-CIUs for which for the "equity risk type 2" was applied in accordance with Article 168(3) of Delegated Regulation (EC) No 2015/35; 9-Not applicable The look-through options of this item shall reflect the approach taken for the SCR calculation. For the purposes of reporting the information on lookthrough required in template S.06.03 the look-through information is required considering the thresholds defined in the general comments of that template. This item is only applicable to CIC category 4.

- (b) in the third column ('Instructions') of row C0310, the closed list is replaced by the following:
  - 1 Not a participation
  - 2 Is a participation in which the look though approach in accordance with Article 84 of Delegated Regulation (EU) 2015/35 is applied
  - 3 Is a participation in which the look though approach in accordance with Article 84 of Delegated Regulation (EU) 2015/35 is not applied;
- in the third column ('Instructions') of row C0330 the closed list of nominated ECAIs is replaced by the following:

Approach to tax rate		
R0590/C0109	Approach based on average tax rate	One of the options in the following closed list shall be used:  1 - Yes  2 - No  3 - Not applicable as the adjustment for the loss-absorbing capacity of deferred taxes (LAC DT) is not used (in this case R0600 to R0690 are not applicable)  See EIOPA Guidelines on loss-absorbing capacity of technical provisions and deferred taxes (EIOPA-BoS-14/177)

**Status:** This is the original version as it was originally adopted in the EU.This legislation may since have been updated - see the latest available (revised) version

Calculation of the adjustment for loss-absorbing capacity of deferred taxes (voluntary information until 31 December 2019, compulsory as from 1 January 2020)

R0600/C0110	DTA Before the shock	Total amount of the deferred tax assets (DTA)
		in the balance-sheet using Solvency II valuation before the instantaneous loss described in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. The DTA amount of this cell shall be consistent with the value in the cell R0040/C0010 in S.02.01
R0600/C0120	DTA After the shock	Total amount of the deferred tax assets (DTA) if a balance-sheet using Solvency II valuation was set up after the instantaneous loss, as provided for in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. This cell shall be left blank where R0590/C0109 is filled with '1-Yes
R0610/C0110	DTA carry forward- Before the shock	Amount of deferred tax assets (DTA) in the balance-sheet using Solvency II valuation due to carry forward of previous losses or tax deductions before the instantaneous loss described in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35.
R0610/C0120	DTA carry forward — After the shock	Amount of deferred tax assets (DTA) due to carry forward of previous losses or tax deductions if a balance-sheet using Solvency II valuation was set up after the instantaneous loss, as provided for in

		Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. This cell shall be left blank where R0590/C0109 is filled with '1-Yes'.
R0620/C0110	DTA due to deductible temporary differences-Before the shock	Amount of deferred tax assets (DTA) in the balance-sheet using Solvency II valuation due to differences between the Solvency II valuation of an asset or liability and its tax base before the instantaneous loss described in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35
R0620/C0120	DTA due to deductible temporary differences — After the shock	Amount of deferred tax assets (DTA) due to differences between the Solvency II valuation of an asset or liability and its tax base if a balance-sheet using Solvency II valuation was set up after the instantaneous loss, as provided for in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. This cell shall be left blank if R0590/C0109 is filled with '1-Yes'.
R0630/C0110	DTL — Before the shock	Amount of Deferred Tax Liabilities (DTL) in the balance-sheet using Solvency II valuation before the instantaneous loss described in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. The DTL amount of this cell shall be consistent with the value in the cell R0780/C0010 in S.02.01.
R0630/C0120	DTL — After the shock	Amount of Deferred Tax Liabilities (DTL) if a balance-sheet using

		Solvency II valuation was set up after the instantaneous loss, as provided for in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. This cell shall be left blank in case of an average tax rate approach and where R0590/C0109 is filled with '1-Yes'.
R0640/C0130	LAC DT	Amount of loss-absorbing capacity of deferred taxes, calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35. The LAC amount of this cell shall be the same as the value in the cell R0150/C0100 in S.25.01.01.
R0650/C0130	LAC DT justified by reversion of deferred tax liabilities	Amount of loss-absorbing capacity of deferred taxes, calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35, justified by reversion of deferred tax liabilities
R0660/C0130	LAC DT justified by reference to probable future taxable economic profit	Amount of loss-absorbing capacity of deferred taxes, calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35, justified by reference to probable future taxable economic profit
R0670/C0130	LAC DT justified by carry back, current year	Amount of loss-absorbing capacity of deferred taxes, calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35, justified by profits from past years. Amount of the losses allocated to the next year.
R0680/C0130	LAC DT justified by carry back, future years	Amount of loss-absorbing capacity of deferred taxes,

Status: This is the original version as it was originally adopted in the EU.This legislation may since have been updated - see the latest available (revised) version

		calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35, justified by profits from past years. Amount of losses allocated to the years after next year.
R0690/C0130	Maximum LAC DT	Maximal amount of loss- absorbing capacity of deferred taxes, that could be available, before the assessment whether the increase in net deferred tax assets can be used for the purposes of the adjustment, as provided for in Article 207(2) of Delegated Regulation (EU) 2015/35.'.

(5) In section S.25.02 — Solvency Capital Requirement – for undertakings using the standard formula and partial internal model, the following rows are added to the table:

'Approach to tax rate		
R0590/C0109	Approach based on average tax rate	One of the options in the following closed list shall be used:  1 - Yes 2 - No 3 - Not applicable as the adjustment for the loss-absorbing capacity of deferred taxes (LAC DT) is not used (in this case R0600 to R0690 are not applicable)  See EIOPA Guidelines on loss-absorbing capacity of technical provisions and deferred taxes (EIOPA-BoS-14/177*)

a Guidelines EIOPA-BoS-14/177 of 2 February 2015 on the loss-absorbing capacity of technical provisions and deferred taxes (https://eiopa.europa.eu/publications/eiopa-guidelines/guidelines-on-the-loss-absorbing-capacity-of-technical-provisions-and-deferred-taxes).';

**Status:** This is the original version as it was originally adopted in the EU.This legislation may since have been updated - see the latest available (revised) version

## Calculation of adjustment for loss-absorbing capacity of deferred taxes (voluntary until 31 December 2019, compulsory from 1 January 2020)

R0600/C0110	DTA Before the shock	Total amount of the Deferred Tax Assets (DTA) in the balance-sheet using Solvency II valuation before the instantaneous loss described in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. The DTA amount of this cell shall be consistent with the value in the cell R0040/C0010 in S.02.01.
R0600/C0120	DTA After the shock	Total amount/estimate of the Deferred Tax Assets (DTA) if a balance-sheet using Solvency II valuation was set up after the instantaneous loss, as provided for in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. This cell shall be left blank where R0590/C0109 is filled with '1-Yes'.
R0610/C0110	DTA carry forward- Before the shock	Amount of deferred tax assets (DTA) in the balance-sheet using Solvency II valuation due to carry forward of previous loses or tax deductions before the instantaneous loss described in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35
R0610/C0120	DTA carry forward — After the shock	Amount/estimate of deferred tax assets (DTA) due to carry forward of previous loses or tax deductions if a balance- sheet using Solvency II valuation was set up

a Guidelines EIOPA-BoS-14/177 of 2 February 2015 on the loss-absorbing capacity of technical provisions and deferred taxes (https://eiopa.europa.eu/publications/eiopa-guidelines/guidelines-on-the-loss-absorbingcapacity-of-technical-provisions-and-deferred-taxes).';

		after the instantaneous loss, as provided for in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. This cell shall be left blank where R0590/C0109 is filled with '1-Yes'.
R0620/C0110	DTA due to deductible temporary differences-Before the shock	Amount of deferred tax assets (DTA) in the balance-sheet using Solvency II valuation due to differences between the Solvency II valuation of an asset or liability and its tax base before the instantaneous loss described in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35
R0620/C0120	DTA due to deductible temporary differences — After the shock	Amount/estimate of deferred tax assets (DTA) due to differences between the Solvency II valuation of an asset or liability and its tax base if a balance-sheet using Solvency II valuation was set up after the instantaneous loss, as provided for in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. This cell shall be left blank where R0590/C0109 is filled with '1-Yes'.
R0630/C0110	DTL — Before the shock	Amount of Deferred Tax Liabilities (DTL) in balance-sheet using Solvency II valuation before the instantaneous loss described in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. The DTL amount of this cell shall be consistent with the

