

## SCHEDULE 1

### Specified animal pathogens

#### PART 1

4. Avian influenza viruses that are —
  - (a) uncharacterised;
  - (b) Type A viruses which have an intravenous pathogenicity index in six-week-old chickens of greater than 1.2; or
  - (c) Type A viruses H5 or H7 subtype for which nucleotide sequencing has demonstrated multiple basic amino acids at the cleavage site of hæmagglutinin

**Changes to legislation:**

There are currently no known outstanding effects for the The Specified Animal Pathogens Order 2008, Paragraph 4.
