

1995 No. 33

**AGRICULTURE****PESTICIDES****Pesticides (Maximum Residue Levels in Crops, Food and Feeding Stuffs) (EEC Limits) Regulations (Northern Ireland) 1995***Made* . . . . . 13th February 1995*Coming into operation* . . . . . 24th April 1995

The Department of Agriculture, being a Department designated(a) for the purposes of section 2(2) of the European Communities Act 1972(b) in relation to the common agricultural policy of the European Community, in exercise of the powers conferred on it by the said section 2(2) and of every other power enabling it in that behalf, hereby makes the following Regulations:

*Citation and commencement*

1. These Regulations may be cited as the Pesticides (Maximum Residue Levels in Crops, Food and Feeding Stuffs) (EEC Limits) Regulations (Northern Ireland) 1995 and shall come into operation on 24th April 1995.

*Interpretation*

## 2.—(1) In these Regulations—

“authorised officer” means an officer of any Northern Ireland Department authorised by it to carry out functions under these Regulations;

“pesticide” means any pesticide specified in column 1 of Schedule 1;

“premises” includes any land, vehicle, vessel, aircraft or hovercraft;

“product” means any crop, food or feeding stuff specified in Schedule 2;  
and

“putting into circulation”, in relation to any product, means any handing over, whether or not for a consideration, of that product—

(a) in the case of fruit and vegetables, after they have been harvested,  
and

---

(a) S.I. 1972/1811

(b) 1972 c. 68; section 2 is subject to Schedule 2 to that Act and is to be read with S.I. 1984/703 (N.I. 3) and S.R. 1984 No. 253

(b) in any other case, at any time.

(2) Any reference in a Schedule to any product, figure or pesticide includes any qualifying words relating to that product, figure or pesticide in that Schedule.

(3) The Interpretation Act (Northern Ireland) 1954(b) shall apply to these Regulations as it applies to a Measure of the Northern Ireland Assembly.

#### *Meaning of pesticide residue*

3. Any reference in these Regulations to a pesticide residue contained in any product after the product has—

(a) had a pesticide applied to it; or

(b) been grown on land to which a pesticide has been applied, shall be construed as a reference to the substance specified in column 2 of Schedule 1 opposite the reference to that pesticide.

#### *Maximum residue levels*

4. Where any product has—

(a) had a pesticide applied to it; or

(b) been grown on land to which a pesticide has been applied, a person shall not put that product into circulation if it contains a level of pesticide residue greater than the number of milligrammes of that residue per kilogramme of the product (if any) specified in Schedule 2 under the name of that pesticide opposite the name of that product.

#### *Seizure or disposal of products*

5.—(1) This regulation applies to any product the putting into circulation of which is prohibited by regulation 4.

(2) Any Northern Ireland Department shall have the power to—

(a) seize or dispose of any consignment containing a product to which this regulation applies, or any part of it, or to direct that some other person shall dispose of that consignment; or

(b) direct some other person to take such remedial action in relation to that consignment as appears to that Department to be necessary.

#### *Powers of an Authorised Officer*

6.—(1) An authorised officer may, at any reasonable time and on production if so required of his authority, enter any premises if he has reasonable grounds to believe that it is necessary for him to do so for the purposes of these Regulations.

(2) Where an authorised officer has entered any premises in accordance with paragraph (1) he may, for the purposes of these Regulations—

---

(a) This definition is derived, in its application to fruit and vegetables, from Article 2(2) of Council Directive 76/895/EEC (O.J. No. L340, 9.12.76, p. 26) and, in its application to other products, from Article 2(2) of Council Directive 86/362/EEC (O.J. No. L221, 7.8.86, p. 37) and Article 2(2) of Council Directive 86/363/EEC (O.J. No. L221, 7.8.86, p. 43)

(b) 1954 c. 33 (N.I.)

- (a) open any container;
- (b) carry out searches, inspections, measurements and tests;
- (c) take samples;
- (d) require the production of documents, books and records;
- (e) photograph or copy anything whose production he has the power to require under sub-paragraph (d).

