**1963 No. 1710**

The Weights and Measures Regulations 1963

PART V

WEIGHTS

*Materials and principles of construction*

- 43.** Metric weights (other than carat (metric) weights), including counterpoises—
- (a) if made of iron, shall be of the hexagonal type;
  - (b) if not made of iron, shall be of the cylindrical, hexagonal, flat or wire type;
  - (c) if of the cylindrical type and of a purported value of 5 grammes or more, the height of the cylindrical portion shall be approximately equal to the diameter.
