

## [<sup>F1</sup>SCHEDULE 4B

### Requirements for preservation mixtures

#### Textual Amendments

- F1** Sch. 4B inserted (10.2.2012) by The Fodder Plant Seed (Scotland) Amendment Regulations 2012 (S.S.I. 2012/5), regs. 1, 10, **sch.**

## PART I

### Conditions for directly harvested preservation mixtures

1. The percentage of the constituents of the mixture that are species and, where relevant, subspecies, typical for the habitat type of the collection site is adequate for the purpose of recreating the habitat type of the collection site.
2. The germination rate of the constituent in paragraph 1 is sufficient for the purpose of recreating the habitat type of the collection site.
3. The maximum content of species which do not comply with paragraph 1 does not exceed 1% of the weight of a submitted sample.
4. The mixture does not contain *Avena fatua*, *Avena sterilis* or *Cuscuta spp.*.
5. The maximum content of *Rumex spp.*, other than *Rumex acetosella* and *Rumex maritimus*, does not exceed 0.05% of the weight of a submitted sample.]

**Status:**

Point in time view as at 10/02/2012.

**Changes to legislation:**

There are currently no known outstanding effects for the The Fodder Plant Seed (Scotland) Regulations 2005, PART I.