#### *Sampling and analysis*

7. In determining whether the level of pesticide residue contained in any product exceeds the limit permitted by regulation 4 for it to be put into circulation—

- (a) only so much of that product shall, so far as is practicable, be taken into account as is specified in column 3 of Schedule 3 opposite the name of that product in column 2, and
- (b) the procedure laid down in Part 5 of the Codex Recommendations Concerning Pesticide Residues (a) shall so far as is practicable be followed, and
- (c) in the case of any product specified in paragraphs 3, 4 or 5 of Schedule 2 which has been dried, that Schedule shall have effect as if for the number of milligrammes of each pesticide residue specified opposite the name of that product there were substituted that number of milligrammes divided by the fraction of 1 kilogramme to which 1 kilogramme of the product is reduced by the drying process.

#### *Offences and penalties*

8.—(1) A person who, without reasonable excuse, contravenes, or causes or permits any other person to contravene regulation 4 shall be guilty of an offence, and shall be liable—

- (a) on summary conviction, to a fine not exceeding £2,000; and
- (b) on conviction on indictment, to a fine.

(2) A person who, without reasonable excuse fails to comply with any direction given under regulation 5(2), shall be guilty of an offence and liable on summary conviction, to a fine not exceeding £2,000.

(3) Any person who intentionally obstructs an authorised officer in the performance of his functions under these Regulations is guilty of an offence and liable on summary conviction to a fine not exceeding £2,000.

(4) In any proceedings for an offence under paragraph (1) it is a defence for the person charged to prove that when the product to which the proceedings relate was put into circulation—

- (a) it was so put with the intention of its being exported to a country outside the European Community and the level of pesticide residue in

(a) Food and Agriculture Organisation of the United Nations and World Health Organisation joint Food Standards Programme Codex Alimentarius Commission, document CAC/PR5-1984. Part 5 is entitled "Recommended Method of Sampling for the Determination of Pesticide Residues"

that product was caused by the application thereto of a treatment which was—

- (i) required by the country of destination in order to prevent the introduction of harmful organisms into its territory, or
  - (ii) necessary to protect the product from harmful organisms during transport to the country of destination and storage there, or
- (b) it was so put with the intention that—
- (i) it be used in the manufacture of things other than foodstuffs and animal feed, or
  - (ii) it be used for sowing or planting.

Sealed with the Official Seal of the Department of Agriculture for Northern Ireland on 13th February 1995.

(L.S.)

*I. C. Henderson*

Assistant Secretary

Column 1 <i>Pesticide</i>	Column 2 <i>Residues</i>
Acephate	acephate
Aldrin and dieldrin	singly or combined, expressed as dieldrin (HEOD)
Aminotriazole	aminotriazole
Atrazine	atrazine
Binapacryl	binapacryl
Bromophos-ethyl	bromophos-ethyl
Camphechlor (Toxaphene)	camphechlor (toxaphene)
Captafol	captafol
Carbaryl	carbaryl
Carbendazim, Benomyl and Thiophanate-methyl	carbendazim, benomyl and thiophanate-methyl (expressed as carbendazim)
Carbon disulphide	carbon disulphide
Carbon Tetrachloride	carbon tetrachloride
Cartap	cartap
Chlordane	(1) for products of animal origin: sum of <i>cis</i> - and <i>trans</i> -isomers and oxychlordane, expressed as chlordane; (2) for cereals, fruit and vegetables: sum of <i>cis</i> - and <i>trans</i> -isomers, expressed as chlordane
Chlorothalonil	chlorothalonil
Chlorpyrifos	chlorpyrifos
Chlorpyrifos-methyl	chlorpyrifos-methyl
Cypermethrin	cypermethrin (sum of isomers)
DDT	sum of pp' — DDT, op' — DDT, pp' — DDE and pp' — TDE (DDD) expressed as DDT
Deltamethrin	deltamethrin
Diazinon	diazinon
1,2-Dibromoethane	1,2-dibromoethane
Dichlorvos	dichlorvos
Dichlorprop	dichlorprop (including dichlorprop P)
Dimethoate	dimethoate
Dinoseb	dinoseb
Dioxathion	dioxathion
Endosulfan	sum of alpha- and beta- isomers and of endosulfan sulphate, expressed as endosulfan
Endrin	endrin
Ethion	ethion
Fenchlorphos	fenchlorphos (sum of fenchlorphos and fenchlorphos oxon expressed as fenchlorphos)
Fenvalerate	fenvalerate (sum of isomers)
Glyphosate	glyphosate

