

SCHEDULE 4

Restrictions on the landing in and movement within Northern Ireland of relevant material

PART C

Relevant material which may only be landed in or moved within Northern Ireland (as a protected zone) if special requirements are complied with

<i>Item</i>	<i>Description of relevant material</i>	<i>Requirements of landing</i>
1.	Plants, other than fruit and seeds, of <i>Abies</i> Mill., <i>Larix</i> Mill., <i>Picea</i> A. Dietr., <i>Pinus</i> L. and <i>Pseudotsuga</i> Carr., over 3m in height	The plants must be accompanied by an official statement that the place of production is free from <i>Dendroctonus micans</i> Kugelán
2.	Plants, other than fruit and seeds, of <i>Abies</i> Mill., <i>Larix</i> Mill., <i>Picea</i> A. Dietr. and <i>Pinus</i> L., over 3m in height	The plants must be accompanied by an official statement that the place of production is free from <i>Ips duplicatus</i> Sahlberg
3.	Plants, other than fruit and seeds, of <i>Abies</i> Mill., <i>Larix</i> Mill., <i>Picea</i> A. Dietr., <i>Pinus</i> L. and <i>Pseudotsuga</i> Carr., over 3m in height	The plants must be accompanied by an official statement that the place of production is free from <i>Ips typographus</i> Heer
4.	Plants, other than fruit and seeds, of <i>Abies</i> Mill., <i>Larix</i> Mill., <i>Picea</i> A. Dietr., and <i>Pinus</i> L., over 3m in height	The plants must be accompanied by an official statement that the place of production is free from <i>Ips amitinus</i> Eichhof
5.	Plants, other than fruit and seeds, of <i>Abies</i> Mill., <i>Larix</i> Mill., <i>Picea</i> A. Dietr., <i>Pinus</i> L. and <i>Pseudotsuga</i> Carr., over 3m in height	The plants must be accompanied by an official statement that the place of production is free from <i>Ips cembrae</i> Heer
6.	Plants, other than fruit and seeds, of <i>Abies</i> Mill., <i>Larix</i> Mill., <i>Picea</i> A. Dietr., <i>Pinus</i> L. and <i>Pseudotsuga</i> Carr., over 3m in height	The plants must be accompanied by an official statement that the place of production is free from <i>Ips sexdentatus</i> Börner
7.	Plants, other than seeds, of <i>Platanus</i> L., intended for planting, originating in the European Union or in Armenia, Switzerland or the USA	The plants must be accompanied by an official statement that they have been grown throughout their life: (a) in an area free from <i>Ceratocystis platani</i> (J.M. Walter) Engelbr. & T.C. Harr., established in accordance with ISPM No. 4; or (b) in a protected zone which is recognised as a protected zone for the plant pest mentioned in paragraph (a)
8.	Plants of <i>Larix</i> Mill., intended for planting, other than seeds	The plants must be accompanied by an official statement that they have been produced in nurseries and that the place

Status: This is the original version (as it was originally made).

Item	Description of relevant material	Requirements of landing
9.	Plants, other than fruit or seeds, of <i>Pinus</i> L., intended for planting	<p>of production is free from <i>Cephalcia lariciphila</i> (Klug.)</p> <p>The plants shall be accompanied by an official statement that:</p> <p>(a) they have been grown throughout their life in places of production in countries in which <i>Thaumetopoea pityocampa</i> Denis & Schiffermüller is not known to occur;</p> <p>They have been grown throughout their life in an area free from <i>Thaumetopoea pityocampa</i> Denis & Schiffermüller, established by the national plant protection organisation in accordance with ISPM No. 4;</p> <p>(c) they have been produced in nurseries which, along with their vicinity, have been found free from <i>Thaumetopoea pityocampa</i> Denis & Schiffermüller on the basis of official inspections and official surveys carried out at appropriate times; or</p> <p>(d) they have been grown throughout their life in a site with complete physical protection against the introduction of <i>Thaumetopoea pityocampa</i> Denis & Schiffermüller and have been inspected at appropriate times and found to be free from <i>Thaumetopoea pityocampa</i> Denis & Schiffermüller</p>
10.	Plants intended for planting, other than seeds of <i>Picea</i> A. Dietr.	<p>The plants must be accompanied by an official statement that they have been produced in nurseries and that the place of production is free from <i>Gilpinia hercyniae</i> (Hartig)</p>
11.	Plants of <i>Castanea</i> Mill., intended for planting	<p>The plants must be accompanied by an official statement that they have been grown throughout their life:</p> <p>(a) in a place of production in a country where <i>Cryphonectria parasitica</i> (Murrill) Barr is known not to occur;</p> <p>(b) in an area free from <i>Cryphonectria parasitica</i> (Murrill) Barr, established by the national plant protection organisation in accordance with ISPM No. 4; or</p>

