

### SCHEDULE 3

#### REQUIREMENTS FOR RAW MILK

#### PART I

#### ANIMAL HEALTH STANDARDS

1. Raw milk shall come from animals on a registered production holding and such animals shall undergo regular veterinary inspections to ensure that the requirements of this paragraph are being complied with and shall—

- (a) not show any symptoms of infectious diseases communicable to human beings through milk;
- (b) not give the milk any abnormal organoleptic characteristics;
- (c) have a general state of health which is not impaired by any visible disorder and which are not suffering from any infection of the genital tract with discharge, enteritis with diarrhoea and fever, or a recognisable inflammation of the udder;
- (d) not show any udder wound likely to affect their milk;
- (e) not have had substances within the meaning of Council Directive [81/602/EEC](#) concerning the prohibition of certain substances having a hormonal action and of any substances having a thyrostatic action<sup>(1)</sup>, as amended<sup>(2)</sup>, and Council Directive [88/146/EEC](#) prohibiting the use in livestock farming of certain substances having a hormonal action<sup>(3)</sup>, administered illegally; and
- (f) not have been treated with substances dangerous or likely to be dangerous to human health that are transmissible to milk unless any withdrawal period which may apply to it has been observed.