Column 1 <i>Pesticide</i>	Column 2 <i>Residues</i>
Heptachlor	sum of heptachlor and heptachlor epoxide, expressed as heptachlor
Hexachlorobenzene (HCB)	hexachlorobenzene
Hexachloro-cyclohexane (HCH)	hexachlorocyclohexane (HCH) alpha, beta and gamma isomers individually or summed as in Schedule 2
Hydrogen cyanide	cyanides expressed as hydrogen cyanide
Hydrogen phosphide	phosphides expressed as hydrogen phosphide
Imazalil	imazalil
Inorganic bromide	determined and expressed as total bromine from all sources
Iprodione	iprodione
Malathion	sum of malathion and malaoxon, expressed as malathion
Maleic-hydrazide	maleic hydrazide
Maneb, Mancozeb,	determined and expressed as
Metiram,	carbon disulphide ( $CS_2$ )
Propineb and Zineb	
Methamidophos	methamidophos
Methyl bromide (bromomethane)	methyl bromide (bromomethane)
Omethoate	omethoate (from use of formothion, dimethoate and omethoate)
Paraquat	paraquat
Permethrin	permethrin (and sum of isomers)
Phos�amidon	sum of phos�amidon (E- and Z- isomers) and N-desethylphos�amidon (E- and Z- isomers) expressed as phos�amidon
Procymidone	procymidone
Pyrethrins	sum of pyrethrins I and II, cinerins I and II, jasmolins I and II
TEPP	TEPP
Trichlorfon	trichlorfon
2, 4, 5—T	2, 4, 5—T
Vinclozolin	sum of vinclozolin and all metabolites containing 3, 5-dichloroaniline moiety, expressed as vinclozolin

**UNITS:**

Maximum residue levels (MRLs) are expressed in milligrammes of residue per kilogramme of food.

**KEY:**

\*Level at or about the limit of determination.

**FOOTNOTES:**

1. Paddy or rough rice, husked rice and semi-milled or wholly milled rice.
2. Other cereals do not include rice.
3. Levels are measured on fat, except in the case of foods with a fat content of 10% or less by weight. In these cases the residue is related to the total weight of the boned foodstuff and the MRL is one tenth of the value given in the table, but must be no less than 0.01mg/kg.
4. These levels are for fresh raw cow's milk and fresh whole cream cow's milk expressed on the whole milk.
5. For preserved, concentrated or sweetened cow's milk; for raw milk and whole cream milk of another animal origin; and for butter, cheese or curd whether made from cow's milk or other milk or a combination, the following levels apply:
  - if the fat content is less than 2% by weight, the MRL is taken as half that set for raw milk and whole cream milk;
  - if the fat content is 2% or more by weight, the MRL is expressed in mg/kg of fat and is set at 25 times that set for raw milk and whole cream milk.
6. Birds' eggs in shell (other than eggs for hatching) and whole egg products and egg yolk products (whether fresh, dried or otherwise prepared).
7. Sheepmeat only.
8. Poultry meat only.
9. All meat except sheepmeat.
10. Other meat products.
11. All meat except poultry meat.
12. Pig kidney.
13. Cattle, goat and sheep kidney.
14. Procymidone: 1 mg/kg applies to whole seed; 0.05 mg/kg applies to seed without shell.

*Note:* The word "fresh" is taken to extend to products which have been chilled.

Column 1 <i>Group of products</i>	Column 2 <i>Products included in the groups</i>	Column 3 <i>Part of product to which maximum residue levels apply</i>
1. Fruit, fresh, dried or uncooked, preserved by freezing, not containing added sugar: nuts		
(i) Citrus Fruit	Grapefruit Lemons Limes Mandarins (including clementines and similar hybrids) Oranges Pomelos Others	Whole product
(ii) Tree Nuts (shelled or unshelled)	Almonds Brazil nuts Cashew nuts Chestnuts Coconuts Hazlenuts Macadamia nuts Pecans Pine nuts Pistachios Walnuts Others	Whole product after removal of shell
(iii) Pome Fruit	Apples Pears Quinces Others	Whole product after removal of stems
(iv) Stone Fruit	Apricots Cherries Peaches (including nectarines and similar hybrids) Plums Others	Whole product after removal of stems
(v) Berries and Small Fruit	(a) <i>Table and wine grapes</i> Table grapes Wine grapes (b) <i>Strawberries</i> (other than wild)	

