

SCHEDULES

SCHEDULE 14

FOR PROTECTION OF BRITISH WATERWAYS BOARD

12.—(1) Any specified works shall, when commenced, be constructed—

- (a) with all reasonable dispatch in accordance with the plans approved or deemed to have been approved or settled as aforesaid and with any requirements made under paragraph 8(3)(a);
- (b) under the supervision (if given) and, in the case of any specified work which directly and physically affects a dock area, to the reasonable satisfaction of the engineer;
- (c) in such manner as to cause as little detriment as is reasonably practicable;
- (d) in such manner as to cause as little inconvenience as is reasonably practicable to the Board, its officers and agents and all other persons lawfully using a dock area.

(2) Nothing in this Order shall authorise DLRL to make or maintain any permanent works in or over a dock area so as to impede or prevent (whether by reducing the headroom or depth of water available for vessels, or the width of a dock area or otherwise) the passage of any vessel such as would have been capable of navigating a dock area on 29th June 2004.

(3) Following the completion of the construction of the specified work DLRL shall restore a dock area to a condition no less satisfactory than its condition immediately prior to the commencement of that work.
