

ANNEXES

ANNEX I

FIELDS OF RESEARCH CONCERNING NUCLEAR ENERGY REFERRED TO IN ARTICLE 4 OF THIS TREATY

IV. Processing of radioactive material

1. Methods of extracting plutonium and uranium 233 from irradiated fuels, and possible recovery of uranium or thorium.
2. Chemistry and metallurgy of plutonium.
3. Methods of extracting and chemistry of other transuranic elements.
4. Methods of extracting and chemistry of useful radioisotopes:
 - (a) fission products;
 - (b) radioisotopes obtained by irradiation.
5. Concentration and storage of useless radioactive waste.
