1.—(1) These Regulations may be cited as the Channel Islands (Origin of Goods) Regulations 1973 and shall come into operation on 1st February 1974.

(2) The Interpretation Act 1889(d) shall apply for the interpretation of these Regulations as it applies for the interpretation of an Act of Parliament.

(3) For the purposes of these Regulations—

(a) “originating” refers, in relation to materials and parts, to materials and parts which would, if these Regulations were applicable to them, fail to be treated as produced or manufactured in the Channel Islands.

(4) The Introductory Notes to Schedule 2 hereto shall have effect for the interpretation of that Schedule, Schedule 3 hereto shall have effect for defining the terms and the application of the rules mentioned in Schedules 4 and 5 hereto and the footnotes to Schedule 4 hereto shall have effect for the interpretation thereof.

(2) For the purposes of any other Order imposing customs duties, except for an Order under the Customs Duties (Dumping and Subsidies) Act 1969(e), goods shall be treated as originating in the Channel Islands if they are to be treated as grown, produced or manufactured there in accordance with these Regulations.

(3) Materials and parts shall, for the purposes of these Regulations, be treated as having been imported into the Channel Islands unless they are shown to the satisfaction of the Commissioners of Customs and Excise not to have been so imported.

Goods wholly produced or manufactured in the Channel Islands

3.—(1) Goods which have been wholly produced or manufactured in the Channel Islands without the use of any imported materials or parts shall be treated as produced or manufactured there if consigned from there to the United Kingdom.

(2) For the purpose of paragraph (1)—

- (a) used articles fit only for the recovery of materials therefrom shall be treated as wholly produced in the Channel Islands from materials produced there if they are collected there, and
- (b) scrap or waste shall be treated as so produced if it results from the carrying on of any process of manufacture in the Channel Islands.

General requirement of consignment from and free circulation in the Channel Islands

4.—(1) Goods shall not be treated as grown, produced or manufactured in the Channel Islands unless they are consigned from there to the United Kingdom and goods shall not be treated as so consigned unless they are in free circulation there; and Regulations 5 to 10 (inclusive) shall apply subject to the provisions of this Regulation.

(2) For the purpose of paragraph (1) above goods shall not be treated as being in free circulation unless:—

- (a) any customs duty or charge of equivalent effect payable on the import of the goods, or on the import of materials and parts used in the production or manufacture of the goods, into the Channel Islands has been paid and has not subsequently been refunded or,
- (b) if any such customs duty or charge of equivalent effect has been refunded, compensatory levy has been paid in respect of the goods on export to the United Kingdom as prescribed by an instrument of the European Economic Community made under article 45(2) of the Act annexed to the Treaty concerning United Kingdom Accession to the Community.

Disregard of value added to Channel Islands goods by work done in the United Kingdom and certain other countries

5.—(1) In determining for the purposes of any of the following Regulations the value of goods imported into the Channel Islands no account shall be taken of the value added to those goods by any operation or process of production or manufacture which they underwent in the United Kingdom or Denmark or any of the following countries, namely, Austria, Finland, Iceland, Norway, Portugal, Sweden or Switzerland, and, accordingly, an amount equal to the value so added shall be deducted from the value of any materials and parts determined for the purposes of the following Regulations.

(2) For the purposes of the preceding paragraph of this Regulation, the value added to the goods by a process or operation in any country there referred to shall be taken as the difference between their ex-works price at the time of their first sale after such process or operation, less the amount of any internal taxes or charges refunded or refundable on export from that country, and the total value for customs purposes of all products or materials imported into the country in question and used in the production of the goods.

Goods processed in the Channel Islands: proportion of imported materials usable and specific qualifying processes

6.—(1) This Regulation applies to goods of any description other than one specified in column 1 of Schedule 2 hereto (relating to textiles and certain other

goods which have hitherto fallen to be treated as originating in the area of the European Free Trade Association by virtue of undergoing specified processes).

(2) Goods to which this Regulation applies which have undergone any operation or process of production or manufacture in the Channel Islands shall be treated as produced or manufactured there if the value of materials and parts imported into the Channel Islands and used in the production and manufacture of the goods is not more than 50 per cent. of the ex-works price of the goods after deduction from that price of the amount of any internal taxes or charges refunded or refundable on export of the goods to the United Kingdom.

(3) The rules set out in Schedule 1 hereto shall have effect for determining the value of any materials or parts imported into the Channel Islands and used in the production or manufacture of goods to which this Regulation applies.

(4) For the purposes of paragraph (2) of this Regulation goods shall not be regarded as having undergone an operation or process in the Channel Islands by reason only of any of the following:—

- (b) splitting up into lots,
- (c) sorting or grading,
- (d) marking,
- (e) putting up into sets.

7. Goods of a description specified in column 1 of Schedule 2 hereto shall be treated as produced or manufactured in the Channel Islands if they have undergone in the Channel Islands or the United Kingdom the relevant qualifying process specified in relation to them in column 2 of that Schedule and if the conditions specified in the Introductory Notes to that Schedule have been met.

Production or manufacture from imported materials or parts of a different tariff heading

8. Where goods produced or manufactured in the Channel Islands from imported materials or parts are not to be treated as produced or manufactured there by virtue of Regulation 6 or 7 above, and such materials or parts do not fall within the same tariff heading as the goods, they shall nevertheless be treated as produced or manufactured in the Channel Islands except in the following cases:—

- (a) being goods mentioned in column 1 of Schedule 4 hereto—
 - (i) if they fall to be classified in a different tariff heading by reason only of the performance of the process mentioned in relation to them in column 2 of that Schedule or a combination of such a process and a process or processes mentioned in head (b) of this paragraph; or
 - (ii) if they have not undergone in that country the process, or do not satisfy the rule, mentioned in relation to them in column 3 of that Schedule, as the case may be; or
- (b) if they fall to be classified in a different tariff heading by reason only of the performance of one or more of the following minor processes, namely—
 - (i) operations intended solely to ensure that the goods remain in good condition during transit or storage, including chilling, placing in brine or any other solution, drying, spreading out, ventilating or removing damaged parts;

- (ii) sorting, classifying, matching (including the making up of sets of articles), sifting, screening, removing dust, washing, painting or cutting in pieces;

- (iv) marking or labelling;
- (v) mixing—where any of the components mixed is an imported product;
- (vi) simple assembly;
- (vii) slaughter of animals.

