Licences not to be issued for vehicles unless appropriate certificates are in force

18. Where application is made for a licence under the Vehicle Excise and Registration Act 1994 for a vehicle to which regulation 17 applies, the licence shall not be granted unless on the first application after 10th July 2007 for a licence for that vehicle, there is produced evidence that there is or are one or more certificates in force for the vehicle under Article 31A of the Order or any corresponding enactment having effect in Great Britain from which it appears that the vehicle complies with the prescribed type approval requirements.

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations revoke and replace, with amendments, the Motor Vehicles (Type Approval) Regulations (Northern Ireland) 1985 as amended, and prescribe type approval requirements for certain classes of motor vehicle and motor vehicle parts manufactured on or after 1st August 1978 and first used on or after 2nd December 1985.

The Regulations introduce a new provision, in regulation 7(16), which provides that where a vehicle in another State in the European Economic Area satisfies the technical requirements for permanent registration in that State, the vehicle is deemed to comply with the prescribed requirements of these Regulations, subject to satisfactory documentation being provided.

A number of obsolete requirements in respect of exhaust emissions, seatbelts, brakes and noise and silencers have been omitted from Schedule 1.

The Regulations set out in Schedule 9 are revoked as a consequence of these Regulations.