Guidelines EIOPA-BoS-14/177 of 2 February 2015 on the loss-absorbing capacity of technical provisions and deferred taxes (https://eiopa.eu/publications/eiopa-guidelines/guidelines-on-the-loss-absorbing-capacity-of-technical-provisions-and-deferred-taxes).';

		value in the cell R0780/ C0010 in S.02.01.
R0630/C0120	DTL — After the shock	Amount/estimate of Deferred Tax Liabilities (DTL) if a balance-sheet using Solvency II valuation was set up after the instantaneous loss, as provided for in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. This cell shall be left blank in case of an average tax rate approach and where R0590/C0109 is filled with '1-Yes'.
R0640/C0130	Amount/estimate of LAC DT	Amount/estimate of loss-absorbing capacity of deferred taxes, calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35. The LAC amount of this cell shall be the same as the value in the cell R0310/C0100 in S.25.02.01.
R0650/C0130	Amount/estimate of LAC DT justified by reversion of deferred tax liabilities	Amount/estimate of loss- absorbing capacity of deferred taxes, calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35, justified by reversion of deferred tax liabilities.
R0660/C0130	Amount/estimate of LAC DT justified by reference to probable future taxable economic profit	Amount/estimate of loss-absorbing capacity of deferred taxes, calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35, justified by reference to probable future taxable economic profit.

**a** Guidelines EIOPA-BoS-14/177 of 2 February 2015 on the loss-absorbing capacity of technical provisions and deferred taxes (https://eiopa.europa.eu/publications/eiopa-guidelines/guidelines-on-the-loss-absorbing-capacity-of-technical-provisions-and-deferred-taxes).';

R0670/C0130	Amount/estimate of LAC DT justified by carry back, current year	Amount/estimate of loss-absorbing capacity of deferred taxes, calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35, justified by profits from past years. Amount of the losses allocated to the next year
R0680/C0130	Amount/estimate of LAC DT justified by carry back, future years	Amount/estimate of loss- absorbing capacity of deferred taxes, calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35, justified by profits from past years Amount of losses allocated to the years after next year.
R0690/C0130	Amount/estimate of Maximum LAC DT	Maximal amount of loss- absorbing capacity of deferred taxes that could be available, before the assessment whether the increase in net deferred tax assets can be used for the purposes of the adjustment, as provided for in Article 207(2) of Delegated Regulation (EU) 2015/35

Guidelines EIOPA-BoS-14/177 of 2 February 2015 on the loss-absorbing capacity of technical provisions and deferred taxes (https://eiopa.europa.eu/publications/eiopa-guidelines/guidelines-on-the-loss-absorbingcapacity-of-technical-provisions-and-deferred-taxes).';

in section S.25.03 — Solvency Capital Requirement – for undertakings using full (6) internal model, the following rows are added to the table:

R0590/C0109	Approach based on average tax rate	One of the options in the following closed list shall be used:
		1 – Yes
		2 – No
		3 – Not applicable
		as the
		adjustment
		for the loss-
		absorbing
		capacity of
		deferred tax

		(LAC DT) is not used (in this case R0600 to R0690 are not applicable).  See EIOPA Guidelines on loss-absorbing capacity of technical provisions and deferred taxes (EIOPA-BoS-14/177)
	ent for loss-absorbing capacitil 31 December 2019, comp	
R0600/C0110	DTA Before the shock	Total amount of the deferred tax assets (DTA) in the balance-sheet using Solvency II valuation before the instantaneous loss described in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. The DTA amount of this cell shall be consistent with the value in the cell R0040/C0010 in S.02.01
R0600/C0120	DTA After the shock	Total amount of the Deferred Tax Assets (DTA) if a balance-sheet using Solvency II valuation was set up after the instantaneous loss, as provided for in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. This cell shall be left blank where R0590/C0109 is filled with '1-Yes
R0610/C0110	DTA carry forward- Before the shock	Amount of deferred tax assets (DTA) in the balance-sheet using Solvency II valuation due to carry forward of previous loses or tax deductions before instantaneous loss described in Article 207(1) and (2) of

		Delegated Regulation (EU) 2015/35
R0610/C0120	DTA carry forward — After the shock	Amount/estimate of deferred tax assets (DTA) due to carry forward of previous loses or tax deductions if a balance-sheet using Solvency II valuation was set up after the instantaneous loss, as provided for in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. This cell shall be left blank where R0590/C0109 is filled with '1-Yes'.
R0620/C0110	DTA due to deductible temporary differences-Before the shock	Amount of deferred tax assets (DTA) in the balance-sheet using Solvency II valuation due to differences between the Solvency II valuation of an asset or liability and its tax base before the instantaneous loss described in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35
R0620/C0120	DTA due to deductible temporary differences — After the shock	Amount/estimate of deferred tax assets due to differences between the Solvency II valuation of an asset or liability and its tax base if a balance-sheet using Solvency II valuation was set up after the instantaneous loss, as provided for in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. This cell shall be left blank where R0590/C0109 is filled with '1-Yes'.
R0630/C0110	DTL — Before the shock	Amount of Deferred Tax Liabilities (DTL) in the balance-sheet using Solvency II valuation before the instantaneous

		loss described in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. The DTL amount of this cell shall be consistent with the value in the cell R0780/C0010 in S.02.01.
R0630/C0120	DTL — After the shock	Amount/estimate of Deferred Tax Liabilities if a balance-sheet using Solvency II valuation was set up after the instantaneous loss, as provided for in Article 207(1) and (2) of Delegated Regulation (EU) 2015/35. This cell shall be left blank in case of an average tax rate approach and where R0590/C0109 is filled with '1-Yes'.
R0640/C0130	Amount/estimate of LAC DT	Amount/estimate of loss-absorbing capacity of deferred taxes, as defined in Article 207 of Delegated Regulation (EU) 2015/35. The LAC amount of this cell shall be the same as the value in the cell R0310/C0100 in S.25.02.01.03.
R0650/C0130	Amount/estimate of LAC DT justified by reversion of deferred tax liabilities	Amount/estimate of loss-absorbing capacity of deferred taxes, as calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35, justified by reversion of deferred tax liabilities
R0660/C0130	Amount/estimate of LAC DT justified by reference to probable future taxable economic profit	Amount/estimate of loss-absorbing capacity of deferred taxes, as calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35, justified by reference to probable

		future taxable economic profit.
R0670/C0130	Amount/estimate of LAC DT justified by carry back, current year	Amount/estimate of loss-absorbing capacity of deferred taxes, as calculated in accordance with Article 207 of Delegated Regulation (EU) 2015/35, justified by profits from past years. Amount of the losses allocated to the next year.
R0680/C0130	Amount/estimate of LAC DT justified by carry back, future years	Amount/estimate of loss-absorbing capacity of deferred taxes, as defined in Article 207 of Delegated Regulation (EU) 2015/35, justified by profits from past years. Amount of losses allocated to the years after next year.
R0690/C0130	Amount/estimate of Maximum LAC DT	Maximal amount of loss-absorbing capacity of deferred taxes that could be available, before the assessment whether the increase in net deferred tax assets can be used for the purposes of the adjustment as provided for in Article 207(2) of Delegated Regulation (EU) 2015/35'.

