

SCHEDULE 1

Additional authorised fuels

5. Black Diamond Gem ovoid briquettes, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, Humberside, which—

- (a) comprise anthracite duff (as to 20-30 per cent. of the total weight), petroleum coke (as to 40-45 per cent. of the total weight), bituminous coal (as to 12-22 per cent. of the total weight) and molasses and phosphoric acid as a binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll- pressing and heat treatment at about 300°C;
- (c) are pillow-shaped briquettes marked with two parallel indented lines running latitudinally around the briquette and have an average weight of 160 grammes; and
- (d) have a sulphur content not exceeding 1.5 per cent. of the total weight.