*Agriculture*  
SCHEDULE 3 — *continued*

(vi) Legume Vegetables (fresh)	Beans with pods Beans without pods Peas with pods Peas without pods Others	} Whole product after removal of decayed outer leaves, root and soil (if any)
(vii) Stem Vegetables	Asparagus Cardoons Celery Fennel Globe artichokes Leeks Rhubarb Others	} Whole product after removal of decayed tissue and soil (if any); leeks and fennel: whole product after removal of roots and soil (if any)
(viii) Fungi	Mushrooms (other than wild) Wild mushrooms	} Whole product after removal of soil or growing medium
3. Pulses	Beans Lentils Peas Others	} Whole product

Column 1 <i>Group of products</i>	Column 2 <i>Products included in the groups</i>	Column 3 <i>Part of product to which maximum residue levels apply</i>
4. Oilseeds	Linseed Peanuts Poppy seed Rape seed Sesame seed Sunflower seed* Soya bean Others	Whole seed or kernel after removal of shell and husk, when possible *Whole seed including shell, when present, and whole seed without shell, when shell is absent
5. Potatoes	Early potatoes Ware potatoes	Whole product after removal of soil (if any) (removal of soil by rinsing in running water or by gentle brushing of the dry product)
6. Tea (dried leaves and stalks, fermented or otherwise, <i>Camellia sinensis</i> )		Whole product
7. Hops (dried), including hop pellets and unconcentrated powder		Whole product
8. Cereal grains	Wheat Rye Barley Oats Triticale Maize Rice Other cereals	Whole commodity without husk
9. Products of animal origin	Meat, fat and preparations of meat Milk Eggs	Whole commodity (For fat soluble pesticides a portion of carcase fat is analysed and MRLs apply to carcase fat) Whole commodity Whole egg whites and yolks combined after removal of shells

*(This note is not part of the Regulations.)*

These Regulations specify new maximum levels of pesticide residues which may be left in crops, food and feeding stuffs in accordance with the Council Directive 90/642/EEC (O.J. No. L350, 14.12.90, p. 71) as amended by Council Directive 93/57/EEC (O.J. No. L211, 23.8.93, p. 1) and Council Directive 93/58/EEC (O.J. No. L211, 23.8.93, p. 6).

Council Directive 90/642/EEC as so amended prescribes maximum levels of pesticide residues in and on certain products of plant origin including fruit and vegetables. Council Directive 93/57/EEC amends and extends Council Directive 86/362/EEC and 86/363/EEC on the fixing of maximum levels for pesticide residues in and on cereals, and in and on foodstuffs of animal origin (namely meat and milk and products derived therefrom) (O.J. No. L221, 7.8.86, pages 37 and 43 respectively).

Regulation 3 and Schedule 1 identify certain pesticide residues which will be left in a crop, food or feeding stuff following the application to it or to land on which it is grown of certain named pesticides.

Regulation 4 specifies the maximum limits for pesticide residues in the products which are subject to the Council Directives. It also prohibits the putting into circulation of those products where the limits specified in relation to them are exceeded.

Regulation 5 enables any Northern Ireland Department to seize or dispose of any crop, food or feeding stuff containing a residue level in excess of any maximum residue level specified in relation to it, or to require some other person to dispose of that crop, food or feeding stuff. It may also direct some other person to take such remedial action as appears to it to be necessary.

Regulation 6 provides further enforcement powers for officers appointed by any Northern Ireland Department.

Regulation 7(a) and Schedule 3 prescribe how much of the product in question has to be taken into account in determining whether a maximum residue level has been exceeded. This is in accordance with Council Directive 90/642/EEC as amended by Council Directive 93/58/EEC in relation to certain products of plant origin including fruit and vegetables.

In accordance with regulation 7(b) the level of residue in any product is to be determined inter alia by reference to Part 5 of the Codex Alimentarius Guide to Codex Recommendations Concerning Pesticide Residues.

Regulation 7(c) increases the maximum residue levels to take account of concentration when a product is dried.

Regulation 8 creates offences and specifies penalties. It also provides for defences in cases where the products concerned are being exported to countries outside the European Community or are being used in manufacturing or as seed for planting.

Copies of the Codex Guide and Recommendations are available for inspection at the Library of the Department of Agriculture for Northern Ireland, Dundonald House, Upper Newtownards Road, Belfast BT4 3SB.
