

## SCHEDULE 1

### TABLES OF ACTION LEVELS AND EXPOSURE LIMIT VALUES

#### PART 2

#### DIRECT BIOPHYSICAL EFFECTS OF EXPOSURE

##### Exposure Limit Values – thermal effects

#### Notes

2. The ELV may be exceeded during an employee's shift where the employer ensures that—
  - (a) it is only exceeded temporarily;
  - (b) adequate information is provided to the employee on the possibility of sensory effects related to pulsed microwave radiation, including auditory sensations; and
  - (c) where any of those sensory effects are reported to the employer, the risk assessment is updated where necessary.