- (7) in section S.26.01 — Solvency Capital Requirement — Market risk, the table is amended as follows:
  - row R0010/C0010 is deleted; (a)
  - (b) the following row is inserted between rows Z0030 and R0020/C0010:

R0012/C0010	Simplifications spread risk – bonds and loans	The options in the following closed list shall be used:	
		1 –	Simplification for Article 104
		2 –	Simplifications for Article 105a

**Status:** This is the original version as it was originally adopted in the EU.This legislation may since have been updated - see the latest available (revised) version

simultaneously. If R0012/C0010 = 1, only C0060 and C0080 shall be filled in for R0410
---

(c) the following row is inserted before row R0020/C0010:

R0014/C0010	Simplifications market risk concentration— simplifications used	Simplifications for Article 105a Simplifications
		not used

- (d) the code of row R0220–R0240/C0020 is replaced by 'R0221–R0240/C0020';
- (e) the code of row R0220-R0240/C0040 is replaced by 'R0221-R0240/C0040';
- (f) the code for row R0260–R0280/C0020 is replaced by 'R0261–R0280/C0020';
- (g) the code for row R0260–R0280/C0040 is replaced by 'R0261–R0280/C0040';
- (h) the rows between R0261-R0280/C0040 and R0292/C0020 are deleted;
- (i) the following rows are inserted between rows R0260-R0280/C0040 and R0292/C0020:

	·	
R0291/C0020, R0293- R0295/C0020	Initial absolute values before shock – Assets – Equity risk –qualifying infrastructure corporate equities	This is the initial absolute value of the assets sensitive to the equity risk for each kind of qualifying infrastructure corporate equities.  Recoverables from reinsurance and SPVs shall not be included in this cell.
R0291/C0030, R0293- R0295/C0030	Initial absolute values before shock – Liabilities – Equity risk – qualifying infrastructure corporate equities	This is the initial absolute value of liabilities sensitive to the equity risk for each kind of qualifying

		infrastructure corporate equities. The amount of TP shall be net of reinsurance and SPV recoverables.
R0291/C0040, R0293- R0295/C0040	Absolute values after shock – Assets – Equity risk – qualifying infrastructure corporate equities	This is the absolute value of the assets sensitive to equity risk for each kind of qualifying infrastructure corporate equities, after the shock.  Recoverables from reinsurance and SPVs shall not be included in this cell.
R0291/C0050, R0293- R0295/C0050	Absolute values after shock – Liabilities (after the loss-absorbing capacity of technical provisions) – Equity risk – qualifying infrastructure corporate equities	This is the absolute value of liabilities sensitive to equity risk (for each kind of qualifying infrastructure corporate equities), after the shock and after the application of the adjustment for the loss-absorbing capacity of technical provisions. The amount of TP shall be net of reinsurance and SPV recoverables.
R0291/C0060, R0293- R0295/C0060	Absolute value after shock – Net solvency capital requirement – Equity risk –qualifying infrastructure corporate equities	This is the net capital charge for equity risk (for each kind of qualifying infrastructure corporate equities) after the application of the adjustment for the loss-absorbing capacity of technical provisions.
R0291/C0070, R0293- R0295/C0070	Absolute values after shock – Liabilities (before the loss-absorbing capacity of technical provisions) – Equity risk – qualifying infrastructure corporate equities	This is the absolute value of the liabilities sensitive to equity risk (for each kind of qualifying infrastructure corporate equities), after the shock but before the application of the

		adjustment for the loss- absorbing capacity of technical provisions. The amount of TP shall be net of reinsurance and SPV recoverables.
R0291/C0080, R0293- R0295/C0080	Absolute value after shock – Gross solvency capital requirement – Equity risk – qualifying infrastructure corporate equities	This is the gross capital charge for equity risk for each kind of qualifying infrastructure corporate equities, i.e. before the application of the adjustment for the loss-absorbing capacity of technical provisions.

- (j) the rows between rows R0291/C0080, R0293-R0295/C0080 and row R0300/C0020 are deleted;
- (k) the following rows are inserted between rows R0291/C0080, R0293-R0295/C0080 and row R0300/C0020;

R0292/C0020, R0296- R0298/C0020	Initial absolute values before shock – Assets – Equity risk –qualifying infrastructure equities other than corporate equities	This is the initial absolute value of the assets sensitive to the equity risk for each kind of qualifying infrastructure equities other than corporate equities.  Recoverables from reinsurance and SPVs shall not be included in this cell.
R0292/C0030, R0296- R0298/C0030	Initial absolute values before shock – Liabilities – Equity risk – qualifying infrastructure equities other than corporate equities	This is the initial absolute value of liabilities sensitive to the equity risk for each kind of qualifying infrastructure equities other than corporate equities.  The amount of TP shall be net of reinsurance and SPV recoverables.
R0292/C0040, R0296- R0298/C0040	Absolute values after shock – Assets – Equity risk – qualifying infrastructure equities	This is the absolute value of the assets sensitive to equity risk for each kind of qualifying

	other than corporate equities	infrastructure equities other than corporate equities, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0292/C0050, R0296- R0298/C0050	Absolute values after shock — Liabilities (after the loss-absorbing capacity of technical provisions) — Equity risk — qualifying infrastructure equities other than corporate equities	This is the absolute value of liabilities sensitive to equity risk (for each kind of qualifying infrastructure equities other than corporate equities), after the shock and after the application of the adjustment for the loss-absorbing capacity of technical provisions. The amount of TP shall be net of reinsurance and SPV recoverables.
R0292/C0060, R0296- R0298/C0060	Absolute value after shock – Net solvency capital requirement – Equity risk –qualifying infrastructure equities other than corporate equities	This is the net capital charge for equity risk (for each kind of qualifying infrastructure equities other than corporate equities) after the application of the adjustment for the loss-absorbing capacity of technical provisions.
R0292/C0070, R0296- R0298/C0070	Absolute values after shock – Liabilities (before the loss-absorbing capacity of technical provisions) – Equity risk – qualifying infrastructure equities other than corporate equities	This is the absolute value of the liabilities sensitive to equity risk (for each kind of qualifying infrastructure equities other than corporate equities), after the shock but before the application of the adjustment for the loss-absorbing capacity of technical provisions. The amount of TP shall be net of reinsurance and SPV recoverables.

R0292/C0080, R0296- R0298/C0080	Absolute value after shock – Gross solvency capital requirement – Equity risk – qualifying infrastructure equities other than corporate equities	This is the gross capital charge for equity risk for each kind of qualifying infrastructure equities other than corporate equities, i.e. before the application of the adjustment for the loss-absorbing capacity of technical provisions.
------------------------------------	---	--

- (l) the rows between row R0450/C0080 and row R0480/C0020 are deleted;
- (m) the following rows are inserted between row R0450/C0080 and row R0480/C0020:

