The Private Water Supplies (Scotland) Regulations 2006

PART VII

TYPE A SUPPLIES: MONITORING

Check monitoring – interpretation

19. In this Part, “check monitoring” means monitoring a Type A supply for the purpose of obtaining representative information at regular intervals—

- (a) as to the organoleptic and microbiological quality of water; and
- (b) where relevant, as to the effectiveness of drinking water treatment (particularly of disinfection),

for the purpose of determining—

- (i) as regards the parameters listed in Tables A and B in Schedule 1, whether water supplied for human consumption purposes satisfies the provisions of Part IV or, if a departure has been authorised under Part V in relation to that supply, those provisions as read with the terms of that departure; and
- (ii) as regards indicator parameters listed in Table C in Schedule 1, whether water supplied for human consumption purposes meets the specifications for those parameters.
