

[^{F1}SCHEDULE 2

Requirements for water bottled and labelled as “spring water” and bottled drinking water

Textual Amendments

F1 Sch. 2 substituted (6.4.2018) by The Natural Mineral Water, Spring Water and Bottled Drinking Water (England) (Amendment) Regulations 2018 (S.I. 2018/352), reg. 1(1), **Sch. 1**

PART 3

Parametric concentrations for chemical parameters

<i>Parameter</i>	<i>Parametric concentration</i>	<i>Unit of measurement</i>	<i>Further provision</i>
Acrylamide	0.10	µg/l	
Antimony	5.0	µg Sb/l	
Arsenic	10	µg As/l	
Benzene	1.0	µg/l	
Benzo(a)pyrene	0.010	µg/l	
Boron	1.0	mg/l	
Bromate	10	µg/l BrO ₃ /l	
Cadmium	5.0	µg Cd/l	
Chromium	50	µg Cr/l	
Copper	2.0	mg Cu/l	
Cyanide	50	µg CN/l	
1,2-dichloroethane	3.0	µg/l	
Epichlorohydrin	0.10	µg/l	
Fluoride	1.5	mg F/l	
Lead	10	µg Pb/l	
Mercury	1.0	µg Hg/l	
Nickel	20	µg Ni/l	
Nitrate	50	mg NO ₃ /l	The concentration (mg/l) of nitrate divided by 50 added to the concentration (mg/l) of nitrite divided by 3 must not exceed 1.
Nitrite	0.50	mg NO ₂ /l	The concentration (mg/l) of nitrate divided by 50 added to the concentration (mg/l) of nitrite divided by 3 must not exceed 1.

Changes to legislation: There are currently no known outstanding effects for the The Natural Mineral Water, Spring Water and Bottled Drinking Water (England) Regulations 2007, PART 3. (See end of Document for details)

<i>Parameter</i>	<i>Parametric concentration</i>	<i>Unit of measurement</i>	<i>Further provision</i>
Pesticides—			Only those pesticides which are likely to be present in a given water must be monitored.
(a) individual substances—			
(i) in the case of aldrin, dieldrin, heptachlor and heptachlor epoxide	0.030	µg/l	The parametric concentration applies to each individual pesticide.
(ii) in the case of other individual pesticides	0.10	µg/l	The parametric concentration applies to each individual pesticide.
(b) total pesticides	0.50	µg/l	The concentration for “total pesticides” refers to the total sum of the concentrations of all the individual pesticides detected and quantified in the monitoring procedure.
Polycyclic aromatic hydrocarbons	0.10	µg/l	The parametric concentration applies to the total sum of the concentrations of all the individual polycyclic aromatic hydrocarbons detected and quantified in the monitoring procedure.
Selenium	10	µg Se/l	
Tetrachloroethene and trichloroethene	10	µg/l	The parametric concentration applies to the total sum of the concentrations of both of the parameters specified in the first column.
Trichloromethanes	100	µg/l	The parametric concentration applies to the total sum of the concentrations of all the individual trichloromethanes detected and quantified in the monitoring procedure.
Vinyl chloride	0.50	µg/l	

Changes to legislation:

There are currently no known outstanding effects for the The Natural Mineral Water, Spring Water and Bottled Drinking Water (England) Regulations 2007, PART 3.