<i>Item</i>	<i>Description of relevant material</i>	<i>Requirements of landing</i>
		(c) in a protected zone which is recognised as a protected zone for the plant pest mentioned in paragraphs (a) and (b)
12.	Tubers of <i>Solanum tuberosum</i> L., intended for planting	<p>The tubers must be accompanied by an official statement that they:</p> <p>(a) were grown in an area where Beet necrotic yellow vein virus (BNYVV) is known not to occur;</p> <p>(b) were grown on land, or in growing media consisting of soil that is known to be free from BNYVV, or officially tested by appropriate methods and found free from BNYVV; or</p> <p>(c) have been washed free from soil</p>
13.	Tubers of <i>Solanum tuberosum</i> L., other than those mentioned in item 12	The consignment or lot must not contain more than 1% by weight of soil, or the tubers are intended for processing at premises with officially approved waste disposal facilities which ensures that there is no risk of spreading BNYVV
14.	Plants, other than seeds, of <i>Prunus</i> L., intended for planting	<p>The plants shall be accompanied by an official statement that:</p> <p>(a) they have been grown throughout their life in places of production in countries in which <i>Xanthomonas arboricola</i> pv. <i>pruni</i> (Smith) Vauterin <i>et al.</i> is not known to occur;</p> <p>(b) they have been grown throughout their life in an area free from <i>Xanthomonas arboricola</i> pv. <i>pruni</i> (Smith) Vauterin <i>et al.</i>, established by the national plant protection organisation in accordance with ISPM No. 4;</p> <p>(c) they have been derived in direct line from mother plants which have shown no symptoms of <i>Xanthomonas arboricola</i> pv. <i>pruni</i> (Smith) Vauterin <i>et al.</i> during the last complete cycle of vegetation and no symptoms of that plant pest have been observed on the plants at the place of production since the beginning of the last complete cycle of vegetation; or</p>

Status: This is the original version (as it was originally made).

Item	Description of relevant material	Requirements of landing
15.	Plants of <i>Palmae</i> , intended for planting, having a diameter of the stem at the base of over 5 cm and belonging to the following genera: <i>Brahea</i> Mart., <i>Butia</i> Becc., <i>Chamaerops</i> L., <i>Jubaea</i> Kunth, <i>Livistona</i> R. Br., <i>Phoenix</i> L., <i>Sabal</i> Adans., <i>Syagrus</i> Mart., <i>Trachycarpus</i> H. Wendl., <i>Trithrinax</i> Mart. or <i>Washingtonia</i> Raf.	<p>(d) in the case of plants of <i>Prunus laurocerasus</i> L. or <i>Prunus lusitanica</i> L. for which there is evidence from their packing or from other means that they are intended for sale to final consumers not involved in professional plant production, no symptoms of <i>Xanthomonas arboricola</i> pv. <i>pruni</i> (Smith) Vauterin <i>et al.</i> have been observed on plants at the place of production since the beginning of the last complete growing season</p> <p>The plants shall be accompanied by an official statement that:</p> <p>(a) they have been grown throughout their life in places of production in countries where <i>Paysandia archon</i> (Burmeister) is known not to occur;</p> <p>(b) they have been grown throughout their life in an area free from <i>Paysandia archon</i> (Burmeister) established by the national plant protection organisation in accordance with ISPM No. 4; or</p> <p>(c) they have, during a period of at least two years prior to export or movement, been grown in a place of production:</p> <p>(i) which is registered and supervised by the national plant protection organisation in the country of origin;</p> <p>(ii) where the plants were placed in a site with complete physical protection against the introduction of <i>Paysandia archon</i> (Burmeister); and</p> <p>(iii) where, during three official inspections per year carried out at appropriate times, including immediately prior to movement from the place of production, no signs of <i>Paysandia archon</i> (Burmeister) have been observed</p>
16.	Plants of <i>Palmae</i> , intended for planting, having a diameter of the stem at the base of over 5 cm and belonging to the following taxa: <i>Areca catechu</i> L., <i>Arenga pinnata</i> (Wurmb) Merr., <i>Bismarckia</i> Hildebr. & H. Wendl., <i>Borassus flabellifer</i> L., <i>Brahea armata</i> S.	<p>The plants shall be accompanied by an official statement that:</p> <p>(a) they have been grown throughout their life in places of production in countries where <i>Rhynchophorus ferrugineus</i> (Olivier) is known not to occur;</p>

