## EXPLANATORY NOTE

*(This note is not part of the Regulations)*

These Regulations amend the Bovine Semen (England) Regulations 2007 ([S.I. 2007/1319](#)) (“the 2007 Regulations”) which control the collection, processing and storage of bovine semen. The 2007 Regulations establish two regimes: one by which semen may be collected and processed for trade with other EU member States, and one by which semen may be collected for use in the United Kingdom.

The 2007 Regulations implement Council Directive [88/407/EEC](#) laying down the animal health requirements applicable to intra-Community trade in and imports of semen of domestic animals of the bovine species (OJ No L 194, 22.7.1988, p 10), as last amended by Council Directive [2008/73/EC](#) (OJ No L 219, 14.8.2008, p 40).

In particular, regulations 4 and 6 provide that the use of teaser cows does not require approval at unlicensed semen collection centres.

Regulations 3, 5, 7 and 11 (amending regulations 2, 16, 24 and Schedule 7 respectively of the 2007 Regulations) relate to unlicensed processing premises where semen collected either from unlicensed premises or from a domestic collection centre and not intended for intra-Community trade may be processed subject to supervision by an EC collection centre veterinarian.