R0461/C0020	Initial absolute values before shock – Assets – spread risk – securitisation positions – senior STS securitisation	This is the absolute value of the assets sensitive to the spread risk on senior STS securitisation positions. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0461/C0030	Initial absolute values before shock – Liabilities – spread risk – securitisation positions – senior STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on senior STS securitisation positions. This value shall only be reported where the split between R0461 to R0483 could be derived from the method used for the calculation. Where the split is not possible only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0461/C0040	Absolute values after shock – Assets – spread risk – securitisation positions – senior STS securitisation	This is the absolute value of the assets sensitive to the spread risk on senior STS securitisation positions, after the shock.  Recoverables from reinsurance and SPVs

		shall not be included in this cell.
R0461/C0050	Absolute values after shock – Liabilities (after the loss-absorbing capacity of technical provisions) – spread risk – securitisation positions – senior STS securitisation)	This is the absolute value of the liabilities sensitive to the spread risk on senior STS securitisation positions, after the shock and after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0461/C0060	Absolute value after shock – Net solvency capital requirement – spread risk – securitisation positions – senior STS securitisation	This is the net capital charge for spread risk on senior STS securitisation positions, after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in.
R0461/C0070	Absolute values after shock – Liabilities (before the loss-absorbing capacity of technical provisions)— spread risk – securitisation positions – senior STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on senior STS securitisation positions, after the shock but before the application of the adjustment for the loss-absorbing

		capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0461/C0080	Absolute value after shock – Gross solvency capital requirement – spread risk – securitisation positions – senior STS securitisation	This is the gross capital charge for spread risk on senior STS securitisation positions, i.e. before the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible only R0450 shall be filled in.
R0462/C0020	Initial absolute values before shock – Assets – spread risk – securitisation positions – non-senior STS securitisation	This is the absolute value of the assets sensitive to the spread risk on non-senior STS securitisation positions. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0462/C0030	Initial absolute values before shock – Liabilities – spread risk – securitisation positions – non-senior STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on non-senior STS securitisation positions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used

		for the calculation. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0462/C0040	Absolute values after shock — Assets — spread risk — securitisation positions — non-senior STS securitisation	This is the absolute value of the assets sensitive to the spread risk on non-senior STS securitisation positions, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0462/C0050	Absolute values after shock – Liabilities (after the loss-absorbing capacity of technical provisions) – spread risk – securitisation positions – non-senior STS securitisation)	This is the absolute value of the liabilities sensitive to the spread risk on non-senior STS securitisation positions, after the shock and after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in.  The amount of TP shall be net of reinsurance and SPV recoverables.
R0462/C0060	Absolute value after shock – Net solvency capital requirement – spread risk – securitisation positions – non-senior STS securitisation	This is the net capital charge for spread risk on non-senior STS securitisation positions, after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the

		split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in.
R0462/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions)— spread risk — securitisation positions — non-senior STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on non-senior STS securitisation positions, after the shock but before the application of the adjustment for the loss-absorbing capacity of technical provisions.  This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in.  The amount of TP shall be net of reinsurance and SPV recoverables.
R0462/C0080	Absolute value after shock – Gross solvency capital requirement – spread risk – securitisation positions – non-senior STS securitisation	This is the gross capital charge for spread risk on non-senior STS securitisation positions, i.e. before the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only

			R0450 shall be filled in.
(n)	the following rows are in	nserted after row R0480/C	20080:
	R0481/C0020	Initial absolute values before shock – Assets – spread risk – securitisation positions – other securitisation	This is the absolute value of the assets sensitive to the spread risk on other securitisation positions. Recoverables from reinsurance and SPVs shall not be included in this cell.
	R0481/C0030	Initial absolute values before shock – Liabilities – spread risk – securitisation positions – other securitisation	This is the absolute value of the liabilities sensitive to the spread risk on other securitisation positions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
	R0481/C0040	Absolute values after shock – Assets – spread risk – securitisation positions – other securitisation	This is the absolute value of the assets sensitive to the spread risk on other securitisation positions, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
	R0481/C0050	Absolute values after shock – Liabilities (after the loss-absorbing capacity of technical provisions) – spread risk – securitisation positions – other securitisation)	This is the absolute value of the liabilities sensitive to the spread risk on other securitisation positions, after the shock and after the application of the adjustment for the

		loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0481/C0060	Absolute value after shock – Net solvency capital requirement – spread risk – securitisation positions – other securitisation	This is the net capital charge for spread risk on other securitisation positions, after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in.
R0481/C0070	Absolute values after shock – Liabilities (before the loss-absorbing capacity of technical provisions)– spread risk – securitisation positions – other securitisation	This is the absolute value of the liabilities sensitive to the spread risk on other securitisation positions, after the shock but before the application of the adjustment for the loss-absorbing capacity of technical provisions.  This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of

		the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0481/C0080	Absolute value after shock – Gross solvency capital requirement – spread risk – securitisation positions – other securitisation	This is the gross capital charge for spread risk on other securitisation positions, i.e. before the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in.
R0482/C0020	Initial absolute values before shock – Assets – spread risk – securitisation positions – transitional type 1 securitisation	This is the absolute value of the assets sensitive to the spread risk on transitional type 1 securitisation positions.  Recoverables from reinsurance and SPVs shall not be included in this cell.
R0482/C0030	Initial absolute values before shock – Liabilities – spread risk – securitisation positions – transitional type 1 securitisation	This is the absolute value of the liabilities sensitive to the spread risk on transitional type 1 securitisation positions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split

		is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0482/C0040	Absolute values after shock – Assets – spread risk – securitisation positions – transitional type 1 securitisation	This is the absolute value of the assets sensitive to the spread risk on transitional type 1 securitisation positions, after the shock.  Recoverables from reinsurance and SPVs shall not be included in this cell.
R0482/C0050	Absolute values after shock – Liabilities (after the loss-absorbing capacity of technical provisions) – spread risk – securitisation positions – transitional type 1 securitisation)	This is the absolute value of the liabilities sensitive to the spread risk on transitional type 1 securitisation positions, after the shock and after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0482/C0060	Absolute value after shock – Net solvency capital requirement – spread risk – securitisation positions – transitional type 1 securitisation	This is the net capital charge for spread risk on transitional type 1 securitisation positions, after the application of the adjustment for the loss-absorbing capacity of technical provisions.

		This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in.
R0482/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions)— spread risk — securitisation positions — transitional type 1 securitisation	This is the absolute value of the liabilities sensitive to the spread risk on transitional type 1 securitisation positions, after the shock but before the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0482/C0080	Absolute value after shock – Gross solvency capital requirement – spread risk – securitisation positions – transitional type 1 securitisation	This is the gross capital charge for spread risk on transitional type 1 securitisation positions, i.e. before the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread

		risk. Where the split is not possible, only R0450 shall be filled in.
R0483/C0020	Initial absolute values before shock – Assets – spread risk – securitisation positions – guaranteed STS securitisation	This is the absolute value of the assets sensitive to the spread risk on guaranteed STS securitisation positions. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0483/C0030	Initial absolute values before shock – Liabilities – spread risk – securitisation positions – guaranteed STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on guaranteed STS securitisation positions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0483/C0040	Absolute values after shock – Assets – spread risk – securitisation positions – guaranteed STS securitisation	This is the absolute value of the assets sensitive to the spread risk on guaranteed STS securitisation positions, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0483/C0050	Absolute values after shock – Liabilities (after the loss-absorbing capacity of technical provisions) – spread risk – securitisation positions – guaranteed STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on guaranteed STS securitisation positions, after the shock and after the application of the adjustment for the

		loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0483/C0060	Absolute value after shock – Net solvency capital requirement – spread risk – securitisation positions – guaranteed STS securitisation	This is the net capital charge for spread risk on guaranteed STS securitisation positions, after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in.
R0483/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions)— spread risk — securitisation positions — guaranteed STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on guaranteed STS securitisation positions, after the shock but before the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of

**Status:** This is the original version as it was originally adopted in the EU.This legislation may since have been updated - see the latest available (revised) version

		the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0483/C0080	Absolute value after shock – Gross solvency capital requirement – spread risk – securitisation positions – guaranteed STS securitisation	This is the gross capital charge for spread risk on guaranteed STS securitisation positions, i.e. before the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation of the SCR for spread risk. Where the split is not possible, only R0450 shall be filled in.

- (8) in section S.26.02 Solvency Capital Requirement Counterparty default risk, the table is amended as follows:
  - (a) in the third column ('Instructions') of row R0010/C0010, the text is replaced by the following:

Identify whether an undertaking used simplifications for the calculation of counter party default risk. The options in the following closed list shall be used:

- 3 Simplification pooling arrangements, Article 109
- 4 Simplification grouping single name exposures, Article 110
- 5 Simplification of the LGD for reinsurance arrangements, Article 112a
- 6 Simplification for type 1 exposures, Article 112b
- 7 Simplification for the risk-mitigating effect of reinsurance arrangements, Article 111
- 9 Simplifications not used

Options 3 to 7 may be used simultaneously.

