SCHEDULE 6 U.K.

Regulation 8

LIST OF PRESERVATIVES WHICH COSMETIC PRODUCTS MAY CONTAIN

U.K.

Preservatives are substances which may be added to cosmetic products for the primary purpose of inhibiting the development of micro-organisms in such products.

U.K.

The substances marked with the symbol (*) may also be added to cosmetic products in concentrations other those laid down in this Schedule for other specific purposes apparent from the presentation of the products, e.g. as deodorants in soaps or as anti-dandruff agents in shampoos.

U.K.

Other substances used in the formulation of cosmetic products may also have anti-microbial properties and thus help in the preservation of the products, as, for instance, many essential oils and some alcohols. These substances are not included in this Schedule.

U.K.

For the purposes of this list:

- “Salts” is taken to mean: salts of the cations sodium, potassium, calcium, magnesium, ammonium and ethanolamines; salts of the anions chloride, bromide, sulphate, acetate.
- “Esters” is taken to mean: esters of methyl, ethyl, propyl, isopropyl, butyl, isobutyl, phenyl.

U.K.

All finished products containing formaldehyde or substances in this Schedule and which release formaldehyde must be labelled with the warning ‘contains formaldehyde’ where the concentration of formaldehyde in the finished product exceeds 0.05%.

Status: Point in time view as at 18/06/2008.

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations revoke and re-enact the Cosmetic Products (Safety) Regulations 2004 (S.I. 2004/2152) (“the 2004 Regulations”). The 2004 Regulations give effect to Council Directive [76/768/EEC](#) (O.J. No. L262, 27.9.76, p. 169) (“the Directive”) on the approximation of the laws of the Member States relating to cosmetic products, as amended by the Community instruments listed in Schedule 2 to these Regulations.

These Regulations also give effect to Council Directive [2007/22/EC](#) (O.J. No. L101, 18.4.2007, p.11) which amends the Directive by deleting or amending entries in Annexes IV and VI. This Directive requires that the daily bioavailable intake of iodine from cosmetic products should not exceed 20% of the recommended daily intake and bans the use of Iodopropynyl Butylcarbamate (IPBC) in oral hygiene and lip care products. It also reduces the concentrations of IBPCs allowed in other products (particularly for young children). Regulations 2(2) and 2(3) make appropriate amendments to Schedules 5 and 6 which implement those Annexes.
