EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations amend the Social Security (Industrial Injuries) (Prescribed Diseases) Regulations (Northern Ireland) 1986 which prescribe diseases for which industrial injuries benefit is payable.

Regulation 2 amends prescribed disease A11 by adding sensorineural symptoms to the description of the disease and a proviso that both sets of symptoms are caused by vibration and by providing that the prescription shall not cover blanching of the skin or sensorineural symptoms prior to employment in a prescribed occupation. It also amends the description of the occupation involving hand-held chain saws.

Regulation 3 makes transitional provision so that the amendments relating to blanching do not apply to a period of assessment which relates to a claim made, or having effect, before the date these Regulations come into operation or to a renewed break-out of a condition for which a claim was made before these Regulations come into operation.

These Regulations make in relation to Northern Ireland only provision corresponding to provision contained in Regulations made by the Secretary of State for Work and Pensions in relation to Great Britain and accordingly, by virtue of section 149(3) of, and paragraph 7 of Schedule 5A to, the Social Security Administration (Northern Ireland) Act 1992 (c. 8), are not subject to the requirement of section 149(2A) of that Act for prior reference to the Industrial Injuries Advisory Council.
