

**Status:** This is the original version (as it was originally made). This item of legislation is currently only available in its original format.

## SCHEDULE 3

### LABELLING REQUIREMENTS

4. Information to the effect that the plant protection product may be used when bees or other non-target species are active, or when crops or weeds are in flower, or other such phrases to protect bees or other non-target species, may be given on the label if and only if the approval relates explicitly to use during the season for bees or other specified organisms and presents minimal risk to them.