Item	Description of relevant material	Requirements of landing
	Watson, <i>Brahea edulis</i> H. Wendl., <i>Butia capitata</i> (Mart.) Becc., <i>Calamus merrillii</i> Becc., <i>Caryota maxima</i> Blume, <i>Caryota cumingii</i> Lodd. ex Mart., <i>Chamaerops humilis</i> L., <i>Cocos nucifera</i> L., <i>Copernicia</i> Mart., <i>Corypha utan</i> Lam., <i>Elaeis guineensis</i> Jacq., <i>Howea forsteriana</i> Becc., <i>Jubae chilensis</i> (Molina) Baill., <i>Livistona australis</i> C. Martius, <i>Livistona decora</i> (W. Bull) Dowe, <i>Livistona rotundifolia</i> (Lam.) Mart., <i>Metroxylon sagu</i> Rottb., <i>Phoenix canariensis</i> Chabaud, <i>Phoenix dactylifera</i> L., <i>Phoenix reclinata</i> Jacq., <i>Phoenix roebelenii</i> O'Brien, <i>Phoenix sylvestris</i> (L.) Roxb., <i>Phoenix theophrasti</i> Greuter, <i>Pritchardia</i> Seem. & H. Wendl., <i>Ravenea rivularis</i> Jum. & H. Perrier, <i>Roystonea regia</i> (Kunth) O.F. Cook, <i>Sabal palmetto</i> (Walter) Lodd. ex Schult. & Schult. F., <i>Syagrus roman-zoffiana</i> (Cham.) Glassman, <i>Trachycarpus fortunei</i> (Hook.) H. Wendl. or <i>Washingtonia</i> Raf.	(b) they have been grown throughout their life in an area free from <i>Rhynchophorus ferrugineus</i> (Olivier), established by the national plant protection organisation in accordance with ISPM No. 4; or (c) they have, during a period of at least two years prior to export or movement, been grown in a place of production: (i) which is registered and supervised by the national plant protection organisation in the country of origin; (ii) where the plants were placed in a site with complete physical protection against the introduction of <i>Rhynchophorus ferrugineus</i> (Olivier); and (iii) where, during three official inspections per year carried out at appropriate times, including immediately prior to movement from the place of production, no signs of <i>Rhynchophorus ferrugineus</i> (Olivier) have been observed
17.	Plants of herbaceous species intended for planting, other than: — -bulbs, — -corms, — -plants of the family <i>Gramineae</i> , — -rhizomes, — -seeds, or — -tubers	The plants shall be accompanied by an official statement that: (a) they originate in an area or areas known to be free from <i>Liriomyza huidobrensis</i> (Blanchard) and <i>Liriomyza trifolii</i> (Burgess); (b) no signs of <i>Liriomyza huidobrensis</i> (Blanchard) or <i>Liriomyza trifolii</i> (Burgess) have been observed at the place of production, on official inspections carried out at least monthly during the three months prior to harvesting; (c) immediately prior to marketing, the plants have been officially inspected and found free from <i>Liriomyza huidobrensis</i> (Blanchard) and <i>Liriomyza trifolii</i> (Burgess) and have been subjected to an appropriate treatment against <i>Liriomyza huidobrensis</i> (Blanchard) and <i>Liriomyza trifolii</i> (Burgess); or (d) they originate from plant material (explant) which is free from <i>Liriomyza</i>

Status: This is the original version (as it was originally made).

