

SCHEDULE 8

RADIOACTIVE SUBSTANCES ACTIVITIES

PART 2

Amendments to common framework provisions

Authorisation conditions: manufacture and supply of high-activity sealed sources

24. SEPA must ensure that a permit for a radioactive substances activity involving the manufacture or supply of a high-activity sealed source includes such conditions as it considers appropriate to—

- (a) ensure that a source is identified by a unique number which, where practicable, must be engraved or stamped on the source;
- (b) ensure either that a source container is engraved or stamped with the source's unique number or, if the container is a reusable transport container, that the container, at least, bears information on the nature of the source;
- (c) ensure a source container and, where practicable, the source are marked and labelled with an appropriate sign to warn people of the radiation hazard; and
- (d) require the manufacturer of the source to provide a photograph of each manufactured source design type and a photograph of the typical source container.

Changes to legislation:

There are currently no known outstanding effects for the The Environmental Authorisations (Scotland) Regulations 2018, Paragraph 24.
