(3) Subject to paragraph (5), the requirements in ADR or RID which cannot be complied with are to be disregarded for the purposes of Part 2 of these Regulations if the requirements of paragraph (4) are satisfied.

(4) The requirements are—

- (a) the old pressure receptacle has not been subject to modification, major repair or re-rating which has put it outside the scope of the design standard or design specification to which it was originally constructed;
- (b) the old pressure receptacle—
 - (i) has been approved by a person appointed pursuant to regulation 29(2) as being safe for use;
 - (ii) was found to be safe by an inspection body in accordance with paragraph 5(4) of Schedule 3 to the 2007 Regulations and marked accordingly; or
 - (iii) was found to be safe by an inspection body or a competent person in accordance with paragraph 4(2) of Schedule 2 to the Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations 2004 ^{M22} and marked accordingly, and the time elapsed since the approval or the finding that the receptacle was safe does not exceed the intervals for periodic inspection specified in Tables 1 to 3 of Packaging Instruction P200 and Packing Instruction P203 in Section 4.1.4; and
- (c) in respect of old pressure receptacles used for the carriage of acetylene, the operator has a written record of—
 - (i) the tare weight of the old pressure receptacle, including the porous substance and, where relevant, the acetone or other solvent;
 - (ii) the nature of solvent used; and
 - (iii) the maximum safe operating pressure of the old pressure receptacle.

(5) An old pressure receptacle which is of seamless construction or has contained acetylene and in relation to which a modification, major repair or re-rating has been undertaken may not be used for the carriage of dangerous goods.

(6) In this regulation “old pressure receptacle” means a cylinder, tube, pressure drum, closed cryogenic receptacle or bundle of cylinders—

- (a) constructed—

- (i) in the case of cylinders, tubes and cryogenic receptacles, on or before 30th June 2003; and
- (ii) in the case of other pressure receptacles, on or before 9th May 2004;
- (b) which did not meet the design and construction requirements applicable to that receptacle that were set out in ADR or RID as in force on the date construction was completed;
- (c) which did comply with the design and construction requirements imposed under the law of the United Kingdom in force on the date construction was completed; and

Information to the public about health protection measures

2.—(1) Every consignor, carrier and consignee carrying out the transport of a consignment must—

- (a) ensure that any members of the public who are in an area in which, in the opinion of the GB competent authority, they are likely to be affected by a radiological emergency arising from the undertaking of that carrier, consignor or consignee are supplied, in the appropriate manner approved by the GB competent authority and without their having to request it, with at least the information set out in sub-paragraph (2); and
 - (b) make that information publicly available, which includes endeavouring to enter into an agreement or arrangement with the local authority in the area referred to in Paragraph (a) for the dissemination by that authority of the information required to be supplied to members of the public in accordance with that Paragraph.

- (a) employee or agent of a consignor, carrier or consignee; or
- (b) person of whose services a consignor, carrier or consignee makes use in the carriage of dangerous goods,

who assists in an intervention and is liable to be subjected to emergency exposure must be treated as being a person classified pursuant to regulation 20 of the Ionising Radiations Regulations 1999^{M25} (“the 1999 Regulations”) and, accordingly, the consignor, carrier or consignee (as the case may be) has the same duties with regard to the monitoring of such persons as are imposed upon an ‘employer’ by regulations 21 to 26 of the 1999 Regulations.

(2) To the extent that it is necessary in order to save human lives, an emergency exposure is permitted as a result of which the dose limit specified in paragraph 1, 2, 6, 7 or 8 of Schedule 4

(2) The plan must be prepared having regard to—

- (a) the principle that intervention is to be undertaken only if the damage due to the radiation resulting from the radiation emergency is sufficient to justify the potential harm and the potential cost (including the social cost) of that intervention;
- (b) the principle that the form, scale and duration of the intervention should ensure that the benefit to health will be greater than any harm that might be associated with the intervention itself;
- (c) the dose limits provided for in Schedule 4 to the Ionising Radiations Regulations 1999; and
- (d) the levels of radiation dose applicable in an emergency that are specified by the Health Protection Agency pursuant to its functions under section 3 of the [^{F41}the Secretary of State pursuant to the Secretary of State's functions under section 58 of the Health and Social Care Act 2012].

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations impose requirements and prohibitions in relation to the carriage of dangerous goods by road and by rail and, in so far as they relate to safety advisers, by inland waterway. In doing so they implement certain Directives as respects Great Britain.

First, the Regulations implement Directive [2008/68/EC](#) of the European Parliament and of the Council of 24th September 2008 on the inland transport of dangerous goods (O.J. L260, 30.9.2008, p. 13). This Directive applies the Annexes to the European Agreement concerning the International Carriage of Dangerous Goods by Road signed at Geneva on 30th September 1957, as amended (“ADR”) (Current Edition: 2009), the Annex to the Regulation concerning the International Carriage of Dangerous Goods by Rail (“RID”) which forms Appendix C to the Convention concerning International Carriage by Rail (“COTIF”) (Current Edition: 2009) and the Regulations annexed to the European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterway (“ADN”) (Current edition: 2009). These Regulations only apply the provisions of ADN in respect of safety adviser qualifications.

Secondly, the Regulations implement Council Directive [1999/36/EC](#) of 29th April 1999 on transportable pressure equipment (O.J. No. L138, 1.6.1999, p. 20) as last amended by Commission Directive [2002/50/EC](#) of 6 June 2002 (O.J. No. L149, 7.6.2002, p. 28).

Thirdly, the Regulations implement Article 5 of Title II (Prior Information) of Council Directive [89/618/Euratom](#) of 27th November 1989 on informing the general public about health protection measures to be applied and steps to be taken in the event of a radiological emergency (O.J. No. L357, 7.12.1989, p. 31) and Title IX, Section 1 (Intervention in cases of radiological emergency) of Council Directive [96/29/Euratom](#) of 13th May 1996 laying down basic safety standards for the protection of the health of workers and the general public against the dangers arising from ionizing radiation (O.J. No. L159, 29.6.1996, p. 1), in so far as Section 1 of Title IX is relevant to carriage by road and by rail.

The implementation of [1999/36/EC](#), [89/618/Euratom](#) and [96/29/Euratom](#) replaces the implementation of the same Directives (or parts of Directives) made by the Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations 2007 (the 2007 Regulations) (S.I. 2007/1573).
