The Town and Country Planning (General Permitted Development) (Scotland) Amendment Order 2016

Amendment of the Town and Country Planning (General Permitted Development) (Scotland) Order 1992

3.—(1) The Town and Country Planning (General Permitted Development) (Scotland) Order 1992(1) is amended in accordance with paragraph (2).

(2) For class 6H(2) of Part 1A (installation of domestic microgeneration equipment) of Schedule 1 (classes of permitted development) substitute—

“Class 6H

(1) The installation, alteration or replacement of an air source heat pump on a dwelling or within the curtilage of a dwelling.

(2) Development is not permitted by this class—

- (a) if it would result in the presence on the same building or within the curtilage of a building of more than one air source heat pump;
- (b) in the case of an installation, alteration or replacement of an air source heat pump on a dwelling if—

- (i) any part of the development would protrude more than 1 metre from the outer surface of an external wall, roof plane, roof ridge or chimney of the dwelling; or
- (ii) the air source heat pump would be within a conservation area, unless the air source heat pump would be—

- (aa) at ground floor level; and
- (bb) on the rear elevation;

(c) in the case of the installation, alteration or replacement of an air source heat pump within the curtilage of a building if—

- (i) any part of the development would be forward of a wall forming part of the principal elevation or side elevation where that elevation fronts a road; or
- (ii) any resulting structure would exceed 3 metres in height; or

(d) the air source heat pump would be within—

- (i) a World Heritage Site; or
- (ii) the curtilage of a listed building.

(3) Development is permitted by this class subject to the following conditions—

- (a) the air source heat pump must be used only for the purpose of providing domestic heating or hot water;

Status: This is the original version (as it was originally made). This item of legislation is currently only available in its original format.

- (b) where the air source heat pump is no longer needed for, or capable of, providing domestic heating or hot water it must be removed as soon as reasonably practicable;
 - (c) the air source heat pump must comply with MCS Planning Standards or equivalent standards.
- (4) In this class—
- “MCS Planning Standards” means the product and installation standards for air source heat pumps specified in the Microgeneration Certification Scheme MCS 020(3);
 - “principal elevation” is a reference to the elevation of the original dwelling which by virtue of its design or setting, or both, is the principal elevation;
 - “rear elevation” means the elevation of the original dwelling that is opposite its principal elevation; and
 - “side elevation” means the elevation of the original dwelling linking the principal elevation with the rear elevation.”.