If R0010/C0010 = 4 or 6, for Type 1 exposures, only R0100/C0080 shall be filed in for R0100.;

(b) in the third column ('Instructions') of row R0010/C0080, the text is replaced by the following:

This is the gross capital charge (before the loss–absorbency capacity of technical provisions) for counterparty default risk arising from all Type 1 exposures.

If R0010/C0010 = 4 or 6, this item represents the Gross solvency capital requirement using simplifications.;

(9) in section S.26.03 – Solvency Capital Requirement – Life underwriting risk, in the third column ('Instructions') of row R0040/C0010, the text is replaced by the following:

Identify whether an undertaking used simplifications for the calculation of lapse risk. The following options shall be used:

- 1 Simplification for the purposes of Article 95
- 2 Simplification for the purposes of Article 95a
- 9 Simplifications not used

Options 1 and 2 may be used simultaneously.

If R0040/C0010 = 1, only C0060 and C0080 shall be filled in for R0400 to R0420.;

- in section S.26.04 Solvency Capital Requirement Health underwriting risk is amended as follows:
  - in the third column ('Instructions') of row R0050/C0010, the text is replaced by the following:

Identify whether an undertaking used simplifications for the calculation of lapse risk. The following options shall be used:

- 1 Simplification for the purposes of Article 102
- 2 Simplification for the purposes of Article 102a
- 9 Simplifications not used

Options 1 and 2 may be used simultaneously.

If R0050/C0010 = 1, only C0060 and C0080 shall be filled in for R0400 to R0420.;

(b) the following row is inserted after row R0050/C0010:

R0051/C0010	Simplifications – NSLT lapse risk	Identify whether an undertaking used simplifications for the calculation of lapse
		risk. The following
		options shall be used:

**Status:** This is the original version as it was originally adopted in the EU.This legislation may since have been updated - see the latest available (revised) version

	1 – 9 –	Simplification for the purposes of Article 96a Simplifications
	9-	not used

in section S.26.05 – Solvency Capital Requirement – Non-Life underwriting risk, the following row is inserted after row R0010/C0010 of the table:

R0011/C0010	Simplifications used – non-life lapse risk	underta simplif calcula underw	y whether an aking used ications for the tion of non-life vriting risk. The ng options shall be
		9 –	for the purposes of Article 90a Simplification not used

- in section S.26.07 Solvency Capital Requirement Simplifications, the table is amended as follows:
  - (a) the following table is added:

Market risk — Market risk concentrations			
R0300/C0300	Debt portfolio share	The share of the debt portfolio for which a simplified SCR calculation was performed. This item shall only be reported in case of the reporting exemption of S.06.02.	

(b) the following rows are inserted after row R0300/C0300:

NAT CAT simplifications			
R0400/C0320	Windstorm – risk weight chosen in the NAT CAT simplifications	Include risk weight used in windstorm simplifications	
R0400/C0330	Windstorm – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to windstorm simplifications	

R0410/C0320	Hail – risk weight chosen in the NAT CAT simplifications	Include risk weight chosen in hail simplifications
R0410/C0330	Hail – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to hail simplifications
R0420/C0320	Earthquake – risk weight chosen in the NAT CAT simplifications	Include risk weight chosen in earthquake simplifications
R0420/C0330	Earthquake – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to earthquake simplifications
R0430/C0320	Flood – risk weight chosen in the NAT CAT simplifications	Include risk weight chosen in flood simplifications
R0430/C0330	Flood – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to flood simplifications
R0440/C0320	Subsidence – risk weight chosen in the NAT CAT simplifications	Include risk weight chosen in subsidence simplifications
R0440/C0330	Subsidence – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to subsidence simplifications

- in section S.27.01-Solvency Capital Requirement Non-life and health catastrophe risk, the table is amended as follows: (13)
  - the following rows are inserted after row Z0030: (a)

R0001/C001	Simplifications used – fire risk	undertal simplificalculat	whether an king used cations for the ion of fire risk. owing options
		shall be 1 –	

**Status:** This is the original version as it was originally adopted in the EU.This legislation may since have been updated - see the latest available (revised) version

		only C08	/C0001 = 1, 380 shall be for R2600.
R0002/C001	Simplifications used – natural catastrophe risk	Identify whether an undertaking used simplifications for the calculation of natural catastrophe risk. The following options shall be used:	
		1 –	Simplification for the purposes of Article 90b windstorm
		2 –	Simplification for the purposes of Article 90b earthquake
		3 –	Simplification for the purposes of Article 90b flood
		4 –	Simplification for the purposes of Article 90b hail
		5 –	Simplification for the purposes of Article 90b subsidence
		9 –	Simplifications not used
			1 to 5 may be ultaneously.

(b) the following table is inserted before row C0760/R2400:

Number of vessels		
C0781/R2421	below the threshold of	This is the number of vessels below the threshold of EUR 250k

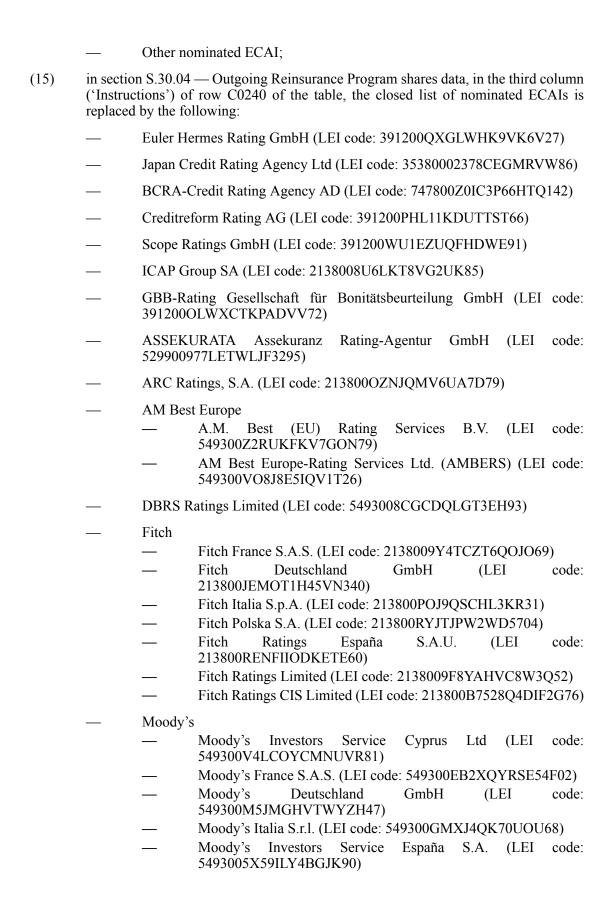

(c) in the first column of row C1170/R3300–R3600, C1190/R3300–R3600,C1210/R3300–R3600,C1230/R3300–R3600, C1250/R3300–R3600, 'C1210/R3300–R3600' is deleted;

- (d) in the first column of row C1180/R3300-/R3600, C1200/R3300-R3600, C1220/R3300-R3600, C1240/R3300-R3600, C1260/R3300-R3600, C1220/R3300-R3600' is deleted;
- (e) in the first column of row C1320/R3700–R4010, C1330/R3700–R4010, C1340/R3700–R4010, C1350/R3700–R4010, C1360/R3700–R4010, 'C1340/R3700–R4010' is deleted;
- in section S.30.02 Facultative covers for non-life and life business shares in the third column ('Instructions') of row C0340 of the table, the closed list of nominated ECAIs is replaced by the following:

	the following rows are inserted between rows R0261-R0280/C0040 and R0292/C0020:			
	R0291/C0020, R0293- R0295/C0020	Initial absolute values before shock  – Assets – Equity risk –qualifying infrastructure corporate equities	This is the initial absolute value of the assets sensitive to the equity risk for each kind of qualifying infrastructure corporate equity.  Recoverables from reinsurance and SPVs shall not be included in this cell.	
	R0291/C0030, R0293- R0295/C0030	Initial absolute values before shock – Liabilities – Equity risk – qualifying infrastructure corporate equities	This is the initial absolute value of liabilities sensitive to the equity risk for each kind of qualifying infrastructure corporate equity	

equity.