Item	Description of relevant material	Requirements of landing
		<i>huidobrensis</i> (Blanchard) and <i>Liriomyza trifolii</i> (Burgess), are grown in vitro in a sterile medium under sterile conditions that preclude the possibility of infestation with <i>Liriomyza huidobrensis</i> (Blanchard) or <i>Liriomyza trifolii</i> (Burgess) and are shipped in transparent containers under sterile conditions
18.	Plants of <i>Allium porum</i> L., <i>Apium</i> L., <i>Beta</i> L., other than those mentioned in (item 25 of the Annex) and those intended for animal fodder, <i>Brassica rapa</i> L., <i>Daucus</i> l., other than plants intended for planting	The consignment or lot must not contain more than 1% by weight of soil, or the plants are intended for processing at premises with officially approved waste disposal facilities which ensures that there is no risk of spreading BNYVV
19.	Plants intended for planting, other than seeds, of <i>Beta vulgaris</i> L.	<p>The plants must be accompanied by a statement that they:</p> <p>(a) have been officially individually tested and found free from BNYVV; or</p> <p>(b) have been grown from seeds complying with the requirements in items Annex IV Part B, (27.1) and (27.2) and grown on land, or in growing media, officially tested by appropriate methods and found free from BNYVV, and sampled, and the sample tested and found free from BNYVV</p> <p>The organisation or research body holding the material shall inform their official member State plant protection service of the material held</p>
20.	Uprooted cuttings of <i>Euphorbia pulcherrima</i> Willd., intended for planting	<p>The cuttings must be accompanied by an official statement that:</p> <p>(a) they originate in an area or areas known to be free from <i>Bemisia tabaci</i> Genn. (European populations);</p> <p>(b) no signs of <i>Bemisia tabaci</i> Genn. (European populations) have been observed on the cuttings or on the plants from which the cuttings are derived and which are held or produced at the place of production on official inspections carried out at least each three weeks during the whole production period of these plants at the place of production; or</p>

Item	Description of relevant material	Requirements of landing
21.	<p>Plants of <i>Euphorbia pulcherrima</i> Willd., intended for planting, other than:</p> <p>-seeds,</p> <p>Those for which there is evidence from their packing or their flower (or bract) development or from other means that they are intended for sale to final customers not involved in professional plant production, or</p> <p>-those specified in item 18</p>	<p>(c) in cases where <i>Bemisia tabaci</i> Genn. (European populations) has been found at the place of production the cuttings and the plants from which the cuttings are derived and which are held or produced in this place of production have undergone an appropriate treatment to ensure freedom from <i>Bemisia tabaci</i> Genn. (European populations) and subsequently this place of production shall have been found free from <i>Bemisia tabaci</i> Genn. (European populations) as a consequence of the implementation of appropriate procedures aimed at eradicating <i>Bemisia tabaci</i> Genn. (European populations), in both official inspections carried out weekly during the three weeks prior to the movement from this place of production and in monitoring procedures throughout this period. The last inspection of the above weekly inspections shall be carried out immediately prior to movement</p> <p>The plants must be accompanied by an official statement that:</p> <p>(a) they originate in an area or areas known to be free from <i>Bemisia tabaci</i> Genn. (European populations);</p> <p>(b) no signs of <i>Bemisia tabaci</i> Genn. (European populations) have been observed on plants at the place of production on official inspections carried out at least once each three weeks during the nine weeks prior to marketing; or</p> <p>(c) in cases where <i>Bemisia tabaci</i> Genn. (European populations) has been found at the place of production, the plants, held or produced in this place of production have undergone an appropriate treatment to ensure freedom from <i>Bemisia tabaci</i> Genn. (European populations) and subsequently this place of production shall have been found free from <i>Bemisia tabaci</i> Genn. (European populations) as a consequence of the implementation of appropriate procedures aimed at eradicating <i>Bemisia tabaci</i> Genn. (European populations), in both official inspections carried out weekly during the three weeks prior to the</p>

Status: This is the original version (as it was originally made).

