SCHEDULE 4

REQUIREMENTS FOR DRINKING MILK

PART I

RAW MILK FOR DRINKING

1. Subject to paragraph 2 below, drinking milk which is raw cows' milk shall meet the following standards after wrapping:

| | |
|---------------------------------------|--|
| Plate count at 30° (per ml) | ≤50,000 calculated on the basis of a geometric average over a period of two months, with at least two samples a month. |
| <i>Staphylococcus aureus</i> (per ml) | n = 5, c = 2, m = 100, M = 500 |
| <i>Salmonella</i> spp | Absence in 25ml, n = 5, c = 0 |

Pathogenic micro-organisms and their toxins shall not be present in quantities such as to affect the health of the ultimate consumer.