		The amount of TP shall be net of reinsurance and SPV recoverables.
R0291/C0040, R0293- R0295/C0040	Absolute values after shock – Assets – Equity risk – qualifying infrastructure corporate equities	This is the absolute value of the assets sensitive to equity risk for each kind of qualifying infrastructure corporate equity, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0291/C0050, R0293- R0295/C0050	Absolute values after shock – Liabilities (after the loss-absorbing capacity of technical provisions) – Equity risk – qualifying infrastructure corporate equities	This is the absolute value of liabilities sensitive to equity risk (for each kind of qualifying infrastructure corporate equity), after the shock and after the application of the adjustment for the loss-absorbing capacity of technical provisions. The amount of TP shall be net of reinsurance and SPV recoverables.
R0291/C0060, R0293- R0295/C0060	Absolute value after shock – Net solvency capital requirement – Equity risk –qualifying infrastructure corporate equities	This is the net capital charge for equity risk (for each kind of qualifying infrastructure corporate equity), after the application of the adjustment for the loss-absorbing capacity of technical provisions.
R0291/C0070, R0293- R0295/C0070	Absolute values after shock – Liabilities (before the loss-absorbing capacity of technical provisions) – Equity risk – qualifying infrastructure corporate equities	This is the absolute value of the liabilities sensitive to equity risk (for each kind of qualifying infrastructure corporate equity), after the shock but before the application of the adjustment for the loss-absorbing capacity of technical provisions.

		The amount of TP shall be net of reinsurance and SPV recoverables.
R0291/C0080, R0293- R0295/C0080	Absolute value after shock – Gross solvency capital requirement – Equity risk – qualifying infrastructure corporate equities	This is the gross capital charge for equity risk for each kind of qualifying infrastructure corporate equity, i.e. before the application of the adjustment for the loss-absorbing capacity of technical provisions.

- the rows between rows R0291/C0080, R0293-R0295/C0080 and R0300/ (j) C0020 are deleted;
- (k) the following rows are inserted between row R0291/C0080, R0293-R0295/ C0080 and row R0300/C0020:

R0292/C0020, R0296- R0298/C0020	Initial absolute values before shock  – Assets – Equity risk – qualifying infrastructure equities other than corporate equities	This is the initial absolute value of the assets sensitive to the equity risk for each kind of qualifying infrastructure equity, other than corporate equities.  Recoverables from reinsurance and SPVs shall not be included in this cell.
R0292/C0030, R0296- R0298/C0030	Initial absolute values before shock – Liabilities – Equity risk – qualifying infrastructure equities other than corporate equities	This is the initial absolute value of liabilities sensitive to the equity risk for each kind of qualifying infrastructure equity, other than corporate equities.  The amount of TP shall be net of reinsurance and SPV recoverables.
R0292/C0040, R0296- R0298/C0040	Absolute values after shock – Assets – Equity risk – qualifying infrastructure equities other than corporate equities	This is the absolute value of the assets sensitive to equity risk for each kind of qualifying infrastructure equity, other than corporate

		equities, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0292/C0050, R0296- R0298/C0050	Absolute values after shock — Liabilities (after the loss-absorbing capacity of technical provisions) — Equity risk — qualifying infrastructure equities other than corporate equities	This is the absolute value of liabilities sensitive to equity risk (for each kind of qualifying infrastructure equity, other than corporate equities), after the shock and after the application of the adjustment for the loss-absorbing capacity of technical provisions. The amount of TP shall be net of reinsurance and SPV recoverables.
R0292/C0060, R0296- R0298/C0060	Absolute value after shock – Net solvency capital requirement – Equity risk –qualifying infrastructure equities other than corporate equities	This is the net capital charge for equity risk (for each kind of qualifying infrastructure equity other than corporate equities), after the application of the adjustment for the lossabsorbing capacity of technical provisions.
R0292/C0070, R0296- R0298/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions) — Equity risk — qualifying infrastructure equities other than corporate equities	This is the absolute value of the liabilities sensitive to equity risk (for each kind of qualifying infrastructure equity other than corporate equities), after the shock, but before the application of the adjustment for the loss-absorbing capacity of technical provisions. The amount of TP shall be net of reinsurance and SPV recoverables.
R0292/C0080, R0296- R0298/C0080	Absolute value after shock – Gross	This is the gross capital charge for

solvency capital	equity risk for each
requirement – Equity	kind of qualifying
risk – qualifying	infrastructure equity,
infrastructure equities	other than corporate
other than corporate	equities, i.e. before
equities	the application of the
	adjustment for the loss-
	absorbing capacity of
	technical provisions.

- (1) the rows between R0450/C0080 and R0480/C0020 are deleted;
- (m) the following rows are inserted after row R0450/C0080:

R0461/C0020	Initial absolute values before shock – Assets – spread risk – securitisation positions – senior STS securitisation	This is the absolute value of the assets sensitive to the spread risk on senior STS securitisation positions. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0461/C0030	Initial absolute values before shock – Liabilities – spread risk – securitisation positions – senior STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on senior STS securitisation positions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0461/C0040	Absolute values after shock – Assets – spread risk – securitisation positions – senior STS securitisation	This is the absolute value of the assets sensitive to the spread risk on senior STS securitisation positions, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.

R0461/C0050	Absolute values after shock – Liabilities (after the loss-absorbing capacity of technical provisions) – spread risk – securitisation positions – senior STS securitisation)	This is the absolute value of the liabilities sensitive to the spread risk on senior STS securitisation positions, after the shock and after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0461/C0060	Absolute value after shock – Net solvency capital requirement – spread risk – securitisation positions – senior STS securitisation	This is the net capital charge for spread risk on senior STS securitisation positions, after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in.
R0461/C0070	Absolute values after shock – Liabilities (before the loss-absorbing capacity of technical provisions)– spread risk – securitisation positions – senior STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on senior STS securitisation positions, after the shock but before the application of the adjustment for the loss-absorbing capacity of technical provisions.

		This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0461/C0080	Absolute value after shock – Gross solvency capital requirement – spread risk – securitisation positions – senior STS securitisation	This is the gross capital charge for spread risk on senior STS securitisation positions, i.e. before the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in.
R0462/C0020	Initial absolute values before shock – Assets – spread risk – securitisation positions – non-senior STS securitisation	This is the absolute value of the assets sensitive to the spread risk on non-senior STS securitisation positions. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0462/C0030	Initial absolute values before shock – Liabilities – spread risk – securitisation positions – non-senior STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on non-senior STS securitisation positions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not

		possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0462/C0040	Absolute values after shock – Assets – spread risk – securitisation positions – non-senior STS securitisation	This is the absolute value of the assets sensitive to the spread risk on non-senior STS securitisation positions, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0462/C0050	Absolute values after shock – Liabilities (after the loss-absorbing capacity of technical provisions) – spread risk – securitisation positions – non-senior STS securitisation)	This is the absolute value of the liabilities sensitive to the spread risk on non-senior STS securitisation positions, after the shock and after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0462/C0060	Absolute value after shock – Net solvency capital requirement – spread risk – securitisation positions – non-senior STS securitisation	This is the net capital charge for spread risk on non-senior STS securitisation positions, after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation.