Item	Description of relevant material	Requirements of landing
22.	Plants, other than seeds, tubers or corms, of <i>Begonia</i> L., intended for planting; or plants, other than seeds, of <i>Dipladenia</i> A.DC., <i>Ficus</i> L., <i>Hibiscus</i> L., <i>Mandevilla</i> Lindl. or <i>Nerium oleander</i> L., intended for planting	<p>movement from this place of production and in monitoring procedures throughout this period. The last inspection of the above weekly inspections shall be carried out immediately prior to movement; and</p> <p>(d) evidence is available that they have been produced from cuttings which:</p> <p>(i) originate in an area or areas known to be free from <i>Bemisia tabaci</i> Genn. (European populations);</p> <p>(ii) have been grown at a place of production where no signs of <i>Bemisia tabaci</i> Genn. (European populations) have been observed on official inspections carried out at least once each three weeks during the whole production period of these plants; or</p> <p>(iii) in cases where <i>Bemisia tabaci</i> Genn. (European populations) has been found at the place of production, have been grown on plants held or produced in this place of production having undergone an appropriate treatment to ensure freedom from <i>Bemisia tabaci</i> Genn. (European populations) and subsequently this place of production shall have been found free from <i>Bemisia tabaci</i> Genn. (European populations) as a consequence of the implementation of appropriate procedures aimed at eradicating <i>Bemisia tabaci</i> Genn. (European populations), in both official inspections carried out weekly during the three weeks prior to the movement from this place of production and on monitoring procedures throughout this period. The last inspection of the above weekly inspections shall be carried out immediately prior to movement</p> <p>The plants must be accompanied by an official statement that:</p> <p>(a) they originate in an area known to be free from <i>Bemisia tabaci</i> Genn. (European populations);</p> <p>(b) no signs of <i>Bemisia tabaci</i> Genn. (European populations) have been</p>

Item	Description of relevant material	Requirements of landing
23.	Plants of <i>Beta vulgaris</i> L., intended for industrial processing	<p>observed on plants at the place of production on official inspections carried out at least once each three weeks during the nine weeks prior to marketing; or</p> <p>(c) where <i>Bemisia tabaci</i> Genn. (European populations) has been found at the place of production, the plants held or produced at the place of production, have undergone an appropriate treatment to ensure freedom from <i>Bemisia tabaci</i> Genn. (European populations) and subsequently the place of production has been found free from <i>Bemisia tabaci</i> Genn. (European populations) as a consequence of the implementation of appropriate procedures aiming at eradicating <i>Bemisia tabaci</i> Genn. (European populations), both in official inspections carried out weekly during the three weeks prior to the movement from the place of production and in monitoring procedures throughout the said period; or</p> <p>(d) in the case of plants for which there is evidence from their packing or their flower development or from other means that they are intended for direct sale to final consumers not involved in professional plant production, they have been officially inspected and found free from <i>Bemisia tabaci</i> Genn. (European populations) immediately prior to their movement</p>
24.	Soil from beet and unsterilized waste from beet (<i>Beta vulgaris</i> L.)	<p>The plants must be accompanied by an official statement that:</p> <p>(a) they are transported in such a manner as to ensure that there is no risk of spreading BNYVV, and are intended to be delivered to a processing plant with officially approved waste disposal facilities, which ensures that there is no risk of spreading BNYVV; or</p> <p>(b) the plants have been grown in an area where BNYVV is known not to occur</p> <p>The soil or waste must be accompanied by an official statement that:</p> <p>(a) it has been treated to eliminate contamination with BNYVV; or</p>

Status: This is the original version (as it was originally made).

