

EXPLANATORY NOTE

(This Note is not part of the Order, but is intended to indicate its general purport.)

Under the Order in Council of 6th August, 1942, it is prohibited to manufacture, keep, convey or sell acetylene compressed to over nine pounds per square inch above atmospheric pressure, subject to an exception (amongst others) that acetylene at pressures of not over twenty-two pounds per square inch above atmospheric pressure may be manufactured and kept on premises, and under conditions, approved by the Minister of Home Affairs. This amendment provides that the apparatus used in the manufacture or keeping shall, whenever required be submitted to tests carried out on behalf of the Minister, and makes a further exception allowing, subject to the same conditions as to approval and tests, the use of acetylene in the production of organic compounds at pressures not over three hundred pounds per square inch above atmospheric pressure and not mixed with air or oxygen.
