NOTE:—This table is for use in connection with Regulation 33(1) and (2) for compounding awards of long-term compensation under Part IV of the Regulations. The total amount of the annual long-term compensation which is to be compounded must first be calculated, i.e. the amount which the person would receive on account of that compensation, or the part of it which is to be compounded, if it were paid until age 65. For each £100 so calculated, the lump sum payment will be the amount shown in the table according to the number of complete years in the period between the date of compounding and age 65.

The capital value of each £100 of the total amount of long-term compensation, payable to age 70, in which the annual payments attract pension increase from age 55, according to the outstanding period of long-term compensation.