Item	Description of relevant material	Requirements of landing
25.	Seeds and fodder beet seed of the species <i>Beta vulgaris</i> L.	<p>(b) it is intended to be transported for disposal in an officially approved manner; or</p> <p>(c) it comes from <i>Beta vulgaris</i> plants grown in an area where BNYVV is known not to occur</p> <p>The seeds must be accompanied by an official statement that:</p> <p>(a) the seed of the categories “basic seed” and “certified seed” satisfies the conditions laid down in Directive 66/400/EEC; or</p> <p>(b) in the case of “seed not finally certified”, the seed:</p> <p>-satisfies the conditions laid down in Directive 66/400/EEC, and</p> <p>-is intended for processing that will satisfy the conditions laid down in Directive 66/400/EEC and delivered to a processing enterprise with officially approved controlled waste disposal, to prevent the spread of BNYVV;</p> <p>(c) the seed has been grown in an area where BNYVV is known not to occur</p>
26.	Vegetable seed of the species <i>Beta vulgaris</i> L.	<p>The seed must be accompanied by an official statement that:</p> <p>(a) the processed seed contains no more than 0.5% by weight of inert matter, in the case of pelleted seed this standard shall be met prior to pelleting; or</p> <p>(b) in the case of non-processed seed, the seed shall be officially packed in such a manner as to ensure that there is no risk of spread of BNYVV, and is intended for processing that will satisfy the conditions laid down in (a) and delivered to a processing enterprise with officially approved controlled waste disposal, to prevent the spread of BNYVV; or</p> <p>(c) the seed has been produced from a crop grown in an area where BNYVV is known not to occur</p>

<i>Item</i>	<i>Description of relevant material</i>	<i>Requirements of landing</i>
27.	Relevant material in or on used agricultural machinery	The machinery must be cleaned and free from soil and plant debris when brought in on places of production where beets are grown, or it shall come from an area where BNYVV is known not to occur
28.	Plants of <i>Castanea</i> Mill., other than plants in tissue culture, fruit or seeds	<p>The plants must be accompanied by an official statement that the plants have been grown throughout their life:</p> <p>(a) in a place of production in a country where <i>Dryocosmus kuriphilus</i> Yasumatsu is known not to occur;</p> <p>(b) in an area free from <i>Dryocosmus kuriphilus</i> Yasumatsu, established by the national plant protection organisation in accordance with ISPM No. 4; or</p> <p>(c) in a protected zone which is recognised as a protected zone for the plant pest mentioned in paragraphs (a) and (b)</p>
29.	Plants, other than fruit or seeds, of <i>Quercus</i> L., other than <i>Quercus suber</i> , intended for planting, whose girth at 1.2 m above the root collar is 8 cm or more	<p>The plants must be accompanied by an official statement that:</p> <p>(a) they have been grown throughout their life in places of production in countries in which <i>Thaumetopoea processionea</i> L. is not known to occur;</p> <p>(b) they have been grown throughout their life in a protected zone which is recognised as a protected zone for <i>Thaumetopoea processionea</i> L. or in an area free from <i>Thaumetopoea processionea</i> L., established by the national plant protection organisation in accordance with ISPM No. 4;</p> <p>(c) they have been produced in nurseries which, along with their vicinity, have been found free from <i>Thaumetopoea processionea</i> L. on the basis of official inspections carried out as close as practically possible to their movement and official surveys of the nurseries and their vicinity have been carried out at appropriate times since the beginning of the last complete cycle of vegetation to detect larvae and other symptoms of <i>Thaumetopoea processionea</i> L.; or</p>

Status: This is the original version (as it was originally made).

<i>Item</i>	<i>Description of relevant material</i>	<i>Requirements of landing</i>
		(d) they have been grown throughout their life in a site with complete physical protection against the introduction of <i>Thaumetopoea processionea</i> L. and have been inspected at appropriate times and found to be free from <i>Thaumetopoea processionea</i> L.