		Where the split is not possible, only R0450 shall be filled in.
R0462/C0070	Absolute values after shock – Liabilities (before the loss-absorbing capacity of technical provisions)— spread risk — securitisation positions — non-senior STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on non-senior STS securitisation positions, after the shock but before the application of the adjustment for the loss-absorbing capacity of technical provisions.  This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation.  Where the split is not possible, only R0450 shall be filled in.  The amount of TP shall be net of reinsurance and SPV recoverables.
R0462/C0080	Absolute value after shock – Gross solvency capital requirement – spread risk – securitisation positions – non-senior STS securitisation	This is the gross capital charge for spread risk on non-senior STS securitisation positions, i.e. before the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in.

## (n)

R0481/C0020	Initial absolute	This is the absolute
	values before shock -	value of the assets
	Assets – spread risk –	sensitive to the
	securitisation positions	1
	<ul> <li>other securitisation</li> </ul>	securitisation positions.

		Recoverables from reinsurance and SPVs shall not be included in this cell.
R0481/C0030	Initial absolute values before shock – Liabilities – spread risk – securitisation positions – other securitisation	This is the absolute value of the liabilities sensitive to the spread risk on other securitisation positions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0481/C0040	Absolute values after shock – Assets – spread risk – securitisation positions – other securitisation	This is the absolute value of the assets sensitive to the spread risk on other securitisation positions, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0481/C0050	Absolute values after shock – Liabilities (after the loss-absorbing capacity of technical provisions) – spread risk – securitisation positions – other securitisation)	This is the absolute value of the liabilities sensitive to the spread risk on other securitisation positions, after the shock and after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible only R0450 shall be filled in.

		The amount of TP shall be net of reinsurance and SPV recoverables.
R0481/C0060	Absolute value after shock – Net solvency capital requirement – spread risk – securitisation positions – other securitisation	This is the net capital charge for spread risk on other securitisation positions, after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in.
R0481/C0070	Absolute values after shock – Liabilities (before the loss-absorbing capacity of technical provisions)– spread risk – securitisation positions – other securitisation	This is the absolute value of the liabilities sensitive to the spread risk on other securitisation positions, after the shock but before the application of the adjustment for the loss-absorbing capacity of technical provisions.  This value shall be reported only where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible only R0450 shall be filled in.  The amount of TP shall be net of reinsurance and SPV recoverables.
R0481/C0080	Absolute value after shock – Gross solvency capital requirement – spread risk – securitisation positions – other securitisation	This is the gross capital charge for spread risk on other securitisation positions, i.e. before the application of the adjustment for the loss-

		absorbing capacity of technical provisions. This value shall be reported only where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in.
R0482/C0020	Initial absolute values before shock – Assets – spread risk – securitisation positions – transitional type 1 securitisation	This is the absolute value of the assets sensitive to the spread risk on transitional type 1 securitisation positions. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0482/C0030	Initial absolute values before shock – Liabilities – spread risk – securitisation positions – transitional type 1 securitisation	This is the absolute value of the liabilities sensitive to the spread risk on transitional type 1 securitisation positions.  This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation.  Where the split is not possible, only R0450 shall be filled in.  The amount of TP shall be net of reinsurance and SPV recoverables.
R0482/C0040	Absolute values after shock – Assets – spread risk – securitisation positions – transitional type 1 securitisation	This is the absolute value of the assets sensitive to the spread risk on transitional type 1 securitisation positions, after the shock.  Recoverables from reinsurance and SPVs shall not be included in this cell.

R0482/C0050	Absolute values after shock – Liabilities (after the loss-absorbing capacity of technical provisions) – spread risk – securitisation positions – transitional type 1 securitisation)	This is the absolute value of the liabilities sensitive to the spread risk on transitional type 1 securitisation positions, after the shock and after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0482/C0060	Absolute value after shock – Net solvency capital requirement – spread risk – securitisation positions – transitional type 1 securitisation	This is the net capital charge for spread risk on transitional type 1 securitisation positions, after application of the adjustment for the lossabsorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in.
R0482/C0070	Absolute values after shock – Liabilities (before the loss-absorbing capacity of technical provisions)– spread risk – securitisation positions – transitional type 1 securitisation	This is the absolute value of the liabilities sensitive to the spread risk on transitional type 1 securitisation positions, after the shock but before the application of the adjustment for the loss-absorbing capacity of technical provisions.

		This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0482/C0080	Absolute value after shock – Gross solvency capital requirement – spread risk – securitisation positions – transitional type 1 securitisation	This is the gross capital charge for spread risk on transitional type 1 securitisation positions, i.e. before the application of the adjustment for the lossabsorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in.
R0483/C0020	Initial absolute values before shock – Assets – spread risk – securitisation positions – guaranteed STS securitisation	This is the absolute value of the assets sensitive to the spread risk on guaranteed STS securitisation positions. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0483/C0030	Initial absolute values before shock – Liabilities – spread risk – securitisation positions – guaranteed STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on guaranteed STS securitisation positions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not

		possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0483/C0040	Absolute values after shock – Assets – spread risk – securitisation positions – guaranteed STS securitisation	This is the absolute value of the assets sensitive to the spread risk on guaranteed STS securitisation positions, after the shock. Recoverables from reinsurance and SPVs shall not be included in this cell.
R0483/C0050	Absolute values after shock – Liabilities (after the loss-absorbing capacity of technical provisions) – spread risk – securitisation positions – guaranteed STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on guaranteed STS securitisation positions, after the shock and after application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in. The amount of TP shall be net of reinsurance and SPV recoverables.
R0483/C0060	Absolute value after shock – Net solvency capital requirement – spread risk – securitisation positions – guaranteed STS securitisation	This is the net capital charge for spread risk on guaranteed STS securitisation positions, after the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation.

**Status:** This is the original version as it was originally adopted in the EU.This legislation may since have been updated - see the latest available (revised) version

		Where the split is not possible, only R0450 shall be filled in.
R0483/C0070	Absolute values after shock — Liabilities (before the loss-absorbing capacity of technical provisions)— spread risk — securitisation positions — guaranteed STS securitisation	This is the absolute value of the liabilities sensitive to the spread risk on guaranteed STS securitisation positions, after the shock but before the application of the adjustment for the loss-absorbing capacity of technical provisions.  This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation.  Where the split is not possible, only R0450 shall be filled in.  The amount of TP shall be net of reinsurance and SPV recoverables.
R0483/C0080	Absolute value after shock – Gross solvency capital requirement – spread risk – securitisation positions – guaranteed STS securitisation	This is the gross capital charge for spread risk on guaranteed STS securitisation positions, i.e. before the application of the adjustment for the loss-absorbing capacity of technical provisions. This value shall only be reported where the split between R0461 to R0483 can be derived from the method used for the calculation. Where the split is not possible, only R0450 shall be filled in.

(o) the following row is added at the end of section S. 26.01.:

Currency used as a reference to calculate the currency risk

R0810/C0090	Currency used as a	Identify the ISO 4217
	reference to calculate	alphabetic code of the
	the currency risk	currency that is used as

		a reference to calculate the currency risk
--	--	--

- in section S.26.02 Solvency Capital Requirement Counterparty default risk, the table is amended as follows:
  - (a) in the third column ('Instructions') of row R0010/C0010, the text is replaced by the following:

Identify whether an undertaking used simplifications for the calculation of counter party default risk. The options in the following closed list shall be used:

- 3 Simplification pooling arrangements, for the purposes of Article 109
- 4 Simplification grouping single name exposures, for the purposes of Article 110
- 5 Simplification of the LGD for reinsurance arrangements, for the purposes of Article 112a
- 6 Simplification for type 1 exposures, for the purposes of Article 112b
- 7 Simplification for the risk-mitigating effect of reinsurance arrangements, for the purposes of Article 111
- 9 Simplifications not used

Options 3 to 7 may be used simultaneously.

