The Tweed Regulation Order 2007

Citation and commencement

1. This Order may be cited as the Tweed Regulation Order 2007 and shall come into force on 15th February 2007.

Commencement Information

I1 Art. 1 in force at 15.2.2007, see [art. 1](#)

Interpretation

2.—(1) In this Order—

“fish pass” means any fish pass, ladder, fish way or lift or other device which facilitates the free passage, upstream or downstream, of salmon around, over or through any dam;

“monofilament netting” means any netting containing any mesh the sides of which consist of a single filament of synthetic material;

“off-take” includes a lade;

“operator” in relation to a dam or off-take means its owner or, where another person is in occupation or control of it, that person;

“the principal Order” means the Scotland Act 1998 (River Tweed) Order 2006.

(2) Unless the context otherwise requires, any reference in this Order to a river includes its tributary streams.

Commencement Information

I2 Art. 2 in force at 15.2.2007, see [art. 1](#)

Annual close time order

3.—(1) The annual close time for salmon fishing extends from 15th September until [^{F1}31st March] of the following year, both dates inclusive⁽¹⁾.

(2) Fishing for and taking salmon by rod and line (but only with the artificial fly) is permitted from 15th September until 30th November, and from [^{F2}1st February until 31st March], all dates inclusive.

[^{F3}(3) No person may retain any salmon caught by rod and line [^{F4}in inland waters] during the period from 1st February until 31st March, both dates inclusive.

(4) In paragraph (3) “retain” means failing to return a fish at once to the river or other water from which it came and with the least possible injury.]

⁽¹⁾ Articles 3 and 4 of this Order replace the provisions of article 76(2) of the principal Order.

Definition of methods of net fishing

7. For the purposes of article 22 of the principal Order—
- (a) fishing for or taking salmon by net and coble means the use of a sweep net, paid out from a boat and worked from the bank or shore or from waters adjacent to the bank or shore, whereby the salmon are surrounded by the net and drawn to the bank or shore, provided that—
 - (i) the net and any warps are not made or held stationary, nor allowed to remain stationary, nor allowed to drift with the current or tide but are both paid out and hauled in as quickly as practicable and kept in unchecked motion by and under the effectual command and control of the fisherman for the purpose of enclosing the salmon within the sweep of the net and drawing them to the bank or shore;
 - (ii) no stakes or dykes or other obstructive devices or other nets are used in association with the net;
 - (iii) the water is not disturbed by throwing of stones or other objects, or splashing or other activity in order to drive salmon into the area to be swept by the net;
 - (iv) the net shall not come within 50 metres of any other such net already being paid out or hauled, until the last mentioned net has been fully hauled in to the bank or shore; and
 - (v) the net is not designed or constructed for the purpose of catching fish by enmeshing them; and
 - (b) fishing for or taking salmon by bag net, fly net or other stake net means the use of a fish trap (including the use of a landing net to remove salmon from such a trap) consisting of one or more fish courts and associated inscales and wings, together with a leader net designed to lead the salmon into the trap, the whole of which is fixed or moored to the shore or seabed, provided that—
 - (i) no part of the bag net, fly net or other stake net, except mooring warps and anchors, shall extend seawards beyond 1300 metres from the mean low water mark; and
 - (ii) no part of the net or trap is designed or constructed for the purpose of catching fish by enmeshing them.

Commencement Information

I7 Art. 7 in force at 15.2.2007, see [art. 1](#)

Regulation of bag nets, fly nets or other stake nets

8. All bag nets, fly nets or other stake nets set or placed beyond the estuary limits of any river in the district shall be subject to the following provisions—

- (a) the nets used in the formation and construction of such fly nets or other stake nets and of the leaders of such bag nets shall be extended evenly so that the meshes of such nets shall be stretched to their full opening;
- (b) every fly net or other stake net shall be placed and constructed so that clear openings for the free passage of salmon can be made in the traps or chambers of the net;
- (c) in every fly net or other stake net there shall be made and kept free from obstruction during the weekly close time a clear opening of at least 90 cm in width from the bottom to the top of the traps or chambers of such nets, so as to allow the free passage of salmon during the whole period of the weekly close time;

- (d) every bag net shall be placed and constructed so that the netting of the leaders can be raised and kept out of the water; and it shall be so raised and kept out of the water during the whole period of the weekly close time;
- (e) the leader of any bag net, fly net or other stake net shall not exceed 300 m in length; and
- (f) the nets used in the formation and construction of bag nets, fly nets or other stake nets shall not comprise monofilament netting.

Commencement Information

I8 Art. 8 in force at 15.2.2007, see [art. 1](#)

Regulation of size of meshes

9.—(1) Subject to the provisions of this article it shall not be lawful for the purpose of fishing for salmon to shoot, draw or use in the district any net of which the meshes are less than 90 mm.

(2) Paragraph (1) does not apply to nets used solely for the purpose of landing fish taken by rod and line.

(3) For the purposes of this article mesh size shall be measured in accordance with [^{F5}Commission Regulation (EC) No 517/2008 laying down detailed rules for the implementation of Council Regulation (EC) No 850/98 as regards the determination of the mesh size and assessing the thickness of twine of fishing nets].
