

Commission Implementing Regulation (EU) 2020/1398 of 5 October 2020 concerning the renewal of the authorisation of *Saccharomyces cerevisiae* CBS 493.94 as a feed additive for horses and repealing Regulation (EC) No 886/2009 (holder of authorisation All-Technology Ireland Ltd) (Text with EEA relevance)

COMMISSION IMPLEMENTING REGULATION (EU) 2020/1398

of 5 October 2020

concerning the renewal of the authorisation of *Saccharomyces cerevisiae* CBS 493.94 as a feed additive for horses and repealing Regulation (EC) No 886/2009 (holder of authorisation All-Technology Ireland Ltd)

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1831/2003 of the European Parliament and of the Council of 22 September 2003 on additives for use in animal nutrition⁽¹⁾, and in particular Article 9(2) thereof,

Whereas:

- (1) Regulation (EC) No 1831/2003 provides for the authorisation of additives for use in animal nutrition and for the grounds and procedures for granting and renewing such authorisation.
- (2) The preparation of *Saccharomyces cerevisiae* CBS 493.94 was authorised for 10 years as a feed additive for horses by Commission Regulation (EC) No 886/2009⁽²⁾.
- (3) In accordance with Article 14(1) of Regulation (EC) No 1831/2003, an application was submitted by the holder of that authorisation for the renewal of the authorisation of *Saccharomyces cerevisiae* CBS 493.94 as a feed additive for horses requesting that additive to be classified in the additive category 'zootechnical additives'. That application was accompanied by the particulars and documents required under Article 14(2) of Regulation (EC) No 1831/2003.
- (4) The European Food Safety Authority ('the Authority') concluded in its opinion of 12 November 2019⁽³⁾ that, *Saccharomyces cerevisiae* CBS 493.94 does not have an adverse effect under the authorised conditions of use for the animal health, consumer health or the environment. It also concluded that the additive should be considered as a moderate eye irritant and a potential skin and respiratory sensitiser. Therefore, the Commission considers that appropriate protective measures should be taken to prevent adverse effects on human health, in particular as regards the users of the additive. Since the Authority was unable to conclude on the new proposed minimum dose, the previous doses should be maintained.

Status: Point in time view as at 31/12/2020.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2020/1398. (See end of Document for details)

- (5) The assessment of *Saccharomyces cerevisiae* CBS 493.94 shows that the conditions for authorisation, as provided for in Article 5 of Regulation (EC) No 1831/2003, are satisfied. Accordingly, the authorisation of that additive should be renewed as specified in the Annex to this Regulation.
- (6) As a consequence of the renewal of the authorisation of *Saccharomyces cerevisiae* CBS 493.94 as a feed additive under the conditions laid down in the Annex to this Regulation, Regulation (EC) No 886/2009 should be repealed.
- (7) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1

The authorisation of the additive specified in the Annex, belonging to the additive category ‘zootechnical additives’ and to the functional group ‘digestibility enhancers’, is renewed subject to the conditions laid down in that Annex.

Article 2

Regulation (EC) No 886/2009 is repealed.

Article 3

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 5 October 2020.

For the Commission

The President

Ursula VON DER LEYEN

Status: Point in time view as at 31/12/2020.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2020/1398. (See end of Document for details)

ANNEX

Identification number of the additive	Name of the holder of authorisation	Additive	Composition chemical or formula, description of analytical method	Species or category of animal	Maximum age	Minimum content	Maximum content	Other provisions	End of period of authorisation
						CFU/kg of complete feedingstuff with a moisture content of 12 %			
Category of zootechnical additives. Functional group: digestibility enhancer.									
4a1704	All-Technology Ireland Ltd.	Saccharomyces cerevisiae CBS 493.94	Additive composition Preparation of <i>Saccharomyces cerevisiae</i> CBS 493.94 containing a minimum of:	Horses		1,6 × 10 ⁹		1.	26.10.2030 In the directions for use of the additive and premixture, the storage conditions and stability to heat treatment shall be indicated.
			Characterisation of active substance Viable cells of <i>Saccharomyces cerevisiae</i> CBS 493.94						
			Analytical method^a Enumeration: pour plate method using chloramphenicol
