existing pipes or other conduits for the collection, passage or distribution of water and underground works belonging to them to be marked on a map (drawn on a scale of not less than six inches to one mile), and shall, from time to time within six months after the making of any alterations or additions, cause the said map to be so corrected as to show the course and situation of all such pipes and conduits and underground works for the time being belonging to them, and the map or a copy thereof bearing the date of its preparation and of the last occasion on which it was corrected shall be kept at the office of the undertakers.

In this subsection the expression “pipes” does not include service pipes.

- (2) The said map shall at all reasonable hours be open to inspection by any person interested free of charge.

Mines lying near the works not to be worked without notice to undertakers.

- 13 Subject to any agreement to the contrary, if the owner, lessee or occupier of any mines of coal, ironstone, slate or other minerals lying under the reservoirs or buildings of the undertakers or any of their pipes or other conduits or underground works shown on the map referred to in the last foregoing section, or lying within the prescribed distance therefrom, or, if no distance be prescribed, within 40 yards therefrom, desires to work the said mines or minerals, he shall give to the undertakers 30 days’ notice of his intention so to do.

If undertakers unwilling to pay compensation, mines may be worked in usual manner.

- (2) The amount of any such compensation shall, in case of dispute, be determined by the Lands Tribunal for Scotland.

Duty of undertakers as respects constant supply and pressure.

- 25 Subject as hereinafter provided, the undertakers shall cause the water in all pipes on which hydrants are fixed, or which are used for giving supplies for domestic purposes, to be laid on constantly and at such a pressure as will cause the water to reach to the topmost storey of every building within the limits of supply:

- (b) they may in their discretion determine the service reservoir or tank from which any supply is to be taken; and
- (c) the provisions of this section shall not apply if the undertakers are prevented from complying therewith by reason of frost, drought, unavoidable accident, or other unavoidable cause, or during the execution of necessary works.

- (a) any building the supply of water to which need not under the special Act be constantly laid on under pressure, and
- (b) any house the erection of which was not commenced before 16th May 1946 and to which water is required to be delivered at a height greater than 35 feet below the draw-off level of the service reservoir from which a supply of water is being or is to be furnished by them,

shall be provided with a cistern having a ball-tap and stopcock fitted on the pipe conveying water to it and, in the case of such a house as is mentioned in paragraph (b) of this subsection, may require that the cistern shall be capable of holding sufficient water to provide an adequate supply to the house for a period of 24 hours.

- (2) Where, in the case of any house—
 - (a) the erection of which was begun on or after the 16th May 1968, or
 - (b) to which a supply of piped water was given for the first time on or after that date, or
