

SCHEDULE 9

POST-MORTEM HEALTH INSPECTION

PART II

INDICATIONS OF UNFITNESS FOR HUMAN CONSUMPTION

- (a) (a) Rabbits shall be declared totally unfit for human consumption where the post-mortem health inspection reveals any of the following diseases or conditions:
- diseases transmissible to man or animals;
 - malignant or multiple tumours; multiple abscesses;
 - extensive parasitic infestation in the subcutaneous or muscle tissues;
 - presence of residues of forbidden substances or residues in excess of permitted Community levels, including substances with a pharmacological effect;
 - poisoning,
 - extensive injuries or extensive blood or serum imbibition;
 - anomalies as regards colour, smell or taste;
 - anomalies as regards consistency, particularly oedema or severe emaciation.
- (b) Parts of slaughtered rabbits which show localized lesions or contaminations not affecting the health of the rest of the meat shall be declared unfit for human consumption.