Where R0010/C0010 = 4 or 6, for Type 1 exposures, only R0100/C0080 shall be filed in for R0100;

(b) in the third column ('Instructions') of row R0100/C0080, the text is replaced by the following:

This is the gross capital charge (before the application of the adjustment for the loss–absorbency capacity of technical provisions) for counterparty default risk arising from all Type 1 exposures.

Where R0010/C0010 = 4 or 6, this item shall represent the Gross solvency capital requirement using simplifications.;

(7) In section S.26.03 – Solvency Capital Requirement – Life underwriting risk, row R0040/C0010 is replaced by the following:

R0040/C0010	Simplifications used — life lapse risk	Identify whether an undertaking within the scope of group for the SCR calculation used simplifications for the calculation of lapse risk. The following options
		shall be used:

**Status:** This is the original version as it was originally adopted in the EU.This legislation may since have been updated - see the latest available (revised) version

	1 –	Simplification
		for the purposes
		of Article 95
	2 –	Simplification
		for the purposes
		of Article 95a
	9 –	Simplifications
		not used
	Options	1 and 2 may be
	used sim	ultaneously.
	Where R	.0040/C0010
	= 1, only	C0060 and
		nall be filled in
	for R040	00 to R0420.
	1	

- (8) in section S.26.04 Solvency Capital Requirement Health underwriting risk, the table is amended as follows:
  - (a) in the third column ('Instructions') of row R0050/C0010, the text is replaced by the following:

Identify whether an undertaking within the scope of group supervision used simplifications for the calculation of lapse risk. The following options shall be used:

- 1 Simplification for the purposes of Article 102
- 2 Simplification for the purposes of Article 102a
- 9 Simplifications not used

Options 1 and 2 may be used simultaneously.

Where R0050/C0010 = 1, only C0060 and C0080 shall be filled in for R0400 to R0420.;

(b) the following is inserted after row R0050/C0010:

R0051/C0010	Simplifications – NSLT lapse risk	Identify whether an undertaking within the scope of group for the SCR calculation used simplifications for the calculation of lapse risk. The following options shall be used:  1 — Simplification for the purposes of Article 96a  9 — Simplifications not used
-------------	--------------------------------------	--

(9) in section S.26.05 – Solvency Capital Requirement – Non-Life underwriting risk, the following row is inserted after row R0010/C0010 of the table:

R0011/C0010	Simplifications used – non-life lapse risk	undertak scope of SCR cal simplific calculati underwr	whether an king within the group for the culation used cations for the con of non-life iting risk. The groptions shall be  Simplification for the purposes of Article 90a Simplification
		9 –	not used

(10)in section S.26.07 - Solvency Capital Requirement - Simplifications, the following rows are added to the table:

Market risk — Market risk concentrations			
R0300/C0300	Debt portfolio share	The share of the debt portfolio for which a simplified SCR calculation has been made.  To be reported only in case undertaking is exempted from reporting template S.06.02	
NAT CAT simplifications			
R0400/C0320	Windstorm – risk weight chosen in the NAT CAT simplifications	Include risk weight used in windstorm simplifications	
R0400/C0330	Windstorm – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to windstorm simplifications	
R0410/C0320	Hail – risk weight chosen in the NAT CAT simplifications	Include risk weight chosen in hail simplifications	
R0410/C0330	Hail – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to hail simplifications	
R0420/C0320	Earthquake – risk weight chosen in the NAT CAT simplifications	Include risk weight chosen in earthquake simplifications	

R0420/C0330	Earthquake – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to earthquake simplifications
R0430/C0320	Flood – risk weight chosen in the NAT CAT simplifications	Include risk weight chosen in flood simplifications
R0430/C0330	Flood – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to flood simplifications
R0440/C0320	Subsidence – risk weight chosen in the NAT CAT simplifications	Include risk weight chosen in the subsidence simplifications
R0440/C0330	Subsidence – sum of exposures subject to the NAT CAT simplifications	Include sum of exposures subject to subsidence simplifications

- in section S.27.01 Solvency Capital Requirement Non-life and health catastrophe risk, the table is amended as follows:
  - (a) the following rows are inserted after row Z0030:

R0001/C001	Simplifications used – fire risk	Identify whether an undertaking within the scope of group for the SCR calculation used simplifications for the calculation of fire risk. The following options shall be used:  1 — Simplifications for the purposes of Article 90c  9 — Simplifications not used  Where R0001/C0001 = 1, only C0880 shall be filled in for R2600.
R0002/C001	Simplifications used – natural catastrophe risk	Identify whether an undertaking within the scope of group for the SCR calculation used simplifications for the calculation of natural catastrophe risk. The following options shall be used:  1 — Simplification for the purposes of

	2 –	Article 90b windstorm Simplification for the purposes of
	3 –	Article 90b earthquake Simplification for the purposes of
	4 –	Article 90b flood Simplification for the
	5 –	purposes of Article 90b hail Simplification for the purposes of
	9 –	Article 90b subsidience Simplifications not used 1 to 5 may be
		ultaneously.

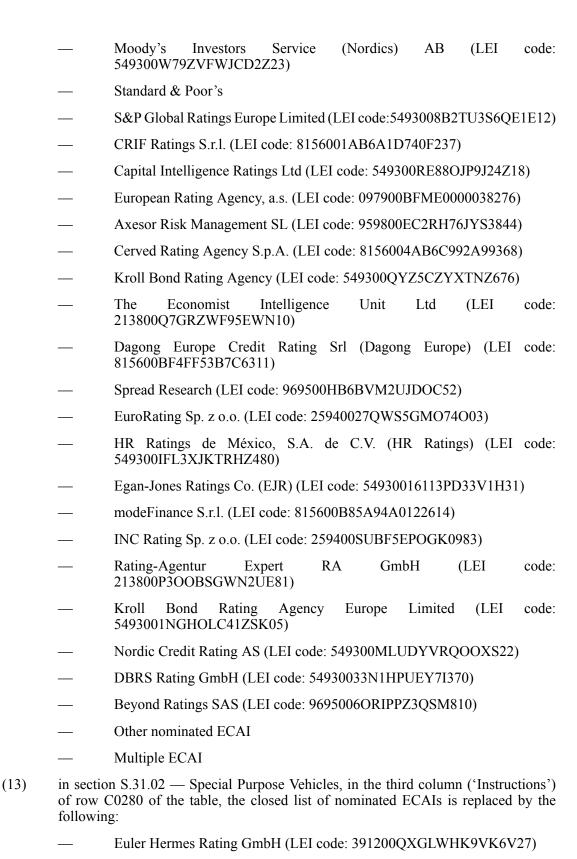

(b) the following row is inserted before row C0760/R2400:

Number of vessels		
C0781/R2421	Number of vessels below the threshold of EUR 250k	This is the number of vessels below the threshold of EUR 250k

- (c) in the first column of row C1170/R3300–R3600, C1190/R3300–R3600,C1210/R3300–R3600,C1230/R3300–R3600, C1250/R3300–R3600, 'C1210/R3300–R3600' is deleted;
- (d) in the first column of row C1180/R3300–R3600, C1200/R3300–R3600, C1220/R3300–R3600, C1240/R3300–R3600, C1260/R3300–R3600, 'C1220/R3300–R3600' is deleted;
- (e) in the first column of row C1320/R3700–R4010, C1330/R3700–R4010, C1340/R3700–R4010, C1350/R3700–R4010, C1360/R3700–R4010, 'C1340/R3700-R4010' is deleted;
- in section S.31.01 Share of reinsurers (including Finite Reinsurance and SPV's) in the third column ('Instructions') of row C0220 of the table, the closed list of nominated ECAIs is replaced by the following:
  - Euler Hermes Rating GmbH (LEI code: 391200QXGLWHK9VK6V27)
  - Japan Credit Rating Agency Ltd (LEI code: 35380002378CEGMRVW86)
