- (2) The Australia Group (AG) is an informal forum of countries which, through the harmonisation of export controls, seeks to ensure that exports do not contribute to the development of chemical or biological weapons. Further information is available at: <http://www.australiagroup.net/>
- (3) The Missile Technology Control Regime (MTCR) is an informal political understanding among states that seek to limit the proliferation of missiles, complete rocket systems, unmanned air vehicles, and related technology. Further information is available at: <http://mtcr.info/>
- (4) The Nuclear Suppliers Group (NSG) is a group of nuclear supplier countries that seeks to contribute to the non-proliferation of nuclear weapons through the implementation of two sets of Guidelines for nuclear exports and nuclear-related exports. Further information is available at: <http://www.nuclearsuppliersgroup.org/>
- (5) The Wassenaar Arrangement (WA) has been established in order to contribute to regional and international security and stability, by promoting transparency and greater responsibility in transfers of conventional arms and dual-use goods and technologies, thus preventing destabilising accumulations. Further information is available at: <https://www.wassenaar.org/>
- (6) The Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on their Destruction (the Chemical Weapons Convention or CWC) aims to eliminate an entire category of weapons of mass destruction by prohibiting the development, production, acquisition, stockpiling, retention, transfer or use of chemical weapons by States Parties.
