Slaughter of a suspect animal

3.—(1) For the purposes of paragraphs (1) and (2) of Article 12 of the Community TSE Regulation, if a veterinary inspector suspects that a bovine animal is affected with BSE, he must either —

- (a) kill it on the holding immediately;
- (b) remove the cattle passport and serve a notice prohibiting the animal from being moved from the holding until it has been killed; or
- (c) ensure that its cattle passport is stamped “Not for human consumption” and serve a notice directing the owner to consign it to other premises for killing and prohibiting movement other than in accordance with that direction.

(2) He must restrict the movement of other bovine animals from the holding in accordance with the second and fourth paragraphs of Article 12(1) of the Community TSE Regulation and Article 2(1)(a) of Commission Decision [2005/598/EC](#).

(3) In accordance with Article 12(3) of the Community TSE Regulation, if the animal is killed on the holding, it is an offence to remove the body from that holding except in accordance with a written direction from an inspector.

(4) If the animal is not killed immediately, its keeper must dispose of its milk in such a way that it cannot be consumed by humans or animals except its own calf or animals kept for research purposes, and failure to comply with this sub-paragraph is an offence.

Identification and restriction of offspring and cohorts

4.—(1) In accordance with Articles 12(1) and 13(2) of the Community TSE Regulation, if—

an inspector must identify—

- (d) (if the suspect animal is female) all its offspring born on or after 1st August 1996; and
- (e) all its bovine cohorts born on or after 1st August 1996,

and for these purposes the animal’s date of birth is the one shown on its cattle passport.

(2) An inspector must serve notices prohibiting movement of those animals from the holding on which they are kept or where he suspects they may be kept (whether or not this is the same holding as that of the suspect animal) and remove their cattle passports.

 - (i) he is satisfied that the animal did not have access to the same feed as the affected animal; or
 - (ii) the animal is a bull that is kept at, and will not be removed from, a semen collection centre, but it is an offence to remove the animal from the centre except to be killed, and when it is killed the owner commits an offence unless he ensures that the carcass is completely destroyed.

(2) If the animal is not killed on the holding, an inspector must ensure that its passport is stamped “Not for human consumption” and must direct the owner in writing to consign it to other premises for killing as specified in the direction.

(3) If the test is negative he must remove all restrictions imposed because of the suspect animal and return the cattle passports.

(4) When an animal is killed under this regulation, it is an offence to remove the carcass from the premises on which it was killed except in accordance with a written direction from an inspector.

Exceptions

10.—(1) Where the Secretary of State considers that the data to calculate the average price is inadequate, she may pay compensation at—

- (a) for animals in that category, the most recent previously calculated average price for which there was sufficient data to calculate the average price; or
- (b) for the individual animal, the market price.

(2) For buffalo or bison, compensation is the market price.

(3) The market price is the price that might reasonably have been obtained for the individual animal from a purchaser in the open market at the time of valuation if the animal was not required to be killed under this Schedule, calculated by agreement, failing which regulation 15 applies, with the fees for nominating the valuer and the valuer's fee payable by the Secretary of State.