Processing not involving a change of tariff heading

9. Where goods mentioned in column 1 of Schedule 5 hereto are processed or manufactured in the Channel Islands from imported materials or parts and are not to be treated as produced or manufactured there by virtue of Regulations 6 or 7 above, they shall nevertheless be treated as produced or manufactured in the Channel Islands if:—

- (a) they have undergone there the process mentioned in column 2 of that Schedule and
- (b) they have not subsequently undergone a further process in another country.

Goods qualifying for commonwealth preference

10. Goods qualifying for commonwealth preference (and satisfying the requirements of Regulation 4 above) shall be treated as grown, produced or manufactured in the Channel Islands.

SCHEDULE 1**DETERMINATION OF VALUE OF MATERIALS FOR PURPOSES OF REGULATION 6**

1. Whichever is appropriate of the following provisions of this Schedule shall have effect for determining the value of any materials imported into the Channel Islands and used in the production or manufacture of any goods.

2. Subject to the provisions of paragraph 4 of this Schedule, the value of any such materials shall be taken to be the aggregate of the following amounts, that is to say—

- (a) the amount equivalent to the value attributed to those materials, on their last clearance for home use or for temporary admission, by the customs authorities of the Channel Islands, and
- (b) in so far as it has not been taken into account in arriving at the value attributed as aforesaid, the amount equivalent to the cost of any insurance and freight on those materials (other than the cost of transport in the Channel Islands).

3. Subject to the provisions of paragraph 4 of this Schedule, where it cannot be determined in accordance with paragraph 2 of this Schedule, the value of any such materials shall be taken to be the amount equivalent to the purchase price paid on the earliest ascertainable sale of those materials in the territory of the Channel Islands.

4. Where, in determining the value of any materials under this Schedule, it appears to the Commissioners—

- (a) on the determination in accordance with paragraph 2, that the value attributed to those materials at the relevant time by the customs authorities was not arrived at by reference to a sale of those materials in the open market between buyer and seller independent of each other, or
- (b) on a determination in accordance with paragraph 3, that the amount taken as the price paid on a purchase of those materials at the relevant time was not paid on such a sale thereof as aforesaid,

for the value so attributed or, as the case may be, the purchase price so taken there shall be substituted the amount which, in the opinion of the Commissioners of Customs and Excise, would have been paid on a sale of those materials at the relevant time in the open market between buyer and seller independent of each other.

EXPLANATORY NOTE

(This Note is not part of the Regulations.)

These Regulations, which come into force on 1st February 1974, prescribe the conditions which goods of the Channel Islands, which have hitherto qualified for exemption from import duties as goods of Convention Area Origin within the meaning of the European Free Trade Association Act 1960 (c.19), shall satisfy in order to benefit from the provisions of Protocol No. 3 to the Act annexed to the Treaty of Accession (Cmnd. 5179). The Protocol applies the Community rules on customs matters to the Channel Islands, with the consequent prohibition of the imposition of new duties in trade between the Channel Islands and the United Kingdom.

Regulation 3 deals with goods wholly produced in the Channel Islands and provides for used articles fit only for scrap and for scrap and waste from the process of manufacture to be treated as wholly produced in the Channel Islands.

Regulation 4 provides that to qualify as of Channel Islands origin goods must be consigned from there to the United Kingdom and that any customs duties payable on import into the Islands of the goods, or materials or parts used in their production, must have been paid and not refunded or, if such duties are refunded, that E.E.C. compensatory levy must have been paid on the export of the goods to the United Kingdom.

Regulation 5 provides that the value of materials imported into the Channel Islands from certain other countries hitherto entitled to preference in the Channel Islands and the United Kingdom under the E.F.T.A. Convention and so entitled from 1973 under Agreements with the European Communities can be disregarded, wholly or in part, for the purpose of determining whether goods are produced or manufactured in the Channel Islands.

Regulations 6 and 7 adapt, for the purpose of determining whether goods are produced or manufactured in the Channel Islands, certain rules previously used for determining whether goods were of E.F.T.A. Area origin.

Regulations 8 and 9 apply the rules of origin laid down in Agreements between the Communities and the other countries which formed part of the E.F.T.A. Area for the purpose of determining whether goods were produced or manufactured in the Channel Islands.

Schedules 2, 4 and 5 specify the processes of production which, in accordance with Regulations 7, 8 and 9, must be performed for goods to be regarded as produced or manufactured in the Channel Islands.

(These Regulations apply in addition to other origin provisions affecting Channel Islands goods on import into the United Kingdom, in particular the Commonwealth Preference Regulations 1958 (S.I. 1958/1874) and s.37(1) of the Customs and Excise Act 1952 (c.44) under which goods wholly produced in the Channel Islands are entitled to duty-free entry.)

Regulation 10 provides that (subject to the consignment and free circulation requirements in Regulation 4) goods qualifying for commonwealth preference are to be treated as of Channel Island origin.

The Regulations also apply to determine whether goods originate in the Channel Islands for the purposes of a few preferential rates of revenue duties (for example under the Finance Act 1973) applying to goods originating in the Channel Islands (Regulation 2(2)).
