

SCHEDULE 1

Temporary national measures

PART 3

Official controls on consignments from third countries

Completion of official controls

13. Following the completion of official controls on a Schedule 1 consignment, a plant health inspector must—

- (a) decide whether the controlled material in the consignment complies with the domestic import rules relating to that material and, where relevant, indicate the applicable customs procedure for the consignment;
- (b) finalise the plant health entry document for that consignment; and
- (c) where the finalised plant health entry document authorises the placing and handling of the consignment under a relevant customs procedure and the consignment was accompanied by a phytosanitary certificate, provide the responsible operator with an authenticated copy of the phytosanitary certificate or, if the consignment is to be split, with authenticated copies of the phytosanitary certificate for each part of the split consignment.
