SCHEDULE 1

Regulation 3

Column 1	Column 2
Pesticide	Residues
Aldicarb	sum of aldicarb, its sulfoxide and its sulfone, expressed as aldicarb
Amitraz	amitraz plus all its metabolites containing 2, 4 dimethylaniline, expressed as amitraz
Bromopropylate	bromopropylate
Flucythrinate	sum of isomers
Methidathion	methidathion
Methomyl Thiodicarb	sum of methomyl and thiodicarb expressed as methomyl
Profenophos	profenophos

SCHEDULE 2

1 Paddy or rough rice, husked rice and semi-milled or wholly milled rice.

2 Other cereals do not include rice.

3 Levels are measured on fat, except in the case of foods with a fat content of 10% or less by weight. In these cases the residue is related to the total weight of the boned foodstuff and the MRL is one tenth of the value given in the table, but must be no less than 0.01 mg/kg.

4 These levels are for fresh raw cow's milk and fresh whole cream cow's milk expressed on the whole milk.

5 For preserved, concentrated or sweetened cow's milk; for raw milk and whole cream milk of another animal origin; and for butter, cheese or curd whether made from cow's milk or other milk or a combination, the following levels apply: — if the fat content is less than 2% by weight, the MRL is taken as half that set for raw milk and whole cream milk;

- if the fat content is 2% or more by weight, the MRL is expressed in mg/kg of fat and is set at 25 times that set for raw milk and whole cream milk.
- Birds' eggs in shell (other than eggs for hatching) and whole egg products and egg yolk products (whether fresh, dried or otherwise prepared). For eggs and egg products with a fat content higher than 10% the maximum level is expressed in 6 mg/kg fat. In this case the maximum level is 10 times higher than the maximum level for fresh eggs.
- 7 Poultrymeat only.
- With the exception of meat and other ovine, bovine and caprine products. 8
- 9 Footnotes 3, 5 and 6 do not apply in cases where the lower limit of analytical determination is indicated.
