**2000 No.**

**The Energy from Waste Plants  
(Rateable Values) (England) Order 2000**

**Interpretation and application**

2.—(1) In this Order—

“declared net capacity”, in relation to generating plant, means the highest generation of electricity at the generator terminals which can be maintained indefinitely without causing damage to the plant, less so much of that generation as is consumed by the plant, expressed in megawatts to the nearest one hundredth part of a megawatt and calculated on the assumption that, in so far as they affect the generating plant—

- (i) the air temperature is 10 degrees Celsius, and
- (ii) the air pressure is 1013 millibars;

“generating plant”, in relation to a hereditament, means plant in or on the hereditament which is used or available for use for the purposes of generating electricity;

“list” means a local non-domestic rating list; and

“year” means a chargeable financial year.

(2) This Order applies for the purpose of the determination of rateable values for the purposes of lists compiled on 1st April 2000.
